328 .Means supplying fuel for passage through the flame holding structure, e.g., radiant surface burner
329 ..Woven screen holds flame
330 DRIP, TRICKLER, OR SHELF-TO-SHELF TYPE BURNER
331 POT TYPE BURNER
332 .Having feeder or holder for disparate fluid
333 .Having means for continuously feeding fuel
334 ..With pot or fuel reservoir elevating means
335 ..Air feed passage through bottom of pot
336 ..Ring structure at pot outlet forms central vertical discharge throat
337 ...Structure includes radial air feed passages discharging at throat
338 ..Having baffling means within pot confines
339 ...Forms separate zones of combustion at fuel surface
340 ...Horizontally extending partition having central passage
341 .Including exhaust flue having air feed passages
342 ..And baffling means within pot
343 WITH SUPPORTING BRACKET, LEG, HOOK, STRAP OR CLIP
344 FLAME HOLDER AND FUEL TANK ASSEMBLY
345 FLAME HOLDER HAVING ATTACHED HANDLE
346 FLASH-BACK CONTROLLING OR PREVENTING STRUCTURE

347 INCANDESCING OR REFLECTING COMPONENT, E.G., REIGNITING HOT SPOT, ETC.
348 .Flame sweeps dished incandescing surface
349 ADJUNCTIVE, RELATIVELY LOW VELOCITY, FLAME MAINTAINING FUEL PASSAGE
350 FLAME HOLDER HAVING PROTECTIVE FLAME ENCLOSING OR FLAME STABILIZING STRUCTURE
351 .Including means feeding air axially spaced points of the flame
352 ..Axial perforations along combustion tube
353 .Tubular member delineates flame
354 MIXER AND FLAME HOLDER
355 .Bunsen burner type
356 MISCELLANEOUS

1 PROCESSES OF HEATING OR HEATER OPERATION
2 .Including apparatus purging, cleaning or accretion preventing
3 .Including repairing, converting or assembling apparatus
4 .Including apparatus heat-up, cool-down or protection
5 .Including preparing or arranging work for heating
6 ..Stacking or aligning objects
7 ..Forming a permeable layer or sheet
8 .Continous strip, strand or web passed longitudinally through heating zone
9 .Treating an article, container, batch or body as a unit
10 ..Localized treating or shielding of work area
11 ..Moving unit through or within treating zone during treating
12 ..Modulating, varying or augmenting heat supply during heat-up period
13 .Including melting, vaporizing, sintering, expanding comminuting, or classifying work material
14 .Including passing, treating or conveying gas into or through particulate work
15 ..Including maintenance of fluidized bed
16 ..Including a dust control or particle separation step
17 ..Including modulation of flow rate of gas or treated material
18 .Subjecting work to diverse treatments or graduated temperatures
19 .Controlling flame position or work atmosphere
20 ..Providing flame or high luminosity
21 ..Including recycling work atmosphere
22 ..Establishing strata, layer or curtain
23 ..Establishing or maintaining composition of atmosphere bathing work
24 ..Modulating or stabilizing pressure or temperature
25 ..Providing pulsed or periodically reversed atmosphere
26 ..By mode of admission of treating or protecting fluid
27 .Including the flowing or circulating of particulate heat carrier
28 .Of operating a furnace utilizing a heat storage mass
29 .Of heating a fluid
30 ..Utilizing a heat storage mass
31 .Heating of or by wall or radiant surface
32 WITH INDICATOR, ILLUMINATOR OR INSPECTION MEANS
33 ARTICLE OR TEMPLATE FOLLOWER POSITIONS HEATING ELEMENT RELATIVE TO ARTICLE
34 HAVING OPERATING OR CONTROLLING DEVICE RESPONDING TO PRESENCE OF DISCRETE WORK UNIT OR REMOVABLE UNIT HOLDER
35 FRANGIBLE OR FUSIBLE SAFETY RELIEF OR SHUTDOWN MEANS
36 HAVING CONDITION RESPONSIVE CONTROL
37 .Analyzer or composition sensor of work, work atmosphere or exhaust gas
38 .Control of or response to apparatus protecting fluid or means
39 .Of selection or load balancing of furnace exhaust heated regenerators
40 .Of hot blast stove (i.e., of Cowper stove)
41 .Of purger, purge period, scavenger or cleaner
42 .Of protective work shield, cooler or atmosphere; or of heat applicator position
43 .Of discharging, or stopping the heating of a unit or batch on sensed completion of heating
44 ..With cool-down timer or means
45 .Of or by means sensing or controlling work movement, quantity or position
46 .Condition responsive shutdown requiring reset
47 .Of or by pressure of fluid work or work chamber atmosphere
48 .Of cooling, dilution, withdrawal, bypass or circulation of work chamber atmosphere
49 .Of or by heat generation or transmission
50 WITH PROTECTOR, CLEANER OR SUPPORT FOR CONDITION SENSOR
51 HAVING TIMING, PROGRAMMING OR CYCLING CONTROL MEANS
52 .Of handling or treatment of discrete work batch or unit
53 ..And of furnace closure or heating element operator
54 WITH INTERLOCKED, INTERCONNECTED OR MULTIWAY CONTROLLER ALTERNATING FLOW OF HEATED AND HEATING FLUID
55 WITH CONCURRENT CONTROL OR INTER-CONTROL OF DIVERSE OPERABLE ELEMENTS
56 .Door or baffle movement correlated with work movement or placement
57 .Heating gas supply, removal or recirculation correlated with work or door movement or placement
58 WITH HEATING GAS CONVEYING, AGITATING, SCATTERING OR DISINTEGRATION OF WORK (E.G., FLUIDIZED BED, ETC.)
59 ADVANCING STRUCTURE FLEXING, LOOPING OR COILING SHEET, WEB OR STRAND
60 .Internally heated roll
61 WITH LUMP BREAKER OR CLASSIFIER FOR PARTICULATE WORK MATERIAL
62 GEOGRAPHIC OR STRUCTURAL INSTALLATION
63 .Installed on internal combustion engine element
64 HAVING FLUID CURTAIN AT CHAMBER PORT OR WORK PATH
65 WITH HEAT SHIELD, OR ESCAPING GAS COLLECTOR AT FURNACE CHAMBER ACCESS AREA
66 WITH CONDENSER OR ABSORBER FOR WORK CHAMBER VAPOR
67 WITH MEANS SEPARATING SOLID PARTICLES OR SLAG FROM WORK CHAMBER GAS
68 .Separator discharges gas to work zone
69 .With means passing separated solid to heating zone
70 .At regenerator or recuperator (e.g., slag pocket, etc.)
71 ..With separated solid discharge structure
72 WITH MEANS DILUTING, PURIFYING OR BURNING EXHAUST GASES
73 COMBUSTION PRODUCTS, FLUE OR GENERATOR AND WORK CHAMBER MOUNTED FOR RELATIVE MOVEMENT FOR ACCESS
74 WITH DRIP, LEAKAGE, BREAKAGE OR SOIL COLLECTING STRUCTURE
75 WITH CLEANING MEANS FOR APPARATUS
76 WITH APPARATUS REPAIR OR ASSEMBLY MEANS
77 WITH WORK COOLING STRUCTURE
78 .Combustion feed air cools exiting work by contact
79 ..Contact at discharge end section of shaft furnace
80 ..Work manipulated in cooling zone

	WITH WORK COOLING STRUCTURE
81	.Work holder having selectively usable heating and cooling structure
82	.Entering and leaving work exchange heat
83	.Work heat removed through heat transmitting wall
84	..Combustion feed material cools wall
85	.Cooling liquid contacts work
86	WITH MEANS RECEIVING WORK FROM WORK HEATING ZONE DISCHARGE MEANS
87	WITH MEANS SUPPLYING WORK TO WORK FEEDER
88	WITH WHEEL, HANDLE, OR SKID-TYPE SUPPORT FOR HEATER ASSEMBLY
89	CONVERTIBLE
90	BOILER AND WORK HEATING FURNACE, POT OR OVEN
91	.Having means utilizing generated steam in heating work
92	COMBINED
93	HAVING WORK HEATING CHAMBER AND OPEN ACCESS WORK SUPPORTING AND HEATING AND HEATING STRUCTURE OUTSIDE OF CHAMBER
94	DISPARATE HEAT SOURCES OR FUELS
95	SHAFT TYPE
96	.Having combustion products generated in or fed to shaft
97	..Having flow controller restraining solid and passing melt
98	..Having agitator or movably mounted baffle for shaft or shaft outlet
99	..Having vertically spaced gas supply ports
100	..Having distinct fume outlet and work inlet
101	..Having distinct combustion products generator chamber
102	.Having heat emitting tube or flue within or traversing shaft chamber
103	TUMBLER-TYPE ROTARY - DRUM FURNACE
104	.Having support for engaging heated surface of domestic stove
105	.Having combustion products generated in or fed to drum
106	..Including plural, distinct serially connected work chambers
107	..And having externally heated drum surface or indirect heating flue
108	..Work advancing type (e.g., steady flow of work)
109	...Axially spaced feed to drum of combustion or reaction material
110	...Structure providing different rates of heating or work movement along axis
111	...Counterflow of work and combustion products
112	.Externally heated drum or associated heating element heats work by conduction or radiation
113	..And having distinct atmosphere supply or removal structure
114	..Heat emitter is tube within the drum chamber or the drum wall
115	.Having flexible, cooled, or air curtain seal between rotary and stationary parts
116	.Having protective cooling structure
117	.Having work or work atmosphere feed or discharge structure
118	.Having structure agitating or controlling the motion of the charge
119	.Having brick-type lining
120	WORK CHAMBER HAVING HEATING MEANS
121	.Having means by which work is progressed or moved mechanically
122	..Having manipulating means arranging, orienting, segregating or topically heating individual unit
123	...Handler outside of chamber supports unit partially within and partially outside of furnace chamber
124	...Having structure rotating, reorienting, or inverting unit during heating
125	...Vertical stack or mutually supporting units having thrust means
126	...Thrust means advances row or stack of units
127	....Having structure for removing skid marks
128	..Plural distinct chambers
129	...Work moved to drop between shelf or trough-type chambers
130	....Combustion products generated in or fed to chamber
131	.....Annular shelves and rotary pusher on central vertical axis
132	....Heated shelf or trough
133	...Having combustion products generated in or fed to work chamber
134	..Vibrating or jarring-type work advancer
135	..Traveling heat emitter carries or stirs work
136	..Combustion products generated in or fed to chamber
137	...Movable chamber floor section carried by external guide or axle
138	....Rotary section
139	...Plough, rake, screw, or stirrer means
140	....Moved by endless carrier
141	...Rotatably mounted work carrier (e.g., Ferris wheel type, etc.)
142	....Horizontal shelf on vertical axis
143	...Having means forming work path from inlet to outlet
144	....Having structure circulating work atmosphere along or across path
145	.....Distinct blowers or blower discharge ports along path
146	....Plural burners longitudinal spaced in path
147	.....Radiant type
148	....Baffle, heat radiator, or heating flue in chamber along path
149	....Combustion material supply ports spaced along path
150	....Spaced combustion products exhaust ports
151	..Stirrer in externally heated tank
152	..Having distinct atmosphere supply, removal or recirculation structure
153	..Work or work carrier slides on heated chamber wall or floor
154	...Screw-type pusher
155	..Chamber heated by multiple combustion products flues
156	.Crucible or pot heating furnace
157	..Having tilting arrangement
158	..Pot stand forms annular combustion material admission zone
159	.Combustion products heat work by contact
160	..Furnace or work holder of furnace mounted for tilting discharge
161	..Having separator of flow director for melted work
162	..Having shelf, rack, tray or chamber on guide or pivot
163	..Plural structurally related work chambers
164	...Connected for serial flow of combustion products
165	....Having serially connected regenerator
166	....Chambers spatially separated

	WORK CHAMBER HAVING HEATING MEANS
	.Combustion products heat work by contact
	..Plural structurally related work chambers
	...Connected for serial flow of combustion products
167	....Having temporary partition
168	....Through perforated floor
169	....Through perforated partition
170	....Having branch connection to common flue
171	...Diverse atmospheres (e.g., directly and indirectly heated, etc.)
172	...Fed with combustion products from a common generator
173	..Having protective cooling means for combustion material feed structure
174	..Including noncommunicating combustion products flue
175	..Radiant-type burner in or on wall (e.g., surface combustion, etc.)
176	..Having exhaust return passage or recirculating fan or jet
177	..Chamber exhaust transfers heat with chamber wall
178	..Work chamber or its wall heats chamber feed
179	..Work chamber exhaust heats chamber feed
180	...By regenerative-type heat exchanger
181	....Spaced alternating or successive chamber exhausts feed plural regenerators
182	.....Regenerators heat fuel
183	..For annular article (e.g., wheel rim, etc.)
184	..Article inserted type
185	..Dividing baffle or screen in cabinet forms upper work and lower burner chambers
186	..Distinct combustion chamber feeds work chamber
187	...Having additional feed means diluting combustion products
188	...Work chamber indirectly heating by common wall or connecting flue
189	...Having pump or jet means forcing air into combustion chamber
190	...Distinct vertically spaced combustion products feed openings to work chamber
191	...Plural distinct combustion chambers feed single work chamber
192	...Multiple perforate wall, floor or roof for combustion feed or exit
193	..Spaced exhaust ports from work chamber
194	..Baffle, shield, heat absorber, work support or flow directing means in work chamber
195	..Hearth-type or tank-type furnace
196	..Spaced fuel or air feeds to work chamber
197	.Having particulate or liquid heat transfer medium in work chamber
198	.Means supplying a protective or treating agent other than or additional to air
199	.Having work atmosphere recirculating means
200	.Work chamber having gaseous material supply or removal structure
201	..Air flow-through type
202	...Having means heating work by radiation or conduction
203	...Pump for atmosphere
204	...Having a movable drawer or separable tray
205	..Having pump, jet or valve means establishing chamber pressure distinct from ambient
206	.Interior bell forms muffle
207	.Plural structurally related work heating chambers
208	..Chambers are movably or removably mounted retorts
209	.Heating tube, element, or flue traverses work space
210	.Externally heated, liquid holding type of work container
211	..Mounted for pouring discharge
212	.Tortuous, branched or baffled heating flue means within or along chamber wall
213	..Having distinct burner units
214	HEAT GENERATING MEANS HEATS HEAT STORAGE MASS OF SOLID MATERIAL
215	.Mass is solid fluent heat carrier (e.g., pebbles, etc.)
216	.Interconnected separately encased masses
217	.Dividing wall in casing forms combustion and heat storage chambers
218	..Annular divider forms concentric chambers
219	HEAT GENERATOR HEATS GAS OR LIQUID MATERIAL IN A FLOW STRUCTURE
220	.With pump for the material driven by energy from the heat generator
221	.With means utilizing the heated material for heating work
222	.Material heated by mixing with combustion products of generator
223	..Having means for indirectly exchanging heat between combustion products and material
224	INSERTED EMITTER TYPE OF HOLLOW ARTICLE INTERIOR HEATER
225	HEAT APPLICATOR HAVING STRUCTURE FOR MOUNTING IT ON OR AROUND OBJECT TO BE HEATED
226	HAVING MASK, BAFFLE OR CONDUCTOR CONCENTRATING HEAT ON OR PROTECTING SECTION OF ARTICLE
227	HEAT GENERATOR WITH AN ASSOCIATED WORK SUPPORT OR HEAT DELIVERY STRUCTURE
228	.Internally heated roll
229	.Movably mounted heat emitter traverses work during heating
230	.Means moving or guiding work relative to heat emitter during heating
231	.Article engaging and retaining support fixes position of article relative to heat emitter
232	.Horizontal, planar, openwork, work support above burner
233	HEATING APPARATUS ELEMENT HAVING PROTECTIVE COOLING STRUCTURE
234	.Work skid or rail structure
235	.Conveyor, chute or work agitator element
236	..Roll
237	.Door, cover, door frame or rim of cover
238	.Wall, floor or roof element
239	WORK FEEDING, AGITATING, DISCHARGING OR CONVEYING SUBCOMBINATION
240	.Having support for engaging surface of domestic stove
241	.Removable furnace bottom section or kiln cart
242	.Having closure or seal for work feeder's entrance passage
243	.Outside conveyor track paralleled by chamber wall slot for conveyor arm
244	.Seal at chamber wall for conveyor arm or shaft

	WORK FEEDING, AGITATING, DISCHARGING OR CONVEYING SUBCOMBINATION
245	.Having distinct heat shield, conductor, director or expansion relief structure
246	.Roll-type conveyor element
247	HEATING OR HEAT RETAINING WORK CHAMBER STRUCTURE
248	.Protected, lined or reinforced melt holding section
249	.Including baffle wall, work shield, or work support element
250	.Door, cover or port
251	.Having expansion relieving or absorbing means
252	.Masonry with metallic casing or support
253	ACCESSORY MEANS FOR HOLDING, SHIELDING OR SUPPORTING WORK WITHIN FURNACE
254.1	.Fluid tight metallic heat transferring box, shield or hood
254.2	..Bell-type hood or support for such hood
258	.Support structure for heat treating ceramics (e.g., saggars, etc.)
259	..Point or line contact support
260	.For annular work (e.g., coil separator, etc.)
261	.Openwork tray, basket, or grid structure for heat treating metal
262	.Crucible
263	..Having dispensing opening or spout
264	..Lined, layered or coated
265	..Of particular material

CLASS 433 DENTISTRY

DECEMBER 1990

1	VETERINARY DENTISTRY
2	ORTHODONTICS
3	.Tool
4	..Plier type
5	.Including extra-oral force transmitting means
6	.By mouthpiece-type retainer
7	.By device having means to apply outwardly directed force (e.g., expander)
8	.Bracket
9	..Cemented to tooth
10	..Having means to secure arch wire
11	...Resiliently biased clamping member
12	...Tension adjustment nut
13	...Separable securing means
14	....Lock pin
15	....Ligature wire
16	..Having adjustable or angular arch wire guide
17	..Having arch wire enclosing guide (e.g., buccal tube)
18	.Means to transmit or apply force to tooth
19	..Acting between upper and lower teeth
20	..Arch wire
21	..Metallic spring
22	.Arch wire attachment
23	.Band
24	.Method of positioning or aligning teeth
25	APPARATUS
26	.Tooth selection guide
27	.having condition sensor to transmit signal to regulate indicating device or controller
28	..Switch or valve controlled by presence of device on support
29	.Having means to emit radiation or facilitate viewing of the work
30	..Mirror
31	...Combined with other device
32	.Having heater or electrode
33	.Having support for patient or operator
34	.Having static product shaping surface (e.g., mold)
35	..Having cooling means
36	..Having settable material dispenser or fill openings
37	..Intra-oral
38	...Comprising frame and flexible bib
39	...Deformable or flexible band (e.g., matrix)
40	...Single tooth
41	...Adjustable
42	....Upper section relative to lower section
43	....Pivotally connected sections
44	...Having positioning means or gauge
45	...Having means to facilitate assembly or disassembly
46	....Detachable handle
47	...Including release facilitating means
48	...Mold material
49	.Work support
50	..Including tool, marker, or coupling means therefor
51	...Abrading tool or cutter
52	..Including motor or power transmitting means
53	..Including means to support plural workpieces for relative movement
54	...Articulator or attachment therefor
55	....Having visual indicator or recorder
56	....Including gauge or means for removably mounting gauge on support
57	....Including hinge having parts which cooperate in a manner allowing relative movement
58	.....And resiliently biased
59	....Including adjustable incisal guide
60	....Including means to secure workpiece or articulator
61	....Having pivot and additional adjustment between workpiece supporting means
62	.....Additional pivot
63	......Rectilinear adjustment
64	......Ball-and-socket
65	.....Rectilinear adjustment only between supporting means and pivot
66	....Having lock or adjustable stop for pivoted work holder
67	.....Workpiece supporting means between adjustable stop and pivot
68	.Having means to record or indicate jaw movement or position or dental occlusion
69	..Jaw movement
70	..By transfer of material to teeth
71	..By deformation of material
72	.Having gauge or guide
73	..Condylar referencing means (i.e., face bow)
74	..Dowel pin or positioner therefor
75	..Having tool, marker, or coupling or guiding means therefor
76	...Parallel drilling
77	.Having storage or nonuse supporting means (e.g., tray, rack, cabinet, etc.)
78	..Including hose retractor
79	..Movably mounter tray or holder
80	.Having intra-oral dispensing means
81	..Endodontic
82	..Combined with or attachment for work contacting tool or handpiece therefor
83	...Having means to compact dispensed material
84	...Power-driven tool having fluid control valve for dispensed material
85	....On or adjacent handpiece or handle
86	...Ultrasonic tool
87	...Dispenser externally mounted on tool or handpiece
88	..Dispensed material discharged by fluid current
89	..Hand-held implement with material supply
90	...Single charge device having plunger-type ejector
91	.Having suction orifice
92	..And suction pump or material separator
93	..And mouth prop, tongue guard or depressor, or cheek spreader
94	..And clamp or positioner
95	..And control valve for suction
96	..In flexible conduit or eduction tube
97	.Having receptacle (e.g., cuspidor)
98	.Including activator or regulator for controller or drive
99	..In handpiece
100	...Fluid control valve
101	..Foot operated
102	.Broach
103	.Having motor or means to transmit motion from motor to tool (e.g., "engine")
104	..Including lubricating or apparatus cooling means
105	..Including clutch or variable transmission

	APPARATUS
	.Having motor or means to transmit motion from motor to tool (e.g., "engine")
106	..Including braking means
107	..Including means to apply counter force to counteract tool weight or movement
108	..And means to retain standard, arm, or handpiece in adjusted or stored position
109	...Pivotally adjustable
110	..Endless belt transmission
111	...Having tensioning means
112	..Flexible shaft transmission
113	..Having treadle
114	..Hand-held tool or handpiece
115	...Having seal
116	...Having cover or guard
117	...Including shock absorbing or vibration dampening means
118	...Having reciprocating, vibrating, or oscillating output
119	....Ultrasonic
120	....Fluid motor
121	....Impact by sudden release of spring
122	....Having rotating cam or eccentric
123	.....And adjustment for stroke, intensity, or position of tool
124	....Angularly offset tool
125	...Having abrading or polishing means
126	...Having means facilitating assembly or disassembly of tool or handpiece
127	....Means to releaseably grip tool
128	.....Comprising locking means extending into groove or recess
129	.....Including axially movable collect to cam fingers
130	...Having adjustable head
131	...Having motor
132	....Rotary fluid turbine
133	...Contra angled handpiece
134	..Arbor
135	...Screw actuated clamp for apertured tool bit
136	.Having absorption means or means to isolate tooth or mouth from adjacent area (e.g., bib, dam, etc.)
137	..Bib
138	..And discrete oral fastening or positioning means
139	...Tooth clamp
140	.Jaw, cheek, lip, or tongue positioner
141	.Hand manipulatable implement
142	..Having abrading or polishing means
143	..Scaler
144	..Having cutter
145	...Including force multiplier
146	...Having means facilitating assembly or disassembly
147	...Removable tool element
148	..Separator
149	...Comprising tooth contacting wedge or wedge actuator
150	..Impacting means
151	...By sudden release of spring
152	..Including work penetrating portion to secure tool to work
153	..Having relatively movable work engaging surfaces
154	...Three or more relatively movable coacting surfaces
155	....Work accommodating slot or opening through surface (e.g., matrix clamp)
156	...Including contoured work shaping surface
157	...Pivoted
158	....Having actuating screw
159	....Having handles to pivot surface (e.g., pliers)
160	.....Plural pivots
161	...Screw actuated
162	...Resiliently biased
163	..Work carrier
164	..Plugger
165	.Tool bit
166	..Abrading or polishing
167	PROSTHODONTICS
168.1	.Denture liner or cushion
169	.Stress breaker
170	..Between tooth engaging clasp and denture
171	.Prefabricated denture
172	.Holding or positioning denture in mouth
173	..By fastening to jawbone
174	...By screw
175	...Shape of removed tooth root
176	...By blade
177	..By resiliently biased means
178	...Tooth engaging clasp
179	...Acting between upper and lower denture
180	..By cement or adhesive
181	...Including mating connectors on denture and abutment tooth
182	....And additional member for securing connectors together
183	...Including crown cemented to existing tooth
184	..By suction
185	...Including valve or air passageway leading from suction area
186	...Cup or disc
187	....Plural cups or discs
188	...Suction area comprising recess or cavity formed in denture base
189	..By magnetic material
190	.Connecting right and left segments of partial denture
191	.Attaching artificial tooth to base or adjacent artificial tooth
192	..By cavity in tooth for base material
193	..Connected to base by discrete connecting member
194	...And additional discrete element for securing connecting member to tooth
195	...Imbedded in base material
196	.Orienting or positioning teeth
197	.Cutting edge shape or arrangement
198	..Metallic cutting edge
199.1	.Denture base construction
200.1	..Metallic
201.1	.Dental implant construction
202.1	.Tooth construction
203.1	..Indicia, tinting, or shading
204	..Having means facilitating replacement of tooth portion
205	..Having plural piece backing or discrete connecting means for adjacent tooth portions
206	..Metallic tooth, tooth portion, or attachment
207	...Alloy
208	...Metallic backing
209	....Having dovetail, "T", pinhead, or bulbous protrusion extending into congruent recess in facing
210	....Having pin extending into facing
211	...Connecting pin
212.1	..Nonmetallic composite
213	.Preliminary casting, model, or trial denture
214	.Impression taking or bite determination

215	METHOD OR MATERIAL FOR TESTING, TREATING, RESTORING, OR REMOVING NATURAL TEETH
216	.Cleaning
217.1	.By lining or coating
218	.Crown
219	..Attachment to natural tooth or adjacent crown
220	...By post
221	....Having surface grooves or ridges
222.1	..Composite
223	..Method of fabricating
224	.Endodontic
225	.Anchor pin
226	.By filling, bonding or cementing
227	..Foil
228.1	..by named composition
229	MISCELLANEOUS

CLASS 434 EDUCATION AND DEMONSTRATION

1 DETECTION OR RANGE DETERMINATION OF DISTANT OBJECT BY APPARATUS USING SENSOR OF ELECTROMAGNETIC OR SOUND ENERGY
2 .Radar
3 ..Cathode ray screen display simulated by light means (e.g., light spot projected onto screen, etc.)
4 ..Optical means (e.g., image projector, etc.) or light or sound sensor (e.g., television camera, microphone, etc.) included in a simulator
5 ..Interference simulation
6 .Sonar
7 ..Interference simulation
8 ..Simulation of Doppler shift of echo
9 ..Simulation of plural detector system
10 ..Simulation by use of sound recording
11 ORGANIZED ARMED OR UNARMED CONFLICT OR SHOOTING
12 .Self-propelled projectile
13 ..Launched underwater
14 .Aerial warfare
15 ..Bombing
16 .Gunnery
17 ..Gunfire spotting
18 ..Gun recoil simulation
19 ..Gun aiming
20 ...Cinematographic or cathode ray screen display
21 ...Training apparatus using beam of infrared, visible light, or ultraviolet radiation
22 ....Beam sensor included in apparatus
23 ...Means (e.g., target, terrain model, etc.) marked or pierced to simulate projectile impact point
24 ..Gun loading or projectile preparation (e.g., fuse setting, etc.)
25 .Water warfare
26 ..Periscope view simulation
27 .Range finding
28 AIRCRAFT WIND DRIFT SIMULATION
29 VEHICLE OPERATOR INSTRUCTION OR TESTING
30 .Flight vehicle
31 ..Automatic pilot
32 ..Model viewed and maneuvered by trainee from point remote therefrom
33 ..Helicopter
34 ..Outer space vehicle
35 ..In flight
36 ...With simulation of night or reduced visibility flight
37 ..Aircraft, aircraft simulator, or means connected thereto traveling on ground or water during simulated flight training
38 ..Simulation of view from aircraft
39 ...View simulating means located on belt or cylinder
40 ...View simulating means located on element having spherical surface
41 ...Simulation of night or reduced visibility flight
42 ....Runway outlining or approach lights simulated
43 ...View simulated by cathode ray screen display
44 ...View simulated by projected image
45 ..Simulation of feel of control means (e.g., flight control stick, etc.)
46 ..Ground trainer agitated to simulate rough air buffeting or engine induced vibration of aircraft
47 ..Display or recordation of simulated flight path of ground trainer
48 ..Aircraft sound simulation
49 ..Aircraft or ambient condition simulated electrically or indicated by instrument or alarm
50 ...Takeoff or preparation therefor
51 ...Aircraft attitude (e.g., roll, etc.)
52 ...Ice formation or aircraft weight
53 ...Pressure
54 ...Propulsion means or accessory
55 ..Tiltable or turnable ground trainer
56 ...With fan or simulated propeller
57 ...With means for stabilizing trainer when idle
58 ...By fluid actuated piston/cylinder ram
59 ..Simulation of flight generated force applied to aircraft occupant
60 .Sail-equipped vehicle
61 .Bicycle or motorcycle
62 .Automobile or truck
63 ..Model viewed and maneuvered by trainee from point remote therefrom
64 ..Driver's skill measured by time or vehicle travel distance
65 ..Recordation of driver's performance
66 ..Real vehicle used in instruction or testing
67 ...Vehicle positioned on rollers, belt, or platform
68 ...Obstacle or other means contacted by improperly driven vehicle
69 ..Simulation of view from vehicle
70 ...View simulating means located on belt or cylinder
71 ..Manipulation of gear shift lever or clutch pedal
72 ARCHITECTURE, INTERIOR DECORATION, OR INDUSTRIAL PLANT LAYOUT
73 .Magnet included in display or demonstration
74 .Brick, tile, roofing, or siding
75 .Curtain or wall, ceiling, or floor cover
76 ..Light, mirror, or image projector included in display or demonstration
77 ..Roller-mounted belt or strip included in display or demonstration
78 ..Plaque (e.g., disk, etc.) turnable relative to index (e.g., window in card, etc.) to selectively align different points on plaque therewith
79 ..Building or room interior represented pictorially or by model
80 .Representation of furniture, bathroom or kitchen accessory, or cabinet placeable in different locations on representation of room interior
81 VISUAL ART OR CRAFT, ARTISTIC ADORNMENT, OR COLOR TRAINING OR DEMONSTRATION
82 .Sculpture or craft involving manual carving or shaping
83 .Shape defined by filament (e.g., string, etc.)
84 .Color application (e.g., painting, etc.)
85 .Drawing
86 ..Animal or human body model having movable parts
87 ..Stencil
88 ..Tracing
89 ..Model support
90 ..Grid included in drawing aid or scene viewer
91 ..Perspective
92 ..Orthogonal projection
93 .Flower arranging or landscaping
94 .Hair or wig styling
95 .Decorative sewing, needlework, weaving, or textile designing

VISUAL ART OR CRAFT, ARTISTIC ADORNMENT, OR COLOR TRAINING OR DEMONSTRATION
96 .Design formed of identical or complementary elements
97 ..Strips
98 .Color display
99 ..Personal appearance or wearing apparel
100 ...Cosmetic or nail polish
101 ..Produced by spinning means (e.g., plural rotating color disks, etc.)
102 ..Produced by superposed color filters
103 ..Including mixing receptacle or holder for color material
104 ..Including relatively rotatable elements (e.g., concentrically mounted color disks, etc.)
105 ..Automobile
106 ASTROLOGY
107 BUSINESS OR ECONOMICS
108 .Work schedule
109 .Record keeping
110 .Coin or currency identification or counterfeit detection
111 CELESTIAL NAVIGATION
112 COMMUNICATION AIDS FOR THE HANDICAPPED
113 .Tactile reading aid (e.g., Braille, etc.)
114 ..Converting information to tactile output
115 ..Braille writing slate
116 .Converting information to sound
117 .Writing guide for the blind
118 COMPUTER LOGIC, OPERATION, OR PROGRAMMING INSTRUCTION
126 FLUID FLOW OR WAVE MOTION
127 FOOD
128 GAME, BOARD OR TABLE TYPE
129 .Using playing card
130 GEOGRAPHY
131 .Terrestrial globe or accessory therefor
132 ..Relief globe
133 ..Having diverse use (e.g., pencil box, etc.)
134 ..Having magnet associated therewith
135 ..Having plural planar or curved surfaces (e.g., flat or frustoconical surfaces, etc.)
136 ..Rotated by mechanical drive
137 ..Collapsible or arranged for convenient assembly, disassembly, or storage
138 ...Inflatable
139 ..With means representing vehicle moving relative to earth
140 ...Space vehicle
141 ..With means indicating distance between points on earth
142 ..With means indicating time at different points on earth
143 ..With means demonstrating solar illumination of earth
144 ..With means demonstrating wind currents over earth
145 ..With internal light
146 ..With means to facilitate finding or reading indicia thereon
147 ..With map segment attachable thereto (e.g., continent, nation, etc.)
148 ..With suspension type support
149 .Means indicating time at different points on earth
150 .Map or terrain model
151 ..With model or sample of natural or man-made item associated therewith
152 ..Relief
153 ..Means for facilitating location of different points on map
154 HISTORY OR GENEALOGY
155 IDENTIFICATION OF PERSON OR HANDWRITING ANALYSIS
156 LANGUAGE
157 .Foreign
158 .Shorthand
159 .Alphabet letter formation, recognition, or sequencing
160 ..Letter formed by segments
161 ..Letter displayed upon manipulation of mechanism
162 .Writing or printing by hand
163 ..Tracing
164 ...Slotted or grooved path
165 ..Writing sample included in teaching means
166 ..Mechanical means for teaching proper position of body part while writing
167 .Spelling, phonics, word recognition, or sentence formation
168 ..Magnet included in teaching means
169 ..Electrical component included in teaching means
170 ..Color used in teaching means
171 ..Letter or word bearing elements (e.g., cards, blocks, etc.) with interfitting surface configurations
172 ..Letter-bearing elements (e.g., cards, blocks, etc.) selectively aligned to form word or sentence
173 ...Letter-bearing belt or reel-mounted strip
174 ...Rotatably mounted letter bearing element
175 ...Letter-bearing elements slidable between different grooves
176 ..Display of word or picture upon correct manipulation of teaching means
177 ..Crossword puzzle aid
178 ..Reading
179 ...Speed
180 ....Projected image of reading matter
181 ....Apertured mask moved past reading matter carrier
182 ....Reading matter carrier moved past viewing position
183 ....Pacer moved down reading matter carrier
184 ...Directionality training (e.g., for dyslexics, etc.)
185 .Speech
186 MAGNETIC OR GYRO COMPASS
187 MEASUREMENT OF LENGTH OR VOLUME
188 MATHEMATICS
189 .Base conversion or use of base other than ten
190 .Magnet included in teaching means
191 .Arithmetic
192 ..Chalkboard or equivalent means having readily erasable surface
193 ..Manually manipulated numeral shaped elements
194 ..Numeric value represented by weight placed on balance
195 ..Manually manipulated elements having size proportional to numeric value
196 ...Fraction representing elements
197 ..Indicia-bearing belt or reel-mounted strip
198 ..Plaque (e.g., disk, etc.) turnable relative to index (e.g., window in card, etc.) to selectively align different points on plaque therewith
199 ..Plaque slidable relative to index (e.g., window in card, etc.) to selectively align different points on plaque therewith
200 ..Manually manipulated pin or peg

MATHEMATICS
.Arithmetic
201 ..Electric component included in teaching means
202 ..Keyboard or like manually manipulated array (e.g., slides, levers, etc.)
203 ..Apertured elements threaded on elongate means (e.g., abacus, etc.)
204 ...Elements manually placed on or removed from elongate means during use
205 ..Means having number of marks (e.g., dots, etc.) or associated physical units (e.g., sticks, indentations, etc.) corresponding to numeric value
206 ..Rotatable wheel-shaped element (e.g., ring, disc, cylinder, etc.) having indicia on perimeter thereof
207 ..Color used in teaching means
208 ..Ball, block, or disk
209 ..Division or multiplication
210 ..Place value relative to decimal point
211 .Geometry, trigonometry, or physical mathematic model structure
212 ..Pythagorean theorem
213 ..Property of sphere or spheroid
214 ..Property of circle or ellipse
215 ..Demonstration means using relatively turnable elements
216 ..Demonstration means using filament (e.g., string, etc.) to define geometric shape
217 METEOROLOGY
218 NUCLEAR ENERGY OR RADIOACTIVE RADIATION DETECTION OR SIMULATION
219 OCCUPATION
220 .Air traffic control
221 .Audiometry
222 .Code communication
223 ..Visual signalling
224 .Electricity or electronics
225 .Dairying, farming, ranching, or other occupation involving care of plants or animals
226 .Fire fighting
227 .Keyboard operation (e.g., typing, key punching, etc.)
228 ..Means for selectively illuminating character on simulated keyboard
229 ..Means for selectively rendering key operable or inoperable
230 ..Means for selectively producing sound of character
231 ..Practice keyboard having individually depressible keys
232 ...With means to display character upon depression of key
233 ..Means on hand or finger for indicating finger to be used
234 .Soldering or welding
235 PARLIAMENTARY PROCEDURE
236 PSYCHOLOGY
237 .Cooperation of plural pupils
238 .Behavior or performance display (e.g., board for showing completed chores, etc.)
239 RADIO NAVIGATION
240 .Light sensor included in simulator of radio navigation equipment
241 .Simulation of upwardly directed airfield or landing approach marker radio beam
242 .Simulated radio signal generated by use of data storage means
243 .Simulated bearing or position or vehicle relative to radio transmitter or directional beam indicated to trainee by instrument
244 .Simulation of radio directional beam carrying Morse code signal
245 RELIGION
246 .Rosary
247 PHYSICAL EDUCATION
248 .Basketball
249 .Bowling
250 .Dancing
251 .Football, soccer, or rugby
252 .Golf
253 .Skiing
254 .Swimming
255 .Traversing ground (e.g., crawling, running, etc.)
256 .Body model with articulated parts
257 .Picture or image of body included in display or demonstration
258 .Developing or testing coordination
259 ..Associating dissimilar objects with apertures or pegs having matching size, shape, or color
260 ..Manipulation of tool or fastener (e.g., zipper, shoelaces, etc.)
261 ..Tracing
262 ANATOMY, PHYSIOLOGY, THERAPEUTIC TREATMENT, OR SURGERY RELATING TO HUMAN BEING
263 .Dentistry
264 ..Means mounting upper and lower tooth models for relative movement
265 .Cardiac massage or artificial respiration
266 .Simulation of body sound
267 .Anatomical representation
268 ..Simulation of flow of body liquid
269 ..Including superposed sheets respectively depicting different body parts
270 ..Head or part thereof
271 ...Eye
272 ..Internal organ, blood vessel, or nerve
273 ...Female genital
274 ..Skeleton or bone
275 ...Palpation or manual force application (e.g., chiropractic adjustment, etc.)
276 SCIENCE
277 .Crystal structure model or display having discrete element (e.g., geometric shape, light, etc.) representing atom
278 .Molecular model or display having discrete element representing atom or radical
279 ..Model having helical chain of elements (e.g., DNA model, etc.)
280 ..Atom or radical represented by element formed of sheet material
281 .Model or display demonstrating structure or property of atom or radical
282 ..Indicia chart (e.g., periodic table, etc.)
283 .Means demonstrating physical property (e.g., osmotic pressure, solubility, etc.) of substance
284 .Astronomy
285 ..Representation of light generating celestial body
286 ...Light spot
287 ...Celestial globe
288 ....And earth representation
289 ...Finding or identifying aid
290 ...Simulation of sun and earth
291 ....Simulation of motion of earth and another major planet around sun
292 ....And moon

SCIENCE
.Astronomy
..Representation of light generating celestial body
...Simulation of sun and earth
....And moon
293 .....Moon model moved around earth model by mechanical or eleGctrical means
294 ......By belt drive
295 .Biology or taxidermy
296 ..Specimen display
297 ...Specimen enclosure
298 .Chemistry or metallurgy
299 .Geology
300 .Physics
301 ..Electricity or magnetism
302 ..Statics or dynamics
303 ..Optics
304 TELLING TIME OR CALENDAR READING
305 VEHICLE MOVEMENT OR TRAFFIC ACCIDENT OR CONDITION
306 VOTING MACHINE OR BALLOT MARKING
307 CATHODE RAY SCREEN DISPLAY AND AUDIO MEANS
308 AUDIO RECORDING AND VISUAL MEANS
309 .Common carrier for visual means and audio recording
310 ..Carrier used with image projector
311 ..Card, sheet, or block
312 ...Reading head moved past stationary audio track
313 ....Manually
314 .Image projector
315 ..With code on image carrier for controlling operation of apparatus
316 ..With code on audio carrier for controlling operation of apparatus
317 .Visual information in book form
318 .Audio recording on disk
319 AUDIO RECORDING
320 .Listener's voiced response recorded
321 .Operation of apparatus controlled by listener's response to question or problem
322 QUESTION OR PROBLEM ELICITING RESPONSE
323 .Cathode ray screen display included in examining means
324 .Image projector included in examining means
325 ..And light detector
326 .Mark transfer sheet (e.g., carbon paper, etc.) included in examining means
327 .Correctness of response indicated to examine by self-operating or examinee-actuated means
328 ..Involving heat or chemical reaction
329 ..Involving fluid flow
330 ..Involving magnetic attraction
331 ..By optical element (e.g., mirror, color filter, lens, etc.)
332 ..Reward dispensed for correct answer
333 ..Picture or pattern completed by examinee placing plaques bearing portions thereof in correct relation
334 ..Hand-held element insertable to different depths in apertures respectively representing right and wrong answers
335 ..By means including electrical component
336 ...Response of plural examinees communicated to monitor or recorder by electrical signals
337 ...Light detector
338 ...Part of electric circuit completed when examinee places end of flexible lead, or means connected thereto (e.g., plug, etc.), in contact with another element
339 ...Part of electric circuit completed when examinee depresses portion of sheet having electric conductor associated therewith
340 ...Part of electric circuit completed when examinee places free element in contact with another element
341 ....Correct answer indicator lamp carried by free element
342 ...Question or problem located on endless belt or reel mounted strip
343 ...Size or shape of, or aperture in, free element controls indication of response correctness
344 ...Correct answer illuminated
345 ..Size or shape of, or aperture in, free element cntrols indication of response correctness
346 ..Correctness of response indicated when examinee physically alters element other than by marking it
347 ..Correct answer displayed on side of element opposite side displaying question or problem
348 ..Correct answer hidden until examinee moves element
349 ...Means for receiving examinee's written response
350 .Response of plural examinees communicated to monitor or recorder by electrical signals
351 ..Wireless signals
352 ..With means for indicating first examinee to respond
353 .Grading of response form
354 ..Comparison of response form with standard answer form
355 ...Light detector sensing response
356 ...Electrical means sensing conductive mark representing response
357 ...Means sensing aperture representing response
358 ..Light detector sensing response
359 ..Electrical means sensing conductive mark representing response
360 ..Means sensing aperture representing response
361 ..Means perforating response form at correct answer location
362 .Electrical means for recording examinee's response
363 .Card or sheet for receiving examinee's written, marked, or punched response
364 ..With apertured overlay
365 MEANS FOR DEMONSTRATING APPARATUS, PRODUCT, OR SURFACE CONFIGURATION, OR FOR DISPLAYING EDUCATION MATERIAL OR STUDENT'S WORK
366 .Means for simulating abnormal condition
367 .Means for comparing characteristics of plural articles or materials
368 .Superposed indicia bearing sheets, one depicting interior view
369 .Means for displaying article at various stages of manufacture or treatment
370 .Transparent means permitting interior view
371 .Mirror for displaying something (e.g., apparel, hair style, etc.) as it would appear when associated with viewer
372 .Aircraft, spacecraft, or component thereof

	MEANS FOR DEMONSTRATING APPARATUS, PRODUCT, OR SURFACE CONFIGURATION, OR FOR DISPLAYING EDUCATION MATERIAL OR STUDENT'S WORK
373	.Land or water vehicle (e.g., automobile, boat, etc.) or component thereof
374	..Servicing aid (e.g., lubrication chart, etc.)
375	..Shock absorber or spring
376	..Tire, wheel, or brake
377	.Beauty aid or perfume
378	.Burial means or grave maker
379	.Demonstration or display of electrical apparatus or component
380	..Motor or generator
381	.Fluid filter
382	.Household equipment
383	..Refrigerator or air conditioner
384	..Vacuum cleaner
385	.Insulation
386	.Jewelry or monogram
387	.Lock or safe
388	.Lubricant or lubrication
389	.Mechanical power source (e.g., engine, windmill, etc.)
390	.Mining
391	.Pen or pencil
392	.Sport equipment
393	.Toy
394	.Timepiece or component thereof
395	.Wearing apparel
396	..Displayed on doll or manikin
397	..Footwear
398	...Hose
399	..Headwear
400	..Neckwear
401	.Machine mechanism
402	.Rotatable element having indicia or picture on perimeter thereof
403	.Block or like manually manipulatable object having indicia or picture on face thereof, or three-dimensional form for demonstrating shape
404	.Plaque (e.g., disk, etc.) turnable relative to index (e.g., window in card, etc.) to selectively align different points on plaque therewith
405	.Plaque slidable relative to index (e.g., window in card, etc.) to selectively align different points on plaque therewith
406	.Jigsaw elements having indicia thereon
407	.Manually manipulated pin or peg inserted into display board
408	.Chalkboard or equivalent means having easily erasable surface
409	..Mark formed by magnetic attraction between materials (e.g., particles in sheet made visible by movement of magnet over sheet, etc.)
410	..Mark formed by bonding sheet to underlying surface with pressure-applying stylus (e.g., Magic Slate, etc.)
411	..Erasable surface on endless belt
412	..Erasable surface on reel-mounted sheet
413	..Separate elements having erasable surfaces
414	...Relatively swingable
415	..With pencil holder or sharpener
416	..With chart, illustration, or indicia
417	..Chalkboard cleaning means, chalk or eraser holder, or chalk dust receiver
418	..With ruler, straight edge, or holder therefor
419	..Pivotal about horizontal axis
420	..Vertically adjustable
421	..Attached to wall
422	..Hand-carried school slate
423	...With rigid corner cap or separate means holding slate frame elements together
424	...With cushion or noise muffler attached to slate frame
425	..Artificial slate formed of plural constituents
426	.Endless belt or reel-mounted strip having indicia thereon
427	.Apertured mask placed over information bearing surface
428	.Pictorial demonstration or display
429	.Demonstration or display means combined with storage or collection means (e.g., receptacle, scoop, etc.)
430	.Display panel, chart, or graph
431	..Showing seat or desk location
432	DESK, TABLE, OR STUDY BOOTH
433	MISCELLANEOUS

CLASS 435 CHEMISTRY: MOLECULAR BIOLOGY AND MICROBIOLOGY

DECEMBER 1990

1 DIFFERENTIATED TISSUE OR ORGAN OTHER THAN BLOOD PER SE OR DIFFERENTIATED TISSUE OR ORGAN MAINTAINING; COMPOSITIONS THEREFOR, APPARATUS THEREFOR
2 MAINTAINING BLOOD OR SPERM IN A PHYSIOLOGICALLY ACTIVE STATE OR COMPOSITIONS THEREOF OR THEREFOR OR METHODS OF IN VITRO BLOOD CELL SEPARATION OR TREATMENT
3 CONDITION RESPONSIVE CONTROL PROCESS
4 MEASURING OR TESTING PROCESS INVOLVING ENZYMES OR MICROORGANISMS; COMPOSITION OR TEST STRIP THEREFORE; PROCESSES OF FORMING SUCH COMPOSITION OR TEST STRIP
5 .Involving virus or bacteriophage
6 .Involving nucleic acid
7.1 .Involving antigen-antibody binding, specific binding protein assay or specific ligand-receptor binding assay
7.2 ..Involving a microorganism or cell membrane bound antigen or cell membrane bound receptor or cell membrane bound antibody or microbial lysate
7.21 ...Animal cell
7.22 ....Parasite or protozoa
7.23 ....Tumor cell or cancer cell
7.24 ....Leukocyte (e.g., lymphocyte, granulocyte, monocyte, etc.)
7.25 ....Erythrocyte
7.3 ...Flagellar-antigen or pili-antigen
7.31 ...Fungi (e.g., yeast, mold, etc.)
7.32 ...Bacteria or Actinomycetales
7.33 ....Staphylococcus
7.34 ....Streptococcus
7.35 ....Salmonella
7.36 ....Sexually transmitted disease (e.g., chlamydia, syphilis, gonorrhea, etc.)
7.37 ....Escherichia coli
7.4 ..To identify an enzyme or isoenzyme
7.5 ..Involving avidin-biotin binding
7.6 ..Involving a modified enzyme (e.g., abzyme, recombinant, chemically altered, etc.)
7.7 ..Assay in which a label present is an apoenzyme, prosthetic group, or enzyme cofactor
7.71 ..Assay in which a label present is an enzyme inhibitor or functions to alter enzyme activity
7.72 ..Assay in which a label present is an enzyme substrate or substrate analogue
7.8 ..Involving nonmembrane bound receptor binding or protein binding other than antigen-antibody binding
7.9 ..Assay in which an enzyme present is a label
7.91 ...Enzyme produces product which is part of another reaction system (e.g., cyclic reaction, cascade reaction, etc.)
7.92 ...Heterogeneous or solid phase assay system (e.g., ELISA, etc.)
7.93 ....Competitive assay
7.94 ....Sandwich assay
7.95 ....Indirect assay
8 .Involving luciferase
9 .Geomicrobiological testing, e.g., for petroleum, etc.
10 .Involving uric acid
11 .Involving cholesterol
12 .Involving urea or urease
13 .Involving blood clotting factor, e.g., involving thrombin, thromboplastin, fibrinogen, etc.
14 .Involving glucose or galactose
15 .Involving transferase
16 ..Involving transaminase
17 ..Involving creatine phosphokinase
18 .Involving hydrolase
19 ..Involving esterase
20 ...Involving cholinesterase
21 ...Involving phosphatase
22 ..Involving amylase
23 ..Involving proteinase
24 ..Involving peptidase
25 .Involving oxidoreductase
26 ..Involving dehydrogenase
27 ..Involving catalase
28 ..Involving peroxidase
29 .Involving viable microorganism
30 ..Methods of sampling, or innoculating or spreading a sample; methods of physically isolating an intact microorganism
31 ..Testing for sterility condition
32 ..Testing for antimicrobial activity of a material
33 ...Using multifield media
34 ..Determining presence or kind of microorganism; use of selective media
35 ...Using radioactive material
36 ...Streptococcus; Staphylococcus
37 ...Nitrate to nitrite reducing bacteria
38 ...Enteriobacteria
39 ...Quantitative determination
40 ....Using multifield media
41 MICROORGANISM, TISSUE CELL CULTURE OR ENZYME USING PROCESS TO SYNTHESIZE A DESIRED CHEMICAL COMPOUND OR COMPOSITION
42 .Process involving microorganisms of different genera in the same process, simultaneously
43 .Preparing compound having a 1-thia-4-aza-bicyclo (3.2.0) heptane ring system, e.g., penicillin, etc.
44 ..By desacylation of the substituent in 6-position
45 ..By acylation of the substituent in 6-position
46 ..In presence of phenyl acetic acid or phenyl acetamide or their derivatives
47 .Preparing compound having a 1-thia-5-aza-bicyclo (4.2.0) octane ring system, e.g., cephalosporin, etc.
48 ..Di-substituted in 7-position
49 ..Cephalosporin C
50 ..By acylation of the substituent in the 7-position
51 ..By desacylation of the substituent in the 7-position
52 .Preparing compound containing a cyclopentanohydrophenanthrene nucleus; nor-, homo- or D-ring lactone derivatives thereof
53 ..Containing heterocyclic ring
54 ..Acting on D-ring
55 ...Acting at 17-position
56 ....Hydroxylating at 17-position
57 ...Hydroxylating at 16-position
58 ..Hydroxylating
59 ...At 11-position
60 ....At 11 alpha position
61 ..Dehydrogenating; dehydroxylating
62 ...Forming an aryl ring from "A" ring

MICROORGANISM, TISSUE CELL CULTURE OR ENZYME USING PROCESS TO SYNTHESIZE A DESIRED CHEMICAL COMPOUND OR COMPOSITION

63 .Preparing compound containing a prostaglandin nucleus
64 .Preparing compound other than saccharide containing a tetracycline nucleus, e.g., naphacene, etc.
65 .Preparing compound other than saccharide containing a gibberellin nucleus, i.e., gibbane
66 .Preparing compound other than saccharide containing alloxazine or isoalloxazine nucleus
67 .Preparing compound containing a carotene nucleus, i.e., carotene
68.1 .Enzymatic production of a protein or polypeptide (e.g., enzymatic hydrolysis, etc.)
69.1 .Recombinant DNA technique included in method of making a protein or polypeptide
69.2 ..Enzyme inhibitors or activators
69.3 ..Antigens
69.4 ..Hormones and fragments thereof
69.5 ..Lymphokines or monokines
69.51 ...Interferons
69.52 ...Interleukins
69.6 ..Blood proteins
69.7 ..Fusion proteins or polypeptides
69.8 ..Signal sequence, (e.g., beta-galactosidase, etc.)
69.9 ...Yeast derived
70.1 .Using tissue cell culture to make a protein or polypeptide
70.2 ..Fused or hybrid cells
70.21 ...Producing monoclonal antibody
70.3 ..Animal tissue cell culture
70.4 ...Blood (lymphoid) cell culture
70.5 ....Producing interferons
71.1 .Using a microorganism to make a protein or polypeptide
71.2 ..Procaryotic microorganism
71.3 ...Antibiotic or toxin
72 .Preparing compound containing saccharide radical
73 ..Preparing S-glycoside, e.g., lincomycin, etc.
74 ..Preparing O-glycoside, e.g., glucosides, etc.
75 ...Oxygen of the saccharide radical is directly bonded to a nonsaccharide heterocyclic ring or a fused- or bridged-ring system which contains a nonsaccharide heterocyclic ring, e.g., coumermycin, novobiocin, etc.
76 ....The hetero ring has eight or more ring members and only oxygen as ring hetero atoms, e.g., erythromycin, spiramycin, nystatin, etc.
77 ...Oxygen atom of the saccharide radical is directly linked through only acyclic carbon atoms to a nonsaccharide heterocyclic ring, e.g., bleomycin, phleomycin, etc.
78 ...Oxygen atom of the saccharide radical is directly bonded to a condensed ring system having three or more carboxyclic rings, e.g., dauomycin, adriamycin, etc.
79 ...Oxygen atom of the saccharide radical is bonded to a cyclohexyl radical, e.g., kasugamycin, etc.
80 ....Cyclohexyl radical is substituted by two or more nitrogen atoms, e.g., destomycin, neamin, etc.
81 .....Cyclohexyl radical is attached directly to a nitrogen atom of two or more N-C(=N)-N radicals, e.g., streptomycin, etc.
82 .....Having two saccharide radicals bonded through only oxygen to adjacent ring carbons of the cyclohexyl radical, e.g., ambutyrosin, ribostamycin, etc.
83 ......Containing three or more saccharide radicals, e.g., liquidomycin, neomycin, lividomycin, etc.
84 ..Preparing nitrogen-containing saccharide
85 ...N-glycoside
86 ....Cobalamin, i.e., vitamin B12, LLD factor
87 ....Nucleoside
88 .....Having a fused ring containing a six-membered ring having two N-atoms in the same ring, e.g., purine nucleosides, etc.
89 ....Nucleotide
90 .....Dinucleotide, e.g., NAD, etc.
91 .....Polynucleotide, e.g., nucleic acid oligoribonucleotides, etc.
92 .....Having a fused ring containing a six-membered ring having two N-atoms in the same ring, e.g., purine based mononucleotides, etc.
93 ..Mashing or wort making
94 ..Produced by the action of an isomerase, e.g., fructose by the action of xylose isomerase on glucose, etc.
95 ..Produced by the action of a beta-amylase, e.g., maltose by the action of beta-amylase on amylose, etc.
96 ..Produced by the action of an exo-1.4 alpha glucosidase, e.g., dextrose by the action of glucoamylase on starch, etc.
97 ..Produced by the action of a glycosyl transferase, e.g., alpha, beta, gamma-cyclodextrins by the action of glycosyl transferase on starch, etc.
98 ..Produced by the action of an alpha-1, 6-glucosidase, e.g., amylose, debranched amylopectin by the action of pullulanase, etc.
99 ..Produced by the action of a carbohydrase, e.g., maltose by the action of alpha amylase on starch, etc.
100 ..Disaccharide
101 ..Polysaccharide of more than five saccharide radicals attached to each other by glycosidic bonds
102 ...Pullulan
103 ...Dextran
104 ...Xanthan, i.e., Xanthomonas-type heteropolysaccharides
105 ..Monosaccharide
106 .Preparing alpha or beta amino acid or substituted amino acid or salts thereof
107 ..Proline; hydroxyproline; histidine
108 ..Tryptophan; tyrosine; phenylalanine; 3,4 dihydroxyphenylalanine
109 ..Aspartic acid (asparaginic acid); asparagine
110 ..Glutamic acid; glutamine
111 ...Utilizing biotin or its derivatives

MICROORGANISM, TISSUE CELL CULTURE OR ENZYME USING PROCESS TO SYNTHESIZE A DESIRED CHEMICAL COMPOUND OR COMPOSITION
.Preparing alpha or beta amino acid or substituted amino acid or salts thereof
..Glutamic acid; glutamine
112 ...Utilizing surfactant, fatty acids or fatty acid esters, i.e., having seven or more atoms
113 ..Methionine; cysteine; cystine
114 ..Citrulline; arginine; ornithine
115 ..Lysine; diaminopimelic acid; threonine; valine
116 ..Alanine; leucine; isoleucine; serine; homoserine
117 .Preparing heterocyclic carbon compound having only O, N, S, Se, or Te as ring hetero atoms
118 ..Containing two or more hetero rings
119 ...Containing at least two hetero rings bridged or fused among themselves or bridged or fused with a common carbocyclic ring system, e.g., rifamycin, etc.
120 ..Nitrogen or oxygen hetero atom and at least one other diverse hetero ring atom in the same ring
121 ..Nitrogen as only ring hetero atom
122 ...Containing six-membered hetero ring
123 ..Oxygen as only ring hetero atom
124 ...Containing a hetero ring of at least seven ring members, e.g., zearalenone, macrocyclic lactones, etc.
125 ...Containing six-membered hetero ring, e.g., fluorescein, etc.
126 ...Containing five-membered hetero ring, e.g., griseofulvin, etc.
127 .Preparing compound containing at least three carbocyclic rings
128 .Preparing nitrogen-containing organic compound
129 ..Amide, e.g., chloramphenicol, etc.
130 .Preparing sulfur-containing organic compound
131 .Preparing organic compound containing a metal or atom other than H, N, C, O, or halogen
132 .Preparing oxygen-containing organic compound
133 ..Containing quinone nucleus, i.e., quinoid structure
134 ..Fat; fatty oil; ester-type wax; higher fatty acid, i.e., having at least seven carbon atoms in an unbroken chain bound to a carboxyl group; oxidized oil or fat
135 ..Carboxylic acid ester
136 ..Containing a carboxyl group
137 ...Sugar acid having five or more carbon atoms, i.e., aldonic, keto-aldonic, or saccharic acid
138 ....Alpha-ketogulonic acid, i.e., 2-ketogulonic acid
139 ...Lactic acid
140 ...Acetic acid
141 ...Propionic or butyric acid
142 ...Polycarboxylic acid
143 ....Having keto group, e.g., alpha-ketoglutaric acid, etc.
144 ....Tricarboxylic acid, e.g., citric acid, etc.
145 ....Dicarboxylic acid having four or less carbon atoms, e.g., fumaric, maleic, etc.
146 ...Hydroxy carboxylic acid
147 ..Containing carbonyl group
148 ...Ketone
149 ....Cyclopentanone or cyclopentadione containing compound
150 ....Acetone containing product
151 .....Substrate contains grain or cereal material
152 .....Substrate contains protein as nitrogen source
153 .....Substrate contains inorganic nitrogen source
154 .....Substrate contains inorganic compound, other than water
155 ..Containing hydroxy group
156 ...Aromatic
157 ...Acyclic
158 ....Polyhydric
159 .....Glycerol
160 ....Butanol
161 ....Ethanol
162 .....Multiple stages of fermentation; multiple types of microorganisms or reuse of microorganisms
163 .....Produced as by-product, or from waste, or from cellulosic material substrate
164 ......Substrate contains sulphite waste liquor or citrus waste
165 ......Substrate contains cellulosic material
166 .Preparing hydrocarbon
167 ..Only acyclic
168 .Preparing element or inorganic compound except carbon dioxide
169 .Using actinomycetales
170 .Using bacteria
171 .Using fungi
172.1 MUTATION OR GENETIC ENGINEERING
172.2 .Fused or hybrid cell formation
172.3 .Recombination
173 TREATMENT OF MICROORGANISM OR ENZYME WITH ELECTRICAL OR WAVE ENERGY, E.G., MAGNETISM, SONIC WAVES, ETC.
174 CARRIER-BOUND OR IMMOBILIZED ENZYME OR MICROBIAL CELL; CARRIER-BOUND OR IMMOBILIZED CELL; PREPARATION THEREOF
175 .Multi-enzyme system
176 .Enzyme or microbial cell is immobilized on or in an inorganic carrier
177 .Enzyme or microbial cell is immobilized on or in an organic carrier
178 ..Carrier is carbohydrate
179 ...Carbohydrate is cellulose or derivative thereof
180 ..Carrier is synthetic polymer
181 ...Attached to the carrier via a bridging agent
182 ...Enzyme or microbial cell is entrapped within the carrier, e.g., gel, hollow fibre
183 ENZYME, E.G., LIGASES (6.), ETC., PROENZYME; COMPOSITIONS THEREOF; PROCESS FOR PREPARING, ACTIVATING, INHIBITING, SEPARATING,OR PURIFYING ENZYMES
184 .Enzyme inactivation by chemical treatment
185 .Malt
186 .Pancreatin
187 .Preparing granular- or free-flowing enzyme composition
188 .Stabilizing an enzyme by forming a mixture, an adduct or a composition or formation of an adduct or enzyme conjugate
189 .Oxidoreductase (1.), e.g., luciferase

ENZYME, E.G., LIGASES (6.), ETC., PROENZYME; COMPOSITIONS THEREOF; PROCESS FOR PREPARING, ACTIVATING, INHIBITING, SEPARATING,OR PURIFYING ENZYMES

.Oxidoreductase (1.), e.g., luciferase

190 ..Acting on CHOH group as donor, e.g., glucose oxidase, lactate dehydrogenase (1.1)

191 ..Acting on nitrogen-containing compound as donor (1.2, 1.5, 1.7)

192 ..Acting on hydrogen peroxide as acceptor (1.11)

193 .Transferase other than ribonuclease (2.)

194 ..Transferring phosphorus containing group, e.g., kineases, etc. (2.7)

195 .Hydrolase (3.)

196 ..Acting on ester bond (3.1)

197 ...Carboxylic ester hydrolase (3.1.1)

198 ....Triglyceride splitting, e.g., lipase, etc. (3.1.1.3)

199 ...Ribonuclease (3.1.4)

200 ..Acting on glycosyl compound (3.2)

201 ...Acting on alpha-1, 4-glucosidic bond, e.g., hyaluronidase, invertase, amylase, etc. (some 3.2.1)

202 ....Alpha-amylase, microbial source

203 .....Fungal source

204 ....Alpha-amylase, plant source (3.2.1.1)

205 ....Glucoamylase (3.2.1.3)

206 ...Acting on beta-1, 4 link between N-acetylmuramic acid and 2-acetylamino 2-deoxy-D-glucose, e.g., lysozyme, etc.

207 ...Acting on beta-galatose-glycoside bond, e.g., beta-galactosidase, etc.

208 ...Acting on alpha-galatose-glycoside bond, e.g., alpha-galactosidase, etc.

209 ...Acting on beta-1, 4-glucosidic bond, e.g., cellulase, etc. (3.2.1.4)

210 ...Acting on alpha-1, 6-glucosidic bond, e.g., isoamylase, pullulanase, etc.

211 ....Dextranase (3.2.1.11)

212 ..Acting on peptide bond, e.g., thromboplastin, leucine amino-peptidase, etc., (3.4)

213 ...Trypsin; chymotrypsin

214 ...Thrombin

215 ...Urokinase

216 ...Streptokinase

217 ...Plasmin, i.e., fibrinolysin

218 ...Elastase

219 ...Proteinase

220 ....Derived from bacteria

221 .....Bacteria is Bacillus

222 ......Bacillus subtilus or Bacillus lichenoformis

223 ....Derived from fungi

224 .....From yeast

225 .....From Aspergillus

226 ....Derived from animal tissue, e.g., rennin, etc.

227 ..Acting on carbon to nitrogen bond other than peptide bond (3.5)

228 ...Acting on a linear amide linkage in linear amide

229 ....Asparaginase

230 ....Penicillin amidase

231 ...Acting on amide linkage in cyclic amides, e.g., penicillinase, etc. (3.5.2)

232 .Lyase (4.)

233 .Isomerase (5.)

234 ..Glucose isomerase

235.1 VIRUS OR BACTERIOPHAGE, EXCEPT FOR VIRAL VECTOR OR BACTERIOPHAGE VECTOR; COMPOSITION THEREOF; PREPARATION OR PURIFICATION THEREOF; PRODUCTION OF VIRAL SUBUNITS; MEDIA FOR PROPAGATING

236 .Inactivation or attenuation; producing viral subunits

237 ..By serial passage of virus

238 ..By chemical treatment

239 .Recovery or purification

240.1 ANIMAL OR PLANT CELL, E.G., CELL LINES, TISSUES; CULTIVATION OR MAINTENANCE THEREOF; MEDIA THEREFORE

240.2 .Animal cells, per se, culture techniques and media

240.21 ..Techniques of establishing a primary culture

240.22 ..Culture of encapsulated cells

240.23 ..Culture of cells on solid support, e.g., anchorage dependent cells

240.24 ...Support is suspendable particle

240.241 ...Culture of cells on membrane

240.242 ....Hollow fibre membrane

240.243 ...Solid support treated or coated to enhance attachment or growth

240.25 ..Culture in suspension

240.26 ..Fused or hybrid cells

240.27 ...Ab or Ig fragments producing cells

240.3 ..Culture medium, per se

240.31 ...Defined medium

240.4 .Plant cells, per se, culture techniques and media

240.45 ..Culture techniques, e.g., meristem culture, etc.

240.46 ...Culture in suspension

240.47 ....Protoplasts

240.48 ...Callus culture

240.49 ....Regeneration (includes nonflowering ornamentals)

240.5 .....Agronomic crops, e.g., tobacco, grains, etc.

240.51 .....Fruit and vegetable crops, e.g., tomato, etc.

240.54 ..Culture medium, per se, or regeneration medium, per se

242 SPORE FORMING OR ISOLATING PROCESS

243 MICROORGANISM PER SE, E.G., PROTOZOA, ETC.; COMPOSITIONS THEREOF; PROCESS OF PROPAGATING, MAINTAINING OR PRESERVING MICROORGANISMS OR COMPOSITIONS THEREOF; PROCESS OF PREPARING OR ISOLATING A COMPOSITION CONTAINING A MICROORGANISM; CULTURE MEDIA THEREFOR

244 .Chemical stimulation of growth or activity by addition of chemical compound which is not an essential growth factor; stimulation of growth by removal of a chemical compound

245 .Adaptation or attenuation of cells

246 .Foam culture

247 .Utilizing media containing lower alkanol, i.e., having one to six carbon atoms

248 .Utilizing media containing hydrocarbon

249 ..Aliphatic

250 ...Having five or less carbon atoms

251 .Utilizing media containing waste sulphite liquor

252 .Utilizing media containing cellulose or hydrolysates thereof

252.1 .Bacteria or Actinomycetales; media therefor

252.2 ..Rhizobium or Agrobacterium

252.3 ..Transformants (e.g., recombinant DNA or vector or foreign or exogenous gene containing, fused bacteria, etc.)

	MICROORGANISM PER SE, E.G., PROTOZOA, ETC.; COMPOSITIONS THEREOF; PROCESS OF PROPAGATING, MAINTAINING OR PRESERVING MICROORGANISMS OR COMPOSITIONS THEREOF; PROCESS OF PREPARING OR ISOLATING A COMPOSITION CONTAINING A MICROORGANISM; CULTURE MEDIA THEREFOR
	.Bacteria or Actinomycetales; media therefor
	..Transformants (e.g., recombinant DNA or vector or foreign or exogenous gene containing, fused bacteria, etc.)
252.31	...Bacillus (e.g., B. subtilis, B. thuringiensis, etc.)
252.32	...Brevibacterium or Corynebacterium
252.33	...Escherichia (e.g., E. coli, etc.)
252.34	...Pseudomonas
252.35	...Streptomyces
252.4	..Mixed culture
252.5	..Bacillus (e.g., B. subtilis, B. thuringiensis, etc.)
252.6	..Actinoplanes
252.7	..Clostridium
252.8	..Escherichia (e.g., E. coli, etc.) or Salmonella
252.9	..Lactobacillus, Pediococcus, or Leuconostoc
253.1	..Mycobacterium
253.2	..Nocardia
253.3	..Pseudomonas
253.4	..Streptococcus
253.5	..Streptomyces
253.6	..Culture media, per se
254	.Fungi; media therefor
255	..Yeast; media therefor
256	...Bakers or brewers yeast
257	.Unicellular algae; media therefor
258	.Protozoa; media therefor
259	.Lysis of microorganism
260	.Preserving or maintaining microorganism
261	.Separation of microorganism from culture media
320.1	VECTOR, PER SE, E.G., PLASMID, HYBRID PLASMID, COSMID, VIRAL VECTOR, BACTERIOPHAGE VECTOR, ETC.
262	PROCESS OF UTILIZING AN ENZYME OR MICROORGANISM TO LIBERATE, SEPARATE, OR PURIFY A PREEXISTING COMPOUND OR COMPOSITION THEREFORE; CLEANING OBJECTS OR TEXTILES
263	.Textile treating
264	.Cleaning using a microorganism or enzyme
265	.Depilating hides, bating or hide treating using enzyme or microorganism
266	.Treating gas, emulsion, or foam
267	.Treating animal or plant material or microorganism
268	..Treating organ or animal secretion
269	..Treating blood fraction
270	..Removing nucleic acid from intact or disrupted cell
271	..Glyceridic oil, fat, ester-type wax or higher fatty acid recovered or purified
272	..Proteinaceous material recovered or purified
273	...Collagen or gelatin
274	..Carbohydrate material recovered or purified
275	...Pectin or starch
276	...Sugar, e.g., molasses treatment, etc.
277	...Cellulose, e.g., plant fibers, etc.
278	....Producing paper pulp
279	....Hemp or flax treating

280	.Resolution of optical isomers or purification of organic compounds or composition containing same
281	.Petroleum oil or shale oil treating
282	..Desulfurizing
283	ORGAN PERFUSION APPARATUS
284	TISSUE, ANIMAL OR PLANT CELL, OR VIRUS CULTURE APPARATUS
285	.With means providing thin layers
286	.With means providing suspensions
287	APPARATUS
288	.For use of free or immobilized enzyme
289	.Including condition or time responsive control
290	..Temperature responsive control
291	.Including measuring or testing with condition sensing or measuring means
292	.Innoculator streaker or sampler
293	..Multifield or continuous
294	..Sampler or innoculator is part of container
295	...Sampler or innoculator is swab
296	.Tube or bottle
297	.Petri dish
298	..Including cover seal
299	.Containing or adapted to contain solid media
300	..Multiple field or compartment
301	...Horizontal, planar field
302	.Malting or mashing apparatus
303	..Rotary drum
304	..Cascade or vertically spaced stages
305	..With agitator or mash turner
306	...With horizontal axis of rotation
307	...With vertical axis of rotation
308	....Rakes
309	..With multilevel gas introduction means
310	.With means providing thin layer or with multilevel trays
311	.With sterilizer or filtration means
312	.Rotatably mounted
313	.With gas introduction means
314	..With draft tube
315	..With agitator
316	.With agitator or heat exchanger
317.1	MISCELLANEOUS (e.g., subcellular parts of microorganisms, etc.)

515	.Through a gel (e.g., Ouchterlony technique, etc.)
516	..Immunoelectrophoresis
517	INVOLVING KINETIC MEASUREMENT OF ANTIGEN-ANTIBODY REACTION
518	INVOLVING AN INSOLUBLE CARRIER FOR IMMOBILIZING IMMUNOCHEMICALS
519	.Carrier is a biological cell or cell fragment
520	..Red blood cell
521	...Fixation or stabilization of red blood cells
522	...Lysis of red blood cell membrane
523	.Carrier is particulate and the particles are of intentionally different sizes or impregnated differently with the immunochemicals
524	.Carrier is inorganic
525	..Metal or metal coated
526	...Magnetic
527	..Glass or silica
528	.Carrier is organic
529	..Polysaccharide, carrier (e.g., dextran, etc.)
530	...Cellulose or derivative
531	..Carrier is synthetic resin
532	...Antigen or antibody attached to a carrier via bridging agent
533	....Carrier is water suspendible particles (e.g., latex, etc.)
534	...Carrier is water suspendible particles
535	..Antigen or antibody entrapped within the carrier (e.g., gel, hollow fibre, etc.)
536	INVOLVING IMMUNE COMPLEX FORMED IN LIQUID PHASE
537	.Signal modification or steric inhibition
538	.Separation of immune complex from unbound antigen or antibody
539	..Involving precipitating reagent
540	...Double or second antibody
541	..Absorbent column, particles or resin strip
542	..Involving radioactive labeling
543	INVOLVING PRODUCING OR TREATING ANTIGEN OR HAPTEN
544	.Producing labeled antigens
545	..Radioactive label
546	..Fluorescent label
547	INVOLVING PRODUCTION OR TREATMENT OF ANTIBODY
548	.Monoclonal antibody
1	PROCESS OR COMPOSITION FOR STERILITY OR PACKAGE INTEGRITY TEST
2	PROCESS OR COMPOSITION FOR DETERMINATION OF PHYSICAL STATE OR PROPERTY BY MEANS INCLUDING A CHEMICAL REACTION
3	.Leak detection
4	.Of crystal or crystalline material
5	.Surface area, porosity, imperfection, or alteration
6	.Corrosion resistance or power
7	.By thermoparticulating composition
8	COMPOSITION FOR STANDARDIZATION, CALIBRATION, SIMULATION, STABILIZATION, PREPARATION OR PRESERVATION; PROCESSES OF USE IN PREPARATION FOR CHEMICAL TESTING
9	.Simulative of a gaseous composition
10	.Particle count or volume standard or control (e.g., platelet count standards, etc.)
11	.Blood gas standard or control
12	.Bilirubin or uric acid standard or control
13	.Lipid, cholesterol, or triglyceride standard or control
14	.Glucose, ketone, nitrate standard or control
15	.Protein or peptide standard or control (e.g., hemoglobin, etc.)
16	.Blood serum or blood plasma standard or control
17	.Preparation composition (e.g., lysing or precipitation, etc.)
18	.Preservative, buffer, anticoagulant or diluent
19	.Inorganic standards or controls
20	FOOD OR DAIRY PRODUCTS
21	.Meat or eggs
22	.Dairy product
23	..Milk or butter fat
24	.Wine or alcoholic beverages
25	GEOCHEMICAL, GEOLOGICAL, OR GEOTHERMAL EXPLORATION
26	.For metallic ores
27	.Using chemical tracers
28	.In situ testing
29	.For petroleum oils or carbonaceous minerals
30	..Removing and testing drilling mud or fluid
31	..Removing and testing solid samples
32	...Analyzing evolved gas
33	....Evolving gas by acidification
34	RATE OF REACTION DETERMINATION
35	USING ACTIVATED SPECIE
36	WITH USE OF CONDENSATION NUCLEI
37	TESTING OF CATALYST
38	PURITY OF STEAM OR CHEMICALLY INERT GAS
39	DETERMINATION OF WATER
40	.In petroleum oil, hydrocarbon oil or organic fluid
41	.By use of a cobalt, copper or nickel containing reagent
42	.By use of Karl Fischer Reagent
43	AUTOMATED CHEMICAL ANALYSIS
44	.Utilizing a moving indicator strip or tape
45	.Utilizing a centrifuge or compartmented rotor
46	.With sample on test slide
47	.With conveyance of sample along a test line in a container or rack
48	..With step of insertion or removal from test line
49	..With treatment or replacement of aspirator element (e.g., cleaning, etc.)
50	.Condition or time responsive
51	..With automated titrator

AUTOMATED CHEMICAL ANALYSIS
52 .With a continuously flowing sample or carrier stream
53 ..With formation of a segmented stream
54 .With aspirator of claimed structure
55 CONDITION RESPONSIVE CONTROL
56 TRACERS OR TAGS
57 INCLUDING USE OF RADIOACTIVE PROPERTIES
58 .Dosage determination of high energy radition, (e.g., use of an X-ray dosimeter, etc.)
59 .Including pyrolysis of radioactive material
60 LUBRICANT, GREASE, MINERAL OIL, HYDROCARBON OIL PRODUCT, OR FATS OR LIPIDS FOR OXIDATION (E.G., BREAKDOWN PRODUCTS OR CONTAMINATION, ETC.)
61 .Acidity, basicity or neutralization number
62 OXYGEN DEMAND (E.G., BOD, TOD, COD, ETC.)
63 BIOLOGICAL CELLULAR MATERIAL TESTED
64 CANCER
65 PREGNANCY OR OVULATION
66 HEMOGLOBIN, MYOGLOBIN, OR OCCULT BLOOD
67 .Glycosylated hemoglobin
68 BLOOD GAS (E.G., OXYGEN, CARBON DIOXIDE, BLOOD, pH, ETC.)
69 CLOTTING OR CLOTTING FACTOR-LEVEL TESTS
70 SEDIMENTATION RATE OR HEMATOCRIT
71 LIPIDS, TRIGLYCERIDES, CHOLESTEROL, OR LIPOPROTEINS
72 SILICON CONTAINING
73 METAL OR METAL CONTAINING
74 .Present in biological fluids (e.g., blood, urine, etc.)
75 .Oxide or gas content of metal (e.g., determination of dissolved gases, etc.)
76 .Organometallic compound determined
77 ..Group IVA (e.g., Ge, Sn, Pb, etc.)
78 .Presence of a component of steel
79 .Group IA or IIA (e.g., Li, Na, K, Rb, Cs, Fr, Be, Mg, Ca, Sr, Ba, Ra, etc.)
80 .Group IB (e.g., Cu, Ag, Au, etc.)
81 .Group IIB, IIIB, or Actinides, or Lanthanides (e.g., Zn, Cd, Hg, Sc, Y, etc.)
82 ..Lanthanide or Actinide
83 .Group IVB, VB, VIB (e.g., Ti, Zr, Hf, V, Nb, Ta, Cr, Mo, W, etc.)
84 .Group VIIB, VIII (e.g., Mn, Tc, Re, Fe, Ru, Os, Co, Rh, Ir, Ni, Pd, Pt)
85 SYNTHETIC OR NATURAL RESIN
86 PEPTIDE, PROTEIN OR AMINO ACID
87 .Glycoproteins (e.g., hormone, etc.)
88 ..Albumin
89 .Amino acid or sequencing procedure
90 ..Alpha or beta amino acid
91 HETEROCYCLIC CARBON COMPOUND (I.E., O, S, N, Se, Te, AS ONLY RING HETERO ATOM, ETC.)
92 .Diverse hetero atoms in same or different rings (e.g., alkaloids, opiates, etc.)
93 .Hetero-O (e.g., ascorbic acid, etc.)
94 ..Saccharide (e.g., DNA, etc.)
95 ...Glucose
96 .Hetero-N
97 ..Bile pigment
98 ..Plural nitrogen in the same ring (e.g., barbituates, creatinine, etc.)
99 ...Uric acid
100 INORGANIC ACID OR BASE (E.G., HCL, SULFURIC ACID, ETC.)
101 .Halogen containing
102 .Sulfur containing
103 PHOSPHORUS CONTAINING
104 .Organic (e.g., chemical warfare agents, insecticides, etc.)
105 .Of inorganic phosphorus compound in body fluid
106 NITROGEN CONTAINING
107 .N-Nitroso containing (e.g., nitrosamine, etc.)
108 .Urea or blood urea nitrogen
109 .Cyanide or isocyanide
110 .Nitrite or nitrate
111 .Amine and quartenary ammonium
112 ..Tertiary amine
113 ..Ammonia
114 .Total nitrogen determined
115 ..As part of an elemental analysis
116 .Oxides of nitrogen
117 ..Only nitrogen dioxide
118 ..Both nitrogen oxide and dioxide
119 SULFUR CONTAINING
120 .Organic or sulfhydryl containing (e.g., mercaptan, hydrogen, sulfide, etc.)
121 ..Only hydrogen sulfide
122 .Sulfur dioxide
123 .Total or elemental sulfur
124 HALOGEN CONTAINING
125 .In aqueous solution
126 .Carbon containing compound (e.g., vinylchloride, etc.)
127 OXYGEN CONTAINING
128 .Carbonyl, ether, aldehyde or ketone containing
129 ..Carboxylic acid
130 ..Formaldehyde or acetone
131 .Hydroxyl containing
132 ..Ethanol
133 .Inorganic carbon compounds
134 ..Carbon monoxide only
135 .Ozone or peroxide
136 .Molecular oxygen
137 ..Fuel/air mixture or exhaust gas analysis
138 ..Dissolved or trace oxygen or oxygen content of a sealed environment
139 HYDROCARBON
140 .Aromatic
141 .Acyclic (e.g., methane, octane, isoparaffin, etc.)
142 ..Unsaturated (e.g., ethylene, diene, etc.)
143 .Total hydrocarbon, flammability, combustibility (e.g., air-fuel mixture, etc.)
144 HYDROGEN, PER SE
145 CARBON CONTAINING
146 .In an aqueous solution (e.g., TOC, etc.)
147 MEASUREMENT INCLUDES TEMPERATURE CHANGE OF THE MATERIAL BEING ANALYZED (E.G., CALORIMETRY, ETC.)
148 MEASUREMENT INCLUDES CHANGE IN VOLUME OR PRESSURE
149 MEASUREMENT OF ELECTRICAL OR MAGNETIC PROPERTY OR THERMAL CONDUCTIVITY
150 .Of a liquid
151 .By means of a solid body in contact with a fluid
152 ..Solid body contains a combustion catalyst
153 .Of an ionized gas
154 ..Flame ionization
155 PYROLYSIS, COMBUSTION, OR ELEVATED TEMPERATURE CONVERSION
156 .Explosibility
157 .Multiple stages of heating or heating at multiple temperatures or application of temperature gradient
158 .Dividing or separating a sample stream

	PYROLYSIS, COMBUSTION, OR ELEVATED TEMPERATURE CONVERSION
159	.With catalyst or accelerator
160	.Combustion with oxygen containing gas
161	INCLUDING CHROMATOGRAPHY
162	.Utilizing paper or thin layer plate
163	INCLUDING TITRATION OR pH DETERMINATION
164	OPTICAL RESULT
165	.With claimed manipulation of container to effect reaction or use of container of claimed optical structure
166	.Including reagent preparation
167	.Including gas absorption in liquid or solid
168	..Liquid sorbent
169	.With reagent in absorbent or bibulous substrate
170	..Plural superposed layers
171	.Spectrum analysis (e.g., flame photometry, etc.)
172	.With fluorescence or luminescence
173	NUCLEAR MAGNETIC RESONANCE, ELECTRON SPIN RESONANCE OR OTHER SPIN EFFECTS OR MASS SPECTROMETRY
174	INCLUDING SAMPLE PREPARATION
175	.Digestion or removing interfering materials
176	.Stabilizing or preserving
177	.Liberation or purification of sample or separation of material from a sample (e.g., filtering, centrifuging, etc.)
178	..Including use of a solid sorbent, semipermeable membrane, or liquid extraction
179	.Dilution
180	.Volumetric liquid transfer
181	.Gaseous sample or with change of physical state
182	ELEMENT OR INORGANIC COMPOUND
183	MISCELLANEOUS

CLASS 437 SEMICONDUCTOR DEVICE MANUFACTURING: PROCESS

DECEMBER 1990

In this schedule, some subclasses are based on groupings of elements in the periodic chart. Below are listed elements in the groups as used in the schedule as of date of publication. The listings of elements is not complete and other elements will be added as they become used in subject matter of Class 437.

Group II: Zn(Zinc), Cd(Cadium), Hg(Mercury)
Group III: B(Boron), Al(Aluminum), Ga(Gallium), In(Indium)
Group IV: C(Carbon), Si(Silicon), Ge(Germanium), Sn(Tin), Pb(Lead)
Group V: N(Nitrogen), P(Phosphorus), As(Arsenic), Sb(Antimony), Bi(Bismuth)
Group VI: O(Oxygen), S(Sulfur), Se(Selenium), Te(Tellurium)

1 MAKING DEVICE HAVING ORGANIC SEMICONDUCTOR COMPONENT
2 MAKING DEVICE RESPONSIVE TO RADIATION
3 .Radiation detectors, e.g., infrared, etc.
4 .Composed of polycrystalline material
5 .Having semiconductor compound
6 MAKING THYRISTOR, E.G., DIAC, TRIAC, ETC.
7 INCLUDING CONTROL RESPONSIVE TO SENSED CONDITION
8 INCLUDING TESTING OR MEASURING
9 INCLUDING APPLICATION OF VIBRATORY FORCE
10 INCLUDING GETTERING
11 .By ion implanting or irradiating
12 .By layers which are coated, contacted, or diffused
13 .By vapor phase surface reaction
14 THERMOMIGRATION
15 INCLUDING FORMING A SEMICONDUCTOR JUNCTION
16 .Using energy beam to introduce dopant or modify dopant distribution
17 ..Neutron, gamma ray or electron beam
18 ..Ionized molecules
19 ..Coherent light beam
20 ..Ion beam implantation
21 ...Of semiconductor on insulating substrate
22 ...Of semiconductor compound
23 ....Light emitting diode (LED)
24 ...Providing nondopant ion including proton
25 ...Providing auxiliary heating
26 ...Forming buried region
27 ...Including multiple implantations of same region
28 ....Through insulating layer
29 .....Forming field effect transistor (FET) type device
30 ....Using same conductivity type dopant
31 ....Forming bipolar transistor (NPN/PNP)
32 .....Lateral bipolar transistor
33 .....Having dielectric isolation
34 ....Forming complementary MOS (metal oxide semiconductor)
35 ...Using oblique beam
36 ...Using shadow mask
37 ...Having projected range less than thickness of dielectrics on substrate
38 ...Into shaped or grooved semiconductor substrate
39 ...Involving Schottky contact formation
40 ...Forming pair of device regions separated by gate structure, i.e., FET
41 ....Self-aligned
42 .....Gate structure constructed of diverse dielectrics
43 .....Gate surrounded by dielectric layer, e.g., floating gate, etc.
44 .....Adjusting channel dimension
45 .....Active step for controlling threshold voltage
46 ...Into polycrystalline or polyamorphous regions
47 ...Integrating active with passive devices
48 ...Forming plural active devices in grid/arrays, e.g., RAMS/ROMS, etc.
49 ....Having multi-level electrodes
50 ...Forming electrodes in laterally spaced relationships
51 .Making assemblies of plural individual devices having community feature, e.g., integrated circuit, electrical connection, etc.
52 ..Memory devices
53 ..Charge coupled devices (CCD)
54 ..Diverse types
55 ...Integrated injection logic (I2L) circuits
56 ...Plural field effect transistors (CMOS)
57 ....Complementary metal oxide having diverse conductivity source and drain regions
58 ....Having like conductivity source and drain regions
59 ...Including field effect transistor
60 ...Including passive device
61 .Including isolation step
62 ..By forming total dielectric isolation
63 ..By forming vertical isolation combining dielectric and PN junction
64 ..Using vertical dielectric (air-gap/insulator) and horizontal PN junction
65 ...Grooved air-gap only
66 ....V groove
67 ...Grooved and refilled with insulator
68 ....V groove
69 ...Recessed oxide by localized oxidation
70 ....Preliminary formation of guard ring
71 ....Preliminary anodizing
72 ....Preliminary etching of groove
73 .....Using overhanging oxidation mask and pretreatment of recessed walls
74 ..Isolation by PN junction only
75 ...By diffusion from upper surface only
76 ...By up-diffusion from substrate region and down diffusion into upper surface layer
77 ....Substrate and epitaxial regions of same conductivity type, i.e., P or N
78 ...By etching and refilling with semiconductor material having diverse conductivity
79 ...Using polycrystalline region
80 .Shadow masking
81 .Doping during fluid growth of semiconductor material on substrate
82 ..Including heat to anneal

INCLUDING FORMING A SEMICONDUCTOR JUNCTION
.Doping during fluid growth of semiconductor material on substrate
83 ..Growing single crystal on amorphous substrate
84 ..Growing single crystal on single crystal insulator (SOS)
85 ..Including purifying stage during growth
86 ..Using transitory substrate
87 ..Using inert atmosphere
88 ..Using catalyst to alter growth process
89 ..Growth through opening
90 ...Forming recess in substrate and refilling
91 ....By liquid phase epitaxy
92 ...By liquid phase epitaxy
93 ..Specified crystal orientation other than (100) or (111) planes
94 ..Introducing minority carrier life time reducing dopant during growth, i.e., deep level dopant Au(Gold), Cr(Chromium), Fe(Iron), Ni(Nickel), etc.
95 ..Autodoping control
96 ...Compound formed from Group III and Group V elements
97 ..Forming buried regions with outdiffusion control
98 ...Plural dopants simultaneously outdiffusioned
99 ..Growing mono and polycrystalline regions simultaneously
100 ..Growing silicon carbide (SiC)
101 ..Growing amorphous semiconductor material
102 ..Source and substrate in close-space relationship
103 ...Group IV elements
104 ...Compound formed from Group III and Group V elements
105 ..Vacuum growing using molecular beam, i.e., vacuum deposition
106 ...Group IV elements
107 ...Compound formed from Group III and Group V elements
108 ..Growing single layer in multi-steps
109 ...Polycrystalline layers
110 ...Using modulated dopants or materials, e.g., superlattice, etc.
111 ...Using preliminary or intermediate metal layer
112 ...Growing by varying rates
113 ..Using electric current, e.g., Peltier effect, glow discharge etc.
114 ..Using seed in liquid phase
115 ...Pulling from melt
116 ....And diffusing
117 ..Liquid and vapor phase epitaxy in sequence
118 ..Involving capillary action
119 ..Sliding liquid phase epitaxy
120 ...Modifying melt composition
121 ...Controlling volume or thickness of growth
122 ...Preliminary dissolving substrate surface
123 ...With nonlinear slide movement
124 ...One melt simulataneously contacting plural substrates
125 ..Tipping liquid phase epitaxy
126 ..Heteroepitaxy
127 ...Multi-color light emitting diode (LED)
128 ...Graded composition
129 ...Forming laser
130 ...By liquid phase epitaxy
131 ...Si(Silicon) on Ge(Germanium) or Ge(Germanium) on Si(Silicon)
132 ...Either Si(Silicon) or Ge(Germanium) layered with or on compound formed from Group III and Group V elements
133 ...Compound formed from Group III and Group V elements on diverse Group III and Group V including substituted Group III and Group V compounds
134 .By fusing dopant with substrate, e.g., alloying, etc.
135 ..Using flux
136 ..Passing electric current through material
137 ..With application of pressure to material during fusing
138 ..Including plural controlled heating or cooling steps
139 ..Including diffusion after fusion step
140 ..Including additional material to improve wettability or flow characteristics
141 .Diffusing a dopant
142 ..To control carrier lifetime, i.e., deep level dopant Au(Gold), Cr(Chromium), Fe(Iron), Ni(Nickel), etc.
143 ..Al(Aluminum) dopant
144 ..Li(Lithium) dopant
145 ..Including nonuniform heating
146 ..To solid state solubility concentration
147 ..Using multiple layered mask
148 ...Having plural predetermined openings in master mask
149 ..Forming partially overlapping regions
150 ..Plural dopants in same region, e.g., through same mask opening, etc.
151 ...Simultaneously
152 ..Plural dopants simultaneously in plural regions
153 ..Single dopant forming plural diverse regions
154 ...Forming regions of different concentrations or of different depths
155 ..Using metal mask
156 ..Outwardly
157 ..Laterally under mask
158 ..Edge diffusion by using edge portion of structure other than masking layer to mask
159 ..From melt
160 ..From solid dopant source in contact with substrate
161 ...Using capping layer over dopant source to prevent out diffusion of dopant
162 ...Polycrystalline semiconductor source
163 ...Organic source
164 ...Glassy source or doped oxide
165 ..From vapor phase
166 ...In plural stages
167 ...Zn(Zinc) dopant
168 ...Solid source in operative relation with semiconductor material
169 ....In capsule type enclosure
170 DIRECTLY APPLYING ELECTRICAL CURRENT
171 .And regulating temperature
172 .Altering or pulsed current
173 APPLYING CORPUSCULAR OR ELECTROMAGNETIC ENERGY
174 .To anneal
175 FORMING SCHOTTKY CONTACT
176 .On semiconductor compound
177 ..Multi-layer elctrode

FORMING SCHOTTKY CONTACT
178 .Using Platinum Group silicide, i.e., silicide of Pt(Platinum), Pd(Palladium), Rh(Rhodium), Ru(Ruthenium),Ir(Iridium), Os(Osmium)
179 .Using metal, i.e., Pt(Platinum), (Pd(Palladum), Rh(Rhodium, (Ru(Rutenium), Ir(Iridium, Os(Osmium), Au(Gold), Ag(Silver
180 MAKING OR ATTACHING ELECTRODE ON OR TO SEMICONDUCTOR, OR SECURING COMPLETED SEMICONDUCTOR TO MOUNTING OR HOUSING
181 .Forming transparent electrode
182 .Forming beam electrode
183 .Forming bump electrode
184 .Electrode formed on substrate composed of elements of Group III and Group V semiconductor compound
185 .Electrode formed on substrate composed of elements of Group II and Group VI semiconductor compound
186 .Single polycrystalline electrode layer on substrate
187 .Single metal layered electrode on substrate
188 ..Subsequently fusing, e.g., alloying, sintering, etc.
189 .Forming plural layered electrode
190 ..Including central layer acting as barrier between outer layers
191 ..Of polysilicon only
192 ..Includng refractory metal layer of Ti(Titanium), Zr(Zirconium), Hf(Hafnium), V(Vanadium), Nb(Niobium), Ta(Tantalum), Cr(Chromium), Mo(Molybdenum), W(Tungsten)
193 ..Including polycrystalline silicon layer
194 ..Including Al(Aluminum) layer
195 ..Including layer separated by insulator
196 .Forming electrode of alloy or electrode of a compound of Si(Silicon)
197 ..Al(Aluminum) alloy
198 ...Including Cu(Copper)
199 ...Including Si(Silicon)
200 ..Silicide of Ti(Titanium), Zr(Zirconium), Hf(Hafnium), V(Vanadium), Nb(Niobium), Ta(Tantalum), Cr(Chromium), Mo(Molybdenum), W(Tungsten)
201 ..Of plantinum metal group Ru(Ruthenium), Rh(Rhodium), Pd(Palladium), Os(Osmium, Ir(Iridium), Pt(Platinum)
202 ..By fusing metal with semiconductor (alloying)
203 .Depositing electrode in preformed recess in substrate
204 .Including positioning of point contact
205 .Making plural devices
206 ..Using strip lead frame
207 ...And encapsulating
208 ..Stacked array, e.g., rectifier, etc.
209 .Securing completed semiconductor to mounting, housing or external lead
210 ..Including contaminant removal
211 ..Utilizing potting or encapsulating material only to surround leads and device to maintain position, i.e., without housing
212 ...Including application of pressure
213 ...Glass material
214 ..Utilizing header (molding surface means)
215 ..Insulating housing
216 ...Including application of pressure
217 ...And lead frame
218 ...Ceramic housing
219 ...Including encapsulating
220 ..Lead frame
221 ..Metallic housing
222 ...Including applicaion of pressure
223 ...Including glass support base
224 ...Including encapsulating
225 INCLUDING COATING OR MATERIAL REMOVAL, E.G., ETCHING, GRINDING, ETC.
226 .Substrate dicing
227 ..With a perfecting coating
228 .Coating and etching
229 .Of radiation resist layer
230 .By immersion metal plating from solution, i.e., electroless plating
231 .By spinning
232 .Elemental Se(Selenium) substrate or coating
233 .Of polycrystalline semiconductor material on substrate
234 ..Semiconductor compound or mixed semiconductor material
235 .Of a dielectric or insulatve material
236 ..Containing Group III atom
237 ...By reacting with substrate
238 ..Monoxide or dioxide of Ge(Germanium) or Si(Silicon)
239 ...By reacting with substrate
240 ...Doped with impurities
241 ..Si(Silicon) and N(Nitrogen)
242 ...By chemical reaction with substrate
243 ..Directly on semiconductor substrate
244 ...By chemical conversion of substrate
245 .Comprising metal layer
246 ..On metal
247 TEMPERATURE TREATMENT MODIFYING PROPERTIES OF SEMICONDUCTOR, E.G., ANNEALING, SINTERING, ETC.
248 .Heating and cooling
249 INCLUDING SHAPING
250 MISCELLANEOUS
****
CROSS-REFERENCE ART COLLECTIONS
****
900 UTILIZING PROCESS EQUIVALENTS OR OPTIONS
901 MAKING PRESSURE SENSITIVE DEVICE
902 MAKING DEVICE HAVING HEAT SINK
903 MAKING THERMOPILE

CLASS 439 ELECTRICAL CONNECTORS

DECEMBER 1990

1 INTERRELATED CONNECTORS RELATIVELY MOVABLE DURING USE
2 .And antivibration mounting
3 .With means to apply lubricant or coolant
4 .With storage means for flaccid conductor
5 .Having liquid contact
6 .Universal movement
7 ..Having "nonsolid" contact, e.g., fibrous or pelletized bed
8 ..Parts comprisng ball and socket
9 ..One part having flexible contact fingers
10 .Compound movement, e.g., rotary + linear
11 .Movement about axis
12 ..Including stacked plates used as conductor
13 ..Rotary movement
14 ...Between cable and screw-type contact shell
15 ...Part comprising hand wheel, e.g., steering wheel
16 ...Part comprising vehicle wheel
17 ...Including ball or roller bearing used as conductor
18 ...Including annular contact
19 ....Rolling contact
20 ....Coaxial annular contacts
21 .....Concentric
22 .....Having axially facing contact surface
23 .....Having radially outwardly facing contact surface
24 ......Three or more such contacts
25 ....Engaged by resiliently biased contact
26 ....Laterally biased finger contact
27 ....Having axially facing contact surface
28 ....Having radially outwardly facing contact surface
29 ...Including resiliently biased contact
30 ....Contact having resilient shank
31 ..Hinge
32 .Linear movement
33 ..Expansion joint
34 WITH VEHICLE STRUCTURE
35 .Connection to towed vehicle
36 .Connection to lamp
37 WITH WEARING APPAREL
38 WITH MAGNET
39 .To urge mating connectors together
40 .To urge connector to supporting surface
41 WITH VACUUM APPLYING MEANS. E.G., SUCTION CUP
42 .To urge mating connectors or contacts together
43 WITH SELECTABLE CIRCUIT, E.G., PLUG BOARD
44 .Planar circuit overlying a second planar circuit, both adapted to be electrically connected
45 ..Connected by transversely inserted pin
46 ...Pin having selection feature
47 ...Panel member having planar surface for supporting circuit and parallel surface for supporting second circuit
48 ...Linear conductors of first surface; linear, normally disposed, conductors in second circuit
49 .Including three or more contacts adapted to be selectively interconnected
50 ..Panel having planar contact array with mating panel having mating planar contact array
51 ...Mounted for controlled movement with respect thereto
52 .Coupling part including repositionable contact
53 .Coupling part with selectably oriented mating part
54 .Test panel
55 PREFORMED PANEL CIRCUIT ARRANGEMENT, E.G., PCB, ICM, DIP, CHIP, WAFER, ETC.
56 .Connection to lamp or electron tube
57 ..Movable about its axis
58 ..Electron tube moved perpendicularly to panel circuit
59 .With mating connector which receives panel circuit edge
60 ..Contacts at different distances from lead panel circuit edge
61 ..Receives plural panel circuit edges
62 ..Panel mounted connector which receives edge of panel circuit
63 .For receiving coaxial connector
64 .With guide for directing panel circuit movement
65 .With provision to conduct electricity from panel circuit to another panel circuit
66 ..Conductor is compressible and to be sandwiched between panel circuits
67 ..Flexible panel
68 ..Micro panel circuit arrangement, e.g., ICM, DIP, chip, wafer, etc.
69 ...Overlying second, coextensive micro panel circuit arrangement
70 ...Dual inline package (DIP)
71 ....Leadless
72 ....Contacts extending parallel with DIP at contact surface
73 ....With external, contact enhancing clamp
74 ..Overlying second preformed panel circuit, both adapted to be electrically connected
75 ...Connected by transversely inserted pin
76 .Within distinct housing spaced from panel circuit arrangement
77 .Flexible panel
78 .Distinct contact secured to panel circuit
79 ..Panel circuit adapted to move along panel plane relative to coupling part for insertion of male contact
80 ...Resilient contact or to receive resilient contact
81 ..Resilient contact or to receive resilient contact
82 ...In or for use in panel circuit aperture
83 ..Contact soldered to panel circuit
84 ..Contact secured to panel circuit by deformation
85 .Of layers of insulation
86 INCLUDING ELASTOMERIC OR NONMETALLIC CONDUCTIVE PORTION
87 .Rigid carbon conductive member
88 .Inductive shielding or arc suppressing means
89 ..Sealing with coupled connector
90 ..Between parallel conductors
91 .Adapted to be sandwiched between preformed panel circuit arrangements
92 WITH CIRCUIT CONDUCTORS AND SAFETY GROUNDING PROVISION
93 .And means to block access to power contact surface

WITH CIRCUIT CONDUCTORS AND SAFETY GROUNDING PROVISION
94 .Uninterrupted support rail or contact, or for interfitting with uninterrupted support rail or contact
95 .Grounding to connector container or housing
96 ..Pliable conductor for making grounding connection of connector to container
97 ..By means of connector mounting screw
98 .Grounding to conductive sheath of cable
99 ..Portion of connector beneath conductive sheath
100 .Grounding to pipe, rod or conduit
101 .Direct grounding of coupling part member passing into aperture
102 ..Prong having locking provision, e.g., bayonet
103 ..Movable or removable ground prong
104 ...Pivotable or rotatable about transverse axis
105 ..Adapter
106 ..Three-prong coupling part including ground prong, or receptacle
107 ...Duplex receptacle
108 .Grounding of coupling part
109 INTERMEDIATE MEMBER BETWEEN PRONG AND ENCOMPASSING PLANAR GROUND
110 UNINTERRUPTED SUPPORT RAIL OR UNINTERRUPTED CONTACT
111 .Arcuate, bendable or pliant rail or contact
112 ..Circular rail or contact
113 .With access restricting cover
114 ..Bus duct
115 .With means to join tandem rails or tandem contacts
116 .With coupling movement-actuating means or retaining means in addition to contact of coupling part
117 ..Uninterrupted contact accessible by mating contact moving in a first, then a lateral direction
118 ...Bayonet coupling part movable about axis
119 .With mating part having mating connector portion and another connector portion electrically connected thereto, e.g., adapter
120 .Molding type; e.g., baseboard
121 FOR INTERFITTING WITH UNINTERRUPTED SUPPORT RAIL OR UNINTERRUPTED CONTACT
122 .Coupling part with actuating means urging contact surface to move with respect to rest of connector and toward mating contact
123 CANDLE SIMULATION TYPE
124 .Adapter
125 HAVING SPARK OR GLOW PLUG COVER
126 .Inductive shielding; e.g., radio disturbance
127 .With distinct securing means
128 .Having removable closure
129 MAGNETO POST TYPE
130 MULTICONTACT INTERNAL COMBUSTION ENGINE DISTRIBUTOR CAP OR MULTICONTACT MATING PART
131 CONNECTOR MOVABLE BETWEEN ACCESSIBLE AND INACCESSIBLE POSITIONS
132 .With fluid pressure operating or control means
133 WITH UNAUTHORIZED CONNECTION PREVENTER, E.G., KEY OR COMBINATION LOCK
134 .Prong cover
135 WITH CONTACT PREVENTER OR RETRACTABLE COVER PART
136 .Movably mounted
137 ..Moved by mating connector
138 ...Moved about an axis
139 ....Connector moved rectilinearly for engagement, preventer or cover moved about axis parallel to direction of connector movement
140 ...Connector moved rectilinearly for engagement, preventer or cover moved rectilinearly and parallel thereto
141 ....Retractable sheath
142 ..Movable about axis
143 ...To misalign aperture with contact
144 ...With connector retaining means in addition to contact of connector
145 ..Movable to misalign aperture with contact
146 .Adapted to fit between contacts of first and second coupled connectors (e.g., power measuring meter)
147 .With connector retaining means in addition to contact of connector
148 .Dummy connector
149 .Prong cover
150 ..Protector for electron tube pin
151 COUPLING PART COMBINED WITH MEANS TO ALLOW REPOSITIONING OF MATING PART FOR ENGAGEMENT WITH DIFFERENT CONTACTS ON MATING PART; E.G., FLASH CUBE
152 WITH COUPLING SEPARATOR
153 .Including retainer or joiner
154 ..Destructible retainer
155 ..Distinct from separator
156 ...Coaxial contacts, center one comprising separator, e.g., photo flash
157 ..Integral retainer and cam separator
158 .Means to utilize direct fluid action
159 .Nonconducting pusher
160 ..Including handle for direct manual urge to separate
161 HEAT RESPONSIVE CONTACT PRESSURE CONTROL
162 WITH RELATIVELY GUIDED MEMBERS AND INTERMEDIATE PLIABLE CONDUCTOR
163 .Frangible pliable conductor; e.g., umbilical break-away
164 .Relatively movable about axis
165 ..Hinge
166 CONVERTIBLE BY INTERNAL CHANGE TO SELECTIVELY COOPERATE WITH A DIFFERENT CONTACT
167 .Connector for power measuring meter
168 .Lamp or electron tube socket or base
169 .Test probe
170 .Coupling part
171 ..Including repositionable contact
172 ...To nonuse or distinct use (e.g., male/female) position
173 ...To fit differently oriented contact
174 .Including repositionable contact
175 ..To fit different size contact
176 FEMALE COUPLING PART CONVERTIBLE TO MALE COUPLING PART BY ADDITION OF PRONG
177 COUPLING PART CONVERTIBLE TO DISTINCT SHAPE BY ADDITION OF NONREMOVABLE ELEMENT OR BY REMOVAL OF NONREUSABLE ELEMENT
178 FLUENT CONDUCTING MATERIAL
179 .Liquid
180 CONTACT SEPARATION BY SNAP OR QUICK-BREAK ACTION
181 INCLUDING ARC SUPPRESSING OR EXTINGUISHING MEANS
182 .Lamp or electron tube socket
183 .By arc suppressing or extinguishing environment
184 ..Gas
185 ...Gas accomodation by relatively moving parts

INCLUDING ARC SUPPRESSING OR EXTINGUISHING MEANS
186 .Contact encasing chamber
187 ..Movable relative to contact
188 HAVING CIRCUIT INTERRUPTING PROVISION EFFECTED BY MATING OR HAVING "DEAD" CONTACT ACTIVATED AFTER MATING
189 WITH OR COMPRISING REMOVABLE CIRCUIT MODIFYING ARRANGEMENT
190 HAVING RETAINER OR PASSAGEWAY FOR FLUENT MATERIAL
191 .Fluent material transmission line
192 ..Connector electrically joined to line
193 ..For use with line heater
194 ..Electrical connection within line
195 ..Connector/line assembly coupled to mating connector/line assembly by movement about an axis less than 360 degrees
196 .Liquid material to dissipate, remove, or block the flow of heat
197 .For urging contact toward or away from mating contact
198 .Gas retainer
199 .Liquid retainer
200 ..Impregnated material
201 ..Coupling part having contact encompassed by liquid storage chamber
202 ...Contact comprising tapered post or mating part (e.g., battery post)
203 ..Crimped end terminal
204 ..Encompassing wire
205 .Passageway allowing escape of fluent material during mating
206 .Vent
207 WITH CONDUIT OR DUCT
208 .Enclosed conductor electrically connected thereto
209 .Molding type (e.g., baseboard)
210 .Means to join conduit, duct or conductor sections
211 .Including receptacle
212 BUS DUCT
213 .Means to join bus ducts
214 COMPRISING COUPLING PART OF INDETERMINATE LENGTH LATERALLY OF CONNECTION
215 .Included in prefabricated building panel (e.g., floor, ceiling, wall)
216 .Molding type (e.g., baseboard)
217 ALTERNATIVELY CONNECTED
218 .Coupling part
219 ..Test probe
220 ..Lamp or electron tube socket or base
221 ..Contact comprising prong
222 ..Receptacle having distinct openings for distinct prongs
223 ..Receptacle for prong of first lateral dimension or for prong of second lateral dimension
224 .To receive contact from first direction or from second axially distinct direction
225 CONTACT TAP BETWEEN NORMALLY ENGAGED COUPLING PARTS
226 COUPLING PART TO RECEIVE FLUORESCENT OR NEON LAMP
227 .Having curved tubular envelope
228 ..Plural lamps
229 ..Circular lamp
230 .With sealing element or material for cooperation with coupled lamp
231 .With contact for starting switch
232 .With additional retaining or locking means for coupled connector and lamp
233 ..Removable
234 .Adjustably mounted
235 .Plural lamps
236 .Adapter
237 .Separately biased connector
238 ..Pivotable connector
239 .With provision for transverse receipt of lamp contact
240 ..By rotation of lamp about axis
241 ...Contact comprising laterally resilient spring finger
242 .With provision for axial receipt of lamp contact
243 ..Axially biased contact
244 ...Coil spring with provision to utilize conductivity thereof
245 COUPLING PART HAVING HELICALLY DISPOSED STRANDLIKE CONTACT
246 SELF ALIGNING CONTACT
247 .Contact mounted in floating nonconductive holder
248 ..Connector including housing or panel to support holder
249 .Receptacle having two directly opposed contact arms and open sides between arms
250 ..To receive fuse
251 ..To receive rigid bar type connector, e.g.,busbar
252 .Tubular socket
253 SCREW COUPLING PART ENGAGED OR DISENGAGED WITHOUT ROTARY MOTION
254 .Having radially movable thread means
255 ..By axially moving wedge or cam
256 ..Biased toward mating thread
257 ...Socket
258 COUPLING PART WITH LATCHING MEANS AND TETHER OR EXPLOSIVE TO UNLATCH FROM MATING PART
259 COUPLING PART WITH ACTUATING MEANS URGING CONTACT TO MOVE LATERALLY WITH RESPECT TO REST OF COUPLING PART AND TOWARD MATING PART
260 .Having open slot for receiving preformed panel circuit arrangement or tape cable
261 .Pivotable means, one portion actuating contact surface, another portion retaining coupling part
262 .Urging stacked contacts to move with respect to rest of coupling part
263 .Contractile receptacle
264 ..For dual inline coupling part, e.g., DIP
265 .Expandable contact or spreadable contacts
266 COUPLING PART HAVING HANDLE OR MEANS TO MOVE CONTACT LATERALLY TO PERMIT UNCOUPLING
267 .Having open slot for receiving panel circuit arrangement
268 .Expandable, prong receiving socket
269 .To move contact with respect to similar contact
270 .Movable latching prong or latch on prong
271 WITH SEALING ELEMENT OR MATERIAL FOR COOPERATION WITH COUPLED CONNECTOR, E.G., GASKET
272 .Sealing element having cross section that is neither circular nor rectangular
273 ..Tapered cross-section
274 ..Combined with distinct cable sheath sealing element or material
275 .Combined with distinct cable sheath sealing element or material
276 .Including chamber for contact potting

WITH SEALING ELEMENT OR MATERIAL FOR COOPERATION WITH COUPLED CONNECTOR, E.G., GASKET
277 .With helically threaded coupling movement-actuating means or retaining means in addition to contact of coupling part
278 HAVING RESILIENT HOUSING FOR SEALING WITH COUPLED CONNECTOR
279 .Combined with distinct cable sheath sealing element or material
280 .Connector comprising lamp or electron tube socket or base
281 .Having interengageable sealing extension
282 .Housing comprising resilient latching means
283 COUPLED CONNECTOR TO SEALINGLY FIT WITH FIRST CONNECTOR
284 ADAPTED TO COOPERATE WITH DUPLICATE CONNECTOR
285 .Sequentially connected contacts, e.g., zipper type
286 .Engaged by axial and pivotal movements (e.g., bayonet)
287 .Engaged by lateral movement
288 ..Pivotal
289 .Butt coupling
290 .Contact intermeshable with duplicate mating contact
291 ..Plural, electrically distinct contacts
292 .With coupling movement retaining means in addition to contact of coupling part
293 ..Resilient
294 ..With relatively rotatable movement-actuating or retaining ring
295 .Resiliently biased contact
296 WITH COUPLING MOVEMENT-ACTUATING MEANS OR RETAINING MEANS IN ADDITION TO CONTACT OF COUPLING PART
297 .With guiding means for removable automobile radio or record player
298 ..Including resilient latching retaining means
299 .With coupling part retained in connection with mating part by presence of distinct coupling part
300 ..Adapter
301 .Retaining means requiring destruction of element before separation
302 ..Threaded coupling part
303 ...Requiring destruction of lamp envelope
304 .Including lock for retaining means (e.g., key or combination lock or requiring "special" tool)
305 ..Magnetically operated latch
306 ..Threaded coupling part
307 ...Having freely rotatable component to prevent unthreading
308 ...Retaining means entirely exterior of coupling part
309 ...Retaining means comprising part of female coupling part
310 .Retaining means with distinct movement-actuating means to move coupling part axially
311 ..For bayonet (breech) type locking ring
312 .Coupling part with relatively pivotable concentric movement-actuating or retaining ring
313 ..Coupling part having appurtenant means for supporting other structure
314 ..Retaining bayonet
315 ...Having coupling indicating indicia or signal
316 ...Bayonet lug on axially extending finger
317 ...With means to move ring
318 ...With means to prevent bayonet release
319 ...With spring to longitudinally bias movement-actuating or retaining ring
320 ..Threaded ring or ring adapted to engage threaded mating part
321 ...With means to prevent unthreading
322 ...Coupling part having concentric contacts
323 ...Adapter
324 .Male contact pin with blockable retaining means at tip, e.g., Modrey
325 .Coupling part for receiving edge of planar board moving parallel to plane
326 ..With angular mating
327 ..Retaining means exterior of slot
328 ...Fingerlike grasping means comprising portion of coupling part
329 .For direct connection to a flexible tape or printed circuit board
330 .For dual inline package (DIP)
331 ..Movement-actuating or retaining means comprises cover press
332 .Bayonet coupling part movable about its axis
333 ..With distinct means to secure movement-actuating or retaining means against movement
334 ..Coupling part including appurtenant means for supporting other structure
335 ..Comprising cylindrical shell having lug receiving slot
336 ...Lamp or electron tube socket
337 ..Having axially extending bayonet contact
338 .Including movement of coupling part about axis
339 ..Threaded coupling part
340 ...With socket contact transversely engaging male threaded part
341 ..Pivotal movement
342 .Including compound movement of coupling part
343 ..Including appurtenant means for supporting other structure
344 .Having push-pull contacts spaced along only one planar side wall transverse to longitudinal engagement axis (e.g., telephone jack or plug)
345 .Retaining means
346 ..Adapted to engage contact of mating part
347 ..Laterally moving slide
348 ..Laterally moving roller or ball
349 ..Toroidal band urged radially of connection or adapted to be compressed for retention, e.g., O-ring
350 ..Finger or stretchable sleeve resiliently urged laterally of connection
351 ...Coupling part having appurtenant means for supporting other structure
352 ...With additional means to cause or prevent unlatching
353 ...Finger inwardly biased during coupling or uncoupling
354 ....Rearwardly extending finger
355 ...Plural independent coupling parts
356 ...Coupling part comprising lamp or electron tube socket
357 ...Resilient finger
358 ....With graspable portion

WITH COUPLING MOVEMENT-ACTUATING MEANS OR RETAINING MEANS IN ADDITION TO CONTACT OF COUPLING PART
.Retaining means
359 ..Retaining means comprising helically threaded member
360 ...For lamp or electron tube
361 ...Including appurtenant means for supporting other structure
362 ...Parallel to connection
363 ....For retaining tubular conductor in electrical contact
364 ....Passing centrally through coupling part
365 ....Adapter
366 ..Retaining functioning electrical component (e.g., tube, lamp, fuse, battery, etc.)
367 ..Protective enclosure
368 ..Single means retaining plural distinct coupling parts and mating parts together
369 ..For unsupported coupling part and unsupported mating part, (e.g., connecting extension cords)
370 ..Resiliently urging coupling part and mating part together
371 ..Pliable band, conductor sheath engaging means, or adhesive
372 ..Rotatable retaining means, pivotable retaining means, or actuated gripping retaining means
373 ..Wall or outlet mounted
374 WITH GUIDING MEANS FOR MATING OF COUPLING PART
375 .Lamp or electron tube socket or base
376 .For constrained pivotal or plural movement coupling
377 .For guiding side of movable panel, e.g., circuit board
378 .Rodlike guide member extending in coupling direction or tubular passage for receiving rodlike guide member
379 ..With plural contacts circularly disposed about guide opening or rodlike member, e.g., electron tube base
380 ..Tubular passage receives contact
381 ...Bare contact
382 INCLUDING VIBRATION CUSHIONING OR ABSORBING MEANS
383 .Adapted to fit between opposing faces of mated connectors
384 .For supporting connector
385 ..By gripping mating connector
386 WITH COMMONING MEANS FOR RETURN GROUND
387 CONTACT COMPRISING CUTTER (SEVERING, PIERCING, ABRADING, SCRAPING, BREAKING OR TEARING)
388 .Adapted to engage tapered post (e.g., storage battery terminal)
389 .Insulation cutter
390 ..Adapted to engage liquid, granular or metallic wool conductor
391 ..Conductor sheath piercing
392 ...With means to cut off excess end of conductor
393 ...Cutter piercing insulation parallel to conductor axis
394 ...Coaxial cable
395 ...Having slot edge for cutting insulation
396 ....With additional diverse sharp cutting edge
397 ....Contact engages conductor in at least two locations spaced along conductor axis
398 .....Conductor engaging slot extends through bight of contact
399 .....With stress relieving means for conductor to terminal joint
400 .....With distinct surface holding conductor in slot
401 ....Contact engages conductor at axial location and engages insulation at second axial location to relieve stress at conductor to terminal joint
402 ....Single conductive member having plural slots formed by three or more fingers for connecting plural conductors
403 .....From different margins of contact
404 ....Plural contacts, each formed by slot between pair of fingers
405 .....Longitudinally and laterally staggered contacts
406 ....Contact is portion of elongated channel
407 .....With stress relieving means for conductor to terminal joint
408 ....More than one conductor in same slot
409 ...Pivoting cutter, pivoting means to operate cutter, or pivoting means to move conductor against cutter
410 ....Pivoting cutter
411 ...Comprising screw, screw operated cutter, or screw means to move conductor against cutter
412 ....Screw means to move conductor against cutter
413 .....Single element cutting and connecting plural conductors
414 .....Lamp or electron tube socket or base
415 ....Screw threads pierce insulation
416 ....Piercing means comprising end of screw
417 ...Rectilinearly moving operator
418 ...Contact member cutting to contact first conductor and contacting second conductor
419 ....Lamp or electron tube socket or base
420 ...Flexibly tensioned strap
421 ...Crimped
422 ....For use with tape cable
423 ....Cutting by peripheral end of sheath encircling crimped contact
424 ....Cutting by stamped out tooth of sheath encircling crimped contact
425 ...Nail like cutter
426 ..Passing through insulation to make contact
427 .Axially penetrating the elongated conductor
428 ..Comprising screw or screw operated means
429 ...Screw threads engage conductor
430 ..Contact permanently secured to a conductor, e.g., crimped, soldered, etc.
431 .Comprising screw, screw operated cutter, or screw means to move conductor against cutter
432 ..Screw operated pivoted cutter
433 ..Annular cutter
434 .Annular cutter
435 .U-shaped clamp
436 .Resiliently biased
437 ..Finger
438 ...Resilient finger
439 ....Plural fingers
440 ....Spaced along longitudinal axis of engagement

	CONTACT COMPRISING CUTTER (SEVERING, PIERCING, ABRADING, SCRAPING, BREAKING OR TEARING)
	.Resiliently biased
	..Finger
	...Resilient finger
441	....Adapted to grip upon withdrawal of mating part
442	.Crimped
443	.Having slot edge for cutting
444	.Piercing into support structure
445	WITH OR HAVING FLEXIBLE GUARD OR SUPPORT FOR CABLE OR CONDUCTOR
446	.Pivotal
447	.Resilient
448	..Coil spring concentric with cable or conductor
449	WITH STRESS RELIEVING MEANS FOR CONDUCTOR TO TERMINAL JOINT
450	.Drop cord attaching means, e.g., block or rosette
451	.Including provision to attach tether
452	.Including provision to attach to stress bearing portion of conductor
453	.Enlargement engaging means
454	..Including longitudinally threaded connector part to effect gripping of enlargement
455	..Distinct cable attached enlargement means
456	.Curved conductor path
457	..Means comprising notched or apertured body
458	...Plate-like body
459	..Conductor clamping and shaping
460	.Conductor gripped by or entirely within connector housing
461	..Including longitudinally threaded connector part to effect gripping of conductor
462	...Distinct clamp actuated by threaded connector part
463	..Eccentric gripping means
464	..By pliant, conductor encircling strap
465	..Longitudinally divided connector housing grips conductor
466	...With additional contacts comprising coupling part mating along axis normal to conductor
467	...Hinged connector housing parts
468	..With additional contacts comprising coupling part mating along axis normal to conductor
469	..Transverse conductor gripping screw, or with means to transversely move conductor gripping means
470	.Conductor gripped outside connector housing by distinct clamp
471	..By pliant conductor encircling strap
472	..With means to transversely move conductor gripping means
473	...With additional contacts comprising coupling part mating along axis normal to conductor
474	INCLUDING OVERSTRESS PREVENTING MEANS
475	.Frangible element
476	INCLUDING HANDLE OR DISTINCT MANIPULATING MEANS
477	.For attachment of connector to overhead conductor
478	..With conductor inside handle or manipulating means
479	..Including handle operated screw to effect gripping of overhead conductor
480	.Distinct manipulating means; e.g., hot stick
481	.Randomly manipulated implement
482	..Test probe
483	.Coupling part
484	..Including bale or loop
485	WITH PROVISION TO DISSIPATE, REMOVE, OR BLOCK THE FLOW OF HEAT
486	.Tube clamp
487	.Distinct heat sink
488	WITH INDICATING OR IDENTIFYING PROVISION
489	.Connection indicating provision
490	..Indicator light
491	.Distinct indicia bearing member
492	INCLUDING OR FOR USE WITH TAPE CABLE
493	.For connection to rigid preformed panel circuit arrangement, e.g., pcb
494	.Single cable end into dual rows of contacts
495	.With mating connection region formed by bared cable
496	..Bared cable wrapped into U-shape about insertion projection
497	.With shield, ground conductor or ground commoning means
498	.Plural cables to multicontact connector or single cable branching to plural connectors
499	.Including connector housing surrounding cable
500	ENERGY CELL SUBSTITUTION DEVICE INCLUDING PLURAL CONTACTS (E.G., JUMPER) OR WITH SUPPORT MEANS FOR ENERGY CELL
501	WITH STORAGE MEANS FOR FLACCID CONDUCTOR
502	WITH FLACCID CONDUCTOR AND WITH ADDITIONAL CONNECTOR SPACED THEREALONG
503	.Adapted to interconnect vehicles
504	.Adapted to connect to a battery
505	.And with third connector spaced therealong
506	.Connector comprising pivoted spring biased clamp
507	JUMPER (OR SHORT CIRCUITING COUPLING PART)
508	.Adapted to be used with power measuring meter
509	.Coupling part comprising short circuiting cover or manipulatable supporting means
510	.To bridge post-type contacts
511	.Including plural prongs
512	.Including plural female contacts
513	.Having spring biased contact
514	.Parallel or supplemental nonshielded path
515	PARALLEL OR SUPPLEMENTAL NONSHIELDED PATH
516	WITH PROVISION TO ISOLATE CIRCUITRY BY SEVERANCE OF BRIDGING ELEMENT
517	POWER MEASURING METER COUPLING PART
518	COUPLING PART CONVERTIBLE TO DIFFERENT FORMAT BY SUBSTITUTION OF DIFFERENT CONTACT
519	WITH PROVISION TO RESTRICT ENVIRONMENT EFFECTS
520	.Sacrificial material
521	.Including contact cover or case
522	..Connector comprising or mating with tapered post, e.g., storage battery terminal
523	..Having elastic or heat shrunk cable grip
524	CORROSION RESISTANT CONDUCTING MATERIAL OTHER THAN LEAD
525	FOR DUAL INLINE PACKAGE (DIP)
526	ALIGNING MEANS FOR DUAL INLINE PACKAGE (DIP)
527	WITH SUPPORTING MEANS FOR COUPLING PART
528	.Nonuse covering means, e.g., connector storage means

WITH SUPPORTING MEANS FOR COUPLING PART
529 .And including appurtenant means for supporting other structure
530 ..And including electrical contact for load bearing
531 .Flexible suspension means, e.g., chain or strand
532 .Interfitting with channel or double rail
533 .Also supporting mating part
534 .Universally or pivotally adjustable supporting elements
535 .Outlet box
536 .Supporting means comprising face plate or closure member for outlet box
537 ..For ceiling box
538 .Outlet receptacle mounting flange
539 ..Yoke
540 .Supporting plural independent coupling parts
541 ..Plural lamp or electron tube sockets
542 .Elongated member supporting connector at its extremity or member for interfitting with such an elongated member
543 ..Threaded shaft or tube
544 .Coupling part or mating part extending into panel opening
545 ..With securing by movement of coupling part in plane of panel
546 ...Movement about connective axis; e.g., bayonet
547 ....To preformed panel circuit arrangement
548 ....With sealing to panel
549 ....Resilient gripping of panel
550 ..With opening encircling retaining collar
551 ...Concentrically screw threaded collar
552 ..Including resilient securing
553 ...By resilient member on panel
554 ...Panel circuit arrangement
555 ...With means to deform or lock resilient means
556 ...With sealing to panel
557 ...Laterally flexed finger on coupling part
558 ....Including lamp or electron tube socket
559 ..With sealing to panel
560 ..Coupling part secured to panel by stressing beyond elastic limit
561 ...By stressing panel beyond elastic limit
562 ..Coupling part including panel engaging shoulder
563 ...Comprising detachable or adjustable flange
564 ...Directly attached to panel by elongated fastener in tension (e.g., rivet, bolt or screw)
565 ...With opposed, cooperating panel engaging member
566 ...For permanent attachment to panel, e.g., by welding
567 .Having resilient means engaging panel opening
568 .Coupling part supported by randomly manipulated appliance (e.g., electric iron)
569 .Flange on coupling part
570 ..Plural detachable flanges
571 .Comprising or for use with supporting panel
572 ..Conductor extending into panel opening
573 ..Directly attached to panel by elongated fastener in tension (e.g., rivet, bolt or screw)
574 .Means to clamp
575 ..Resilient clamp
576 .To be engaged by suspension means
577 COMBINED WITH NONELECTRICAL FEATURE
578 INCLUDING OR FOR USE WITH COAXIAL CABLE
579 .Having means for interconnecting outer conductors of three or more cables
580 .For cable having three or more coaxial conductors
581 .Adapted to join cable conductors to different type conductors (e.g., to PCB conductors)
582 .Adapted to secure cables perpendicular to one another or a cable perpendicular to coupling axis
583 .Having screw-threaded or screw-thread operated cable grip
584 ..With radially compressible cable grip
585 .Having crimpable metallic cable conductor grip
586 COUPLING PART INCLUDING FLEXING INSULATION
587 .Sealing
588 ..Resilient, coupling part encircling jacket
589 ..Within rigid coupling part shell
590 .Storage strip for a plurality of coupling parts
591 .Coupling part for use between duplicate coupling parts (e.g., sandwiched between printed circuit boards)
592 .Insulation distorted by or to effect coupling action
593 ..Receptacle adapted to bias contact and cause indrect gripping of mating contact
594 .Resiliently interlocking coupling part with adjacent modular coupling part
595 .Hinged or flexed detent on insulation engaging to secure contact within coupling part housing
596 .Coupling part housing hinged for coupling part assembly
597 .Having plural, laterally spaced, prongs or prong sockets
598 ..Coupling part including shell and assembly of contact and contact supporting insulator
599 ..And multiple insulating components
600 ..Having laterally spaced prongs
601 ...Folded prongs
602 .Lamp or electron tube socket or base
603 .Retaining contact within distinct coupling part housing
604 WITH EXTERNAL CONDUCTOR OR CABLE EMBEDDED IN INSULATIVE SEALING MATERIAL
605 .Lamp or electron tube socket or base
606 .Molded connector body
607 HAVING OR PROVIDING INDUCTIVE OR CAPACITIVE SHIELD
608 .Conductive shielding material individually surrounding or interposed between mutually insulated contacts
609 .Resilient conductive means providing additional electrical path between mating outer shield members
610 .Having means for electrically connecting shield of shielded cable to connector shield member
611 WITH VITREOUS-TYPE ENVELOPE (E.G., BASE OF LAMP OR VACUUM TUBE)
612 .Connector or contact secured to each end of double-ended envelope

WITH VITREOUS-TYPE ENVELOPE (E.G., BASE OF LAMP OR VACUUM TUBE)
613 .Connector of the type having only concentric annular contacts or annular contact disposed concentrically about an axial contact
614 ..Having three or more contacts (e.g., for three-way lamp)
615 ..Having screw-thread-coupling contact
616 .Having bayonet-coupling contact
617 .Plug having spaced, longitudinally engaging, prong-like contacts
618 ..Having three or more circularly arranged contacts (e.g., base of vacuum tube)
619 .Having only two duplicate contacts arranged bilaterally symmetric about longitudinal axis of engagement
620 WITH CIRCUIT COMPONENT OR COMPRISING CONNECTOR WHICH FULLY ENCLOSES CIRCUIT COMPONENT
621 .With or for fuse
622 ..Comprising coupling part housing for enclosing fuse
623 CABLE COMPOSED OF MUTUALLY INSULATED CONDUCTORS HAVING SEPARATELY CARRIED CONDUCTOR END TERMINALS
624 PLURAL CONTACTS DISPOSED INTERMEDIATE ENDS OF CABLE HAVING SHEATH ENCLOSING MUTUALLY INSULATED CONDUCTORS (E.G., SEISMIC TYPE CABLE)
625 WITH INSULATION OTHER THAN CONDUCTOR SHEATH
626 .Plural-contact coupling part
627 ..For direct simultaneous contact with plural battery or cell terminals
628 ..Single-contact connector for interposition between two plural-contact coupling parts (e.g., adaptor)
629 ..For coupling to edge of printed circuit board or to coupling part secured to such edge
630 ...Having elongated slot for receiving edge of printed circuit board
631 ....Plural slots for electrically interconnecting plural printed circuit boards
632 ....Providing direct contact between contacts of printed circuit board and different type conductors
633 ....Having polarizing means
634 ....Having multipart insulating body
635 .....Relative movement of insulating parts alters contact pressure
636 ....Contacts within slot engage opposite sides of printed circuit board
637 .....Separate mutually insulated contacts on opposite longitudinal sides of slot
638 ..Two or more plural-contact coupling parts combined in one integral unit
639 ...Unit includes three or more diverse types of coupling parts
640 ...One coupling part of unit repositionable relative to another thereof
641 ...Unit includes coupling part having screw-thread-coupling contact
642 ....Plug having surrounding screw-thread-coupling contact
643 .....Combined with plural receptacles with each having internal screw-thread-coupling contact
644 .....Combined with receptacle having internal bayonet-coupling contact
645 .....Combined with push-pull-coupling receptacle
646 ......Wherein the receptacle is adapted to receive plug having spaced prong-like contacts
647 ....Receptacle having internal screw-thread-coupling contact combined with plug having spaced, longitudinally engaging, prong-like contacts
648 ....Plural receptacles with each having screw-thread-coupling contact
649 ...Unit includes plural receptacles with each having bayonet-coupling contact
650 ...Unit includes receptacle for receiving plug having spaced, longitudinally engaging, prong-like contacts
651 ....Combined with plug having spaced, longitudinally engaging, prong-like contacts
652 .....Wherein the plug is combined with a plurality of the receptacles adapted to receive spaced-prong plug
653 ....Combined with diverse type of coupling part
654 ....Having receptacle at each of parallel opposed surfaces or sides
655 ...Unit includes plug having spaced, longitudinally engaging, prong-like contacts
656 ..With common means securing plural conductors to separate contacts
657 ...Screw-thread operated
658 ..Having separate through-passageways for enabling securement of intermediate portion of conductors thereto
659 ...Coupling part comprises receptacle having internal screw-thread-coupling contact
660 ..Plural-contact coupling part comprises receptacle or plug
661 ...Having screw-thread-coupling contact
662 ....Screw threads formed on cylindrical or annular contact
663 .....Screw-threaded center-contact type
664 .....Plug having screw-thread-coupling contact and also having resilient or spring-biased center contact
665 .....Having mutilated, irregular, interrupted, or discontinuous contact thread
666 .....Receptacle having internal screw-thread-coupling contact
667 ......And also having resilient or spring-biased center contact
668 ...Having only push-pull-engaging contacts spaced along longitudinal axis of engagement (e.g., jack-type receptacle or plug)
669 ....Plug having cylindrical or annular contacts of substantially the same diameter (e.g., jack-type plug)
670 ...Having coupling contact requiring successive relative motions in different directions to complete the coupling
671 ....Having bayonet-coupling contact
672 .....Bayonet-coupling contact comprises cylindrically-shaped ring or shell
673 .....Having plural bayonet-coupling contacts
674 ......Polarized

WITH INSULATION OTHER THAN CONDUCTOR SHEATH

.Plural-contact coupling part

..Plural-contact coupling part comprises receptacle or plug

675 ...Having annular, push-pull-engaging contact concentrically disposed about longitudinal axis of engagement

676 ...Having push-pull-engaging contacts spaced along planar side wall transverse to longitudinal engagement axis (e.g., telephone jack or plug)

677 ...Polarized

678 ....By asymmetric disposition or asymmetric shape of duplicate contacts

679 ....By having or receiving contacts of similar type which are unequal in size or shape

680 ....By key or guideway

681 .....User adjustable key or guideway

682 ...Receptacle for receiving plug having spaced, longitudinally engaging, prong-like contacts

683 ....Adapted to receive base connector of electron tube

684 .....Receptacle body formed of thin, superposed plates or discs of insulation

685 ....Having only three prong-receiving recesses arranged to define apices of a triangle

686 ....Having multipart insulating body or casing

687 .....Divided parallel to longitudinal engagement axis (e.g., formed of two casing halves)

688 .....Formed of superposed planar sheets or plates of insulation

689 .....Planar insulating cover overlying insulating body or casing

690 .....Insulating parts secured together by screw-threaded means

691 ....Having additional resilient member cooperating with contact to increase grip on contact of mating plug

692 ...Plug having spaced, longitudinally engaging, prong-like contacts

693 ....With insulative covering about part of protruding portion of each contact

694 ....Having wire conductor receiving passageway extending perpendicular to longitudinal axes of contacts

695 ....Having multipart insulating body

696 .....Divided parallel to longitudinal engagement axis (e.g., formed of two casing halves)

697 ....Having means other than screw-threaded means for securing wire-type conductor to contact

698 ...Receptacle for transversely receiving elongated fuselike component having contact at each end thereof

699 ...Having only two duplicate contacts arranged bilaterally symmetric about longitudinal axis of engagement

700 ...Having spring-biased, plunger-type contact movable along line parallel to longitudinal axis of engagement

701 ...Having modular or multipart insulating body

702 .Insulating body comprising or for use with cylindrical cap and shell type lamp receptacle casing

703 ..Insulating lining or contact support within separable, metallic cap and shell casing

704 ..Insulating lining or contact support within metallic cap casing

705 ..Insulating lining or contact support within metallic shell casing

706 ..Insulating lining for interior of metallic cap or shell casing

707 ..Separable insulating cap and shell casing

708 .Insulating body providing direct contact or engagement of duplicate terminals or conductors

709 .Insulating body having plural mutually insulated terminals or contacts (e.g., terminal block)

710 ..Duplicate insulating blocks or boards interconnected by frangible or severable part

711 ..With common operator for simultaneously securing separate contacts thereof to separate external contacts or conductors

712 ..Modular or multipart insulating body

713 ...Relatively movable insulating body parts

714 ...Formed of three or more thin, flat, superposed layers, plates, or sheets of insulation

715 ...Modular insulating block or board

716 ....With support track for receiving plural insulating blocks or boards

717 ....Having integral means to interlock or interfit with a duplicate insulating block or board

718 ...Having protective cover formed from insulating material

719 ..With conductor fanning means

720 ..Terminals or contacts secured by permanently bending or deforming metallic part onto insulation

721 ..Having three or more spaced, electrically interconnected, duplicate terminals or contacts

722 ..Terminals or contacts embedded in insulating body

723 .Insulating body with spaced, electrically interconnected, duplicate terminals or contacts

724 ..Modular or multipart insulating body

725 .Having movable insulated part for securing conductor or mating connector thereto

726 ..Clamp-type connector for storage battery post

727 ..Screw-thread-operated securing part

728 ...With spring operating on conductive clamp portion of securing part

729 ..Spring-operated or resilient securing part

730 .Terminal connector having insulating tube or sleeve adapted to be crimped or heat-shrunk onto wire conductor

731 .Insulating body divided parallel to longitudinal axis of engagement (e.g., formed of two casing halves)

732 .Interfitting or abutting insulating bodies carried by separate mating connectors

733 .Metallic connector or contact secured to insulation

734 ..Annular or center contact secured to lamp-type insulating receptacle or base

WITH INSULATION OTHER THAN CONDUCTOR SHEATH
.Metallic connector or contact secured to insulation
..Annular or center contact secured to lamp-type insulating receptacle or base
735 ...Screw-threaded contact having mutilated, irregular, interrupted, or discontinuous screw thread
736 ..Secured by heat-molding or cold-deforming insulation or by casting, welding, or cementing
737 ..Secured to insulation by screw-threaded means
738 ...Insulating tube, sleeve, or cap concentrically surrounding part of connector
739 ...Including resilient or spring-biased part for securing wire-conductor or mating connector thereto
740 ..Secured to insulation by bayonet engagement
741 ..Secured by permanently bending, deforming, or crimping metallic part
742 ...Having separate bendable or deformable securing part (e.g., rivet)
743 ...Resilient or spring-biased socket contact or connector
744 ..Secured by resiliently biased part latching behind shoulder or into recess
745 ...Separate latching part secured to contact prior to engagement with insulation
746 ...Latching part unitary with metallic connector or contact
747 ....Coupling part type contact inserted into insulation from coupling end
748 ....Resilient socket contact for surrounding or engaging opposed surfaces of mating plug contact
749 .....Adapted to have secured wire conductor extending transverse to longitudinal coupling axis
750 ..Insulating tube, sleeve, or cap concentrically surrounding part of connector
751 ..Secured by part resiliently gripping insulation
752 ..Secured by superposition of insulating body parts
753 CYLINDRICAL METALLIC CAP AND SHELL TYPE LAMP RECEPTACLE CASING
754 METALLIC CLAMP-TYPE CONNECTOR FOR STORAGE BATTERY TERMINAL
755 .For threaded-receptacle type terminal flush with battery wall (e.g., for side terminal type battery)
756 .Common securing means for post and conductor
757 .With clamp-to-post joint separator
758 ..Clamp secured to and separated from post by same screw-threaded member
759 .Spring-actuated or resilient clamp
760 .With reinforcing insert
761 .Deformable C- or U- clamp
762 ..Screw-thread operated
763 ...With plural conductor terminals
764 ...With means for removably securing conductor thereto
765 .Screw-thread operated
766 ..Screw or nut coaxial with post
767 ..Post between and transverse of plural screws
768 ..Eye bolt type
769 ..Clamping lever
770 ..Clamping cam or wedge
771 ..Screw axis intersects post axis (e.g., set screw)
772 .Clamping lever, cam, or wedge
773 ..Rotary or swinging cam
774 ..Sliding wedge
775 METALLIC CONNECTOR OR CONTACT HAVING MOVABLE OR RESILIENT SECURING PART
776 .Stirrup type for simultaneously securing two spaced-apart locations along the length of a conductor thereto
777 .Adjustable angular joint between separate connectors or conductor securing means
778 .Externally threaded, bifurcated bolt for joining conductors having like cross-sectional shape
779 ..With nut retainer
780 ..With slidable conductive element between conductors
781 .Bolt or screw between and transverse of parallel conductors
782 ..With means to maintain assembly of clamp part and bolt or screw
783 .Cam or wedge between conductors
784 .Screw-threaded securing means coaxial with elongated conductors joined in axially aligned relationship
785 .Parallel elongated conductors between and transverse of plural screws (e.g., U-bolt)
786 .Resilient or spring-operated securing means joining plural conductors
787 ..Conductors secured in duplicate receiving means
788 ...With helical spring
789 .Hinged jaw type having alignable conductor receiving bores
790 .Single operator for securing and joining plural conductors
791 ..Single screw-threaded operator
792 ...Conductors secured in direct contact with one another
793 ....Screw axis intersects axes of conductors joined parallel to one another
794 ...Conductors secured in duplicate receiving means
795 ...Screw-threaded operator circumferentially tensions flexible strap or band
796 .Duplicate receiving means having independently operated securing means for joining plural conductors
797 ..Screw-thread operated securing means for each receiving means
798 ...For joining three or more conductors
799 .Circumferentially tensioned flexible strap or band
800 ..Tensioning screw intersects longitudinal axis of encircled conductor
801 .Screw-thread operated securing part
802 ..Screw-threaded lamp-shell type contact having resilient or spring biased securing part
803 ..C-clamp type
804 ..Single conductor between and transverse of plural screws (e.g., U-bolt)
805 ..Nut, bolt, or screw coaxial with elongated conductor
806 ..Clamping lever
807 ..With screw-thread operated cam or wedge
808 ..With strand coiling or loop forming means

	METALLIC CONNECTOR OR CONTACT HAVING MOVABLE OR RESILIENT SECURING PART
	.Screw-thread operated securing part
809	..With means confining strand or wire loop about screw
810	..Screw axis intersects conductor axis (e.g., set screw)
811	...With movable clamp jaw between conductor and screw or nut (e.g., slidable follower)
812	....Clamp jaw movably secured to screw or nut
813	...Captive screw or nut
814	...Set screw type
815	..Screw or nut moves resilient or resiliently biased securing part
816	.Spring actuated or resilient securing part
817	..Compression spring axis transverse of and intersecting conductor axis
818	...Spring biases detent member to form snap-latch type securing part
819	..Separate spring means moves rigid nonresilent clamping part into securing condition
820	...Spring biases slidable wedge-shaped or wedge-operated jaw
821	...Socket connector having three or more annularly arranged duplicate grip elements
822	...Hinged clamping part (i.e., clamping lever)
823	...Socket or pin connector having small radially biased clamping or detenting element
824	...Spring-biased butt contact
825	..Plug having means for resiliently engaging opposed interior surfaces of mating socket connector (e.g., banana plug)
826	...Also having means for resiliently engaging exterior surfaces of the socket connector
827	...Having separate resilent means extending externally around or outwardly through rigid plug body
828	..Having resilient clamping finger crossing plane of opposed clamping member while in clamping condition
829	...Hand-grip type
830	..For receiving end contact of elongated fuselike component inserted transverse to longitudinal axis of component (e.g., fuse clip)
831	...With contact rejection feature or adaptor
832	...With movably attached user manipulated locking, contact retaining, or spring spreading means
833	...With separate means to increase clamping pressure of spring clip
834	..Clamping pressure provided by cantilevered finger resiliently urged away from opposed clamping member
835	..With movably attached user manipulated means or having user grippable means for manually distorting resilient part
836	...Slidably mounted cam or wedge locks or places resilient securing part into securing condition
837	....With additional spring means to operate slidable cam or wedge
838	...Pivotally or rotatably mounted member locks or places securing part into securing condition
839	..With additional reinforcing spring means
840	..Helically coiled spring forms securing part
841	...Adapted to receive elongated contact or conductor by insertion along axis passing through spring coils
842	..Socket adapted to receive push-pull-engaging elongated contact by insertion along longitudinal axis of contact
843	...Having separate gripping spring means located within or extending into rigid socket body
844	....Adapted to be mounted to flat panel with longitudinal axis of socket perpendicular to plane of panel
845	....Adapted to receive thin blade contact (e.g., spade receiving)
846	....Separate spring means forms snap-latching detent
847	....Spring means mounted on exterior of and extends into rigid socket body
848	...Having latching detent or means operated by mating contact to lock or manipulate resilient part
849	....Adapted to receive thin blade contact (e.g., spade receiving)
850	...Resilient channel-like socket for receiving thin blade contact (e.g., spade receiving)
851	...Socket comprises tubular body having resilient means for gripping inserted elongated contact (includes split or slotted tube)
852	....Having resilient cantilevered clamping finger located within tubular body
853	.....With means for mounting to flat panel
854	....Tubular socket perpendicular to wire-securing barrel (e.g., right-angle connector)
855	...Socket perpendicular to wire-securing barrel (e.g., right-angle connector)
856	...Having opposed cantilevered clamping fingers resiliently urged toward one another
857	....Allochiral cantilevered clamping fingers
858	...Having cantilevered clamping finger resiliently urged toward rigid clamping jaw
859	..Adapted to resiliently engage end face and inner annular shoulder of headed terminal
860	..Comprising conductor-encircling resilient wire loop or comprising slotted or apertured resilient plate
861	..Having cantilevered clamping finger resiliently urged toward opposed clamping jaw
862	..Having cantilevered spring contact finger
863	.Clamping cam or wedge
864	..Rotary or swinging
865	METALLIC CONDUCTOR TERMINAL HAVING CONDUCTOR SHEATH ENGAGING MEANS
866	.Pin or plug type terminal
867	.Resilient or spring-biased socket or clip type terminal
868	.Slotted or apertured disc or plate type terminal (e.g., ring terminal)
869	METALLIC CONNECTOR OR CONTACT HAVING MEANS FOR SECURING TO INSULATION OTHER THAN CONDUCTOR SHEATH

METALLIC CONNECTOR OR CONTACT HAVING MEANS FOR SECURING TO INSULATION OTHER THAN CONDUCTOR SHEATH
870 .Adapted to be secured by permanently bending or deforming metallic part
871 .Adapted to be secured by resiliently biased part latching behind shoulder
872 ..Latching part unitary with metallic connector or contact
873 .Adapted to be secured by part resiliently gripping insulation
874 METALLIC CONNECTOR OR CONTACT HAVING PART PERMANENTLY SECURED TO CONDUCTOR USING FUSED OR MOLDED MATERIAL
875 .Having duplicate locations for permanently securing individual conductors thereto
876 .Adapted to be secured to conductor formed on printed circuit board
877 METALLIC CONNECTOR OR CONTACT ALSO HAVING SECURING PART ADAPTED TO BE CRIMPED, DEFORMED, OR BENT ONTO CONDUCTOR
878 .Securing part crimped or bent onto looped end of wire conductor
879 .Multipart assembly
880 .Having duplicate receiving means for permanently securing individual conductors thereto
881 .Wire conductor secured transverse to contact portion (e.g., right-angle connector)
882 .Wire conductor secured within ferrule having series of preformed wire-gripping means therein
883 METALLIC CONNECTOR OR CONTACT COMPRISING A SLOTTED OR APERTURED DISC OR PLATE
884 CONTACT TERMINAL
885 .Strip of detachable contacts
886 .Having treated (e.g., coated) surface or distinct contact surface layer
887 .Of particular metal or alloy
888 .Having provision for retaining to mating wire (e.g., wire wrap)
889 .Having provision for retaining to mating contact
890 .For functioning electrical component, (e.g., tube, lamp, fuse, spark plug, etc.)
891 .Multipart contact prong
892 DISTINCT COVERING MEANS
893 .Covering functioning electrical component (e.g., tube, lamp, fuse, spark plug, etc.)
894 MISCELLANEOUS

****

901 CONNECTOR HOOD OR SHELL
902 .Angularly disposed contact and conductor
903 .Special latch for insert
904 .Multipart shell
905 ..Axially joined sections
906 ..Longitudinally divided
907 CONTACT HAVING THREE CONTACT SURFACES, INCLUDING DIVERSE SURFACE
908 CONTACT HAVING TWO CONTACT SURFACES FOR ELECTRICAL CONNECTION ON OPPOSITE SIDES OF INSULATIVE BODY
909 MEDICAL USE OR ATTACHED TO HUMAN BODY
910 OBSERVATION AIDE, E.G., TRANSPARENT MATERIAL, WINDOW IN HOUSING
911 SAFETY, E.G., ELECTRICAL DISCONNECTION REQUIRED BEFORE OPENING HOUSING
912 WITH TESTING MEANS
913 CONDITION DETERMINING DEVICE, E.G., OXYGEN SENSOR, ACCELEROMETER, IONIZER CHAMBER, THERMOCOUPLE
914 FOR FLASHBULB OR CAMERA (INCLUDING FLASH CUBE)
915 AUXILIARY DEVICE FOR EXISTING PLUG
916 ANTENNA
917 ALARM CIRCUIT, E.G., WINDOW AFFIXED FOIL
918 MULTILAMP VEHICLE PANEL
919 FOR TREATMENT BY ELECTRICAL CURRENT, E.G., MAGNET OR BATTERY CHARGER, HEATER, WELDER, ETC.
920 FOR INTERCONNECTING RIGID PIPELIKE BODIES, E.G., WAVE GUIDES
921 TRANSFORMER BUSHING TYPE OR HIGH VOLTAGE UNDERGROUND CONNECTOR
922 TELEPHONE SWITCHBOARD PROTECTOR
923 SEPARATION OR DISCONNECTION AID
924 CONTACTS ARRANGED FOR SEQUENTIAL CONNECTION
925 FLOOR MOUNTED, E.G., UNDER CARPET
926 WITHIN MACHINE CASING OR MOTOR HOUSING (CONNECTOR WITHIN CASING WALL)
927 CONDUCTIVE GASKET
928 MODULAR ELECTRICALLY INTERENGAGING PARTS, E.G., STOVE WITH REPLACEABLE HEATING ELEMENTS FORMED ON COUPLING PARTS
929 CONNECTING BASE PLATE OR SHELF TYPE HOLDER
930 COUPLING PART WHEREIN CONTACT IS COMPRISED OF A WIRE OR BRUSH
931 CONDUCTIVE COATING
932 HEAT SHRINK MATERIAL
933 SPECIAL INSULATION
934 .High voltage barrier (e.g., surface arcing or corona preventing insulator)
935 .Glass or ceramic contact pin holder
936 .Potting material or coating (e.g., grease, insulative coating, sealant or, adhesive)
937 .Plural insulators in strip form
938 CATHODIC PROTECTION OF STRUCTURE (E.G., SHIP HULL)

CLASS 440 MARINE PROPULSION

1 MEANS TO CONTROL THE SUPPLY OF ENERGY RESPONSIVE TO A SENSED CONDITION
2 WITH INDICATOR
3 DIVERSE ENGINE MEANS
4 PLURAL ENGINES WITH SINGLE PROPELLING MEANS
5 HYDRAULIC FLUID DRIVE FOR PROPELLING MEANS
6 ELECTRIC DRIVE FOR PROPELLING MEANS
7 .With foot control
8 WIND DRIVEN MOTORS
9 WAVE POWERED PROPELLING MEANS
10 .By oscillating weight
11 POWERED FROM LAND VEHICLE SUPPORTED BY VESSEL
12 .Land vehicle is two-wheel type
13 OSCILLATING PROPELLING MEANS
14 .Fishtail motion propelling means
15 ..Flexible
16 .Moving wave propeller
17 .Having nonpropelling cycle segment
18 ..Piston and cylinder
19 ..With means to move propelling element to nonpropelling position
20 ..With reversing means
21 OPERATOR POWERED DRIVE FOR PROPELLING MEANS
22 .Rocking watercraft
23 .Fluid pump
24 .Having reciprocating pull cable
25 .Sliding handle or pedal
26 .Rotary cranking arm
27 ..Plural-crank type
28 ..Having flexible drive shaft
29 ..Having endless drive member
30 ...Chain and sprocket
31 ..Including gear means
32 .Lever with connecting linkage
33 TOWING
34 .Cable system
35 .Track system
36 .Ground wheel or poler
37 AIR PROPELLED BOAT
38 JET DRIVE
39 .Auxiliary use of propulsive fluid
40 .Direction control for fluid jet
41 ..With bucket or clamshell-type reversing means
42 ..Pivoted outlet
43 ..Pivoted vane
44 .Propulsion fluid is pressurized gas
45 ..Produced by combustion
46 .Having means to prevent clogging
47 .Having means to increase fluid drive means efficiency
48 HELICAL SCREW
49 SCREW PROPELLER
50 .Variable pitch
51 .Combined with rudder
52 .With vibration dampening
53 .With means effecting or facilitating movement of propulsion unit or a segment of the propulsion unit (e.g., tilting or steering)
54 ..With means limited to vertical movement within hull cavity
55 ..Having restraining means
56 ...With releasing means when propulsion unit hits obstruction
57 ..Having gimbal or universal joint support
58 ..Having toothed or threaded member to move propulsion unit or a segment of the propulsion unit
59 ...Screw type
60 ...Rack and pinion
61 ..Having fluid motor to move propulsion unit or a segment of the propulsion unit
62 ..Having pliant member to move propulsion unit or a segment of the propulsion unit
63 ..Having link or lever to move propulsion unit or a segment of the propulsion unit
64 ..Having shaft with releasable coupling
65 ..With means to lift propeller when an obstruction is hit
66 .Having means to control flow around propeller
67 ..Nozzle (Kort-Type)
68 ..Hull channel
69 ...With open bottom
70 ..Hull concavity
71 .Propeller guard
72 ..Cage or screen
73 .Self-clearing
74 .Shaft braking or locking
75 .Having transmission
76 .Propulsion unit casing
77 ..Cowl
78 ..Propeller shaft housing
79 .Propeller arrangement
80 ..Tandem
81 ...On single shaft
82 ..Supporting strut
83 .Shafting
84 ENGINE, MOTOR, OR TRANSMISSION CONTROL MEANS
85 .For starter means
86 .For transmission
87 .For engine speed
88 MEANS FOR HANDLING ENGINE FLUIDS
89 .Exhaust gas handling means
90 PADDLE WHEEL
91 .Having means to reposition paddle wheel assembly
92 .Having means to retract paddle or change paddle attitude
93 ..Having means to provide cyclic change of paddle attitude (e.g., Voith-Schneider)
94 UPRIGHT REMAINING ORBITING PADDLES
95 FLEXIBLE ENDLESS PROPELLING MEANS
96 .With paddle
97 ..Foldable or retractable to nonpropelling position
98 BUOYANT PROPELLING MEANS
99 .Rotating outer hull
100 .Wheellike
101 OAR OR PADDLE
102 .Articulated sectional oar or paddle
103 ..Having gear
104 .Support
105 ..Having outrigger
106 ..Oarlock
107 ...Having oar shaft restraining means
108 ...Separate mounting means
109 ....Socket type
110 ..Having guard for oar
111 INBOARD ENGINE MOUNT
112 .Having thru-hull sealing means
113 MISCELLANEOUS

CROSS-REFERENCE ART COLLECTION

****

900 OUTBOARD MOTORS AND OUTDRIVES

CLASS 441 BUOYS, RAFTS, AND AQUATIC DEVICES

DECEMBER 1990

1 BUOY
2 .With means to call buoy to surface
3 .For mooring a vessel
4 ..Having liquid cargo transfer means
5 ...Having swivel coupling for cargo conduit
6 .Marker buoy
7 ..Having means to release buoy upon submergence
8 ...Water soluble or water weakened member
9 ...Gas assisted
10 ...Responsive to hydrostatic pressure
11 ..With signalling device
12 ...Audible
13 ...Illuminating
14 ....By combustion of fluid
15 .....Fluid produced by chemical reaction with water
16 ....Electric light
17 .....Having water activated switch
18 .....Having water activated battery
19 ...Smoke producing
20 ...Reflecting means
21 .Having means to control attitude or position
22 ..Fluid reaction surface
23 ..Tether
24 ...Having playout means
25 ....Having means to control playout
26 ....Reel for tether
27 ....Having seat for buoy
28 ..Having ballast means
29 ...Variable ballast
30 .Inflatable
31 ..Having chemical reactor to produce gas
32 .Container type
33 ..With means to release transponder, sensor, etc.
34 ..Storm oil distributor
35 RAFTS
36 .With signal device
37 .Having water reactant stabilizing means
38 .With shelter
39 .Having boarding aid
40 .Inflatable
41 ..Having inflation valve means
42 ..Having storage container for raft
43 .Having centrally located suspended basket
44 .Columnar flotation member
45 ..Hollow
46 ...Barrel or drum
47 .Formed from log or other product
48 ..Booming
49 ..Cribbing
50 ..Coupling means
51 ...Dog
52 ...Clamp
53 ...Transverse rigid member
54 ...Encircling flexible member
55 SWIMMING AID TO INCREASE STROKE EFFICIENCY
56 .Hand attached, held, or worn
57 ..Having finger stalls (e.g., gloves)
58 ..Secured to hand by strap
59 .Arm attached
60 .Leg attached
61 .Foot attached
62 ..Repositioned by biasing means
63 ..With lock or latch
64 ..Flipper
65 WATER SKIMMING OR WALKING DEVICE
66 .Inflatable
67 .Circular
68 .Water ski
69 ..Ski tow handle
70 ..Ski binding
71 ..With rooster tail producing means
72 ..With seat
73 ..Having connecting means
74 .Surfboard
75 .With lashing
76 .Water walking device (e.g., water shoes)
77 ..Having pivoted traction flap
78 ..Spheroid or wheel-like device encircling walker
79 .Having stabilizing surface
80 WATER RESCUE OR LIFE PROTECTING APPARATUS
81 .Tossable apertured member (e.g., ring)
82 .For use over ice
83 .Air-sea rescue device
84 .Lifeline
85 ..Having line propelling means
86 .Buoyant shark screen encircling user
87 .Passenger enclosing bouyancy device
88 .Personal flotation device
89 ..With signal means
90 ..With mechanical inflation means
91 ...By pump
92 ...By compressed gas means
93 ....With puncturing means
94 .....Lever actuated
95 .....Actuated by water softened or soluble member
96 ....With control valve
97 .....Actuated by water softened or soluble member
98 ...By gas generation from chemical reaction
99 ....With manually operated valve
100 ....With soluble or deformable element
101 .....With cutting, punching, or striking means
102 ..Body suit
103 ...Full length
104 ....With hood
105 .....With mask
106 ..For torso
107 ...With sleeve
108 ...With buoyancy means substantially encircling the torso
109 ....And attached hip boot
110 ....And leg or foot strap
111 ....And support passing over the shoulder
112 .....Having buoyancy means
113 ....Buoyancy means is a continuous member
114 ...With buoyancy means on the back
115 ....And front
116 .....And shoulder
117 ...With buoyancy means on the front
118 ....And shoulder
119 ...With buoyancy means on the side
120 ..Trunks or shorts
121 ..Suspender
122 ..Arm encircling means
123 ..Neck encircling means
124 ..Head gear
125 .Convertible use article
126 ..Seating means
127 ...Cushion
128 ..Berth
129 BODY SUPPORTING BUOYANT DEVICE
130 .With seat
131 ..Annular buoyant member
132 ..U-shaped buoyant member
133 BUOYANCY PROVIDING ATTACHMENT FOR PIPE, LOG, OR LINE
134 .Float for log
135 BUOYANCY UNDERWATER VIEWING DEVICE
136 MISCELLANEOUS

CLASS 445 ELECTRIC LAMP OR SPACE DISCHARGE COMPONENT OR DEVICE MANUFACTURING

1 PROCESS
2 .Repairing, converting or salvaging
3 .With testing or adjusting
4 ..Electrode position sensing or adjusting by optical operation
5 .Including use of electric arc or current for removing an undesired particle, i.e., spot knocking
6 .With start up, flashing or aging
7 .Spark plug or spark gap making
8 .Implosion protecting
9 .Generating gas or vapor within an envelope, or coating by vapor, gas, mist or smoke within the envelope
10 ..Controlled vaporizing or coating
11 ..Depositing plural coatings
12 ..With diverse type coating operation
13 ..With subsequent treatment of the coating
14 ..Coating on particular base material, part or place
15 ..Plural gas or vapor generating operations
16 ..With gas introduction
17 ..With precedent or subsequent heating of tube or electrode
18 ..Including establishing an electric space discharge
19 ..Electromagnetic induction heating
20 ..Filament heating
21 ..Generating gas or vapor from reactive compostion containing a reducing agent
22 .Combined, e.g., with shaping of lamp or device envelope
23 .With assembly or disassembly
24 ..Display or gas panel masking
25 ...With sealing
26 ..Arc tube making, e.g., fluorescent lamp
27 ..Incandescent lamp making
28 ..Flash lamp, x-ray tube or laser making
29 ..Including electrode or getter mounting
30 ...CRT mask mounting
31 ...Getter mounting
32 ...Incandescent filament mounting
33 ...Plural electrode mounting
34 ....CRT grid or cathode gun
35 ..Electrode making
36 ...CRT type
37 ....CRT mask mounting
38 ..Including evacuating, degasifying or gas, vapor, liquid or meltable or sublimable solid introduction
39 ...With cooling, e.g., to condense
40 ...With heating, e.g., to outgas
41 ...By gettering
42 ...With subsequent evacuation
43 ...With particular sealing
44 ..Hermetically assembling plural parts
45 ...CRT
46 .Electrode making
47 ..Multi-apertured panel making, e.g., CRT mask
48 ..Incandescent filament making
49 ..Electrode shaping
50 ...Emissive type
51 ..Emissive type
52 ..Fluorescent type or mosaic electrode making
53 .Including evacuating, degasifying or getter or fluent material introduction
54 ..With cooling, e.g., to condense
55 ..By gettering
56 ..With subsequent evacuation
57 ..With heating, e.g., to outgas
58 .With coating, e.g., providing protective coating on sensitive area
59 .Including cleaning
60 APPARATUS
61 .Repairing, converting or salvaging means
62 .Having means to operate the device or portion thereof, e.g., to age
63 .Testing or adjusting means
64 ..Having optical means to sense or adjust electrode position
65 .Combined
66 .Assembly means
67 ..Having electrode positioning or assembly means
68 ...Having means to manipulate a CRT mask
69 ..Having means to manipulate lead wire, lamp base or terminal
70 ..Having evacuation or degasification means or means to introduce gas, vapor, liquid or solid treating agent
71 ..With turret means
72 .Including means to establish an electric space discharge
73 .Having evacuation or degasification means or means to introduce gas, vapor, liquid or solid treating agent

CLASS 446 AMUSEMENT DEVICES, TOYS

DECEMBER 1990

1 INCLUDING APERTURED BOARD AND ELEMENT HAMMERED INTO APERTURE
2 DOMINO EFFECT
3 INCLUDING VIBRATING OR HORIZONTALLY RECIPROCATING SUPPORT FOR TRAVELLING OBJECT OR TRAVELLING OBJECT THEREFOR
4 HAVING PORTIONS KNOCKED APART OR AWRY BY IMPACT
5 .Including portion serving as container for diverse articles (e.g., pinata)
6 .Vehicle
7 SIMULATION OF VEHICLE COCKPIT OR OF VEHICLE CONTROL
8 TOY MONEY BOX
9 .Having figure or mechanism operated or released by coin
10 .Having coin depositing mechanism
11 ..Coin projector
12 ..Coin depositing figure
13 .Having retractable coin slot or guard
14 OPERATED BY INTRINSIC TEMPERATURE CHANGE
15 HAVING MEANS FOR FORMING TRANSITORY BUBBLE
16 .Including movably mounted means to dip orificed member into solution
17 ..And mouthpiece
18 ..And variable size air chamber
19 .Including mouthpiece
20 ..And solution reservoir with discrete intermediate passage leading to bubble-forming area
21 .Including variable size air chamber
22 SPARKING
23 .Figure, wheeled, or simulated weapon
24 SMOKING
25 .Wheeled vehicle
26 BODY-CARRIED OR WORN
27 .Facial, head or neck
28 .Torso
29 STRADDLED
30 TETHERED FIXED-WING AIRCRAFT
31 .Tether-manipulated control or mechanism
32 ..Elevator control only
33 .Including aircraft-carried propulsion means
34 AERODYNAMICALLY SUPPORTED OR RETARDED
35 .Ornithopter
36 .Including rotary wing (e.g., helicopter, flying propeller, autogyro, etc.)
37 ..And means to rotate wing
38 ...Separable rotating means
39 ....Including resilient actuator
40 ....Including flaccid pulling element
41 .....Having rewinding spring or plural discrete flaccid elements
42 .....Flaccid element wound about and in contact with portion which moves aloft
43 ....Including spiral actuator
44 ...Including elastomeric actuator
45 ..And projector
46 .Spinning disc (e.g., flying saucer)
47 ..With electric light or sounder
48 ..Having through air passage
49 .Parachute
50 ..Released from airplane or simulated airplane
51 ..Released from container
52 ...From rocket or simulated rocket
53 ...Container detached from parachute
54 ..And separable projector
55 .Having retractable landing gear
56 .Jet-propelled
57 .Having motor-driven propeller
58 ..Gear-driven or having plural propellers
59 ..Elastomeric motor (e.g., rubber band)
60 ...Enclosed
61 .Glider
62 ..Having folding wing
63 ..And projector or launcher
64 ...Resiliently biased projector
65 ....Including means to retain resilient propulsion member in stressed condition
66 ..Having adjustably mounted airfoil
67 ..Having longitudinally folded or creased fuselage
68 ..Having ballast feature
69 HAVING SEPARABLE NESTED PARTS
70 SAND CONSTRUCTION
71 CONVERTIBLE FROM, OR SERVING AS DIVERSE ARTICLE
72 .Including figure toy
73 ..Diverse article is container, holder, or support
74 ...Diverse article is fluid container or handbag
75 .Including container or storing toy parts
76 .Container having shape of specific article
77 .Including toy appurtenance attachable to container
78 ..Rollable wheel
79 .Having severable portion (i.e., score lineline)
80 .Includng fold line (to convert to toy)
81 .Including sounding toy
82 TOY THEATER
83 .Including movable figure
84 ..Including marionette
85 CONSTRUCTION TOY
86 .With special tool or workholder
87 .For assembly into permanent form (i.e., nonseparable)
88 ..Vehicle (e.g., aircraft, automobile)
89 .Includng fluid conduit
90 .Including motor
91 .Including electrical feature or assembly
92 .Including permanent magnet or suction cup to secure elements
93 .Vehicle
94 ..Alternative vehicular forms
95 ..Wheeled
96 ...And pulling member or extrinsic guide
97 .Figure
98 ..Having attachable clothes
99 ..Alternative figures
100 ...Having detachable subordinate part of face or head
101 ..Plural mutually attachable
102 .Having parts assembled for relative movement
103 ..Including rotary gear, pulley, or strand-winding member
104 ..One part swingable about an axis extending along a side or transversely through its end
105 .Including post having plural longitudinal slots for panel or strip
106 .Including elongated element having laterally opposed interlocking notches (e.g., log cabin type)
107 .Including longitudinally flexed rod or strips
108 .Including connectable panels or strips
109 ..Folding panel, strip, or connector
110 ..And door, window or perfecting structure for building
111 ..With separate diverse connector between adjacent panels or strips

CONSTRUCTION TOY
.Including connectable panels or strips
..With separate diverse connector between adjacent panels or strips
112 ...Connected panels or strips having parallel edges and mutually angled faces
113 ...Extending transversely through panel or strip
114 ..Connected with adjacent edges transversely oriented
115 ..Connected panels or strips having parallel edges and mutually angled faces
116 ..Having resilient interlocking portions
117 .Single column stacking
118 .Including substrate for construction elements (e.g., for array of tiles or pegs)
119 .Including flaccid connector for joining plural elements
120 .Resilient interlocking joint (e.g., snap joint)
121 ..Resilient male member
122 .Including abutting elements having slots or apertures receiving discrete transverse connector
123 ..Transverse member is separable bolt or screw
124 .Interfitting elements
125 ..Including identically shaped interfitting portions
126 ..Including three rod-like elements projecting from a fourth element or common connector
127 ..Joined by lateral sliding (e.g., dovetail)
128 ..Including element having plural bosses for forming single joint
129 HAVING PERMANENT MAGNET (NOT MOTOR ASSOCIATED)
130 .For operating valve, switch, or clutch
131 .Including loosely confined parts moved relatively by magnetic field
132 .Manually held member for magnetic interaction with additional member having confined movements
133 .And member movable in spaced relation to moving magnet
134 ..Including interposed partition
135 ...Magnet or member moves along partition surface
136 ....Including motor to move member, magnet, or partition
137 .Contacting, mutually attracted members
138 ..Contact maintained during relative movement
139 ..Including figure or figure portion
140 INCLUDING MEANS CREATING, STORING, OR OPERATED BY STATICALLY INDUCED CHARGE
141 TELEPHONE
142 .Having electrical or voice feature
143 HAVING KEYBOARD
144 SIMULATED HAND OR POWER TOOL
145 .Saw or drill
146 HAVING MEANS TO DRAW
147 CHANGEABLE BOOK, CARD, OR PICTURE
148 .Including device erected by opening card or book, or removing from cover
149 .Movable picture portion
150 ..Moved by opening or closing card or book
151 ..Including hand-manipulatable actuator
152 ...For moving pivoted portion
153 AQUATIC
154 .Including remote control means or tether
155 ..For buoyancy control
156 .Including means to move figure or figure part
157 ..Including oar or paddle held by figure
158 ..Mechanical motor within figure
159 ..Fluid operated means to move figure or figure part
160 .Boat
161 ..Submersible
162 ...Including mechanical propulsion motor
163 ..Having propulsion means
164 ...Mechanical motor
165 ....And screw propeller rotated by motor
166 OPERATED BY GRAVITY-FED FLUENT MATERIAL
167 .For moving figure or figure portion
168 INCLUDING UNATTACHED GRAVITY-FED ROLLING, TUMBLING, OR ENERGY-IMPARTING FALLING ELEMENT, OR PATHWAY THEREFOR (E.G., MARBLE RUNWAY)
169 .For moving figure or figure portion
170 .Hand-supported or-manipulated runway
171 .And means for automatically recycling element
172 ..Hand-cranked element conveyer
173 .For moving element-supporting device
174 ..Wheeled element carrier
175 HAVING LIGHT-OR SOUND-RESPONSIVE SWITCH OR CONTROL
176 OPERATED BY RELATIVELY MOVING FLUID OR PRESSURE DIFFERENTIAL
177 .Including suction cup
178 .Including motorized fan
179 ..Producing supporting air column or cushion
180 .Including variable-size fluid chamber to move fluid
181 ..Supplying compressed gas to rupture sheet (e.g., film burster)
182 ...Including means to feed sheet
183 ..Squeezable figure
184 ...Sounding
185 ....Including external fluid-operated accessory or means to move figure portion
186 ..Contractable balloon for moving fluid
187 ...Jet-propelled balloon
188 ...Sounding
189 ...Wheel-actuated
190 ...And tearing, or having mechanism or manipulatable means for moving figure portion
191 ....Having electrical or wind-up motor
192 ...Including motive power means or hand manipulator for sounder
193 ....And bellows or bulb
194 ...Rotary or pivoted valve
195 ...Reciprocating valve
196 ....Including piston slidable along central apertured member
197 ..Bellows or bulb for moving fluid
198 ...To move figure or figure portion
199 .For changing or moving figure or figure part
200 ..Including mouthpiece for blowing or sucking
201 ..Including fluid-driven rotary blades
202 .Including mouthpiece for blowing or sucking
203 ..Plural differently operated sounders
204 ..Whistle or siren
205 ...Including discrete relatively movable portions
206 ...Including distinct means for enabling selection of pitch
207 ..Vibratory reed sounder
208 ...Including distinct means for enabling selection of pitch
209 ...And cone-shaped terminal portion (e.g., horn)

OPERATED BY RELATIVELY MOVING FLUID OR PRESSURE DIFFERENTIAL
210 .Convection-operated
211 .Having jet propulsion
212 ..And multiple stages or holder for launching
213 .Sounding
214 ..Having twistable or intertwistable flaccid strands for rotating sounder
215 ..Having tether for whirling sounder
216 ..Whistle or siren
217 .Having fluid-driven rotatable radial blade (e.g., pinwheel)
218 ..Rollable or having plural rotating bladed members
219 HAVING CHEMILUMINESCENT LIGHT SOURCE, OPTIC FIBER, MIRROR, OR LENS
220 INFLATABLE
221 .Having separately inflatable parts
222 .Including externally applied sealing element
223 .And means attachable to form a figure
224 .Having check valve
225 .Simulated aerial or space vehicle
226 .Figure
227 INFANT'S TOY AND MEANS FOR RETAINING, ATTACHING, OR SUPPORTING TOY IN INFANT'S ENVIRONMENT
228 SUSPENDED FOR TRAVEL BELOW GUIDE OR SUPPORT MEANS
229 .Including electrical or wind-up propulsion motor
230 SIMULATED AIRCRAFT OR SPACE VEHICLE (I.E., NON-AERODYNAMIC)
231 .Space vehicle or rocket
232 .Having means to rotate propeller or rotor
233 GYROSCOPIC
234 .Having figure
235 .Having detachable cord for spinning
236 ROTATING OR HAVING VISIBLE ROTATING PORTION (E.G., SPINNING OR WHIRLING, NOT ROLLING)
237 .On wheeled support
238 ..And having additional portion which reciprocates or oscillates, or which rotates about distinct axis
239 .Including corrugated support for imparting rotation
240 .Including unattached rod for manipulating toy
241 .Including helically grooved or twisted shaft for imparting rotation
242 .Including electric light or electric sounder
243 .Including markings producing visual effect (e.g., chromatic)
244 ..Thaumatropic effect
245 ..Cord impeller
246 .Including hand crank for imparting rotation
247 .Having attached cord for imparting rotation
248 ..Wound about rotatable member
249 ...Including spring to rewind
250 ...Bandalore
251 ....Including sounder, figure, or vehicle
252 ...Sounding
253 ..Intertwistable flaccid strands
254 ...Including sounding means
255 .Aerial (e.g., diabolo)
256 .Top
257 ..Plural tops
258 ..Including sounding means
259 ..And means for spinning
260 ...Spring impeller
261 ...Cord impeller
262 ....Including holding means
263 .....Seperable
264 ..Having special tip or spindle
265 .Sounding
266 .Handle supported manually actuated rotating portion
267 HAVING ENCLOSED LIQUID
268 FIGURE TOY OR ACCESSORY THEREFOR
269 .Rollable
270 ..Having sounding means
271 ...Including resiliently recovering striking mechanism
272 ...And wheel-driven mechanism for moving figure or figure portion
273 ..Pivoted figure having center of gravity below pivot axis
274 ...Including wheel-driven mechanism for moving figure portion
275 ..Vehicle and external figure
276 ...Having moving limb or foot to simulate walking
277 ....By direct linkage to vehicle wheel or axle
278 ..Elongate figure having writhing or undulating movement
279 ..Figure mounted on wheeled support
280 ...Including wheel-driven mechanism for moving figure or figure portion
281 ....Plural relatively moving figures
282 .....Dependent movement or common component
283 ......One figure mounted on another figure
284 ......Relatively moving portions of one figure
285 ....Having moving limb or foot to simulate walking
286 ....Figure movement simulates propulsion of wheeled support
287 ....Movement about vertical axis or by bent support wheel axle
288 ...Including means to move figure or figure portion with respect to wheeled support
289 ..Including axle through or within figure
290 ...Front and rear axles
291 ....More than two axles
292 ....Including wheel-driven mechanism for moving figure portion or accessory
293 .....For moving limb or foot to simulate walking
294 ...Having moving limb or foot to walk or simulate walking
295 .Having means to simulate respiration, heartbeat, body temperature, or specific symptom of illness
296 .Having means for simulating personal toilet or medical activity or device therefor (e.g., bathing, hair care, etc.)
297 .Having sounding means
298 ..And internal mechanism to move figure portion
299 ...Phonograph, tape, or wire
300 ...Head or head part movement
301 ....Eye, eyelid, or mouth movement
302 ..Phonograph, tape, or wire
303 ..And motive power means or hand crank
304 .Nursing, eating, or drinking
305 ..And tearing or wetting
306 .Tearing
307 .Rope skipping
308 .Leaping or projected figure or accessory
309 ..Figure
310 ...From within enclosure (e.g., "Jack-in-the-box")

	FIGURE TOY OR ACCESSORY THEREFOR
	.Leaping or projected figure or accessory
	..Figure
311	...Self-projecting
312	....By impulse from moving limb or foot
313	.Animal and rider
314	.Including guide for ascending or descending figure
315	..And flaccid element for supporting or moving figure
316	.Constructed for walking down incline
317	.Including spring for returning limb or foot during walking
318	.Including musical instrument or simulation thereof
319	.Variable length hair
320	.Enlargeable or elongatable figure or figure portion
321	.Having selectively displayed alternative faces, limbs, or bodies
322	.Seesawing or swinging (e.g., jumping jack)
323	..Including flaccid support or actuator for figure
324	.Tumbling
325	.Balanced or self-righting
326	..Having relatively movable section on balanced or self-righting portion
327	.Having hand-or finger-accommodating means in figure
328	..Hand or finger forms visible part of figure
329	..And movable jaw
330	.Having mechanism or manipulatable means to move figure or figure portion
331	..Base-mounted figure and button-controlled flaccid element to move figure or figure portion
332	..Figure movable along endless path
333	..Kicking
334	..Fighting
335	...Including motive power means or hand crank
336	..Striking
337	..Having changeable facial feature
338	...And means to move or manipulate head
339	...Changeable by hand-manipulatable means
340	....Manipulatable means is different body portion
341	....Including changeable eye
342	...Movable eyelid
343	...Movable eye
344	....Universally movable
345	....About horizontal axis
346	.....Independently movable eyes
347	.....Incrementally closed by rocking figure
348	.....Having end-mounted axle, or relatively pivoted or sliding anchoring portions
349	.....Having lock or drag for eye movement, or having spring acting against axle in slot
350	.....Adjustable eye spacing
351	..Operated by movably mounted weight
352	..Including motive-power means or hand-crank mechanism
353	...Motive-power means intrinsic to figure
354	....Human figure having movably attached arm or leg portion moved by motive power means
355	.....Walking
356	....Four moving supporting limbs or feet
357	...Plural relatively moving figures
358	...Including extrinsic electric or wind-up motor
359	..Including support or manipulator extrinsic to figure (e.g., marionette)
360	...Relatively movable striking platform
361	...Flaccid support or manipulator
362	....Plural flaccid elements to manipulate plural body parts
363	.....Hand-held overhead support for flaccid elements
364	....For drawing figure along surface
365	...Resiliently biased body portion
366	...Rod-supported or-controlled figure
367	....Plural rods for manipulating plural body parts
368	.Reptile
369	.Fabric-covered stuffed figure
370	..Having enclosed reinforcing or skeletal portion
371	..Including hinge feature connecting parts
372	..Including facial or hair feature
373	.Having enclosed reinforcing or skeletal portion
374	..Of non-recovering bendable material
375	..Including pivoted joint
376	.Having movably joined body parts
377	..Walking
378	..And locking means for retaining body parts in adjusted position
379	..Including separate resilient member
380	...Elastomeric member
381	...For joint allowing movement about plural axes
382	..By bendable or pliant material connecting parts
383	..Including joint allowing movement about plural axes
384	..Swivelled head
385	.Formed from specific material
386	..Edible material
387	..Sheet material figure (e.g., paper doll)
388	...Three-dimensional folded figure
389	..Eye
390	.Limb, hand or foot
391	.Head
392	..Eye
393	...Eyelash
394	..Having hair
395	..Mouth feature
396	BALANCED OR SELF-RIGHTING (E.G., ROCKING)
397	SOUNDING
398	.Detonating
399	..Including projecting means
400	..Projectile
401	..Simulated weapon
402	..Cane or rod thrust longitudinally against surface
403	...Including magazine
404	.With means facilitating combination with diverse art device
405	.Having simulated weapon feature coordinated with sound
406	..Including finger trigger for sounder
407	...Single report
408	.Simulated musical instrument, radio, camera, or television device
409	.Including rolling or tumbling toy
410	..Toy locomotive
411	..And rod, cable or tether as guide means
412	...Guide means secured centrally of wheel
413	....Including wheel-carried strikers for impacting non-rotating portion

	SOUNDING
	.Including rolling or tumbling toy
414	..Having belt-carried or rotary striker on vehicle
415	.Snapping sheet member (e.g., cricket)
416	.Voice-actuated diaphragm (e.g., kazoo)
417	.Tick-tack
418	.Percussion
419	..Unsecured loosely confined percussive member (e.g., rattle)
420	..Ratchet-actuated
421	..Including handle for shaking, flipping, or flicking
422	...Resiliently restored swinging percussive member
423	GARAGE
424	MATERIAL OR ARTICLE HANDLING DEVICE
425	.Having load supporting swingable arm
426	..Horizontally swinging (e.g., crane)
427	.On wheeled vehicle
428	..Having tiltable vehicle body portion for discharging contents (e.g., dump truck)
429	DISCRETE LAUNCHER, ACCELERATOR, OR RETARDER FOR TOY VEHICLE
430	.Including helical spring or elastomeric strip
431	ROLLING OR TUMBLING (E.G., WHEELED)
432	.Fire apparatus
433	.Endless track vehicle
434	.Tractor or trailer
435	.Vehicle and means for freeing or launching object therefrom
436	.Including changeable program carried by vehicle
437	.Including means for causing erratic movement
438	.Including illumination means
439	..And battery holder on rolling or tumbling toy
440	.Motorcycle, tricycle or bicycle
441	.Including vehicle-carried control mechanism activated or deactivated in response to contact with extrinxic structure
442	..Reversing
443	.Having reversible drive
444	.Including extrinsic guide or means cooperable with extrinsic guide
445	..Cooperable traction means on vehicle and roadway
446	..By guide surface below running surface
447	...Vehicle having flanged wheel
448	.Including wheel-or axle-operated device
449	..Operated by belt drive or by tangential contact with wheel
450	.Including handle, rod or tether for physically guiding or propelling (e.g., trundle, hoop, etc.)
451	..Plural wheels
452	..Guide means secured centrally of wheel
453	..Including rolling element or sliding or pivoted retainer between rod and hoop or wheel
454	.Remotely controlled
455	..Via conductor adjacent to vehicle path
456	..By radio signal
457	.Including intrinsic motive power means for propulsion
458	..And eccentric weight
459	..Elastomeric (e.g., rubber band)
460	..Steering vehicle
461	..Having lock for rotary motor or transmission
462	..Having instrinsic energy-storing battery or flywheel
463	...And clutch
464	..Flat spiral or torsion spring
465	.Wheeled vehicle
466	..Wheels vertically movable relative to chassis
467	..Railroad locomotive simulation
468	..Having means permitting turning of wheel for steering
469	..Having specific means for mounting axle to chassis
470	..Having specific body structure
471	...Demountable
472	SIMULATED MEDICAL OR TOILET DEVICE
473	SIMULATED WEAPON OR PROTECTOR
474	SIMULATED CLOTHES OR FABRIC WORKING OR CLEANING
475	INCLUDING DISPENSER
476	BUILDING, TOWER, BRIDGE OR HABITATION
477	.Including electrical feature
478	.Folding or collapsible
479	BUILDING FURNISHING OR APPLIANCE
480	.Simulated fireplace
481	.Simulated stove, heater, or cooking device
482	.Chair, table, desk, cabinet or bed
483	SIMULATED DISPENSER OR PUMP
484	ELECTRIC
485	.With lamp
486	RESILIENT TOY OR ACTUATOR
487	FOLDABLE, COLLAPSIBLE, OR HAVING PIVOTED PORTION
488	.Sheet material folded to form object
489	INCLUDING SLIDING OR GUIDING ELEMENT OR PORTION
490	INCLUDING FLACCID ELEMENT OR PORTION
491	MISCELLANEOUS
	******************************
	CROSS-REFERENCE ART COLLECTION
	******************************
901	DETACHABLY ADHESIVE

CLASS 449 BEE CULTURE

1	METHOD
2	.Honeybee
3	HIVE
4	.For nonhoney producing bee
5	.With provision to extract honey
6	.Observation
7	.Multi-queen; e.g., swarm capture
8	..Queen raising
9	.With feeder
10	..Fitted in frame slot
11	..Having external food supply
12	.With heater
13	.With ventilator
14	..In cover
15	.Cover
16	.Alighting board
17	.Comb honey
18	.Having propolis collector
19	.Having pollen collector or applier
20	.Passage
21	..Queen/drone control means
22	..Moth control means
23	..One-way passage
24	..Adjustable
25	...Entrance
26	.Stand or hive container
27	.Transportation provision or swarm catcher
28	..Queen bee
29	.Hive shell of particular material
30	..Plastic or paper
31	..Ceramic, clay or plaster
32	.Vertically stacked hive bodies
33	..Directly accessible lower body
34	..Congruent bodies
35	.Separable honey frame type
36	..Pivoted honey frame
37	..With honey frame spacer
38	..Side opening hive
39	...Pivoting side
40	....Vertical pivot
41	..Laterally disposed compartments
42	..Honey frame or honeycomb foundation details
43	...Snap fit together or of plastic
44	...Honeycomb foundation details
45	....Strand or metal reinforced honeycomb foundation
46	.Side opening
47	VENOM COLLECTOR
48	FEEDER
49	BEE FOOD PREPARATION MEANS
50	BASE MOUNTED DEVICE
51	.Means to remove honey frame from hive
52	.Means to remove bees from hive
53	.Honey extraction device
54	.Honeycomb decapping device
55	..Having heater
56	.Hive or frame cleaning
57	.Assembling device
58	..Honeycomb foundation
59	...Honeycomb foundation wiring
60	.Honeycomb foundation former
61	RANDOMLY MANIPULATED DEVICE
62	.Plier type
63	.Honeycomb decapping device
64	.Hive body separating device

CLASS 450 FOUNDATION GARMENTS

DECEMBER 1990

1 BREAST OR CHEST, E.G., BRASSIERES
2 .With shoulder or back brace
3 .With midriff covering extension terminating adjacent waistline, e.g., "longline"
4 ..With additional means interiorly attached to extension to support the diaphragm area
5 ..Midriff extension includes overlapping relatively movable parts
6 ..With means to attach extension to subjacent body-supporter or garment, e.g., hold-downs
7 .Combined with subjacent body supporters, e.g., foundation garment
8 ..Including plural superimposed supporting panels or bands
9 ...With separable closure for each layer
10 ...Each layer separately encircles body
11 ..Including apparel-type garment
12 ..Vertically slidable overlapped portions between breast and torso support
13 ...With elastically extensible connector
14 ..Detachably secured to subjacent supporter by separable fastener
15 ..Subjacent supporter unattached at front
16 ..Subjacent supporter unattached at back
17 ..Front center separable closure for both breast and torso support
18 ..With size adjustment for both, e.g., maternity type
19 ..Including plural elastic panels or inserts with diversely oriented lines of elasticity
20 ..Including elastic portions with varying modulus of elasticity
21 ..Including elastic portion with stretch inhibitor of limit
22 ..Subjacent supporter includes crotch member
23 ..Wraparound overlapped type torso support
24 ..Including panels having pleats or folds to permit size increase
25 ..Stepwise girth adjustment
26 ..With separable fastener or connector for apparel-type garment
27 ..Low out at back
28 .With separable fastener or connector for apparel-type garment
29 ..For hosiery
30 .Combined with apparel-type garment
31 ..Breast supporting member within other garment
32 ...Removable breast supporter
33 ..Subjacent garment attached at front only
34 ..With means providing girthwise elasticity for brassiere
35 ...Portion of garment covers elastic connector at back
36 .Closable aperture permits access to breast i.e., nursing type
37 .With lacteal fluid receptor or shield
38 .With inflatable or liquid-containing chambers
39 .Molded preshaped shell-like cup, e.g., plastic latex
40 ..Strand-type fabric with thermoplastic fibers or filaments
41 .With stiffening strips, strands, or stays, e.g., wired
42 ..Cup form includes spirally arranged strip
43 ..Woven or braided strand-type fabric, e.g.,wire gauze
44 ..Cup form includes latticework of strips
45 ..Paired strips or stays for cup rims with connecting span
46 ...With separable joint between paired stays
47 ...Annular cup-rim-encircling stays
48 ...Stays with conneting span form U, V, H, or V shape between the breasts
49 ...Cup fabric has tunnels separably retaining joined stays
50 ..Plural separate stays diagonally crossing between cups
51 ..Annular cup-rim encircling stay individual to one cup
52 ..Single stay individual to one cup with arcuate portion along bottom rim of cup, e.g., U-shaped
53 .With stiffened supporting means contacting only lower half of breast
54 .With means to separably retain breast-form-supplementing pads
55 .With cup-supplementing means to add volume to breast, e.g., pads
56 ..Applied to only lower half of breast
57 ..Pads, per se.
58 .Separable at front center
59 .With cup supplementing uplift straps or slings diagonally crossing at front center
60 .With floatingly attached cup-supplementing breast supporting strip or panel
61 ..Forming breast-receiving pouch with cup bottom
62 ..Supplementary means includes body-girdling straps
63 ..Attaching means includes adjustment feature
64 .Straps narrow bands only, i.e., skeletal type
65 .Elastically expansible cup or cup rim
66 ..All-elastic cup
67 ..Expansible cup rim, e.g., elastic shirring
68 ..With means to vary size of breast cups
69 ..By vertical gathering of material between the cups
70 .Cups joined to common subjacent elastic strip of panel
71 .With variable length connector between cups
72 ..Elastic connector
73 ...With additional nonelastic connector means
74 .Including plural elastic panels or inserts with diversely oriented directions of elasticity
75 .Including elastic portions with variable modulus of elasticity
76 .Including elastic portion with stretch inhibitor or limiter
77 .With girthwise inelastic size adjustment additional to separable closure
78 .With means to gather peripheral edge, e.g., drawstring
79 .Body band has overlapping separately secured ends
80 .Resilient body-clasping band
81 .With adhesive means or vacuum cup to secure to body
82 .Body-embracing band includes detachable connector unit
83 .Body-embracing band means includes vertically spaced portions
84 ..One portion is narrow waist-encircling band

BREAST OR CHEST, E.G., BRASSIERES
85 .Extended length wraparound body bands
86 .Shoulder strap arrangements and connecting features
87 ..Connected by floating extension at or below horizontal mid-cup region
88 ..Detachable, e.g., convertible to strapless
89 .With compartment for carrying articles, e.g., coin pocket
90 .With reinforcing stitching
91 .Reversible
92 .Methods of making or assembling
93 .Materials
94 FOR LOWER TORSO INCLUDING THIGHS, E.G., CORSET, GIRDLES
95 .Combined with apparel type garment
96 .With shoulder or upper back brace
97 .Comprising sheet rubber or deposited rubber or latex
98 .With means bridging or filling out hollows in the body
99 .With individual buttock-receiving concavities
100 .With crotch or leg straps or leg-encircling parts
101 ..Upper-leg-encircling compressor, e.g., thigh reducers
102 ..With detachably connected crotch piece
103 ...Completely removable
104 ..Including crotch piece, e.g., panty girdle
105 ...With opening therethrough, e.g., overlapped panel
106 ..Leg anchors
107 .Comprising latticework of narrow strips or bands, e.g., skeletal
108 .With apertured insert-type panel for ventilation
109 .With stiffener for upper margin, terminating substantially above lower margin, e.g., waistline antiroll
110 .With means to supportingly engage apparel-type garment, e.g., skirt supporters
111 ..Hosiery supporter
112 .With means to resist vertical motion on body, e.g., friction grips
113 ..Over-shoulder straps
114 .With stiff or nonflaccid body-supporting plate or panel
115 .With elastic portions having means to limit or control stretching thereof
116 .Elastic in entirely (may include nonelastic closures or girth adjusters)
117 ..Edge joined multipanel
118 ...With nonparallel lines of elasticity
119 .Belt-operated lacing for closures or adjusters
120 .Vertically slidable overlapped portions, e.g., "telescoping"
121 .One portion laced through aperture in another portion
122 .With superimposed supporting panels or bands
123 ..At least one layer includes elastic feature
124 ...Superimposed elastic layers having nonparallel lines of elasticity
125 ..Layers are readily separable (detachable) one from another
126 ...With selectively different assembled positions
127 ..Each layer circumferentially separable, with closure
128 ..Each layer substantially separately encircles body
129 .Having pretensioning means bridging girthwise closure
130 .Elastic portions have nonparallel lines of elasticity
131 .Elastic bands or panels with varying modulus of elasticity or with stretch limiter
132 .With elastic band, panel, or portion, e.g., gussets
133 ..Detachably secured to garment
134 .Girth adjustment by predetermined increments
135 ..With insertable or removable girth-changing units
136 .Having girth adjuster and separate nonadjustable separable fastener for closure
137 .With plural separately acting girth dimension adjusters
138 ..Vertically spaced
139 .With stays at closure edges having nonflaccid interengaging fastening means
140 .Plural disconnectable panels with selectively different assembled positions
141 .Lacing-type closure with flaccid lace-receiving eyelet or loop
142 .Closures or girth adjusters with interiorly disposed chafing shield
143 .With stiffening strips or stays
144 ..Including stay-reinforcers at waistline or broken stay shields
145 ..Movably articulated directly one to another
146 ..Readily separable from supporter, e.g., from pockets
147 ..Having means to interengage with lacing cord
148 .With closure means for access opening at lower rear margin of buttock-girdling member
149 .With insertable or removble panel unit, e.g., "convertible"
150 .With article carrying pockets
151 .Panels reinforced by tapes or bands
152 .With loops for dooning
153 .Protective covers, liners, or shields
154 .Waistline type, i.e., limited vertical extent
155 .Abdominal uplifting sling type
156 .Materials and making, e.g., pattern layouts

CLASS 452 BUTCHERING

1 CRUSTACEAN (E.G., SHRIMP, CRAB, LOBSTER, CRAYFISH)
2 .Shrimp processing
3 ..Deveining
4 ..Beheader
5 ..Peeler
6 .Hand tool
7 .Vibratory meat removal
8 .Meat removal by pressure differential
9 .Squeezing meat out
10 .Meat removal by centrifugal force
11 .Claw lock
12 MOLLUSK (E.G., OYSTER, CLAM, SQUID, MUSSEL, OCTOPUS, SNAIL, SLUG, SCALLOP)
13 .Bivalve opener
14 ..With heat treatment
15 ..By pressure differential
16 ..Support and wedge
17 ..Hand tool
18 .Eviscerating
19 ..Pinching rollers
20 ..By fluid pressure
21 SHIRRING OF CASING
22 .Combined with sausage stuffing
23 .Multiple shirring devices operating simultaneously
24 .Shirring head
25 ..Moves about axis parallel to shirring mandrel
26 ..Combined with twisting of casing
27 .Fluid lubrication of casing
28 ..Inflation pressure control
29 .Severing into descrete lengths
30 SAUSAGE MAKING
31 .Automatic control
32 .Casing handling
33 ..Insertion on nozzle
34 ...Indexing onto stuffing horn
35 .Stuffing
36 ..Multiple head
37 ..Sausage sizing and shaping
38 ...Sizing ring
39 ...Casing insert (e.g., flat ended sausage)
40 ..Pump type
41 ...Rotary piston
42 ...Reciprocating piston
43 ....Fluid motor
44 ...Screw
45 ..Nozzle
46 .Linking
47 ..By twisting
48 ..By applying constricting member
49 .Delinking
50 .Peeling
51 .Sausage link handling
52 SLAUGHTERING
53 .Conveying live animals to slaughtering apparatus
54 .Restraint or immobilizer
55 ..Knocking pen
56 ..Fall directing device
57 .Stunning
58 ..Electric
59 ...Trough or tank
60 ...Hand held stunner
61 ..Spring loaded
62 ..Pneumatic
63 .Throat slitting or severing
64 ..Beheading
65 .Sticking
66 .Anesthetizing or gassing
67 .Bleeding
68 ..Suction assisted
69 ..Trocar and cannula
70 .Tongue protector
71 EPIDERMAL OUTGROWTH REMOVER
72 .Wax-type
73 .Singeing
74 .Scalding
75 ..With simultaneous scraping or defeathering
76 ...Spray type scalding
77 ..Spray type scalder
78 ..Tanks
79 ...Means for raising or lowering animals into or out of scalding tank (e.g., hoists)
80 ...Conveyed through scalding tank
81 .By fluid material impingement
82 .Gripping type
83 ..And further including rotary type remover
84 ..At least one surface rotates and moves cyclically towards and away from the other gripping surface
85 ...Pinched between roller nip
86 .Power driven
87 ..Beater (i.e., flexible end)
88 ...Rotary
89 ....Carcass conveyed past beater
90 .....Axis of rotation parallel to work path
91 .....Axis of rotation perpendicular to work path
92 ....Batch type
93 ....Beater element structure or mounting
94 ..Rotary scraper (i.e., rigid end)
95 ...Carcass conveyed past scraper
96 ...Batch (e.g., cradle)
97 ...Scraper element structure or mounting
98 ..Scaler (i.e., serrated or toothed end)
99 ...Rotary
100 ....Driven behind boat
101 ....Hand held
102 .Hand tool
103 ..Diverse tool
104 ..Scraper
105 ..Scaler
106 VISCERA PROCESSING
107 .Eviscerating including means to remove external portion of animal
108 ..Removal of head with viscera
109 ..Removal of vent with viscera
110 .Roe or ova
111 .Gizzard
112 ..Harvesting
113 ..Opener
114 ...With cleaning
115 .Oil gland removers
116 .Pressure differential type
117 .Gripper or hook type eviscerator
118 .Spoon type eviscerator
119 .Rotary scrubber type eviscerator
120 .Venting or opening preparatory to eviscerating
121 ..Of fish
122 ..By tubular rotary cutter
123 .Viscera cleaner
124 .Giblet inserter
125 SKINNING
126 .Temperature modification perfects skinning operation
127 .Peeling by movement of workpiece past cutter
128 .Gripper or hook type
129 ..Drum skinner type
130 ..Skin pinching roller type
131 .Fluid pressure type
132 .Skinning implement (e.g., hand tool)
133 ..Power type
134 DEFATTER
135 DEBONING
136 .Plow type
137 ..Hand-held tool
138 .Pressure type

	DEBONING
139	.Beater or abrader type
140	.Fluid impingement type
141	TENDERIZERS
142	.Coacting rolls
143	.Roll and plate
144	.Coacting toothed plates
145	.Hand roll
146	.Hand manipulated pounder
147	..With chopper
148	SCORING CUTTERS
149	CARCASS SUBDIVISION
150	.Automatic control
151	..Of cutters in series
152	..Of splitting
153	...Carcass oriented relative to cutter
154	..Of extremity cutter
155	..Of subdivision into portions
156	...Movement of cutter controlled
157	....By sensed dimensions of carcass
158	....By sensed color variation
159	.....By manually placed markings
160	.Cutting longitudinally through body or body portion (i.e., splitters)
161	..Fish filleting
162	...Coacting rotary disc cutters
163	..Means repositioning carcass relative to cutter
164	..Portable cutter
165	.While internally supported on a mandrel
166	.Extremity remover
167	..Carcass suspended during removing
168	...Neck puller
169	..Wing remover
170	..Carcass conveyed to cutter in horizontal position
171	.Loin remover
172	SINEW REMOVER
173	WASHER
174	MODELLING (E.G., SHAPING)
175	.Bacon stretcher
176	.Visceral cavity closure
177	CONVEYER
178	.Elevating
179	.Orienting
180	.Registering (i.e., aligning)
181	.Metering (e.g., from bulk supply)
182	.Transfer from one conveyor to another
183	.Loading or unloading
184	.Sorting
185	SUPPORT
186	.Smoke stick
187	.Carcass or portion suspended (i.e., hanger)
188	..Fowl
189	..Gambrel
190	...Grappling
191	...Weight of suspended carcass spreads carcass engaging means apart
192	...Foldable to facilitate transport
193	..Bacon hanger
194	.Underlying support
195	..With clamp (clipboard type)
196	..With prong (e.g., impaling means)
197	.Carcass spreader
198	MISCELLANEOUS

CLASS 453 COIN HANDLING

1 CHANGE COMPUTATION AND DELIVERY
2 .Electric computation
3 ASSORTER
4 .Photoelectric
5 .Largest first
6 ..Centrifugal device conveys coins through assorter
7 ..Belt or chain conveys coins through assorter
8 ..Agitator or vibrator conveys coins through assorter
9 .Smallest first
10 ..Centrifugal device conveys coins through assorter
11 ..Belt or chain conveys coins through assorter
12 ..Rotation device conveys coins through assorter
13 ...Rotation device is apertured plate
14 ..Stepped rail type assorter
15 ..Deflector type assorter
16 SUPPLY LEVEL DETECTOR
17 .Electric
18 DELIVERER
19 .Delivery from plural sources by a single actuation
20 ..Electric
21 ...Rectilinearly reciprocating
22 ..Compound movement
23 ..Rectilinearly reciprocating
24 ...Ejector
25 ....Integral
26 ....Lever operated
27 .....Finger actuated (e.g., key button)
28 ....Finger actuated (e.g., key button)
29 .Delivery of a distinct number of plural coins from a single source
30 ..With counter
31 ...And means to wrap delivered coins
32 ...Electric
33 ...Apertured coin mover
34 ...Notched coin mover
35 ...Star wheel
36 ..Compound movement
37 ..Rectilinearly reciprocating
38 ...Plural superposed ejectors
39 .Delivery of a single coin
40 ..Electric
41 ...Rectilinearly reciprocating
42 ..Compound movement
43 ..Rectilinearly reciprocating
44 ...Ejector
45 ....Lever operated
46 .....Finger actuated (e.g., key button)
47 ....Finger actuated (e.g., key button)
48 ....With follower
49 ..Rotary
50 ..Resilient outlet
51 ...With follower
52 ....Spring biased
53 ..With follower
54 ...Spring biased
55 .Vibratory
56 .Belt or chain
57 .Rotary
58 COUNTER OR INDICATOR
59 .With means to wrap coins
60 .Graduated markings
61 STACKER
62 .With tapered guide
63 MISCELLANEOUS

CLASS 455 TELECOMMUNICATIONS

1 INTERFERENCE SIGNAL TRANSMISSION (E.G., JAMMING)
2 AUDIENCE SURVEY AND USE ACCOUNTING
3 DISTRIBUTION SYSTEM (E.G., PLURAL CABLES)
4 .Remote control of distribution system
5 .Two-way
6 .Common antenna or cable
7 CARRIER WAVE REPEATER OR RELAY SYSTEM (I.E, RETRANSMISSION
8 .Failure compensation (e.g., spare channel)
9 .Monitoring
10 ..Fading compensation
11 .Portable or mobile repeater
12 ..Space satellite
13 ...With plural repeater or relay systems
14 .With transmission line
15 .Two separate way transmission
16 ..Simultaneous using plural repeaters at each location
17 .Plural modulated carriers
18 .With delay or recording
19 .Common antenna
20 .With frequency conversion
21 ..With demodulator
22 ..Plural conversion stages
23 .Frequency or phase modulation
24 .Transmitter/receiver feedback compensation
25 .Directive antenna
26.1 USE OR ACCESS BLOCKING (E.G., LOCKING SWITCH)
31 SYSTEM WITH RECEIVER SELECTION
32 .Receiver scans for address signal
33 .Zoned/cellular
34 .Exclusive assigned or seized channel
35 .Tone coded squelch
36 ..Plural tones
37 ...Difference frequency
38 .Coded sequence
39 TRANSMITTER AND RECEIVER AT SEPARATE STATIONS
40 .Earth or water medium
41 .Near field (e.g., inductive or capacitive coupling)
42 .Frequency or phase modulation
43 ..With modification of frequencies of analog signal passed (e.g., pre-emphasis or de-emphasis)
44 ..With stated modulation index
45 ..Via subcarrier
46 .Suppressed carrier wave system
47 .Single or vestigial sideband system
48 .Inverted sideband
49 .Plural transmitters or receivers (more than two stations)
50 ..Noise, distortion, or singing reduction
51 ...Synchronized stations
52 ...Fading compensation
53 ..With central station
54 ...To/from mobile station
55 ....Using radiating transmission line
56 ....Multiple base stations
57 ...Plural receivers tuned to common frequency
58 ..Break-in or lockout
59 .Single message via plural carrier wave transmission
60 ..Different phases of same frequency carrier
61 .Single message via plural modulaton of single carrier
62 .Optimum frequency selection
63 .Distortion, noise, or other interference prevention, reduction, or compensation
64 ..Plasma source or barrier
65 ..Anti-multipath
66 .With diverse art device
67 .With measuring, testing, or monitoring of system or part
68 .With control signal
69 ..Transmitter controlled by signal feedback from receiver
70 ..Receiver control signal originates at message transmitter
71 ...Frequency control
72 ...For compression and expansion of message signal (i.e., companding)
73 TRANSMITTER AND RECEIVER AT SAME STATION (E.G., TRANSCEIVER)
74 .Convertible (e.g., to diverse art device)
75 .With frequency stabilization (e.g., automatic frequency control)
76 ..Synthesizer
77 .With tuning
78 .With transmitter-receiver switching or interaction prevention
79 ..Automatic (e.g., voice operated)
80 ...With distributed parameter coupling
81 ....Waveguide
82 ...Common antenna
83 ..Single antenna switched between transmitter and receiver
84 .With a common signal processing stage
85 ..Transmitter oscillator used as detector
86 ..Transmitter oscillator used as local oscillator
87 ...Tunable or variable
88 .Transceiver controlling a separate transceiver or receiver
89 .Portable or mobile
90 .Housing or support
91 TRANSMITTER
92 .Remote control of a transmitter
93 .Convertible to different type (e.g., AM to FM)
94 .Alternator
95 .Mobile or portable
96 ..Transmitter ejected from moving vehicle
97 ..With antenna ejection or external support
98 ..With aircraft, satellite, or projectile
99 ..With vehicle
100 ..Body attached or connected
101 .Diversity
102 .Plural modulation
103 .Plural separate transmitters or channels
104 ..Carrier and sidebands separately transmitted
105 ..Common frequency
106 .Modulation by absorption, shielding, or reflecting
107 .With variation of antenna impedance or dimension for modulation
108 .Amplitude modulation
109 ..Vestigial or single sideband or suppressed carrier
110 .Angle modulation
111 ..Including distributed parameter structure
112 ..With frequency multiplication or division
113 ..With frequency control
114 .With harmonic radiation suppression
115 .Measuring, testing, or monitoring of transmitter
116 .Carrier amplitude control (e.g., voice operated on/off)

RECEIVER OR ANALOG MODULATED SIGNAL FREQUENCY CONVERTER
.Squelch
219 ..With automatic gain or volume control
220 ..Adjustable
221 ..Audio responsive
222 ..Noise controlled
223 ...Short duration (noise blankers)
224 ....Separate broadband detector channel
225 ..Plural paths
226 .Measuring or testing of receiver
227 .Responsive to an input signal of particular predetermined frequency
228 ..Responsive to specified modulation (e.g., call alarm, Conelrad)
229 ..Responsive to carrier absence or presence
230 .Local control of receiver operation
231 ..Applied at or for specific intervals or periods of time
232 ..Gain, level, or volume control
233 ...With diverse control (tone, etc.)
234 ...Automatic
235 ....Forward acting
236 ....Variable conversion efficiency (variable oscillator amplitude, etc.)
237 ....Responsive to locally injected pilot
238 ....Responsive to vehicle speed
239 ....Nonlinear automatic gain control
240 .....Variable automatic gain control loop gain
241 .....Different gain stages
242 .....Delayed
243 ......Radio frequency stage only delayed
244 .....Dual time constant
245 ....Automatic gain control signal derived from baseband
246 ....Plural inputs or conditions to generate automatic gain control signal
247 .....Separate automatic gain control signals
248 ....Constant or controlled input impedance
249 ....Variable attenuator type
250 ....Automatic gain control to improve strong signal handling
251 ....Different automatic gain control levels or bias to individual stages (partial automatic gain control)
252 ....Plural stages controlled with plates, screen grids, or cathodes connected in parallel
253 ...Semiconductor
254 ..Sensitivity control
255 ..Local oscillator frequency control
256 ...Combined with other control
257 ...Automatic
258 ....Utilizing particular local oscillator control
259 .....Reference oscillator or source
260 ......Phase lock loop or frequency synthesizer
261 .....Variable reactance (e.g., reactance tube)
262 ......Voltage controlled capacitor
263 .....Discriminator or detector
264 .....Voltage control of oscillator
265 ....With local oscillator synchronization or locking
266 ..Selectivity or bandwidth control
267 ..Tone control
268 ..Fidelity control
269 .With wave collector (e.g., antenna)
270 ..Power-line or receiver element used as wave collector
271 ..Suppression of radiation from receiver via wave collector
272 ..Plural separate collectors
273 ...With paticular output combining
274 ....Loop or coil antenna
275 ...With frequency changing or selecting in the output path of one or more collectors
276 ..With phase shifting, correcting, or regulating in the output path of one or more collectors
277 ...Selectively or alternately connected to receiver
278 ...Combined with noise or interference elimination
279 ....Plural antenna currents entering single transformer
280 ..With coupling to a stage of the receiver
281 ...Having distributed parameters
282 ....Transmission line
283 ...Undesired signal or noise control (e.g., antistatic)
284 ....Balancing or cancelling
285 ....With image frequency suppression
286 ....Wave filter, coil, or wave trap
287 ....Shunt or bypass
288 ....Particular composition (e.g., of cell or element)
289 ...With coupling varying, regulating, or control
290 ...Including passive tuned circuit
291 ...Using active device (e.g., as preamplifier or reactance)
292 ...Transformer or other passive inductance
293 ...Specified stage (e.g., mixer, amplifier, or demodulator)
294 ....With particular electron tube structure
295 .Modulation distortion or cross talk correction or elimination
296 .Noise or interference elimination
297 ..In vehicle
298 ..Originating in power supply
299 ...Filter or rectification in power supply energized by fluctuating or a.c. source
300 ..By shielding
301 ...Plural or compartmented shielding structure
302 ..Image frequency suppression
303 ..Using plural separate signal paths
304 ...Phase shift in at least one path
305 ...With balancing or neutralizing
306 ....Filter in at least one path
307 ..With specific filter structure
308 ..With amplitude limiter
309 ...In demodulator or low frequency (audio amplifier circuit)
310 ..Internally generated noise or oscillations
311 ..In radio frequency amplifier, intermediate frequency amplifier or converter circuit
312 ..In demodulator or low frequency (e.g., audio frequency)
313 .Frequency modifying or conversion
314 ..Plural separate successive conversions
315 ...With plural separate local oscillators
316 ....With frequency stabilization for at least one local oscillator
317 ..Unwanted oscillation or radiation prevention
318 ..With specified local oscillator structure or coupling
319 ...With particular coupling

RECEIVER OR ANALOG MODULATED SIGNAL FREQUENCY CONVERTER
.Frequency modifying or conversion
..With specified local oscillator structure or coupling
...With particular coupling
320 ....Lumped impedance
321 ...In a single envelope or with common active element (e.g., autodyne)
322 ....Plural common electrode
323 ..Particular frequency conversion structure or circuitry
324 ...Homodyne (i.e., zero beat or synchrodyne reception)
325 ...Including distributed electrical parameter structure
326 ....With balanced mixer
327 .....Stripline
328 .....Hollow waveguide
329 ....Electron beam tube
330 ....With nonlinear impedance (e.g., diode)
331 ...Crystal or electron tube diode
332 ...Push-pull
333 ...Transistor or integrated circuit
334 .With particular receiver circuit
335 ..Plural diverse function tube or stage (performs plural functions alternately or concurrently)
336 ..Superregenerative detector or discriminator
337 ..Discriminator or demodulator
338 ..Coupling or decoupling between stages
339 ...Band pass filter
340 ...Variably tunable or adjustable
341 ..Amplifier
342 ...Reflex type
343 ..With particular power or bias supply (includes battery saving means and includes self-powered)
344 .Combined with diverse art device
345 ..With vehicle
346 ...Detachable for portability
347 .Cabinet, housing, or chassis structure
348 ..With retractable or readily detachable chassis
349 ..Sectional or interconnectable (e.g., modules)
350 ..With particular speaker mounting
351 ..Transportable
352 .Remote control of receiver
353 ..Plural conditions from remote station
354 ...Mechanical
355 ..Amplitude, volume, or gain control
600 LIGHT WAVE COMMUNICATION
601 .Repeater or relay systems
602 .With signal isolation
603 .Remote control
604 .Distant object identification
605 .Modulation at passive station (e.g., reflecting)
606 .Complete station (i.e., transmitter and receiver at same location)
607 ..Plural
608 .By pulse or digital variation
609 .Including laser
610 ..Including optical waveguide
611 ..Including specified modulation
612 .Including optical waveguide
613 .Including light emitting diode
614 .Photophone
615 .Angle modulaton
616 .Polarization modulation
617 .Transmitter and receiver at separate locations
618 .Transmitter
619 .Receiver
620 MISCELLANEOUS (E.G., PROTONS, MUONS, NEUTRINOS)

CLASS 460 CROP THRESHING OR SEPARATING

1 MEANS RESPONSIVE TO A SENSED CONDITION
2 .Foreign material
3 ..Drive interrupt
4 .Grain loss
5 ..By detector at sieve or screen or grain pan
6 .Machine load
7 .Moisture
8 HAVING MEANS TO DISTRIBUTE OR LEVEL CROP MATERIAL
9 .In association with shaking table
10 ..And baffle for grain
11 WITH RECYCLING OF PROCESSED MATERIAL
12 .With means to recycle processed material from sieve, grate, or screen
13 .Rethreshing
14 ..By separate diverse threshing means
15 CLOVER HULLER
16 WITH FEEDER
17 .Having grasping system for shelling or cutting
18 .Feeder for husker (e.g., feeder table)
19 .With band cutter
20 .And cooperating means for feeder
21 CONVERTIBLE
22 COMBINED WITH DIVERSE ART DEVICE (E.G., HOISTING, DIGGING)
23 WITH HOPPER
24 FLAX THRESHER
25 CORN PROCESSING APPARATUS
26 .With corn snapping or husking means
27 ..Compound roll having snapping and husking surface
28 ..Diverse functioning multiple roll pairs
29 ..Including a husking or snapping roll
30 ...Including roll mounting means
31 ...Including particular roll construction
32 ....With rib or bar
33 ....With teeth
34 ....With abrasive surface, e.g., rubber surface
35 ..With cooperating member
36 ..Including roll adjusting means
37 ..By suction means (e.g., husking by suction, per se)
38 ..With cutting
39 ...Shredding
40 ...Debutting
41 ...Slitting
42 ..With separating system (e.g., removing husked trash)
43 ...With trash container
44 ...With blower means
45 .With shelling
46 ..Concave and cylinder
47 ..Disk
48 ..Knife
49 ...Slitter
50 ...Tipper
51 ...Reciprocatable knife
52 ...Stationary knife
53 ...Rotary knife
54 ...Pivotable mount
55 ....Longitudinally of cob axis
56 ...Radially mounted
57 ...Having adjustment means
58 ..Peripheral action
59 THRESHING
60 .With relief valve in rotor section
61 .Flail machine
62 .With adjusting means for threshing cylinder
63 .With prethreshing cylinder
64 .Vertical axle type
65 .Centrifugal
66 .Axial flow through threshing section
67 ..Flared cylinder
68 ..Rotor formed with integral feed section
69 ..With axial flow separator
70 .With feed means for threshing section
71 .With bar (e.g., rasp bar, inclined blade)
72 ..Adjustable
73 .With beater
74 .With accelerator roll
75 .Transverse threshing section
76 ..Multiple threshing cylinders
77 ..With axial flow to opposed ends
78 .With cutting
79 SEPARATOR
80 .Axial
81 .Separating cylinder
82 ..Foraminous periphery without associated concave
83 ..Multiple cylinders
84 .Including deflector means
85 .Straw walker
86 .Endless apron
87 .Overhung rake
88 ..Rotary rake
89 ...Mounted on crank shaft
90 .Shaking table
91 ..Oscillating
92 ...And reciprocating
93 ..Reciprocating
94 ..Mounting of
95 ...Suspended
96 .With material vibrator
97 CLEANER
98 .Rotary cleaner
99 .Air control affecting air flow
100 .With fan feature
101 .Sieve or grate
102 ..Screen
103 WITH MEANS TO CLEAN MACHINE
104 .Concave cleaner
105 WITH STONE TRAP
106 .Pivoting trap
107 CONCAVE
108 .Grid or grate
109 ..Adjustable
110 ..Teeth, bars, blades, etc.
111 STRAW CHAFF SPREADER OR HANDLING (DISCHARGE)
112 .With chopper
113 BEATER
114 TRANSPORT CONVEYOR
115 .Pneumatic
116 DRIVE RELATED FEATURES
117 DUST HANDLING
118 DRIER
119 MACHINE COMPONENT ARRANGEMENT AND STRUCTURE, E.G., ENGINE PLACEMENT, GRAIN BIN
120 RACK, GRATE BAR EXTENSION
121 TOOTH STRUCTURE
122 .Mounting means
123 FRUIT OR VEGETABLE PROCESSING APPARATUS
124 .Pre-stripper
125 .Declustering
126 .Including picking or plucking (peanuts, hops or similar material)
127 ..Spike tooth
128 ..Spring biased
129 ..Combing
130 .Pressure roller (e.g., snapping-cucumber)
131 .Shelling pressure roller (e.g., peas, beans, per se)
132 .With adjusting means for roller or cylinder
133 .Including agitator
134 .Stripper or stemmer

FRUIT OR VEGETABLE PROCESSING APPARATUS
.Stripper or stemmer
135 ..With rotary cutter
136 ..With cutter encompassing stalk
137 ..With stationary cutter
138 ..With oscillating cutter
139 ..With vibrating cutter
140 ..With roller
141 .With cylinder and concave (for nongrain products)
142 .Drum and beater
143 .Blower assisted
144 .Endless separating conveyer
145 .Shaker or shaking table (for nongrain products)
146 ..Reciprocating
147 ..Oscillating
148 ..Vibratory
149 PROCESS
150 MISCELLANEOUS
****
CROSS-REFERENCE ART COLLECTIONS

903 GRAIN SAVER
904 POTATO DIGGER
905 STRAW OR CHAFF STACKER

CLASS 464 ROTARY SHAFTS, GUDGEONS, HOUSINGS AND FLEXIBLE COUPLINGS FOR ROTARY SHAFTS

1 SPEED RESPONSIVE DEVICE FOR ADJUSTING RELATIVE ROTATIONAL POSITION OF COUPLED MEMBERS

2 .Actuated by fluid or electricity

3 .Pivoted weight

4 ..Gear segment on pivoted weight

5 ..Pivotal movement opposed by compression of coil spring along its axis

6 ..Pivotal movement opposed by expansion of coil spring along its axis

7 HAVING LUBRICATING MEANS

8 .Lubricant impregnated into material

9 ..Metallic material

10 .For overload release coupling

11 .For coupling having torque transmitted via radially directed pin received in conforming aperture

12 ..Lubricant supplied to plural pins via common ring which encapsulates pins

13 ...Pin includes longitudinally extending internal passage

14 ..Pin includes longitudinally extending internal passage

15 .For coupling having torque transmitted via a ball

16 .For coupling having torque transmitted via intermeshing teeth

17 HAVING HEATING OR COOLING MEANS

18 FLEXIBLE COUPLING BETWEEN FLUID-CONDUCTING ROTARY SHAFTS (E.G., COUPLING BETWEEN SECTIONS OF DRILL STRING, ETC.)

19 .Relative angular displacement of axes of shafts

20 .Including member deformable by relative movement between shafts

21 ..Member is coiled spring

22 HAVING CLEANING MEANS

23 WITH AUXILLIARY INDICATOR OR ALARM

24 FLUID COUPLING

25 .For transmitting limited pulsating torque (e.g., fluid drive coupling for impulse tool)

26 .Including piston axially movable in cylinder having axis coextensive with axis of rotation of coupled members

27 .Including multiple piston-cylinder devices radially spaced from axis of rotation

28 .Fluid confined in enclosure having flexible walls

29 ELECTRICAL OR MAGNETIC COUPLING

30 OVERLOAD RELEASE COUPLING

31 .Including thermally responsive element

32 .Torque transmitted via frangible element

33 ..Axially extending pin

34 .Torque transmitted via radially spaced deformable roller

35 .Torque transmitted via a ball

36 ..Axially biased

37 .Torque transmitted via resiliently biased positive drive connection (e.g., cam and follower)

38 ..Axially biased

39 ...By spring coiled about axis of rotation

40 .Torque transmitted via frictional engagement of coil spring

41 .Torque transmitted via plural circumferentially spaced friction elements

42 .Torque transmitted via frictional engagement of conical or frustoconical surfaces

43 ..With separate resilient member for biasing surfaces into engagement

44 ...Coil spring

45 .Torque transmitted via frictional engagement of planar radially extending surfaces

46 ..With separate resilient member for biasing surfaces into engagement

47 ...Coil spring

48 ....Plural, circumferentially spaced coil springs

49 COUPLING DEVICE INCLUDES ENDLESS CHAIN ENGAGED WITH CIRCUMFERENTIAL TEETH ON COUPLED MEMBERS

50 COUPLING DEVICE INCLUDES ANGLED OR HINGED ROD HAVING OPPOSITE ENDS RELATIVELY RECIPROCABLE AXIALLY IN BORES IN SPACED COUPLED MEMBERS

51 TORQUE TRANSMITTED VIA FLEXIBLE ELEMENT

52 .With stationary housing

53 ..And threaded annulus surrounding terminal end of housing for attachment to auxiliary housing

54 .Element coiled sinusoidally about axially spaced driving and driven members

55 .Element is flaccid and operates in tension during torque transmission (e.g., belt, cable, etc.)

56 ..Element has circular cross section

57 .Element has plural convolutions wound about rotational axis

58 ..Plural radially overlapping convoluted elements

59 ..Single element has plural radially overlapping convolutions

60 ..Convoluted element has noncircular cross section

61 .Element is a spring coiled about centerline angularly related to or radially spaced from rotational axis

62 ..Plural springs

63 ...Centerline of springs axially spaced from each other along rotational axis

64 ...Plural superposed springs on common centerline

65 ...Centerline of springs radially spaced from and parallel to rotational axis

66 ...Opposite ends of spring are equidistant from rotational axis

67 ....Springs on circumferentially extending curved centerline

68 ....Springs positioned between axially spaced plates of one member and driven by other member extending radially between said plates

69 .Plural flexible links connected to circumferentially spaced axially directed pins on drive and driven members

70 .Element is annular liner within radially spaced pin-receiving opening

71 ..Axially directed pin

72 ...Plural axially spaced liners

73 .Element positioned between intermeshing teeth on driving and driven members

74 ..Teeth on radially overlapping surfaces

75 ...Element is a continuous annulus extending around rotational axis

76 ..Plurality of disparate elements

77 .Element is an open loop spring curved about rotational axis

78 .Element is tube with slot through wall to provide flexibility

TORQUE TRANSMITTED VIA FLEXIBLE ELEMENT
79 .Element includes diverging wall portions defining annular groove completely surrounding rotational axis (e.g., bellows)
80 ..Nonmetallic
81 .Plural circumferentially spaced elements
82 ..Extending between radially overlapping surfaces on driving and driven members
83 ...Nonmetallic
84 ..Elements are bowed leaf springs
85 ..Nonmetallic
86 ..Axially extending torsion bars
87 .Nonmetallic element
88 ..Element is hollow sleeve surrounding rotational axis and connected at opposite ends to axially spaced torque transmitting surfaces on driving and driven members
89 ..Extending between radially overlapping surfaces on driving and driven members
90 ...Plural elements radially overlapping
91 ...Plural elements axially spaced along rotational axis
92 ..Annular element between and coincident with drive and driven members
93 ...Including means to receive radially spaced axially extending projection on drive and driven members
94 ....Laminated element or plural elements abutting or spaced along rotational axis
95 .....With disparate spacer between plural separable elements
96 ...Laminated element or plural elements abutting or spaced along axis of rotation
97 .Element is a torsion bar having a longitudinal axis coincident with the rotational axis
98 .Element is plate with external edge completely surrounding rotational axis (e.g., disc)
99 ..Plural axially spaced plates
100 .Element is leaf spring
101 ..Bowed
102 SEPARATE COUPLING DEVICE MOVABLE RADIALLY OF AXES OF TORQUE TRANSMITTING MEMBERS TO ACCOMMODATE PARALLEL, MISALIGNED AXES (E.G., OLDHAM COUPLING)
103 .Coupling device includes rolling body for transmitting torque
104 .Coupling device has aperture or groove for receiving complemenatry driving projection on torque transmitting members
105 ..Projection-receiving slot extends completely through thickness dimension of coupler
106 COUPLING ACCOMMODATES DRIVE BETWEEN MEMBERS HAVING MISALIGNED OR ANGULARLY RELATED AXES
107 .Coupling between wheel and vertically oriented shaft (e.g., millstone)
108 ..Wheel mounted on rolling body
109 .Coupling includes relatively movable gear segments
110 .Coupling transmits torque via semicylindrical segments separated by pivot pin (e.g., slipper bearing)
111 .Tripod coupling
112 .Coupling transmits torque via radially directed pin
113 ..With additional axiallly spaced torque-transmitting coupling which facilitates relative movement between members
114 ...Radially directed pin in each coupling
115 ....Pin slidable axially in slot
116 .....Axially spaced pin-carrying parts interconnected by pivotal head and socket centering joint
117 ....Plural pins in each coupling with pin ends spaced 90 degrees apart
118 .....Axially spaced pin-carrying parts interconnected by pivotal head and socket centering joint
119 ....Pins in sequential couplings oriented at right angles to each other
120 ..Pin slidable axially in slot
121 ...Pin carried by intermediate element and slidable axially in slots in both coupled members
122 ...Pin carries disparate sleeve engaged with slot walls
123 ....Sleeve rotatable about pin axis
124 .....Sleeve has spherical or semi-spherical bearing surface
125 ..Plural pins received in conforming apertures in ring
126 ...Split ring
127 ..With particular balancing means
128 ..With particular bearing cup surrounding pin end
129 ...Spherical or semi-spherical cup
130 ...And disparate device for securing cup to pin or receiver
131 ...And flexible seal
132 ..With particular bearing or bushing mounted on pin
133 ..With particular flexible seal
134 ..With particular yoke providing pin-receiving aperture
135 ...Split yoke
136 ..Plural pins carried by intermediate member with pin ends spaced 90 degrees apart
137 .Coupling transmits torque via axially directed pin radially spaced from rotational axis
138 ..Particular pivotal mounting for pin
139 .Coupling transmits torque via radially spaced ball
140 ..With additional axially spaced torque-transmitting coupling which facilitates relative movement between members
141 ..Ball mounted in groove for relative axial movement with respect to coupled member
142 ...Mounted for relative axial movement with respect to both coupled members
143 ....Grooves formed in radially overlapping elements
144 .....Intersecting grooves
145 .....With intermediate positioning cage for ball
146 ......Bottom wall of groove in outer member is parallel to axial centerline of outer member (e.g., internally grooved cylinder)
147 .Torque transmitted via intermediate element

COUPLING ACCOMMODATES DRIVE BETWEEN MEMBERS HAVING MISALIGNED OR ANGULARLY RELATED AXES
.Torque transmitted via intermediate element
148 ..Element carries or receives hook on opposite ends for connection to drive and driven members (e.g., link chain)
149 ..Axially intermeshing teeth
150 ..Intermediate element located between overlapping surfaces on drive and driven members
151 ...Intermediate element is externally grooved or ribbed sphere
152 ...Plural circumferentially spaced intermediate elements
153 ..Intermediate element includes internal openings at opposite ends for receiving axially spaced ends on drive and driven members
154 ...Intermeshing teeth on element and members
155 ..Intermediate element includes external surface at opposite ends received in complementary openings in axially spaced ends of driving and driven members
156 ...Intermeshing teeth on element and members
157 .Torque transmitted via intermeshing teeth on drive and driven members
158 ..Teeth on radially overlapping surfaces
159 ...Spherical or semispherical surfaces
160 COUPLING FACILITATES RELATIVE ROTARY DISPLACEMENT BETWEEN COUPLED MEMBERS
161 .Members coupled via axially movable, resiliently biased intermediate element
162 COUPLING FACILITATES RELATIVE AXIAL MOTION BETWEEN COUPLED MEMBERS
163 .Coupling between rotary drive table and axially movable drill string
164 ..Coupler includes endless belt or chain run engageable with drill string and moveable in direction of axial advance
165 ..Coupler includes antifriction rolling body engageable with drill string
166 ...With screw device for adjusting radial position of rolling body
167 .Coupler includes antifriction rolling body engageable with axially moveable member
168 ..Recirculating rolling bodies
169 .Including spring to bias member in axial direction
170 HOUSING
171 .Rigid semispherical surface on one housing part slidably engaged with surface on mating housing part
172 .Telescoping cylindrical housing members
173 .Flexible housing
174 ..Helically coiled member
175 ..Corrugated structure
176 .Pivotally mounted housing supported for movement between open and closed positions
177 .Separably connected housings for separably connected shafts
178 .With rolling body supporting shaft in housing
179 SHAFTING
180 .Particular vibration dampening or balancing structure
181 .Nonmetalic shaft or component
182 .With disparate device for coupling shaft to additional shaft or rotary body
183 .Hollow or layered shaft
184 GUDGEONS
185 MISCELLANEOUS

900 ELECTRICALLY INSULATIVE MEMBER
901 RAPID ATTACHMENT OR RELEASE
902 PARTICULAR MATERIAL
903 .Nonmetal
904 HOMOKINETIC COUPLING
905 .Torque transmitted via radially extending pin
906 .Torque transmitted via radially spaced balls

CLASS 474 ENDLESS BELT POWER TRANSMISSION SYSTEMS AND COMPONENTS

DECEMBER 1990

1 CONTROL FOR FORWARD AND REVERSE
2 .Cyclical or sequential (e.g., machine controlled, etc.)
3 ..Including device for shifting belt laterally of its direction of run
4 .Including separate belts for forward and reverse
5 ..Belt selection by shifting or tightening belt
6 ...Including device for shifting belt laterally of its direction of run
7 .Including coaxial pulleys rotated in opposite directions by single endless belt simultaneously engaging both pulleys
8 PULLEY WITH BELT-RECEIVING GROOVE FORMED BY DRIVE FACES ON RELATIVELY AXIALLY MOVABLE COAXIAL CONFRONTING MEMBERS (E.G., EXPANSIBLE CONE PULLEY, ETC.)
9 .Members are gripping jaws actuated during each rotation of pulley
10 ..Via relatively rotating cam and follower
11 .Speed responsive
12 ..And load responsive
13 ..To centrifugal force
14 ...Via pivoted weight
15 ...Via ball
16 ...Via liquid
17 .Load responsive
18 ..With actuator driven by electrical or fluid motor
19 ..Via relatively rotating cam and follower
20 ...Including interengaged threads
21 ...Including plural separate cam and follower pairs for adjusting plural members
22 .Temperature responsive
23 .Adjusted by power from pulley drive train
24 .And member has plural, relatively axially movable drive faces
25 .And pulley shiftable laterally of its axis of rotation
26 ..Mounted on laterally shiftable motor
27 ..Mounted on laterally shiftable countershaft
28 .Fluid pressure actuator for adjustment of member
29 .Including actuator interconnecting plural pulleys on spaced shafts for simultaneous adjustment
30 ..For axial adjustment of each member on each pulley
31 ...By dual lever mechanism
32 .Plural members forming plural belt-receiving grooves on common axis
33 ..With member common to plural grooves
34 ...Plural members common to plural grooves
35 ..Axially spaced members simultaneously adjustable
36 ...On bolt radially spaced from pulley axis
37 .By manual actuator for one or both confronting members
38 ..With neutral condition of drive
39 ..Screw actuated
40 ...With additional linkage in actuator drive train
41 ...By opposite-handed screw threads engaging adjacent members
42 ...With means to positively lock members in adjusted position
43 .Including lubrication or particular guide or bearing for movable member
44 ..Self-lubricated bearing
45 ..With lubrication of support for movable member
46 .With spring device
47 PULLEY WITH EXPANSIBLE RIM MEANS OR PULLEYS WITH ALTERNATELY USEABLE NESTABLE RIMS
48 .Nestable rims of diverse kind (e.g., one grooved and the other cylindrical, etc.)
49 .Structure for variably adjusting radius of rim section
50 ..By actuator responsive to speed or load
51 ..By fluid pressure actuator or inflatable rim
52 ..Including means interconnecting plural pulleys for simultaneous adjustment
53 ...Pulleys on spaced axes
54 ..By actuator having collar concentric with, and movable axially on, pulley axis
55 ...Collar interconnected with rim sections via pivoted link
56 ..By actuator having collar concentric with, and rotatable in plane perpendicular to pulley axis
57 ...Collar interconnected with rim sections via pivoted link
58 POWER OUTPUT PULLEY SELECTIVELY SHIFTABLE TO DIFFERENT POWER OUTPUT LOCATIONS RELATIVE TO INPUT PULLEY
59 .Pivotable about plural axes
60 ..Nonparallel axes
61 POWER INPUT AND OUTPUT PULLEYS ON NONPARALLEL AXES
62 .With common belt engaging both pulleys
63 ..And shiftable guide roll engaging belt run
64 PLURAL TURNS OF SAME BELT ABOUT PULLEY AXIS
65 .With flexible belt-tracking guide helically coiled about pulley
66 .Plural turns of same belt about axis of each of laterally spaced pulleys
67 ..With guide roll
68 ...Plural guide rolls
69 CONTROL FOR VARIABLE INPUT TO OUTPUT SPEED-RATIO
70 .Condition responsive (e.g., responsive to speed, load, etc.)
71 .Cyclical or sequential (e.g., machine controlled, etc.)
72 .Including intermeshing gears in one drive train
73 .Including separate belt on each of coaxial pulleys selectively engaged in drive train
74 ..With overrunning clutch
75 ..Selection by tightening belt on selected pulley
76 ..Selection by axially movable pin engaged in opening through selected pulley
77 .Including coaxial pulleys shiftable axially to align selected pulley with drive belt
78 .Including belt shiftable axially from one to another surface of stepped pulley or coaxial pulleys of different diameter
79 ..And pulley pivotally mounted to facilitate belt shift
80 ..And including belt-shifter mechanism
81 ...For shifting belt from both power input and power output pulleys
82 ...Shifter mechanism including parallelogram linkage

CONTROL FOR VARIABLE INPUT TO OUTPUT SPEED-RATIO
83 .Including mechanism for shifting belt axially on spaced pulleys with tapering drive face
84 PLURAL BELTS OR PLURAL OUTPUT LOADS
85 .Plural belts having interengaged drive surfaces
86 .Plural output loads
87 ..With common belt concurrently engaging input and plural output pulleys
88 .Plural belts in series via countershaft
89 ..Countershaft laterally shiftable
90 STATIC ELECTRICITY ELIMINATOR
91 STRUCTURE FACILITATING LUBRICATION OF BELT, PULLEY, OR GUIDE ROLL
92 CLEANING DEVICE FOR BELT, PULLEY, OR GUIDE ROLL
93 FLUID-IMPELLING MEANS (E.G., FOR COOLING, ETC.)
94 RESILIENT CONNECTION BETWEEN PULLEY OR GUIDE-ROLL RIM AND MOUNT
95 HUB FORMED IN SECTIONS AND SEPARABLE BY MOVING SECTIONS RADIALLY APART (E.G., SPLIT PULLEY TO FACILITATE INSTALLATION, ETC.)
96 .And severance lines for separable rim sections diametrically opposite each other
97 ..With spokes connecting hub section and rim section
98 ...Plural integral spokes
99 ....With discrete means connecting outer ends of integral spokes to rim
100 AUXILIARY ENDLESS BAND FOR GUIDING BELT OR HOLDING BELT ENGAGED WITH PULLEY
101 MEANS FOR ADJUSTING BELT TENSION OR FOR SHIFTING BELT, PULLEY OR GUIDE ROLL
102 .With sensor for controlling operation of shifter to correct belt training deviation
103 ..Shifter driven by electrical or fluid motor
104 ...Fluid motor
105 ..Sensor actuates pawl-and-rachet mechanism to operate shifter
106 ..Sensor includes rotatable belt-engaging surface
107 ...Rotatable on same axis as shiftable guide roll or pulley
108 ....To initiate relative axial movement of belt-engaging surfaces of guide roll or pulley
109 .Load responsive tension adjuster or shifter
110 .Tension adjuster or shifter driven by electrical or fluid motor
111 .Tension adjuster has surface in sliding contact with belt
112 .Pulley or guide roll has eccentric mount for shifting or tensioning movement
113 .Pulley shifter
114 ..Pulley on shaft of adjustably mounted drive motor
115 ...Spring biased in belt-tensioning direction
116 ..Pulley is vehicle drive pulley (e.g., bicycle sprocket, etc.)
117 ..Spring biased in belt-tensioning direction
118 ..Pulley shiftable into engagement with exterior of belt surface
119 .Belt shifter for shifting belt laterally or for selective engagement and supported disengagement of belt with pulley
120 ..Pulley has slot in groove-forming flange facilitating belt installation or removal
121 ..For shifting exterior surface of belt into engagement with pulley
122 ..For shifting belt laterally
123 ...By adjusting axial inclination of belt guide roll
124 ...With idler support having circumferentially spaced rollers to receive shifted belt
125 ...Including means for selectively clutching coaxial idler support to pulley
126 ...Shifter actuated by screw or gear drive
127 ...Shifter actuated by flexible cable
128 ...Shifter actuated by handle pivoted about fixed axis
129 ....And connector link between handle and shifter pivotable about spaced fixed axis
130 ..Portable hand tool for removing or installing belt
131 .Guide roll forms belt-thickness gap with pulley
132 .Gravity actuated guide roll for tensioning belt
133 .Guide roll mounted for movement of its axis along arcuate path to tension belt
134 ..Plural guide rolls engaging single belt
135 ..Guide roll spring biased in belt-tensioning direction
136 .Guide roll mounted for movement of its axis along rectilineal path to tension belt
137 ..Plural guide rolls engaging single belt
138 ..Guide roll spring biased in belt-tensioning direction
139 PULLEY ENGAGES EXTERIOR SURFACE OF BELT
140 BELT GUIDE HAS SURFACE IN SLIDING CONTACT WITH BELT
141 PULLEY HAVING CIRCUMFERENTIALLY SPACED PORTIONS OF DRIVE FACE SPACED UNEQUAL DISTANCES FROM PULLEY AXIS OF ROTATION (E.G., ELLIPTICAL PULLEY, ETC.)
142 MAGNETIC ATTRACTION BETWEEN BELT AND PULLEY
143 FABRIC DRIVE FACE ON BELT AND PULLEY
144 GUARD OR HOUSING FOR BELT OR PULLEY
145 .Connected to belt
146 .Extending along entire length of belt run
147 ..Individual tubular housings for opposite belt run
148 SYSTEM INCLUDING SPACED PULLEYS INTERCONNECTED BY A BELT
149 .Positive drive pulley and friction drive pulley connected by same belt
150 .With frame or mount for system
151 AUXILIARY MEMBER REMOVABLY ATTACHED TO PULLEY OR GUIDE ROLL FOR PREVENTING LATERAL DISPLACEMENT OF BELT
152 POSITIVE DRIVE PULLEY OR GUIDE ROLL
153 .With particular belt
154 ..Belt has spherical or hemispherical drive faces
155 ..Belt formed of rigid links
156 ...With sequential links pivoted about discrete pivot pin
157 ....And each link has integral surfaces forming inwardly opening groove

POSITIVE DRIVE PULLEY OR GUIDE ROLL

158 .And additional coaxial surface for engaging same belt in shifted condition or for engaging auxiliary belt, brake, or clutch member

159 ..Coaxial surface is belt-engaging surface on friction drive pulley

160 ..Coaxial surface is belt-engaging surface on positive drive pulley of different circumference

161 .Having nonmetallic component

162 .Having belt-engaging surfaces on discrete circumferentially spaced, relatively movable or replaceable members

163 ..Movable with respect to each other during operation

164 .Having axially spaced sets of belt-engaging surfaces

165 .With stationary support for pulley or guide roll

166 FRICTION DRIVE PULLEY OR GUIDE ROLL

167 .With particular belt

168 .Including plural, coaxial, circumferential belt-receiving grooves

169 ..Plural grooves of different circumferences

170 ..Plural grooves formed in unitary member

171 .And additional coaxial surface for engaging same belt in shifted condition or for engaging auxiliary belt, brake, or clutch member

172 .Guide roll on axis perpendicular to top surface of belt for engaging side of belt

173 ..And additional guide roll for engaging top or bottom surface of belt

174 .Pulley or guide roll including circumferential belt-receiving groove

175 ..Groove formed by rugate or circumferentially spaced drive surfaces

176 ..Groove formed by multiple, abutting, circumferentially connected members

177 ..And circumferentially continuous belt-engaging layer or insert of diverse material added on or between groove-forming flanges

178 ...Layer or insert of resilient material

179 ..Including connected discrete axially spaced groove-forming flanges

180 ...Connected via nesting cylindrical or conical surfaces integral with the flanges

181 ...And abutting radial surfaces integral with the flanges

182 ....Including connector extending through opening in abutting surfaces

183 .....Connector comprises tang integral with one of the surfaces

184 .Pulley or guide roll having plural, discrete belt-engaging faces for engaging flat belt

185 ..Circumferentially spaced faces

186 ...And axially spaced faces

187 ..Each face has continuous circumferential periphery

188 .Including grooves or openings in cylindrical belt-engaging surface (e.g., for escape of air, etc.)

189 ..Circumferentially extending grooves

190 .Including nonmetallic belt-engaging surface portion

191 ..Rubber

192 ...With embedded metal layer

193 ..Leather

194 ..Wood or paper

195 .With spokes connecting rim to hub

196 ..Plural spoke sets axially spaced

197 .Cylindrical rim interconnected to axially spaced support members

198 .With stationary support for pulley or guide roll

199 ..And ball or roller bearing for mounting pulley or guide roll on support

200 MOBIUS BELT

201 BELT HAVING DRIVE SURFACES ON OPPOSITE SIDE EDGES OF STACKED PLATES HAVING PLANAR FACES PERPENDICULAR TO DIRECTION OF BELT MOVEMENT

202 POSITIVE DRIVE BELT

203 .Drive surfaces on belt formed by spherical or hemispherical elements

204 .Drive surfaces on belt formed in or interconnected by continuous flexible member

205 ..Drive surfaces on longitudinally spaced teeth formed integral with flexible member

206 .Belt formed of rigid links

207 ..Including nonmetallic part

208 ..Including wire member coiled about pivotal axis between links

209 ..Including ball or roller bearing circumferentially spaced about pivotal axis between links

210 ..Links pivotable about diverse axes during operation (e.g., "universal" connection facilitating alignment with sprockets in diverse planes)

211 ...Ball-and-socket connection

212 ..Link including integral surfaces forming inwardly opening groove (e.g., silent chain, etc.)

213 ...Plural links having laterally aligned groove-forming surfaces

214 ....Connector or bearing member extending through or positioned in laterally aligned openings in adjacent links is noncircular in transverse cross section

215 .....Multiple connector or bearing members extend through or positioned in common opening

216 ......Concave surface of one connector or bearing member abuts convex surface of another connector or bearing members

217 ....Plural connector or bearing members with concave surface abut convex surface or surfaces on another connector or bearing member

218 ..Including diverse member for interconnecting opposite ends to complete loop (e.g., repair link for broken chain, etc.)

219 ..Including separate locking member for retaining link-connector in laterally aligned openings through adjacent links

220 ...Common locking member retains longitudinally spaced connectors

221 ....Strandlike locking member (e.g., wire, etc.)

222 ...Threaded connection between connector and locking member

223 ...Locking member received in annular groove extending entirely around circumference of connector

POSITIVE DRIVE BELT
.Belt formed of rigid links
..Including separate locking member for retaining link-connector in laterally aligned openings through adjacent links
224 ...Locking member includes portion disposed within opening which receives connector
225 ....Locking member extends through all aligned openings
226 ..Link including discrete members forming laterally spaced sides of opening for pulley tooth
227 ...With particular structure facilitating disassembly of adjacent links
228 ...With discrete connector extending through laterally aligned apertures in adjacent links
229 ....Connector has bearing surface which is noncircular in transverse cross section
230 ....Connector connects sequential links each having discrete members forming laterally spaced sides
231 .....With sleeve rotatable with respect to each link for engaging pulley tooth
232 ..Link including common member forming laterally spaced sides of opening for pulley tooth
233 ...With discrete member interconnecting sequential pulley-tooth-receiving links
234 ....Connector member inserted through lateral opening in pulley-tooth-receiving links
235 ...Common member surrounds opening for pulley tooth on all sides
236 ....Member formed from sheet metal
237 FRICTION DRIVE BELT
238 .Including plural interconnected and transversely spaced pairs of oppositely facing side-drive surfaces (e.g., plural "V-belts", etc.)
239 .Having drive surface on helically coiled wire or cord
240 .Including plural interconnected members each having a drive surface facing in a common direction
241 ..Forming imbricate structure
242 ..Belt has oppositely facing side drive surfaces (e.g., "V-belt", etc.)
243 ...Surfaces on ball or roller elements
244 ...Oppositely facing surfaces are on pair of discrete elements
245 ....And sequential pairs are interconnected longitudinally by distinct pivot elements
246 ..Plural, inwardly facing drive surfaces along the direction transverse to longitudinal extent of belt
247 ...And plural, inwardly facing drive surfaces along the direction parallel to longitudinal extent of belt
248 .Including link-chain coextensive with continuous surface belt
249 .Including groove, openings or pockets formed in belt surface and arranged along entire length of belt (e.g., for flexibility, air escape, etc.)
250 ..Grooves transversely extending on belt surface
251 ...And additional groove on opposite surface
252 ..Groove continuous and longitudinally extending
253 .Including particular means connecting opposite ends to form loop
254 ..Connected by adhering surface on one end to surface on other end (e.g., by adhesive, heat, seal, etc.)
255 ..Including discrete connector
256 ...Connector comprises element inserted into longitudinal openings in belt ends
257 ...Connector comprises plate clamped externally of belt ends
258 ...Connector comprises cord sewn through belt ends
259 .Drive surface on single sheet or web wound in plural, completely overlying convolutions
260 .Including embedded elongated strand having multiple components or layers of diverse materials
261 .Including plural superposed layers each having strands particularly oriented relative to belt dimension
262 ..Strands in the layers are oblique to longitudinal run of belt (e.g., plural layers of bias fabric, etc.)
263 .Including discrete embedded fibers
264 .Including plural layers of different elastomeric materials
265 .Having trapezoidal cross section (e.g., "V-belt", etc.)
266 .Including fabric web (e.g., knit, woven, etc.)
267 ..Fabric having particular knit or weave
268 ..And additional coating, layer, or reinforcement of diverse kind of material
269 ...Additional material is leather
270 ...Additional material is metal
271 ...Additional material is rubber
272 .Including metallic drive face
273 MISCELLANEOUS

900 PHASE VARIATOR
901 PULLEY OR GUIDE ROLL FOR TRACK OF ENDLESS TRACK VEHICLE
902 PARTICULAR CONNECTION BETWEEN RIM AND HUB
903 PARTICULAR CONNECTION BETWEEN HUB AND SHAFT

CLASS 475 PLANETARY GEAR TRANSMISSION SYSTEMS AND COMPONENTS

DECEMBER 1990

1 INPUT FROM INDEPENDENT POWER SOURCES
2 .Condition responsive motor control
3 .Including manual input
4 ..And electric motor input
5 .Including electric motor input
6 .Plural outputs
7 .Worm gear in drive train
8 .One-way clutch or brake in drive train
9 .Bevel planet pinion in drive train
10 .Intermeshing planet pinions in drive train
11 ROTARY PLANETATING OUTPUT
12 REVERSAL OF DIRECTION OF POWER FLOW CHANGES POWER TRANSMISSION TO ALTERNATE PATH
13 .Input and output exchange functions
14 CYCLICAL OR INTERMITTENT DRIVE
15 .Plural outputs
16 .With means to adjust cycle or drive during operation
17 .Multilated or noncircular gear in drive train
18 STEERING BY DRIVING
19 .With condition responsive steer control
20 .With cooling or lubrication
21 .With infinitely variable drive
22 ..Variable drive is fluid drive
23 ...Hydrostatic type
24 ....Plural pump-motor sets
25 ..Belt type
26 ..Variable drive is friction drive
27 .Fluid steer control
28 .With plural power paths to a planetary transmission at each output
29 .With planetary reaction brake steering
30 ..And carrier input to planetary gearing
31 FLUID DRIVE OR CONTROL OF PLANETARY GEARING
32 .Diverse fluid drives
33 .Plural impeller-turbine type fluid circuits
34 ..Fill and empty type
35 .Single impeller-turbine type fluid circuit divides or combines plural power paths
36 ..Planetary gearing divides paths
37 ..Three fluid outputs
38 ...And stator
39 ..Two fluid outputs and stator
40 ...With variable fluid drive control
41 ...And mechanical drive path
42 ..Control of or by fluid drive
43 ..With speed or torque responsive clutch or brake control
44 ..Stator rotatable in reverse direction to provide drive
45 ...Turbine braked, stator provides reverse drive
46 ....And adds torque in forward drive
47 .Impeller-turbine type fluid circuit and mechanical path in parallel
48 ..With control of or by the fluid circuit
49 ...Gearing controlled by fluid circuit condition
50 ...Fill and empty type fluid circuit
51 ..With speed responsive control
52 ..And nonplanetary gearing
53 ..Planetary gearing divides paths
54 ..Sun, orbit and carrier braked
55 ..Sun and orbit braked
56 ..Sun and carrier braked
57 ..Orbit and carrier braked
58 ..Orbits braked
59 .Impeller-turbine type fluid circuit in series with planetary gearing
60 ..And condition responsive control
61 ...Control of or by fluid circuit
62 ....Control responsive to relative impeller and turbine speeds
63 .....System or servo fluid pressure controlled
64 ....Fluid circuit controlled
65 .....By lock-up clutch actuation
66 ..And nonplanetary gearing
67 ..With synchronizing of positive clutch or brake
68 ..With nonratio brake
69 ..Fluid circuit controlled
70 ...Pressure controlled
71 ..And differential in series
72 .Fluid pump and motor in one of plural paths to or from planetary gearing
73 ..Plural fluid power paths to planetary gearing
74 ..Plural outputs
75 ..Three pumps or motors
76 ..Speed responsive control
77 ...Constant speed output
78 ..Interrelated fluid unit and gear control
79 ...With constant speed ratio between input and one fluid unit
80 ..Plural speed ranges
81 ...With constant speed ratio between input and one fluid unit
82 ....Having single planet carrier
83 .Pump and motor in series with planetary gearing
84 .Control of differential planetary gearing
85 ..Special fluid
86 ..By fluid operated mechanical clutch
87 ...Operated by viscous drag
88 ...Operated by a pump responsive to differential action
89 ..Fluid resistance controls relative rotation of outputs
90 ...Fluid pumped by differential gears
91 .Fluid resistance inhibits relative rotation
92 ..Fluid damper for reaction element
93 ..Valve inhibits fluid flow
94 ...Speed or torque responsive valve control
95 ....Centrifugally actuated valve controls fluid clutch
96 .....Clutch connects planet pinion and carrier
97 .....With fluid brake control
98 ....Centrifugally actuated valve controls fluid brake
99 ...Interrelated valve control and mechanical clutch or brake
100 ....Valve control and mechanical clutch
101 .....Pump pressure engages mechanical clutch
102 ...Fluid brake(s) for plural planetary elements
103 ...Plural fluid clutches
104 ...Fluid brake for planetary element
105 ....And fluid clutch
106 ....Bevel gearing
107 ....Sun or orbit braked
108 ...Fluid clutch includes gear type pump
109 ...Planet clutched to carrier
110 ....With reversing means
111 ..Planet clutched to fluid flywheel
112 ..Fluid container connected to planet pinion
113 ..Impeller-turbine type fluid unit used as brake
114 .Fluid control of friction planetary gearing
115 ..Stepless ratio change controlled

FLUID DRIVE OR CONTROL OF PLANETARY GEARING
116 .Fluid controlled mechanical clutch or brake
117 ..Temperature responsive control
118 ..Speed responsive control
119 ...Safety device
120 ...Pressure control
121 ...Ratio change
122 ....Speed responsive valve control
123 .....Electrical control
124 .....Centrifugal control
125 ..Torque responsive control
126 ...Responsive to torque reversal
127 ..Pressure regulation
128 ...Valving controls shift timing
129 ....With fluid accumulator
130 ...Manual regulator
131 ..Manually actuated ratio selector
132 ...Electrical
133 ...With safety valve
134 ...Plural selector valves
135 ...Rotary valve
136 ..With ancillary pump or governor drive
137 ...Plural pumps
138 ..With positive clutch or brake
139 ...And friction synchronizer
140 ..Spring engaged, fluid released clutch or brake device
141 ...Plural devices simultaneously spring engaged
142 ...Single fluid motor engages one device and releases other
143 ..Expanding fluid motor chamber mechanically contracts second motor
144 ..Fluid controlled one-way devices
145 ..Fluid motor controls device through cam or lever
146 ..Fluid motor structure
147 ...Radially expanding motor
148 ...With one-way device
149 ELECTRIC OR MAGNETIC DRIVE OR CONTROL
150 .Differential drive or control
151 .Plural power paths
152 ..With nonplanetary drive to electric or magnetic path
153 .With condition responsive control
154 .With electric or magnetic controlled brake
155 ..And manual speed selector
156 ..Electric or magnetic device disengages brake
157 ..Electric or magnetic engaged brake and spring engaged lockup clutch
158 WITH INDICATOR OR ALARM
159 WITH LUBRICATON
160 .For differential planetary gearing
161 WITH TRANSMISSION COOLING OR HEATING MEANS
162 PLANET PERIPHERY SURROUNDS AXIS OF INTERACTING GEAR (E.G., ECCENTRICALLY DRIVEN TRANSMISSON)
163 .Wabbler transmission
164 ..Single member has oppositely axially facing tooth sets
165 .Friction gearing
166 ..Variable speed
167 .Link chain gearing
168 .Gear teeth comprise rolling bodies
169 .Means to change speed ratio between input and output
170 ..Variable eccentricity
171 ..Plural power paths to planetary gearing
172 ..Condition responsive control
173 ..Plural planetary elements braked
174 .Plural outputs
175 .With releasable clutch or brake
176 .Gear has plural circumferential tooth sets
177 ..Internal and external tooth sets
178 .Circumferentially spaced connector pins
179 ..Roller bearing surrounds pin
180 .Particular gear tooth
181 .Particular counterweight
182 PLANET PINION ENGAGES FLEXIBLE BELT OR CHAIN
183 PLANET PINION IS FRICTION GEAR
184 .Plural outputs (e.g., differential)
185 .Variable speed ratio (without slippage)
186 ..Condition responsive ratio change
187 ..Releasably braked element
188 ...Plural elements releasably braked
189 ..Planet pinion is a ball
190 ..Planet pinion rotatable about axis at angle to axis of input or output gear
191 ...Planet pinion is member having axis fixed or adjustable to position perpendicular to axis of input or output gear
192 ....Pinion engages facing concave surfaces (e.g., mounted in torus)
193 ...Conical or frusto-conical planet pinion
194 ....Torque responsive means to increase contact pressure
195 .Torque responsive means to increase contact pressure
196 .Planet pinion is ball
197 .Planet pinion rotatable about axi8at angle to axis of input or output gear
198 VARIABLE SPEED OR DIRECTION TRANSMISSION COMBINED WITH DIFFERENTIAL
199 .Condition responsive
200 .Differential is beneath prime mover or transmission
201 .Differential is between prime mover and transission in the path of power flow
202 .With universal joint in drive train
203 .Plural selectively driveable gears surround differential
204 .Variable speed or direction is planetary transmission
205 ..Plural planetary units combined with differential
206 .Transmission output shaft parallel to differential output shafts
207 NONPLANETARY VARIABLE SPEED OR DIRECTION TRANSMISSION COMBINED WITH PLANETARY TRANSMISSION
208 .Condition repsonsive
209 .Interrelated control of in series transmissions
210 .Nonplanetary transmission is belt or chain gearing
211 ..Plural power paths to planetary gearing
212 ...Nonplanetary transmission is chain gearing
213 ..Nonplanetary transmission is chain gearing
214 .Nonplanetary transmission is friction gearing
215 ..Plural power paths to planetary gearing
216 ...Friction gear engages facing concave surfaces
217 ...Nonplanetary transmission is disc and wheel
218 .Plural power paths to planetary gearing
219 .Plural planetary units
220 DIFFERENTIAL PLANETARY GEARING
221 .Differential or nondifferential planetary combined with differential (e.g., two differentials)

DIFFERENTIAL PLANETARY GEARING
222 .With universal joint in drive train
223 .Including means to selectively apply rotational power to only one output
224 ..By braking other output
225 .With additional gearset between differential output and load
226 .Planet pinion is worm gear
227 ..And spur gear on pinion
228 .Worm drive on input shaft
229 ..And roller bearing supporting worm from casing
230 .Bevel gear differential
231 ..With means to limit overspeed of one output (e.g., lock-up clutch)
232 ...Centrifugal actuator
233 ...Lock-up clutch between pinion and pinion carrier
234 ...By axial movement of output gear
235 ....With spring bias on gear or clutch
236 ...Particular gear shape or tooth interaction limits overspeed
237 ...Manual actuator
238 ....Friction clutch
239 .....Plate clutch
240 ...Spring bias on overspeed limiting means
241 ....Helically coiled spring
242 ..Separate planet pinions or separate tooth set on same pinion for each output
243 ..Output gear rotatable relative to axial support shaft
244 ...Support shaft coupled to other output gear
245 ...With roller bearing between output gear and shaft
246 ..With roller bearing between gear and its support
247 ...Ball bearing
248 .Spur gear differential
249 ..With means to limit overspeed of one output
250 ...Manual actuator
251 ..Pinion axis at angle intersecting axis of output
252 ..Intermeshing planet pinions
253 ..With roller bearing between gear and its support
254 CONDITION RESPONSIVE CONTROL
255 .Eccentrically weighted planet
256 .Downshift responsive to high speed limit
257 .Speed responsive control adjusted or opposed by torque
258 .Centrifugally controlled clutch or brake
259 ..One-way clutch or brake
260 ..Centrifugal brake control
261 ..Positive clutch
262 ..Axially engaged friction clutch
263 .Overload release
264 ..Spring applied friction drive establishing means
265 ...Drive establishing means is friction brake
266 .Stepped, torque responsive ratio change
267 .With flywheel or centrifugal weight control
268 ..With planet pinion axis at angle to axis of mating gear (e.g., bevel gears)
269 WITH MEANS TO VARY DRIVE RATIO OR DISCONNECT DRIVE (E.G., BRAKE OR CLUTCH)
270 .Manual force provides reaction during drive
271 .Plural elements selectively braked
272 ..With preselection
273 ..Axis of planet pinion at angle to axis of mating gear (e.g., bevel gears)
274 ...And additional planetary gearset having axis of pinion parallel to axis of mating gear
275 ..Transmission includes three relatively rotatable sun gears
276 ...With brake for sun, carrier and orbit
277 ...With brake for plural sun gears
278 ....And brake for carrier
279 ...With brake for plural orbits
280 ..Brake for sun, carrier and orbit
281 ...Including one-way clutch or brake
282 ..Brake for sun and orbit
283 ...Including one-way clutch or brake
284 ..Brake for sun and carrier
285 ...Including one-way clutch or brake
286 ..Brake for orbit and carrier
287 ...Including one-way clutch or brake
288 ..Plural suns braked
289 ...Including one-way clutch or brake
290 ..Plural orbits braked
291 ...Including one-way clutch or brake
292 ..Including one-way clutch or brake
293 .Speed responsive clutch or brake
294 .Ratio shift initiated by reverse rotation of input shaft
295 .Plural outputs
296 .Plural drive ratios other than unity
297 ..Including one-way clutch or brake
298 .Gear shiftable axially to disconnect or vary ratio
299 ..Orbit shiftable relative to sun and carrier
300 ..Sun shiftable relative to orbit and carrier
301 .Brake or clutch on surface of helically coiled member
302 .Nonplanetary gearing combined with planetary
303 .With synchronizing clutch or brake
304 .Planet pinion is worm gear
305 .Including releasable clutch directly between planet pinion and carrier
306 .Brake for planetary transmission having axis of planet pinion at angle to axis of mating gear (e.g., bevel gears)
307 ..Including one-way clutch or brake
308 ..And lock-up clutch
309 ...Friction clutch
310 ....Plate clutch
311 .Sun braked
312 ..Including one-way clutch or brake
313 ..Intermeshing planet pinions on single carrier
314 ..And lock-up clutch
315 ...Friction clutch
316 ....Plate clutch
317 .Orbit braked
318 ..Including one-way clutch or brake
319 ..Intermeshing planet pinions on single carrier
320 ..And lock-up clutch
321 ...Friction clutch
322 ....Plate clutch
323 .Carrier braked
324 ..Including one-way clutch or brake
325 ..Intermeshing planet pinions on single carrier
326 ..And lock-up clutch
327 ...Friction clutch
328 ....Plate clutch
329 PLURAL POWER PATHS TO PLANETARY GEARING
330 .Plural planetary units
331 PLANETARY GEARING OR ELEMENT
332 .Plural outputs

PLANETARY GEARING OR ELEMENT
333 .Planet pinion is worm gear
334 .Floating support annulus in rolling contact with planet pinion
335 .Toothed planet pinion has smooth bearing surface engaging raceway on sun or orbit gear
336 .Axis of planet pinion at angle intersecting rotational axis of mating gear (e.g., bevel gears)
337 .Plural planet carriers in series move at different speeds
338 .Coaxial teeth around planet pinion engage axially spaced relatively rotatable gears
339 ..Engage plural relatively rotatable sun gears
340 ...And orbit gear
341 ..Engage plural relatively rotatable orbit gears
342 ...And sun gear
343 .Nonplanetary gearing combined with planetary
344 .Particular gear tooth feature
345 ..Nonmetallic or resilient
346 .Floating or flexible coupling or support
347 ..Resilient member
348 .Planet pinion supported by roller bearings
349 .With manual input

900 BRAKE FOR INPUT OR OUTPUT SHAFT
901 PARTICULAR MATERIAL
902 .Nonmetallic
903 STACKED PLANETARY GEARING
904 PARTICULAR MATHEMATICAL EQUATION

CLASS 493 MANUFACTURING CONTAINER OR TUBE FROM PAPER; OR OTHER MANUFACTURING FROM A SHEET OR WEB

1 CONTROL OF OPERATION BY USE OF TEMPLET, TAPE CARD, OR OTHER REPLACEABLE INFORMATION SUPPLY
2 .With sensing of numerical information and regulation with mechanical connection between sensing means and regulated means (i.e., Numerical Control)
3 CONTROL MEANS ENERGIZED IN RESPONSE TO ACTIVATOR STIMULATED BY CONDITION SENSOR
4 .Cigarette filter making
5 .Responsive to temperature
6 .Responsive to assembling or coating operation
7 ..Responsive to flowable material (e.g., glue, ink for printer, etc.)
8 .Responsive to work material, the product or means engaging the work material or the product
9 ..By use of pneumatic sensor
10 ..By use of photocell condition sensor
11 ...Responsive to mark or indicia on work
12 ...Responsive to defective or missing work
13 ...Plural sensors
14 ....Plural interrelated sensors
15 .....Photocell and diverse-type sensor
16 ..To eject defective work material or product
17 ..By use of plural sensors
18 ...Plural interrelated sensors
19 ....Sensing opposite edges of planar work
20 .....Opposite side edges
21 ..To actuate timer
22 ..To actuate cutting, breaking, tearing, or abrading means
23 ..To actuate folder
24 ..Sensing indeterminate length work supply
25 ..Responsive to size of work or product
26 ..Responsive to weight of work or product
27 ..To stop machine
28 ..Responsive to count
29 ..To actuate material advancing means
30 .Responsive to machine element
31 ..Malfunctioning machine element
32 ...Responsive to stress of machine element
33 ....To stop machine
34 ..To adjust machine element to preselected position
35 ..Responsive to count of machine element
36 ..Responsive to timer
37 WITH MEASURING OR TESTING
38 SAFETY
39 CIGARETTE FILTER MAKING
40 .Filter having indicator or inspection means
41 .With application of heat to secure wrapper
42 .With shaping or compacting of filter material
43 ..Including heating
44 ..Including fluid contact for forming
45 ..Cutting continuous length rod into determinate lengths
46 ..Prior to assembly with other cigarette filter material
47 .By assembling dissimilar filter materials (e.g., fiber and powdered charcoal, etc.)
48 ..With application of forced air, vacuum or vibration to assist handling
49 ..Including plasticizer, adhesive, coating, or impregnant
50 .Filter of fibrous material
51 CONTAINER MAKING
52 .Rigid container (e.g., box, carton, cap, cup, etc.)
53 ..With printing or photographic reproduction
54 ...On material prior to assembly with container
55 ...On material to be erected to become container
56 ..With cutting, breaking, tearing, or abrading
57 ...By randomly manipulated implement
58 ...And embossing
59 ...And form-scoring
60 ....Rotary cutting, breaking, tearing, abrading, or form-scoring tool
61 ....Reciprocatory cutting, breaking, tearing, abrading, or form-scoring tool
62 .....Severing of web into blanks
63 ...Perforating
64 ...By rotary tool
65 ....On travelling carrier
66 ....Flexibly mounted rotary tool
67 ....Including assembling of distinct members
68 .....And folding
69 ....Including folding
70 .....Of flap
71 .....With means to advance work or product
72 ......Continuous advance
73 ...By reciprocatory tool
74 ....Severing of web into blanks
75 ....Including assembling of distinct members
76 .....Comprising bringing two members together
77 ......Indeterminate length member
78 ....Member comprising adhesive backed tape
79 ....Including folding
80 .....Of flap
81 .....With means to advance work or product
82 ...With scrap material separation or removal
83 ..With scrap material separation or removal
84 ..Assembling of distinct members
85 ...With extruding, drawing, or attenuating
86 ...Including cutting or tearing edge to container
87 ...Including discharge assist means (e.g., valve, pour spout, etc.)
88 ...Including handle or suspension means
89 ...Including structural reinforcement
90 ...Including internal partition
91 ....Intersecting partitions
92 ....Single shaped partition adapted to touch packaged material on three sides
93 ...Liner
94 ....Partial liner (e.g., fly liner, bottom gasket, etc.)
95 ....Liner permanently secured to wall
96 .....Prior to erecting of container
97 ......With indeterminate length work supply
98 .....Assembling by wrapping container about premade liner
99 .....Secured at container seam
100 ....Premade liner and premade container

CONTAINER MAKING
.Rigid container (e.g., box, carton, cap, cup, etc.)
..Assembling of distinct members
...Liner
....Premade liner and premade container
101 .....With venting or vacuumizing of container to allow assembly with liner
102 ...Including application of distinct closure
103 ....Closure having metallic portion
104 ....Nonrectangular cross section container
105 .....By use of turret mandrel carrier
106 ......And frustoconical form
107 ....Rotary form
108 .....Circular cross section container
109 ......With bending to secure closure
110 ...Including laminating or coating of container blank
111 ...Including wrapping of container
112 ....Including use of rotary container support
113 ....Including use of reciprocatory container support
114 ...Securing
115 ....By application of distinct securing member
116 .....Tape
117 ......Applied to moving work
118 .....Material penetrating member
119 ......Bifurcated member
120 ...Including use of work supply hopper
121 ..Securing
122 ...Including use of work blank supply hopper
123 ....And use of vacuum to handle work
124 .....To place blank onto folder
125 .....With conveyor for advance to folder
126 .....And means to transfer blank to folder
127 .....Comprising folder
128 ...With application of adhesive
129 ....And heat sealing
130 ....With work advance between application of adhesive and securing
131 .....Application of adhesive to moving work
132 ......By applicator having surface engaging and moving with work
133 ...Including heat sealing
134 ....By direct application of fluid
135 ....Of moving work
136 ...By interfitting of container portions
137 ....Interlocking tab and slot
138 .....Including integral internal partition
139 .....Integral interlocking closure
140 ....Inwardly folded flange
141 ...Including means to press work while adhesive sets or dries
142 ....Work advancing during pressing
143 .....Plunger- and die-type press
144 .....Roller-type press
145 ....Manually actuated press
146 .....Manually driven
147 ...With means to advance work or product
148 ..With coating
149 ...On nonrectangular cross section container
150 ...Adhesive
151 ....And folding
152 ..Nonrectangular cross section container
153 ...Noncircular cross section
154 ...By use of conical former (e.g., pleating, etc.)
155 ....Rotary former
156 ...End closing
157 ....By folding over end of tube
158 ...Edge crimping or curling
159 ....By relative rotation of work and tool about work axis
160 ..Including form-scoring
161 ...Continuous advance with form-scoring tool moving with work
162 ..Folding
163 ...By mandrel on endless carrier
164 ....Assembly of plural mandrels turning about fixed axis
165 .....To form gable top on container
166 .....Folder driven by stationary cam
167 ...By plunger
168 ....Forming hollow wall or 270 degree folded edge
169 ....Plural interrelated plungers (e.g., making separate cover and container)
170 ....Flowable plunger or reaction member
171 ....Expandable or contractable plunger or reaction member
172 ....Orbitally moving plunger or reaction member
173 .....Continuously orbiting
174 ....And reciprocatory reaction member
175 ...By mandrel
176 ....And reciprocatory arm like tool
177 ...Work moving transversely to fold line during folding
178 ...Work moving parallel to fold line during folding
179 ....On endless conveyor belt or chain
180 ...With means to advance work or product
181 ....Of flattened tubular blank
182 ....By endless conveyor belt or chain
183 ....End flap folding
184 ....Forming gable top
185 ..Including crushing or crumpling
186 .Pliable container (e.g., bag, envelope, etc.)
187 ..With printing or photographic reproduction
188 ...On work material
189 ..Including heat sealing
190 ...And cooling
191 ....Heating or cooling by direct application of fluid
192 ...By direct application of fluid
193 ...Including supplying indeterminate length work
194 ....And cutting, breaking, tearing, or abrading
195 .....At separate station from heat sealing
196 ......With means to advance work or product
197 ....Including work advance during heat sealing
198 ....With means to receive interconnected products
199 ...And cutting, breaking, tearing, or abrading
200 ....At separate station from heat sealing
201 .....With means to advance work or product
202 ......Including work advance during heat sealing
203 ....Composite heat sealing and severing
204 .....With vertical stacking of product
205 ...Heat sealing by means moving with work

CONTAINER MAKING
.Pliable container (e.g., bag, envelope, etc.)
..Including heat sealing
206 ...By oppositely moving work gripping means
207 ...By yieldable, heated means
208 ...By rotary heat sealer
209 ...By reciprocatory heat sealer
210 ..Assembling of distinct members
211 ...With extruding, drawing, or attenuating
212 ...Means to facilitate opening of container
213 ....Reclosable means (e.g., valve)
214 ...Closure securing element
215 ....Plastically deformable
216 ...Return envelope or message card and main envelope
217 ...Liner
218 ...Bottom to square-bottom-folded bag
219 ...Bottom to satchel-bottom-folded bag
220 ...With coating
221 ....Application of adhesive to secure handle or suspension means
222 ...Means to permit visual inspection of content (e.g., window, etc.)
223 ...With cutting, breaking, tearing, or abrading
224 ....Subdividing web of material
225 ...Drawstring to close container
226 ...Handle or suspension means
227 ..With cutting, breaking, tearing, or abrading
228 ...Including form-scoring
229 ....Notching of work edge
230 ....Partial severance to form interconnected products
231 ...Including folding
232 ....Notching of work edge
233 ....Partial severance to form interconnected products
234 .....With application of tension to tear container from web
235 ....Severing of container or container blank from web
236 .....By severing means moving with work
237 ...Notching on work edge
238 ...Partial severance to form interconnected products
239 ...Severing of container or container blank from web
240 ..Including form-scoring
241 ...By rotary tool
242 ...By reciprocatory tool
243 ..Including folding
244 ...Of previously folded material (e.g., refolding, etc.)
245 ....Flap
246 ...Plural folding stations folding noncontinuously advancing work
247 ....With work turret
248 ...By infeeding work to passive folder
249 ...By buckling
250 ...By mandrel or plunger
251 ....Three point, continuous 180 degree folding
252 ....Mandrel having rectangular surface
253 ....Forming triangularly folded container surface
254 ...Central fold
255 ...Tube opening and closing
256 ....Including application of fluid pressure or vacuum to work
257 ....By roller having gripper engaging end edge of tube
258 .....And having side fold gripper
259 ....By means engaging end edge of tube
260 ...Closing of flap
261 ....Multiple flaps
262 .....Container moving transersely to fold
263 ......And parallel to another fold
264 ..With application of adhesive or securing by adhesive
265 ...And drying
266 ...Application by work contacting applicator (e.g., roller, brush, etc.)
267 ..Method
268 ..Means to assist manual manipulation
269 TUBE MAKING
270 .With printing or photographic reproduction
271 .With minute size change of formed tube
272 .With coating
273 ..Applied externally of formed tube
274 ..And heating or drying
275 ..By immersion
276 ..Adhesive
277 ...By work engaging applicator
278 ....Rotary applicator
279 .....Having adhesive transferring roller
280 ......Nondriven roller
281 ......And having scraper
282 .....Coacting with opposed work engaging roller
283 ......Nondriven roller
284 .....Brush
285 .....Plural applicators
286 ......And plural sources of adhesive
287 .With cutting, breaking, tearing, or abrading
288 ..Severing of formed tube to length
289 ...By severing means moving with work
290 ...During relative rotation between work and severing means about work axis
291 .With surface treatment (e.g., polishing, burnishing, etc.)
292 .Tube including metal component
293 .With extruding, drawing, or attenuating
294 .With lining of tube
295 .Polygonal cross section tube
296 .Frustoconical tube
297 .Assembling of distinct members
298 ..With plural, orbiting work supply reels
299 .Spiral winding
300 ..Orbiting work supply reels
301 ..And advancing by wrapping belt
302 .With advancing of tube axially
303 .Convolute winding
304 ..By use of external guide member
305 ..By use of plural mandrels
306 ...On turret
307 ..By manually driven or manipulated means
308 .Including closing end of tube
309 CONTAINER OR TUBE ERECTING, OPENING, OR COLLAPSING
310 .Including overfolding or reverse bending
311 .Collapsing
312 .Cellular container
313 .By direct application of vacuum or fluid pressure
314 ..Internal fluid pressure to erect container or tube
315 ..Orbital movement of work contacting vacuum applying means
316 ..Oscillating movement of work contacting vacuum means
317 ...Compound movement
318 .By orbital means

CONTAINER OR TUBE ERECTING, OPENING, OR COLLAPSING
.By orbital means
319 ..Endless belt or chain
320 WITH PRINTING OR PHOTOGRAPHIC REPRODUCTION
321 .By rotary printer
322 .By bed and travelling cylinder printer
323 .Selective type printer
324 .And cutting, breaking, tearing, or abrading
325 ..With securing
326 WITH OR INCLUDING SURFACE PREPARATION FOR COATING
327 .Removal of previously applied coating
328 WITH COATING
329 .By immersion
330 .Plural diverse materials
331 .Adhesive
332 ..With heating or drying
333 ..Applied in a repeating pattern
334 ..With assembling of distinct members
335 ...Indeterminate length work
336 ..By work contacting applicator
337 ...Comprising roller
338 WITH EXTRUDING, DRAWING, OR ATTENUATING
339 .Method
340 WITH CUTTING, BREAKING, TEARING, OR ABRADING
341 .Including application of heat
342 .With scrap material separation or removal
343 .Including assembling or disassembling of distinct members
344 ..Comprising bringing two members together
345 ...Indeterminate length member
346 ....Plural indeterminate length members
347 ....Member comprising adhesive backed tape
348 ....Including use of work supply hopper
349 ...Wrapping one member about another member
350 ...And securing by interfitting
351 ....Work penetrating member
352 .And with bending
353 ..By use of composite cutting, breaking, tearing, or abrading tool and folding tool
354 ..By use of composite cutting, breaking, tearing, or abrading tool and form-scoring or crushing tool
355 ..Form-scoring
356 ..Folding
357 ...With means to advance work or product
358 ....Continuous advance with endless belt folder surface moving with work
359 ....Continuous advance with rotary folder surface moving with work
360 ....Folding by roller
361 .Plural cutting, breaking, tearing, or abrading stations
362 ..With advancing work from first to second station
363 .Making plural, separate cuts by distinct cutting edges
364 ..Engaging work on opposite sides
365 ...Rotary cutter
366 ..By relatively adjustable cutting edges or cutting and scoring edges
367 ...On rotary tool support
368 ....Adjustable circumferentially
369 .Of moving work
370 .By rotary tool
371 ..With flexibly mounter cutter
372 .By reciprocatory tool
373 WITH SCRAP MATERIAL SEPARATION OR REMOVAL
374 ASSEMBLING OR DISASSEMBLING OF DISTINCT MEMBERS
375 .Of tag or label to tether or to article
376 ..By passing tether through tag or label and article in single stroke
377 .Including tear strip
378 .Including cutting or tearing edge
379 .Comprising bringing two members together
380 ..Indeterminate length member
381 ...Plural indeterminate length members
382 ...Member comprising adhesive backed tape
383 ..Including distinct securing member
384 ...Work penetrating member
385 ....Bifurcated securing member
386 ..Wrapping one member about another member
387 ...Including convex or recessed surface (e.g., eyeglass case)
388 ...By use of rotary work support
389 ...By use of reciprocatory work support
390 ..And securing by interfitting
391 ...Assembling container partitions
392 ...Work penetrating member
393 .Securing
394 SECURING
395 BENDING
396 .Form-scoring
397 ..With folding
398 ...Plural work stations
399 ....Folding along score line
400 ..With means to advance or position work or product
401 ...Continuous advance
402 ....By rotary tool having surface moving with work
403 .....Roller
404 ..Form-scoring along intersecting lines
405 .Folding
406 ..And tautening or smoothing
407 ..With crushing or crumpling
408 ..Overfolding
409 ..Refolding or unfolding
410 ...Of indeterminate length work
411 ....Including use of swinging work guiding means (e.g., zigzag folding, etc.)
412 ....With elevating work support
413 ..Folding of indeterminate length work by swinging work guiding means (e.g., zigzag folding, etc.)
414 ...Swinging passage
415 ....Defined by feed roll pair
416 ..With means to advance work or product
417 ...And provision to precisely align for folding
418 ...Folding by direct application of vacuum or fluid
419 ...Folding by buckling
420 ....Buckle chute folding
421 .....Plural folding operations making multiple folds
422 ...Continuous advance with folder moving with work
423 ....Folding by endless belt
424 ....Rotary folder
425 .....Having radial folding blade
426 ......Radially moving folding blade
427 ....Fold off-roll-type folder
428 ....And cooperating, registering cylinder
429 ....Plural folding blades
430 ....For zigzag folding
431 ....Planetary blade

	BENDING
	.Folding
	..With means to advance work or product
	...Continuous advance with folder moving with work
	....Rotary folder
	.....Having radial folding blade
432	......And cooperating, registering cylinder
433	.......For zigzag folding
434	.....Folding by roller
435	......Roller couple
436	...Continuous advance past folder
437	....Reciprocatory folder
438	....Folding by passive reaction member
439	.....Folding indeterminate length work
440	......Plural folding actions
441	...Folding by endless belt
442	...Folding by roller
443	....Roller passive reaction member
444	.....With reciprocatory folding knife
445	......Reaction member comprising roller pair yieldably biased together
446	...Folding by passive reaction member
447	....Including multiple reaction members each presenting one or more shaping edges
448	.....And provision to allow one reaction member to move relative to another (e.g., zigzag folding, etc.)
449	....And cooperating plunger
450	..By direct application of vacuum or fluid
451	..By plural relatively movable folding edges approaching work from same side (e.g., zigzag folding, etc.)
452	..Forming gable top
453	..Including folding end flap
454	..By rotary member
455	..By passive reaction member
456	...Including multiple shaping edges on reaction member
457	...And cooperating reciprocatory folder
458	..Sequential, diverse folds
459	.Pulling over an edge (e.g., curling, etc.)
460	.Deflecting
461	..Of longitudinally moving work
462	...To form convolute coil (e.g., paper "log", etc.)
463	.Corrugating
464	.Crushing or crumpling
465	FLEXING
466	.To present part of workpiece for securing to another part
467	SURFACE TREATMENT
468	TOOL OR TOOL SUPPORT
469	.Adapted to be magnetically manipulated
470	.Adapted to be heated or cooled
471	.Rotary
472	.With ejector or stripper
473	.Plural tools or tool supports
474	.Expandable or collapsible
475	.Adjustable
476	..Folder
477	MACHINE FRAME
478	.Adjustable
479	..Plural, simultaneous adjustments

942	CLEANING IMPLEMENT (E.G., BRUSH, DUST MOP, ETC.)
943	CANDY STICK
944	APERTURE CARD OR DISPLAY DEVICE WITH WINDOW
945	COIN HOLDER
946	PHONOGRAPH RECORD JACKET
947	FILE FOLDER
948	IGNITING FUSE
949	ELECTRICAL INSULATION
950	LAMP SHADE
951	SEEDLING CONTAINER
952	PHOTO CORNER MOUNT
953	STENCIL OR OUTLINE GUIDE
954	SPOOL
955	DECORATION ARTICLE
956	.Having appearance of living plant (e.g., Christmas tree, etc.)
957	.Festoon
958	.Garland
959	TOY OR AMUSEMENT ARTICLE
960	TOILET ARTICLE
961	TAG, MARKER, OR LABEL
962	CLOSURE (E.G., TIE STRING, VALVE, ETC.)
963	OPENER (E.G., TEAR STRIP, ETC.)
964	PALLET
965	.Flat or "Boat" (for candy, crakers, etc.)
966	HONEYCOMB STRUCTURE
967	DUNNAGE, WADDING, STUFFING, OR FILLING EXCELSIOR
968	STRUCTURAL SHAPE

CLASS 494 IMPERFORATE BOWL, CENTRIFUGAL SEPARATORS

DECEMBER 1990

1 WITH CONDITION RESPONSIVE MEANS
2 .For controlling outlet valve
3 ..In response to location of inner boundary of heavy component
4 ..In response to centrifugal force
5 .For controlling inlet valve
6 ..In response to level of liquid-type material in bowl or in reservoir for supplying bowl
7 .For controlling drive of (a) bowl or (b) driven means within bowl
8 ..In response to load imposed upon driven means
9 ..In response to speed of bowl or rotarily-driven means therewithin
10 WITH MEANS FOR INDICATING, INSPECTING, MEASURING, SIGNALING OR TESTING
11 WITH CYCLIC OR TIME CONTROL MEANS
12 INCLUDING MEANS OR STRUCTURE FOR PROMOTING SAFETY
13 WITH MEANS FOR EXCHANGING HEAT
14 .Comprising or including means for cooling
15 WITH MEANS FOR LUBRICATING
16 INCLUDING PLURALITY OF MINIATURE BOWLS (E.G., TEST TUBES) DISTRUBUTED ABOUT ROTATABLE CARRIER AND READILY REMOVABLE THEREFROM
17 .And means for introducing either material or auxiliary fluid into bowls
18 ..Including conduit of flexible umbilical cable type
19 .And means for rotating each bowl about own axis
20 .Having bowls, or holders therefor, pivotaby attached to carrier for tilting during rotation of carrier
21 .Comprising flexible bowls embraced by pockets provided therefor in carrier
22 INCLUDING INTRODUCTION OF DIFFERING-WEIGHT FLUIDS (E.G., LIQUIDS) FOR COUNTERCURRENT FLOW
23 WITH MEANS FOR FURNISHING AUXILIARY FLUID TO MATERIAL OR APPARATUS
24 .Energy of fluid utilized for driving bowl
25 .Gas other than air
26 .Air at atmospheric, or greater, pressure
27 .Liquid
28 ..Moving radially inwardly toward axis of rotation of bowl
29 ..Furnished at plural locations
30 ..Including one or more valves in incoming path
31 INCLUDING PLURALITY OF SEPARATE AND DISTINCT BOWLS
32 .And means external of bowls for conducting material therebetween
33 .Having bowls equally spaced from a central axis of rotation for orbiting thereabout
34 .Having bowls spaced along common axis of rotation
35 BOWL AND MEANS EXTERNAL THEREOF FOR RECIRCULATING MATERIAL
36 WITH MEANS FOR FILTERING
37 PROCESS
38 INCLUDING SEALING MEANS
39 .For protecting evacuated, bowl-enclosing housing against gaseous infiltration
40 .Comprising seal, or element cooperating therewith, movable axially for controlling outlet on periphery of bowl
41 .For sealing between stationary and moving elements
42 INCLUDING DRIVEN MEANS AT LEAST PARTIALLY EXTERNAL OF BOWL FOR MOVING MATERIAL THERETO OR THEREFROM
43 ROTATABLE BOWL
44 .Comprising plurality of bowls partly or wholly within one another
45 .Including flexible, removable lining therein
46 .Including bearing means adapted to enable bowl to establish dynamic axis of rotation
47 .Including means for imparting other movement to bowl in whole or in part before, during or after its axial rotation
48 ..Axial movement of one portion of bowl wall relative to another (e.g., for discharging)
49 .Driven by energy of material supplied
50 .Including driven material-moving means therein
51 ..Plural driven means
52 ..Rotatably driven coaxially with bowl, but differing as to direction or speed
53 ...Including element having helical blade
54 ....Modified blade
55 ...Including plurality of discrete pushing or scraping elements moving proximate to material collecting surface of bowl
56 .Including discharge-related structure in nature of (a) outlet having device for controlling quantity of flow, (b) element associated with pickup of material and adjustable for varying quality of flow, or (c) static scraper or the like for engaging material in moving bowl
57 ..Element associated with pickup of material and adjustable for varying quality of flow
58 ..Static scraper or the like for engaging material in moving bowl
59 ...And structure to receive or guide material loosened
60 .Including housing for bowl
61 ..And means for reducing, and maintaining, pressure in housing below that of environment
62 ..Serving to support bowl from above
63 ..For vertically-oriented bowl, and having plural receivers at top for separated components
64 .Having structural provision for facilitating cleaning (e.g., quick take-apart)
65 .Vertically-oriented, and including structural provision for bottom entry of material
66 .Including structure located within bowl and defining axially-extending, helical flow path
67 .Including structure located within vertically-oriented bowl and extending outwardly from central region (e.g., axis) thereof
68 ..Comprising plurality of elements, each concentrically encircling axis of bowl and spaced therealong
69 ...Each extending generally normally to region, and having surface displaying three-dimensional configuration

	ROTATABLE BOWL
	.Including structure located within vertically-oriented bowl and extending outwardly from central region (e.g., axis) thereof
	..Comprising plurality of elements, each concentrically encircling axis of bowl and spaced therealong
70	...Each extending away from region with significant downward, as well as significant outward, component (e.g., nested cones)
71	....And the plurality divided vertically into two or more, physically separate or functionally distinct groups
72	....And extending therebeyond generally downwardly
73	....And one or more elements having surface displaying three-dimensional configuration
74	..Comprising plurality of axially-extending, plate-like elements, each having its inner edge lying along central region
75	...And each extending outwardly in curve of changing or constant radius
76	.Including plurality of axially-extending, tubular elements located within vertically-oriented bowl
77	..Each element concentric with axis of bowl
78	...And at least one element having other-than-circular periphery
79	.Including plurality of axially-extending, plate-like elements located within vertically-oriented bowl
80	.Including plurality of shelf-like elements located within vertically-oriented bowl and extending generally horizontally inwardly from wall thereof
81	.Material of bowl wall
82	INCLUDING VIBRATION DAMPING MEANS
83	INCLUDING BEARING STRUCTURE
84	INCLUDING SPECIFIC DEVICE OR STRUCTURE FOR DRIVING OR CONTROLLING BOWL
85	MISCELLANEOUS

900	INVOLVING MIXTURE CONTAINING ONE OR MORE GASES
901	INVOLVING MIXTURE CONTAINING OIL
902	INVOLVING THE USE OF MERCURY

1 CERAMIC COMPOSITIONS
2 .Devitrified glass-ceramics
3 ..Halogen containing crystalline phase (e.g., fluormica, etc.)
4 ..Silica containing crystalline phase (e.g., stuffed quartz, crystobalite, etc.)
5 ..Binary, ternary, quaternary, etc., metal silicate crystalline phase (e.g., mullite, diopside, sphene, plagioclase, slagcerams free of alumina, etc.)
6 ...Alkali metal aluminosilicate crystalline phase
7 ....Lithium aluminosilicate (e.g., spodumeme, eucryptite, petalite, etc.)
8 ...Divalent metal oxide aluminosilicate crystalline phase (e.g., anorthite, slagcerams, etc.)
9 ....Magnesium aluminosilicate (e.g., cordierite, etc.)
10 ..Nonsilica and nonsilicate crystalline phase (e.g., spinel, barium titanate, etc.)
11 .Glass compositions, compositions containing glass other than those wherein glass is a bonding agent, or glass batch forming compositions
12 ..Made by gel route
13 ..Radiation color change responsive
14 ..Enamels, glazes, or fusion seals (e.g., raw, fritted, or calcined ingredients)
15 ...Fusion seals (frit plus material other than glass)
16 ...Plural diverse frits
17 ...Frit plus material other than glass (e.g., color, opacifier, mill additions, etc.)
18 ....Titanium or zirconium compound as other material
19 ....Free metal as other material
20 ....With vehicle or suspending agent (i.e., slip)
21 ...Chemically specified frit compositions
22 ....Lead containing
23 .....And titanium or zirconium
24 ....Phosphorous containing
25 ....Halogen containing
26 ....Zinc containing
27 ..Glass batch forming compositions (i.e., glass batch compositions)
28 ...Slag containing
29 ...Pellet or agglomerate containing
30 ...Halogen containing
31 ...Uncombined silica containing (e.g., sand)
32 ..Glass and material other than glass (e.g., crystal glass, opal glass, etc.)
33 ..Beads
34 ...Reflective
35 ..Fibers
36 ...Mineral fibers (e.g., slag wool, rock wool, mineral wool, etc.)
37 ...Optical fibers
38 ...Titanium or zirconium containing
39 ..Pore-forming
40 ..Nonoxide glasses (e.g., fluoride glasses, etc.)
41 ..Nonsilicate oxide glasses
42 ...Germanium containing
43 ...Halogen containing
44 ....Fluorine and phosphorus containing
45 ...Phosphorus containing
46 ....And titanium, zirconium, vanadium, tungsten, or molybdenum
47 ....And boron
48 ....And aluminum or beryllium
49 ...Boron containing
50 ....And yttrium or rare earth (i.e., elements with atomic numbers 39, 57-71, or 89+)
51 .....And zirconium, titanium, tantalum, or niobium
52 ....And aluminum or beryllium
53 ..Silica containing
54 ...More than 90 percent by weight silica
55 ...40 percent - 90 percent by weight silica
56 ....And halogen or nitrogen
57 .....Fluorine
58 ......And boron
59 ....And aluminum
60 ....And lead
61 .....And boron
62 .....And aluminum
63 ....And phosphorus, niobium, or tantalum
64 ....And yttrium or rare earth (i.e., elements with atomic numbers 39 or 57-71)
65 ....And boron
66 .....And aluminum
67 ......And zinc or zirconium
68 ....And aluminum or iron compound
69 .....And divalent metal oxide (e.g., oxides of zinc, cadmium, beryllium, alkaline earth metal, magnesium, etc.)
70 ......Calcium oxide containing
71 ....And chromium, nickel, or cobalt
72 ....And divalent metal oxide (e.g., oxides of zinc, cadmium, beryllium, alkaline earth metal, magnesium, etc.)
73 ...Less than 40 percent by weight silica
74 ....And lead
75 .....And boron
76 ......And zinc
77 ....And boron
78 .....And rare earth (i.e., elements with atomic number 39 or 57-71)
79 .....And zinc
80 .Pore-forming
81 ..By use of organic combustible material
82 ...Of resin or vegetable origin material
83 ....Of cellulosic material
84 ..By gas blowing, foaming agent, or in situ reactive gas generation
85 ..By volatilizing or heat expansion of water or other noncombustible material
86 .Synthetic precious stones (e.g., single crystals, etc.)
87 .Carbide or oxycarbide containing
88 ..Silicon carbide
89 ...And aluminum compound
90 ...And carbonaceous material
91 ...And different carbide
92 ...And boride, silicide, nitride, or oxynitride
93 ..Plural carbides (i.e., carbides of plural metals) containing
94 .Refractory
95 ..Fiber or fiber containing
96 ..Boride, silicide, nitride, or oxynitride containing
97 ...Silicon nitride or silicon oxynitride containing
98 ...And trivalent metal compound containing (e.g., clay, yttrium oxide, sialon, etc.)
99 ..Elemental carbon containing

	CERAMIC COMPOSITIONS
	.Refractory
	..Elemental carbon containing
100	...And aluminum compound (e.g., clay, aluminum oxide, etc.)
101	...And alkaline earth metal or magnesium compound (e.g., dolomite, magnesium oxide, etc.)
102	..Zirconium compound containing
103	...Zirconium oxide
104	....And alkaline earth metal or magnesium compound
105	....And aluminum compound (e.g., clay, aluminum oxide, etc.)
106	...Zirconium silicate
107	....And aluminum compound (e.g., clay, aluminum oxide, etc.)
108	..Magnesium compound containing
109	...With organic material in starting mixture
110	....And iron or chromium compound
111	...And phosphorus compound
112	...And iron compound
113	....Dolomite containing
114	....And chromium compound
115	.....Fused cast or fused material containing
116	.....Chemical binder containing
117	...And chromium compound
118	...And aluminum compound
119	....Aluminum compound other than clay
120	.....Spinel or other aluminate
121	...Less than 90 percent by weight magnesium compound
122	...And silicon compound
123	..Alkaline earth metal compound containing
124	...Hydraulic cement containing
125	...And aluminum compound
126	..Trivalent metal compound (e.g., iron oxide, chromium oxide, trivalent rare earth oxide, etc.) containing
127	...Aluminum compound (e.g., clay, aluminium oxide, etc.)
128	....And silicon compound other than clay
129	.....And silica-clay mixtures
130	.....And clay containing
131	......Less than 40 percent by weight clay
132	...Chromium compound containing
133	..Silica containing
134	.Titanate, zirconate, stannate, niobate, or tantalate or oxide of titanium, zirconium, tin, niobium, or tantalum containing (e.g., dielectrics, etc.)
135	..Alkaline earth or magnesium containing
136	...Titanate containing
137	....Barium titanate
138	.....And divalent metal oxide other than alkaline earth oxide or magnesium oxide
139	.....And trivalent metal oxide
140	.Elemental sulfur containing
141	.Clay containing (e.g., porcelain, earthenware, etc.)
142	..And phosphorus (e.g., bone china, etc.)
143	..And flint or feldspar
144	...Kaolin (e.g., ball clay, fire clay, etc.) containing
145	..Clay pretreatment
146	...Chemical pretreatment
147	....Using alkaline compound treating agent
148	....Using organic substance as treating agent
149	...Water pretreatment
150	...Heat pretreatment
151	.Fluorine containing
152	.Yttrium, lanthanide, actinide, or transactinide containing (i.e., atomic numbers 39 or 57-71 or 89+)
153	.Aluminum compound containing
154	.Silicon compound containing
155	.Composed of waste material
	*******************************

900	.Optical glass (e.g., silent on refractive index and/or Abbe number)
901	..Having R.I. at least 1.8
902	..Having Abbe number at least 70
903	..Having refractive index less than 1.8 and Abbe number less than 70
904	..Infrared transmitting or absorbing
905	..Ultraviolet transmitting or absorbing
906	..Thorium oxide containing

CLASS 502 CATALYST, SOLID SORBENT, OR SUPPORT THEREFOR, PRODUCT OR PROCESS OF MAKING

NOTE:

In this schedule, many subclasses are based on the groupings of elements in the periodic chart. Below are listed elements in the groups as used in the schedule. Obsolete and archaic names and synonyms for elements are to be found in the class definition.

Group I metals : Li(Lithium), Na(Sodium), K(Postassium), Rb(Rubidium), Cs(Cesium), Fr(Francium), Cu(Copper), Ag(Silver), and Au(Gold)

Group II metals : Be(Beryllium), Mg(Magnesium), Ca(calcium), Sr(strontium), Ba(Barium), Ra(Radium), Zn(Zinc), Cd(Cadmium), and Hg(Mercury)

Group III metals : Sc(Scandium), Y(ttrium), Al(Aluminum), Ga(Gallium), In(Indium), and Tl(Thallium)*

Group IV metals : Ti(Titanium), Zr(Zirconium), Hf(Hafnium), Ge(Germanium), Sn(Tin), and Pd(Lead)

Group V metals : V(Vanadium), Nb(Niobium) Ta(Tantalum), As(Arsenic), Sb(Antimony), and Bi(Bismuth)

Group VI metals : Cr(Chromium), Mo(Molybdenum), W(Wolfram), T(Tungsten), and Po(Polonium)

Group VII metals : Mn(Manganese), Tc(Technetium), and Re(Rhenium)

Group VIII metals : Iron group metals Fe(Iron), Co(Cobalt), Ni(Nickel), and the platinum group metals Ru(Ruthenium), Rh(Rhodium), Pd(Palladium), Os(Osmium), Ir(Iridium), and Pt(Platinum)

Lanthanides : Elements with atomic numbers 57-71 inclusive, La(Lanthanum), Ce(Cerium), Pr(Praseodynium), Nd(Neodymium), Pm(Promethium), Sm(Samarium), Eu(Europium) Gd-(Gadolinium), Tb(Terbium), Dy(Dysprosium), Ho(Holmium), Er(Erbium), Tm(Thulium), Yb(Ytterbium and Lu(Luthetium)*

Alkaline Earth Metals: Ca(Calcium), Sr(Strontium), Ba(Barium), and Ra(Radium)

Alkali metals : Li(Lithium), Na(Sodium), K(Postassium), Rb(Rubidium), Cs(Cesium), and Fr(Francium)

Actinides : Elements with atomic numbers 89 and above inclusive, Ac(Actinium), Th(Thorium) Pa(Protactinium), U(Uranium), Np(Neptunium) Pu(Plutonium), Am(Americium), Cm(Curium), Bk(Berkelium), Cf(Californium), Es(Einsteinium), Fm(Fermium), Md(Mendelevium), No(Nobelium), and Lw(Lawrencium)*

Halogens : F(Fluorine), Cl(Chlorine), Br(Bromine), I(Iodine), and At(Astatine)

Rare Earth : Lanthanides, Scandium and Yttrium

* La is grouped with the lanthanides and Ac with the Actinides and not with Group III

1 HAVING FOREIGN OR DIVERSE FUNCTION (E.G., PREVENT CORROSION, ETC.)
2 .With structure having utility in addition to support or carrier
3 TO BE USED AS A MELT
4 IN FORM OF A MEMBRANE
5 IRRADIATION BY, OR APPLICATION OF, ELECTRICAL, MAGNETIC OR WAVE ENERGY
6 CONTROL RESPONSIVE TO SENSED CONDITION
7 BIOSPECIFIC MATERIAL, OR PRODUCED BY ENZYME OR MICROORGANISM
8 FORMING OR TREATING A SPHERE, PROCESS ONLY
9 .Forming other than by liquid immersion
10 .Treating preformed sphere only
11 INCLUDING ION EXCHANGING, EXCEPT ZEOLITES OR PRODUCT THEREOF
12 .For regenerating or rehabilitating catalyst or sorbent
20 REGENERATING OR REHABILITATING CATALYST OR SORBENT

REGENERATING OR REHABILITATING CATALYST OR SORBENT
21 .Including segregation of diverse particles
22 .Treating with a liquid or treating in a liquid phase, including dissolved or suspended
23 .."Wet air combustion" oxidation of material submerged in liquid
24 ..Including intended dissolution or precipitation of a substantial amount of an ingredient of the ultimate composition
25 ..Using salt or alkaline substance
26 ...Ammonia or derivative thereof
27 ..Using acid
28 ...Organic
29 ..Organic liquid
30 ...And gas addition thereto
31 ...Hydrocarbon
32 ...Halogen containing
33 ...Oxygen containing
34 .Gas or vapor treating
35 ..Using halogen containing substance including liquids vaporizable upon contacting spent catalyst or sorbent
36 ...Fluorine containing
37 ...Simultaneously or subsequently adding free oxygen or use of oxyhalogen compound
38 ..Treating with free oxygen containing gas
39 ...And forming useful by-product
40 ...And adding heat by admixing solid heat carrier
41 ...In gaseous suspension (e.g., fluidized bed, etc.)
42 ....And substantially complete oxidation of carbon monoxide to carbon dioxide within regeneration zone
43 ....Plural distinct serial combustion stages
44 ....Indirectly heating or cooling spent material within regeneration zone or prior to entry into regeneration zone
45 ...Moving bed (e.g., vertically or horizontally, etc., moving bulk material)
46 ....Generally concurrent flow of oxygen containing gas and material
47 ....Generally countercurrent flow of oxygen containing gas and material
48 ....Generally transverse (i.e., lateral) flow of oxygen containing gas relative to material
49 ...Plural distinct oxidation stages
50 ...Reactive gas treating after oxidation
51 ...Oxidation gas comprises essentially steam and oxygen
52 ...With control of oxygen content in oxidation gas
53 ..Elemental hydrogen
54 ..Ammonia or derivative thereof
55 ..Steam
56 .By heat
60 ZEOLITE OR CLAY, INCLUDING GALLIUM ANALOGS
61 .Gallium containing
62 .Including organic component
63 .And additional AL or Si containing component
64 ..Zeolite
65 ...And rare earth metal (Sc, Y or Lanthanide)containing
66 ...And Group VIII (Iron Group or Platinum Group) metal containing
67 ...Mixed zeolites
68 ...Mixed with clay
69 ...Heterogeneous arrangement
70 ...Gelling in presence of zeolite
71 ...ZSM Type
72 ..Mixed clays
73 .And Group III or rare earth metal (Al, Ga, In, Tl, Sc, Y) or Lanthanide containing
74 .And Group VIII (Iron Group or Platinum Group) containing
75 .Including chemical reduction of exchanged cation
76 .Coprecipitation
77 .ZSM type
78 .Mordenite type
79 .Faujasite type (e.g., X or Y, etc.)
80 .Clay
81 ..Acid treating
82 ...Plural acid treatment
83 ...Sulfuric or hydrochloric acid
84 ..And metal, metal oxide, or metal hydroxide
85 .Activating treatment
86 ..Utilizing ammonium ions
87 .Support per se
100 CATALYST OR PRECURSOR THEREFOR
101 .Making catalytic electrode, process only
102 .Plural component system comprising A - Group I to IV metal hydride or organometallic compound - and B - Group IV to VIII metal, lanthanide or actinde compound - (i.e., alkali metal, Ag, Au, Cu, alkaline earth metal, Be, Mg, Zn, Cd, Hg, Sc, Y, Al, Ga, In, Tl, Ti, Zn, Hf, Ge, Sn or Pb hydride or organometallic compound and Ti, Zr, Hf, Ge, Sn, Pb, V, Nb, Ta, As, Sb, Bi, Cr, Mo, W, Po, Mn, Tc, Re, Iron group, Platinum group, atomic number 57 to 71 inclusive or atomic number 89 or higher compound)
103 ..Component A metal is Group IA, IIA or IIIA and component B metal is Group IVB to VIIB or VIII (i.e., alkali metal, alkaline earth Metal, Be, Mg, Al, Ga, In or Tl and Ti, Zr, Hf, V, Nb, Ta, Cr, Mo, W, Mn, Tc, Re, iron Group or Platinum group) (e.g., Ziegler Catalyst, etc.)
104 ...Preparing catalyst or precursor
105 ....Including comminuting (e.g., milling, grinding, etc.)
106 ....Fluidized bed feature
107 ....Including heating to higher temperature
108 ....Utilizing hydrocarbon containing unsaturation not part of benzene ring
109 ....Utilizing high molecular weight synthetic polymer
110 ....Including plural additions of Component A
111 ....Utilizing water or compound containing hydroxy bonded to carbon
112 ...Containing iodine
113 ...Containing two or more different Component B metals
114 ...Containing hydrides or organometallic of two or more different Component A metals
115 ....Magnesium containing
116 .....And compound containing Silicon-Hydrogen or Silicon-Carbon bond

CATALYST OR PRECURSOR THEREFOR
.Plural component system comprising A - Group I to IV metal hydride or organometallic compound - and B - Group IV to VIII metal, lanthanide or actinde compound - (i.e., alkali metal, Ag, Au, Cu, alkaline earth metal, Be, Mg, Zn, Cd, Hg, Sc, Y, Al, Ga, In, Tl, Ti, Zn, Hf, Ge, Sn or Pb hydride or organometallic compound and Ti, Zr, Hf, Ge, Sn, Pb, V, Nb, Ta, As, Sb, Bi, Cr, Mo, W, Po, Mn, Tc, Re, Iron group, Platinum group, atomic number 57 to 71 inclusive or atomic number 89 or higher compound)
..Component A metal is Group IA, IIA or IIIA and component B metal is Group IVB to VIIB or VIII (i.e., alkali metal, alkaline earth Metal, Be, Mg, Al, Ga, In or Tl and Ti, Zr, Hf, V, Nb, Ta, Cr, Mo, W, Mn, Tc, Re, iron Group or Platinum group) (e.g., Ziegler Catalyst, etc.)
117 ...Component B metal is other than titanium or vanadium
118 ...And a third component C (i.e., an additive other than a saturated hydrocarbon or an aromatic hydrocarbon free of aliphatic or cycloaliphatic unsaturation)
119 ....Non-metallic inorganic halogen containing
120 ....Elemental oxygen or nonmetallic inorganic oxygen-containing material, other than water
121 ....Nonmetallic organic phosphorus containing
122 ....Nonmetallic organic sulfur containing
123 ....Nonmetallic organic nitrogen containing
124 .....Including element in addition to carbon, hydrogen, and nitrogen (e.g, nitro, etc.)
125 ....Nonmetallic organic oxygen containing
126 .....Ether
127 .....Ester
128 ....Nonmetallic organic halide
129 ....Metal compound other than which could be produced in situ by reaction of a Group IA, IIA, or Group IIIA metal compound present with a titanium or vanadium compound present
130 .....Lead compound
131 .....Tin compound
132 .....Aluminum compound
133 .....Magnesium compound
134 ......Halogen containing
150 .Organic compound containing
151 ..Method of making including comminuting of solid material (e.g., grinding, crushing, etc.)
152 ..Organic compound including carbon-metal bond
153 ...Diverse metals bonded to carbon
154 ...Including metal compound containing different metal than that bonded to carbon
155 ...Including phosphorus or sulfur or compound containing nitrogen or phosphorus or sulfur
156 ...Including alcohol, phenol, or ether
157 ...Alkali metal bonded to carbon
158 ..Compound with Silicon-hydrogen bond or organic compound with silicon-carbon bond
159 ..Resin, natural or synthetic, polysaccharide or polypeptide
160 ..Peroxygen compound containing
161 ..With metal carbonyl or carbon monoxide complex
162 ..Organic phosphorus or nitrogen, except the ammonium ion
163 ...Phthalocyanine
164 ...Quaternary ammonium or phosphonium
165 ...Copper containing
166 ...Rhodium containing
167 ...Organic nitrogen containing
168 ..Organic sulfur compound
169 ..With metal halide
170 ..With metal carboxylate or metal compound and carboxylic acid or anhydride
171 ..Organic compound contains metal (e.g., Na-O-Ethyl, etc.)
172 ..Alcohol, phenol, ether, aldehyde or ketone
173 ..Elemental metal in organic dispersing medium
174 .Inorganic carbon containing
175 ..Cyanide
176 ..Hydroxycarbonate
177 ..Carbide
178 ...Silicon carbide
179 ....Group VA (N, P, As, Sb, Bi) containing
180 ..Elemental carbon
181 ...And halogen containing
182 ...And metal, metal oxide, or metal hydroxide
183 ....Of Group II (i.e., alkaline earth, Be, Mg, Zn, Cd or Hg)
184 ....Of Group I (i.e., alkali, Ag, Au or Cu)
185 ....Of Group VIII (i.e., iron or platinum group)
200 .Nitrogen compound containing
201 ..Nitrate
202 .Boron or compound containing same
203 ..Boron halide
204 ..And Group VI metal containing (i.e., Cr, Mo, W or Po)
205 ...And bismuth containing
206 ...Molybdenum containing
207 ..And Group VIII metal containing (i.e., iron or platinum group)
208 .Phosphorus or compound containing same
209 ..And vanadium containing
210 ..And Group VI metal (i.e., Cr, Mo, W or Po,)
211 ...Molybdenum
212 ....And bismuth containing
213 ...And Group VIII metal containing (i.e., iron or platinum group)
214 ..And silicon containing
215 .Selenium or tellurium or compound containing same
216 .Sulfur or compound containing same
217 ..Sulfate
218 ...And Group I metal containing (i.e., alkali, Ag, Au or Cu)
219 ..And Group VI metal containing (i.e., Cr, Mo, W or Po)
220 ...Molybdenum containing
221 ...And Group VIII metal containing (i.e., iron or platinum group)
222 ..And Group VIII metal containing (i.e., iron or platinum group)
223 ...Platinum group (i.e., Ru, Rh, Pd, Os, Ir, Pt)

CATALYST OR PRECURSOR THEREFOR

224 .Halogen or compound containing same
225 ..Copper halide
226 ..And Group II metal (i.e., alkaline earth, Be, Mg, Zn Cd or Hg)
227 ..And Group IV metal (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
228 ..And Group VI metal (i.e., Cr, Mo, W or Po)
229 ..And Group VIII metal (i.e., iron or platinum group)
230 ...Platinum group (i.e., Ru, Rh, Pd, Os, Ir or Pt)
231 ..And Group III metal (i.e., Sc, Y, Al, Ga, In or Tl)
232 .Silicon containing or process of making
233 ..Forming silica gel
234 ...Coprecipitating
235 ....Group III or rare earth metal, metal oxide, or metal hydroxide containing (i.e., Sc, Y, Al, Ga, In, Tl or lanthanide)
236 ....Group IV metal, metal oxide, or metal hydroxide, (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
237 ...Metal, metal oxide, or metal hydroxide containing
238 ....Of Group III metal (i.e., Sc, Y, Al, Ga, In or Tl)
239 ....Of Group IV metal (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
240 ..With metal, metal oxide, or metal hydroxide
241 ...Of Group VII (i.e., Mn, Tc or Re)
242 ...Of Group IV (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
243 ...Of Group I (i.e., Alkali, Ag, Au or Cu)
244 ....Of copper
245 .....And group VIII metal containing (i.e., iron or platinum group)
246 ...Of Group V (i.e., V, Nb, Ta, As, Sb or Bi)
247 ....Of vanadium
248 .....And Group VI metal (i.e., Cr, Mo., W or Po)
249 ....Of antimony or bismuth
250 ...Of Group II (i.e., alkaline earth, Be, Mg, Zn, Cd or Hg)
251 ....Magnesium
252 .....And Group VIII metal containing (i.e., iron or platinum group)
253 ....Of zinc, cadmium, or mercury
254 ...Of Group VI (i.e., Cr, Mo, W or Po)
255 ....Molybdenum
256 ....Chromium
257 .....And Group VIII metal containing (i.e., iron or platinum group)
258 ...Of Group VIII (i.e., iron or platinum group)
259 ....Nickel
260 ....Cobalt
261 ....Platinum group (i.e., Ru, Rh, Pd, Os, Ir or Pt)
262 .....Platinum or palladium
263 ...Of Group III or lanthanide group (i.e., Sc, Y, Al, Ga, In, Tl, or atomic number 57 to 71 inclusive)
300 .Metal, metal oxide or metal hydroxide
301 ..Raney type
302 ..Of lanthanide series (i.e., atomic number 57 to 71 inclusive)
303 ...Lanthanum
304 ...Cerium
305 ..Of Group VI (i.e., Cr, Mo, W or Po)
306 ...And Group II metal containing (i.e., alkaline earth, Be, Mg, Zn, Cd or Hg)
307 ....Zinc
308 ...And Group IV metal containing (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
309 ....Titanium containing
310 ....Tin containing
311 ...And Group V metal containing (i.e., V, Nb, Ta, As, Sb or Bi)
312 ....Vanadium containing
313 ...And Group VIII metal containing (i.e., iron or platinum group)
314 ....Iron group metal and Group III metal containing (i.e., Fe, Co or Ni and Sc, Y, Al, Ga, In or Tl)
315 ....Nickel containing
316 ....Iron containing
317 ...And Group I containing (i.e., alkali, Ag, Au or Cu)
318 ....Copper containing
319 ...Of chromium
320 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
321 ...Of molybdenum
322 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
323 ...And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
324 ..Of manganese
325 ..Of Group VIII (i.e., iron or platinum group)
326 ...Of platinum group metal and of iron group (i.e., Ru, Rh, Pd, Os, Ir, or Pt and Fe, Co or Ni)
327 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
328 ...And Group II metal containing (i.e., alkaline earth, Be, Mg, Zn, Cd or Hg)
329 ....Zinc containing
330 ...And Group I metal containing (i.e., alkali, Ag, Au or Cu)
331 ....Copper containing
332 ...And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
333 ....Of palladium
334 ....Of platinum
335 ....Of nickel
336 ....Of iron
337 ...Of nickel
338 ...Of iron
339 ...Of palladium or platinum
340 ..Of Group II (i.e., alkaline earth, Be, Mg, Zn, Cd or Hg)
341 ...And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
342 ....Of zinc
343 ...Of zinc
344 ..Of Group I (i.e., alkali, Ag, Au or Cu)
345 ...Of copper
346 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
347 ...Of silver
348 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
349 ..Of Group IV (i.e., Ti, Zr, Hf, Ge, Sn or Pb)
350 ...Of titanium
351 ....And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)
352 ...Of tin
353 ..Of Group V (i.e., V, Nb, Ta, As, Sb or Bi)
354 ...And Group III metal containing (i.e., Sc, Y, Al, Ga, In or Tl)

CATALYST OR PRECURSOR THEREFOR
.Metal, metal oxide or metal hydroxide
355 ..Of Group III (i.e., Sc, Y, Al, Ga, In or Tl)
400 SOLID SORBENT
401 .Organic
402 ..Synthetic resin
403 ..Protein
404 ..Carbohydrate
405 .Inorganic gel containing
406 .Having specifically intended extraneously added iron group (i.e., Fe, Co, Ni) component
407 .Silicon containing
408 ..Acid treated
409 ..Quartz
410 ..Magnesium silicate (e.g., abestos, vermiculite, etc.)
411 ..Having extraneously added alkali metal, or alkaline earth metal
412 ..Diatomaceous earth
413 ..Free carbon containing
414 .Aluminum containing
415 ..Alumina (i.e., dialuminum trioxide)
416 .Free carbon containing
417 ..And specified adde active sorbent material
418 ..Process utilizing solid or liquid source carbonizable material, or product thereof
419 ...Producing diverse useful byproduct
420 ...Temperature vs. time factor
421 ...Including recycling product or intermediate thereof to prior stage of process
422 ...Including diverting part of source to provide fuel for process
423 ...Adding nongaseous inorganic, or inorganic yielding component, prior to or during process
424 ....Zinc containing
425 ....Phosphorus containing
426 ....Acid
427 ....Alkali metal, alkaline earth metal, or magnesium containing
428 ...Including pelletizing or briquetting and subsequently comminuting
429 ....Using carbonaceous binder
430 ...Treating with gas
431 ....Fluidized bed having specified parameter
432 ....Specified atmosphere
433 .....Including free oxygen
434 ......And subsequent diverse gas
435 .....Exposure to hot flue or exhaust gas
436 ...Diverse temperatures
437 ...Specified source (e.g., peach pit, etc.)
438 ..Chemically reducing an oxide or product thereof
439 MISCELLANEOUS (E.G., CARRIER OR SUPPORT PER SE OR PROCESS OF MAKING, ETC.)

****

CROSS-REFERENCE ART COLLECTIONS

****

500 STABILIZED
501 .For multi-regenerability
502 .Cystallinity
503 .Crush strength
504 .Abrasion resistance
506 METHOD OF MAKING INORGANIC COMPOSITION UTILIZING ORGANIC COMPOUND (EXCEPT FORMIC, ACETIC, OR OXALIC ACID OR SALT THEREOF)
507 .Synthetic resin, natural resin, polysaccaride, or polypeptide
508 .Sulfur containing organic compound
509 .Nitrogen containing organic compound
510 ..Also containing hydroxyl bonded to carbon, e.g., carboxylic acid, etc.
511 ..Two or more nitrogen atoms bonded to different carbon atoms
512 .Carboxylic acid or salt thereof other than formic, acetic, or oxalic acid
513 .Alcohol, phenol, or ether or metallate thereof
514 PROCESS APPLICABLE EITHER TO PREPARING OR TO REGENERATING OR TO REHABILITATING CATALYST OR SORBENT
515 SPECIFIC CONTAMINANT REMOVAL
516 .Metal contaminant removal
517 .Sulfur or sulfur compound removal
518 .Carbonaceous contaminant
519 REAGENT GRADE (E.G., ULTRA PURE)
520 SUPPRESSED SIDE REACTIONS
521 METAL CONTAMINANT PASSIVATION
522 RADIANT OR WAVE ENERGY ACTIVATED
523 MISCELLANEOUS SPECIFIC TECHNIQUES OF GENERAL APPLICABILITY
524 SPINEL
525 PEROVSKITE
526 SORBENT FOR FLUID STORAGE, OTHER THAN AN ALLOY FOR HYDROGEN STORAGE
527 PECULIAR STRUCTURE OR PHYSICAL FORM

CLASS 503 RECORD RECEIVER HAVING PLURAL LEAVES OR A COLORLESS COLOR FORMER, METHOD OF USE OR DEVELOPER THEREFOR

200 HAVING A COLORLESS COLOR-FORMER, DEVELOPER THEREFOR, OR METHOD OF USE
201 .Method of use, kit, or combined with marking instrument or organ
202 .Color developed by mere decomposition of color-former
203 .Duplicating master
204 .Plural colors or plural diverse systems
205 .Having a color desensitizer
206 .Component noncoextensive with substrate
207 .Having nonreactant particles of defined size
208 .Having constituent defined in terms of melting temperature
209 .Having nonchromogenic liquid spread-control or transfer-improving agent or component, color modifier, stabilizer or preservative
210 .Heavy metal reactant
211 ..Metal of atomic number 22-30
212 ...Zinc
213 .Identified solvent or dispersant for color-former, other than mere mineral oil
214 .Identified reactant isolating material or capsule wall material or binder resin
215 ..Synthetic resin capsule walls
216 .Identified organic electron acceptor (developer) other than phenolic resin
217 ..And identified color-former
218 .Identified color-former
219 ..And identified inorganic electron acceptor (developer), other than mere clay
220 ..Furanone moiety-containing
221 ...Fluoran or derivative
222 ....Molecule having plural fluorans or more than three rings fused together
223 ..Azole moiety-containing
224 ..Polyphenylmethane moiety-containing
225 .Identified electron acceptor (developer)
226 .Spatial relationship specified between color-former and developer
227 HAVING PLURAL INTERACTIVE LEAVES

CLASS 505 SUPERCONDUCTOR TECHNOLOGY - APPARATUS, MATERIAL, PROCESS

DECEMBER 1990

1 MATERIAL, PROCESS, APPARATUS, FUNCTIONING ABOVE 30 K

****

CROSS-REFERENCE ART COLLECTIONS

****

A. Involving High Temperature Material (Tc above 30 degree K)

700 HIGH Tc (ABOVE 30 DEGREE K) SUPERCONDUCTING DEVICE, ARTICLE OR STRUCTURED STOCK

701 .Coated or thin film device (i.e., active or passive)

702 ..Josephson junction present

703 ..Microelectronic device with superconducting conduction line

704 .Wire, fiber or cable

705 ..Magnetic coil

706 .Contact pads or leads bonded to superconductor

725 PROCESS OF MAKING OR TREATING HIGH Tc (ABOVE 30 DEGREE K) SUPERCONDUCTING SHAPED MATERIAL, ARTICLE OR DEVICE

726 .Measuring or testing of superconducting property

727 .Using magnetic field

728 .Etching

729 .Growing single crystal (e.g., epitaxy, bulk)

730 .Vacuum treating or coating

731 ..Sputter coating

732 ..Evaporative coating with superconducting material

733 .Rapid solidification (e.g., quenching, gas-atomizing, melt-spinning, roller-quenching)

734 .From organometallic precursors (e.g., acetylacetonates)

735 ..By sol-gel process

736 .From free metal precursors

737 .From inorganic salt precursors (e.g., nitrates)

738 ..By precipitating

739 .Molding, coating, shaping or casting of superconducting material

740 ..To form wire or fiber

741 ..Coating or casting onto a substrate (e.g., screen printing, tape casting)

742 .Annealing

775 HIGH Tc (ABOVE 30 DEGREE K) SUPERCONDUCTING MATERIAL

776 .Containing transition metal oxide with rare earth or alkaline earth

777 ..Lanthanum (La)-(e.g., La2Cu04)

778 ...Alkaline earth (i.e., Ca,Sr,Ba,Ra)- e.g., La(2-x)Ba(x)Cu04

779 ..Other rare earth (i.e., Sc,Y,Ce,Pr,Nd,Pm,Sm,Eu,Gd,Tb,Dy,Ho,Er,Tm,Yb,Lu) and alkaline earth (i.e., Ca,Sr,Ba,Ra)

780 ...Yttrium(Y) and barium(Ba)-(e.g., YBa2Cu307)

781 ....Noble metal (i.e., Ag,Au,Os,Ir,Pt.Ru,Rh,Pd) or chromium(Cr), manganese(Mn), iron(Fe), cobalt(Co), or nickel(Ni)- e.g., YBa2Cu(3-x)Fe(x)0(y)

782 ..Bismuth(Bi)-(e.g., BiCaSrCu0)

783 ..Thallium(Tl)-(e.g., Tl2CaBaCu308)

784 .Bismuth(Bi)-(e.g., BaKBi0)

785 .Composition containing superconducting material and diverse nonsuperconducting material

B. Involving Low Temperature Superconductors (Tc at or below 30 degree K)

800 MATERIAL, PER SE, PROCESS OF MAKING SAME

801 .Composition: (Classes 75, 252, 501)

802 ..Organic

803 ..Magnetic

804 ..Amorphous alloy

805 ..Alloy or metallic: (Class 420,420/901)

806 ...Niobium base (Nb)

807 ..Powder: (Class 75)

808 ..Liquid crystal: (Class 252)

809 ..Ceramic: (Class 501)

810 .Compound: (Class 423)

811 ..Organic: (Classes 520-570)

812 .Stock: (Class 428, 428/930)

813 ..Wire, tape, or film

814 ..Treated metal: (Class 148/400+)

815 .Process of making, per se

816 ..Sputtering, including coating, forming, or etching (Class 204/192.24)

817 ...Forming Josephson element

818 ..Coating: (Classes 204, 427/62)

819 ...Vapor deposition

820 ...And etching

821 ...Wire

822 ..Shaping: (Classes 148, 264)

823 ..Powder metallurgy: (Class 419)

824 ..Battery, thermo or photo-electric: (Class 136)

825 APPARATUS, per se, DEVICE, per se, OR PROCESS OF MAKING OR OPERATING SAME

826 .Coating: (Class 118)

827 .Code converter: (Class 340)

828 .Modulator: (Class 332), demodulator, or detector: (Class 329)

829 .Electrical computer or data processing system (Class 364)

830 .Electrical pulse counter, pulse divider or shift register: (Class 377)

831 .Static information storage system or device: (Class 365, 365/160)

832 ..Josephson junction type: (Class 365/162)

833 ..Thin film type: (Class 365/161)

834 ...Plural (e.g., memory matrix, etc.): (Class 365/161)

835 ....Content addressed (i.e., associative memory type): (Class 365/49, 161)

836 ....Location addressed (i.e., word organized memory type (Class 365/161)

837 ....Random access (i.e., bit organized memory type): (Class 365/161)

838 ..Plural (e.g., memory matrix, etc.): (Class 365/160)

839 ...Content addressed (i.e., associative memory type): (Class 365/160)

840 ...Location addressed (i.e., word organized memory type): (Class 365/160)

841 ...Random access (i.e., bit organized memory type): (Class 365/160)

842 .Measuring and testing: (Classes 73, 324, 356, and 374)

843 ..Electrical: (Class 324)

844 ...Nuclear magnetic resonance (Nmr) system or device: (Class 324)

845 ...Magnetometer: (Class 324/248)

846 ....Using superconductive quantum interference device (i.e., SQUID): (Class 324/248)

847 ..Thermal: (Class 374)

848 .Radiant energy application: (Class 250)

849 ..Infrared responsive electric signalling: (Class 250/338+)

850 .Protective circuit: (Class 361/19)

851 .Control circuit for electromagnetic device: (Class 361/141)

852 .Electric motor control: (Class 318)

853 .Oscillator: (Class 331)

APPARATUS, per se, DEVICE, per se, OR PROCESS OF MAKING OR OPERATING SAME
.Oscillator: (Class 331)
854 ..With solid state active element: (Class 331/107S)
855 .Amplifier: (Class 330)
856 .Electrical transmission or interconnection system: (Class 307)
857 ..Nonlinear solid state device system or circuit: (Class 307/200+)
858 ...Digital logic: (Class 307/476)
859 ....Function of AND, OR, NAND, NOR or NOT: (Class 307/462)
860 ...Gating (i.e., switching) circuit: (Class 307/245)
861 ....With Josephson junction: (Class 307/245)
862 ....With thin film device: (Class 307/245)
863 ...Stable state circuit for signal shaping, converting, or generating: (Class 307/277)
864 ....With Josephson junction: (Class 307/277)
865 ...With Josephson junction: (Class 307/306)
866 .Wave transmission line, network, waveguide, or microwave storage device: (Class 333/99S)
867 .Electric power conversion system: (Class 363)
868 ..Current conversion: (Class 363/14)
869 .Power supply, regulation, or energy storage system: (Class 323)
870 ..Including transformer or inductor: (Class 323/360)
871 .Magnetic lens: (Class 250/396)
872 .Magnetic field shield: (Class 307/91)
873 .Active solid state device: (Class 357)
874 ..With Josephson junction (e.g., SQUID, etc.): (Class 375/5)
875 ..Combined with housing and cryogenic fluid cooling: (Class 357/83)
876 .Electrical generator or motor structure: (Class 310)
877 ..Rotary dynamoelectric type: (Class 310/40+)
878 ...With cooling: (Class 310/52+)
879 .Magnet or electromagnet: (Class 335/216)
880 .Inductor: (Class 336/DIG1)
881 .Resistance device responsive to magnetic field: (Class 338/32S)
882 .Circuit maker or breaker: (Class 200)
883 .Housing and mounting assembly with plural diverse electrical components: (Class 361/331+)
884 .Conductor: (Class 174)
885 ..Cooling, or feeding, circulating, or distributing fluid; in superconductive apparatus: (Class 174/15CA)
886 ...Cable: (Class 174/15S)
887 ..Conductor structure: (Class 174/126S and 128S)
888 .Refrigeration: (Class 62)
889 ..Utilizing rare earth material
890 ..Heat pipe device
891 ..Magnetic or electrical effect cooling
892 ..Magnetic device cooling
893 ...Spectrometer
894 ..Cyclic cryogenic system (e.g., Sterling, Gifford-McMahon, etc.)
895 ...With regenerative heat exchanger
896 ..Special refrigerant compound
897 ..Cryogenic media transfer
898 ..Cryogenic envelope
899 ..Method of cooling
900 .Heat exchange: (Class 165)
901 ..Heat pipe
902 .Railway (e.g., rapid transit, etc.): (Class 104)
903 ..Suspension (e.g., magnetic, electrodynamic, etc.)
904 ...Guidance means (i.e., in addition to the track)
905 ...Motor structure
906 ...Switching device (i.e., electrical not railway stock diverting)
907 ...Support structure
908 ...Method of operation
909 .Power plant: (Class 60)
910 .Pump: (Class 417)
911 .Fluid reaction surface (i.e., impeller): (Class 416)
912 .Metal founding: (Class 164)
913 ..Casting process
914 ...Using magnetic or electric field
915 ...Making composite product
916 ...Continuous casting
917 .Mechanically manufacturing superconductor: (Classes 29, 72, and 228)
918 ..With metallurgical heat treating
919 ...Reactive formation of superconducting intermetallic compound
920 ....Utilizing diffusion barrier
921 ....Metal working prior to treating
922 ..Making Josephson junction device
923 ..Making semiconductor device (e.g., integrated circuit, etc.)
924 ..Making superconductive magnet or coil
925 ..Making superconductive joint
926 ..Mechanically joining superconductive members
927 ..Metallurgically bonding superconductive members
928 ..Metal deforming
929 ...By extruding
930 ...By drawing
931 .Classifying, separating, and assorting solids using magnetism: (Class 209)
932 ..Separating diverse particulates
933 ...In liquid slurry

CLASS 512 PERFUME COMPOSITIONS

1 PERFUME COMPOSITIONS
2 .With preservative, stabilizer, or fixative
3 .With specified extender
4 .Nonliquid or encapsulated
5 .Animal or plant extract active ingredient
6 .Cyano containing active ingredient
7 .Boron, metal, or acyclic sulfur containing active ingredient
8 .Ring containing active ingredient
9 ..Spiro
10 ..Nitrogen in the ring
11 ..Chalcogen in the ring
12 ...Plural chalcogens in the ring
13 ...Polycyclo ring system having the chalcogen containing ring as one of the cyclos
14 ..Polycyclo carbocyclic ring system
15 ...Oxygen double bonded directly to the ring system
16 ...Carbonyl bonded directly to the ring system
17 ....The ring system is bicyclo
18 ...Carbonyl attached indirectly to the ring system by nonionic bonding
19 ...Oxygen single bonded directly to the ring system
20 ..Benzene ring
21 ...Acyclic carbonyl containing
22 ..Six-membered alicyclic ring
23 ...Oxygen bonded directly to the ring
24 ...Carbonyl bonded directly to the ring
25 .Oxygen containing active ingredient
26 ..The oxygen is part of a carbonyl group
27 ...The carbonyl is part of an aldehyde or ketone group

CLASS 514 DRUG, BIO-AFFECTING AND BODY TREATING COMPOSITIONS

Class 514 is to be considered an integral part of Class 424 (after subclass 197.1) and follows the schedule hierarchy, retaining all pertinent definitions and class lines of Class 424.

1 DESIGNATED ORGANIC ACTIVE INGREDIENT CONTAINING (DOAI)
2 .Peptide containing (e.g., protein, peptones, fibrinogen, etc.) DOAI
3 ..Insulin or derivative
4 ...With an additional active ingredient
5 ..Iodine containing
6 ..Heavy metal containing (e.g., hemoglobin, etc.)
7 ..Phosphorus containing
8 ..Glycoprotein (carbohydrate containing)
9 ..Cyclopeptides
10 ...Bicyclic
11 ...Monocyclic
12 ..25 or more peptide repeating units in known peptide chain structure
13 ..16 to 24 peptide repeating units in known peptide chain
14 ..12 to 15 peptide repeating units in known peptide chain
15 ..9 to 11 peptide repeating units in known peptide chain
16 ..7 or 8 peptide repeating units in known peptide chain
17 ..5 or 6 peptide repeating units in known peptide chain
18 ..3 or 4 peptide repeating units in known peptide chain
19 ..2 peptide repeating units in known peptide chain
20 ...Guanidine containing
21 ..Produced by or extracted from animal tissue

****
NOTE: See subclasses 800-809
for art collections pertain-
ing to subclasses 1-21. ....
****

22 .Lignin or derivative DOAI
23 .Carbohydrate (i.e., saccharide radical containing) DOAI
24 ..S-glycoside
25 ..O-glycoside
26 ...Cyclopentanohydrophenanthrene ring system
27 ...Oxygen of the saccharide radical bonded directly to a nonsaccharide hetero ring or a polycyclo ring system which contains a nonsaccharide hetero ring
28 ....The hetero ring has 8 or more ring carbons
29 .....The hetero ring has exactly 13 ring carbons (e.g., erythromycin, etc.)
30 .....The hetero ring has exactly 15 ring carbons
31 .....The hetero ring has 20 or more ring carbons (e.g., nystatin, etc.)
32 ...Oxygen of the saccharide radical bonded to a nonsaccharide hetero ring by acyclic carbon bonding
33 ...Oxygen of the saccharide radical bonded directly to a polycyclo ring system of three or more carbocyclic rings
34 ....Oxygen of the saccharide radical bonded directly to a polycyclo ring system of four carbocyclic rings (e.g., daunomycin, etc.)
35 ...Oxygen of the saccharide radical bonded directly to a cyclohexyl ring
36 ....Two or more nitrogen atoms bonded directly to the cyclohexyl ring
37 .....The nitrogen atoms are in N-C(=N)-N groups (e.g., streptomycin, etc.)
38 .....Two saccharide radicals bonded through only oxygen to adjacent ring carbons of the cyclohexyl ring
39 ......Three or more saccharide radicals (e.g., neomycin, etc.)
40 .....Two saccharide radicals bonded through only oxygen to 4- and 6-positions of the cyclohexyl ring
41 ......Kanamycin or derivative
42 ..N-glycoside
43 ...Nitrogen containing hetero ring
44 ....Polynucleotide (e.g., RNA, DNA, etc.)
45 ....Purines (including hydrogenated) (e.g., adenine, guanine, etc.)
46 .....Adenosine or derivative
47 ......Phosphorus containing
48 .....Phosphorus containing
49 ....Pyrimidines (including hydrogenated) (e.g., cytosine, etc.)
50 .....2,4-diketone pyrimidine or derivative (e.g., uracil, etc.)
51 ......Phosphorus containing
52 ....Phosphorus containing (e.g., Vitamin B12, etc.)
53 ..Dissacharide
54 ..Polysaccharide
55 ...Chitin or derivative
56 ...Heparin or derivative
57 ...Cellulose or derivative
58 ...Dextrin or derivative
59 ...Dextran or derivative
60 ...Starch or derivative
61 ...Tri- or tetrasaccharide
62 ..Glucosamine or derivative
63 .Silicon containing DOAI
64 .Boron containing DOAI
65 .Pyrethrum plant derived material or plant derived rotenone compound containing DOAI
66 ..With heterocyclic compound
67 ...Methylenedioxyphenyl group containing (e.g., piperonyl butoxide, etc.)
68 ..With carbocyclic acid ester
69 ..With carboxylic acid metal salt
70 ..With organic nitrogen containing compound
71 ...Sulfur containing organic nitrogen compound
72 ..With organic oxygen containing compound
73 ...Phosphorus or halogen containing organic oxygen compound
74 ..With hydrocarbon or halohydrocarbon
75 .Phosphorus containing other than solely as part of an inorganic ion in an addition salt DOAI
76 ..Amine addition salt of organic phosphorus containing acid
77 ..Inner salt (e.g., betaine, etc.)
78 ...Lecithins
79 ..Nitrogen containing hetero ring
80 ...Polycylo ring system having a ring nitrogen in the system
81 ....Nonshared hetero atoms in at least two rings of the polycyclo ring system

.Phosphorus containing other than solely as part of an inorganic ion in an addition salt DOAI
..Nitrogen containing hetero ring
...Polycylo ring system having a ring nitrogen in the system
82 ....Quinolinyl or isoquinolinyl (including hydrogenated)
83 .. Hetero ring is three-membered consisting of one nitrogen and two carbons
84 ...Hetero ring is six-membered consisting of three nitrogens and three carbons
85 ...Hetero ring is six-membered consisting of two nitrogens and four carbons
86 ....Nitrogen atoms occupy 1 and 3-positions
87 .....PX- bonded directly to 1,3-diazine at 2- position (X is chalcogen)
88 .....Two or more PX- groups attached to the same 1,3-diazine (X is chalcogen)
89 ...Hetero ring is six-membered and includes only one ring nitrogen
90 ....Chalcogen in the six-membered hetero ring
91 ...Hetero ring is five-membered
92 ....Two or more hetero atoms in the five-membered ring
93 .....Triazoles (including hydrogenated)
94 .....Diazoles (including hydrogenated)
95 ..Sulfur containing hetero ring
96 ...Polycyclo ring system having the hetero ring as one of the cyclos
97 ...Two or more sulfurs in the hetero ring
98 ...Oxygen in the hetero ring
99 ..Oxygen containing hetero ring
100 ...Polycyclo ring system having the hetero ring as one of the cyclos
101 ...Two or more oxygen in the hetero ring
102 ..Two or more phosphorus atoms directly or indirectly bonded together by only covalent bonds
103 ...Phosphorus acid ester of polyhydric alcohol or thioalcohol (e.g., P-X-R-X-P group, etc., wherein X is chalcogen and R is the residue of the polyhydric alcohol or thioalcohol)
104 ....Benzene ring in the alcohol moiety
105 ...Phosphorus is part of a ring
106 ...P-O-P or P-S-P containing (e.g., anhydrides, etc.)
107 ...Benzene ring containing
108 ...Acyclic and contains at least one carbon atom between the phosphorus atoms
109 ..P-X-X containing (X is chalcogen)
110 ..Phosphorus is part of a ring
111 ...Polycyclo ring system having the phosphorus containing ring as one of the cyclos
112 ..Cyano or isocyano containing
113 ...Cyano or isocyano bonded directly to a benzene ring
114 ..Nitrogen, other than nitro or nitroso, bonded indirectly to phosphorus
115 ...N-C(=X)-N containing (X is chalcogen)
116 ...Sulfur single bonded directly to nitrogen
117 ....N-(O=)S(=O) containing (i.e., sulfonamides)
118 ...Phosphorus single bonded directly to nitrogen
119 ...C(=O)N containing
120 ..C=O other than as ketone or aldehyde, attached directly or indirectly to phosphorus
121 ...Plural C=O groups, other than as ketone or aldehyde
122 ....Malathion
123 .....With N-C(=O)-O containing compound
124 ...C=O, other than as ketone or aldehyde, attached to a benzene ring
125 ..Ketone or aldehyde containing
126 ..Sulfur not bonded directly to phosphorus
127 ...Thioether, sulfoxide or sulfone
128 ....Sulfur bonded directly to a benzene ring
129 ..Oxygen bonded directly to a carbon or hydrogen and wherein the oxygen is not bonded directly to phosphorus
130 ...The oxygen is bonded directly to a benzene ring
131 ..Nitro group bonded to a carbon
132 ...Nitro group is directly bonded to a benzene ring which benzene ring is either bonded directly bonded to phosphorus or indirectly bonded to phosphorus through a chalcogen
133 ....Two or more such benzene rings
134 ..Acyclic carbon to carbon unsaturation
135 ...Alkyne
136 ...Phosphate ester having three ester groups (e.g., DDVP, etc.)
137 ..Nitrogen bonded directly to phosphorus
138 ...N-P-N or N-N-P containing
139 ..Phosphorus bonded directly to halogen
140 ..(C)(R)P=X(-XC) containing (i.e., Phosphinate (X is chalcogen; R is C or H)
141 ..(CX-) (C)P=X(XH) or (CX-) (R)P=X(XC) containing (e.g., phosphonate, etc.) (X is chalcogen; R is C or H)
142 ..(CX-)(C)P(C),(CX-)(RX-)P(C),(C X-)P(XH)(XH) or (CX-)(CX-)P(-XR) containing (X is chalcogen; R is C or H) (e.g., phosphinite, phosphite, etc.)
143 ..Ester of (HX)P=X(XH)(XH) (X is chalcogen) (e.g., phosphate, etc.)
144 ...Triester
145 ....Three benzene rings bonded directly to chalcogen
146 ....Two benzene rings bonded directly to chalcogen
147 ....One benzene ring bonded directly to chalcogen
148 ...Diester
149 .Azoxy DOAI
150 .Acyclic nitrogen double bonded to acyclic nitrogen, acyclic nitrogen triple bonded to acyclic nitrogen or azide DOAI
151 ..Acyclic C-N=N-N containing
152 .3,10-dihydroxy-2-naphthacene carboxamide or derivative (e.g., tetracycline, etc.) DOAI
153 ..With stabilizer or preservative
154 ..With an additional active ingredient (excludes reaction product or complex)
155 .Para-N-benzene - sulfoxy-N containing DOAI, and said benzene ring is not part of a polycyclo ring system
156 ..Hetero ring containing
157 ...The hetero ring is six-membered and includes at least two nitrogens and no other hetero atoms
158 ...The hetero ring is five-membered

159	.Ortho-hydroxybenzoic acid (i.e., salicyclic acid) or derivative DOAI
160	..With additional ortho-hydroxybenzoic acid compound
161	..With heterocyclic compound
162	..With organic nitrogen containing compound
163	..With carboxylic acid, ester or metal salt thereof
164	..With organic oxygen containing compound
165	..Aspirin per se (i.e., 2-(acetyloxy)benozic acid)
166	..Nitrogen containing (e.g., anilides, etc.)
167	.9,10-seco-cyclopentanohydrophenanthrene ring system (e.g., vitamin D, etc.) DOAI
168	..With a vitamin type active ingredient
169	.Cyclopentanohydrophenanthrene ring system DOAI
170	..Plural Compounds containing cyclopentanohydrophenanthrene ring systems
171	..With additional active ingredient
172	..Hetero ring containing
173	...Spiro ring system
174	...-O-C-O- is part of a hetero ring (e.g., acetonide, etc.)
175	...-C(=O)-O-is part of a hetero ring (e.g., lactone, etc.)
176	...Nitrogen containing hetero ring
177	..Oxygen double bonded to a ring carbon of the cyclopentanohydrophenanthrene ring system
178	...Oxygen single bonded to a ring carbon of the cyclopentanohydrophenanthrene ring system
179	....Modified C-ring (except methyl in 13-position) (e.g., double bond containing, substituted, etc.)
180	.....9-position substituted
181	....21-position substituted
182	..Oxygen single bonded to a ring carbon of the cyclopentanohydrophenanthrene ring system
183	.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
184	..Heavy metal containing (including salts)
185	...Polycyclo ring system
186	....Bicyclo ring system
187	.....Quinolines or isoquinolines (including hydrogenated)
188	...Hetero ring is six-membered consisting of one nitrogen and five carbons
189	...Tin
190	...Mercury
191	..Aluminum (including salts)
192	..1-thia-4-aza-bicyclo (3.2.0) heptane ring containing (including dehydrogenated) (e.g., penicillins, etc.)
193	...Spiro or additional polycyclo ring system
194	...6,6-di-substituted
195	...3-position substituent contains -COOC- group
196	...6-position substituent contains hetero ring
197	...6-position substituent contains carbocyclic ring
198	....Ampicillin per se or salt thereof
199	....Penicillin G per se or salt thereof (e.g., procaine pencillin G, etc.)
200	..1-thia-5-aza-bicyclo (4.2.0) octane ring containing (including dehydrogenated) (e.g., cephalosporins, etc.)
201	...7,7-di-substituted
202	...Additional hetero ring
203	....3-position substituent contains pyridine ring
204	....3-position substituent contains sulfur
205	.....The additional hetero ring is part of a polycyclo ring system
206	.....7-position substituent contains hetero ring
207	.....Alkyl, hydroxyalkyl, alkoxyalkyl, or alkanoyloxyalkyl bonded directly to 3-position
208	...Sulfur containing substituent
209	...Alkyl, hydroxyalkyl, alkoxyalkyl, or alkanoyloxyakyl bonded directly to 3-position
210	..Hetero ring is four-membered and includes at least one nitrogen
211	..Hetero ring is seven-membered and includes at least one nitrogen and at least one hetero atom other than nitrogen
212	..Hetero ring is seven-membered consisting of one nitrogen and six carbon atoms
213	...Polycyclo ring system having the seven-membered hetero ring as one of the cyclos
214	....Ring nitrogen is shared by two or three of the cyclos
215	....Additional hetero atom in the polycyclo ring system
216	....Two of the cyclos share at least three ring carbons (i.e., bridged)
217	....Tricyclo ring system having the seven-membered hetero ring a one of the cyclos
218	..Hetero ring is seven-membered consisting of two nitrogens and five carbon atoms
219	...Polycyclo ring system having the seven-membered hetero ring as one of the cyclos
220	....Tricyclo ring system having the seven-membered hetero ring as one of the cyclos
221	....Bicyclo ring system having the seven-membered hetero ring as one of the cyclos
222.2	..Hetero ring is six-membered and includes at least nitrogen and sulfur as ring members
222.5	...Three or more ring hetero atoms in the six-membered hetero ring
222.8	....Polycyclo ring system having the six-membered hetero ring as one of the cyclos
223.2	.....1,2,4 - Benzothiadiazine - 1,1 - dioxides (including hydrogenated)
223.5	......With additional active ingredient
223.8	....1,3,5-Thiadiazines
224.2	...Polycyclo ring system having the six-membered hetero ring as one of the cyclos (e.g., 1,3- and 1,4-benzothiazines, etc.)
224.5	....At least three cyclos in the polycyclo ring system
224.8	.....Phenothiazines (including hydrogenated)

.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
..Hetero ring is six-membered and includes at least nitrogen and sulfur as ring members
...Polycyclo ring system having the six-membered hetero ring as one of the cyclos (e.g., 1,3- and 1,4-benzothiazines, etc.)
....At least three cyclos in the polycyclo ring system
.....Phenothiazines (including hydrogenated)
225.2 ......Hetero ring attached directly or indirectly to the phenothiazine ring nitrogen by acyclic nonionic bonding
225.5 ....The hetero ring is monocyclic piperidine
225.8 ....The hetero ring contains plural ring nitrogens
226.2 ......Chalcogen or nitrogen attached indirectly to the phenothiazine ring nitrogen by acyclic nonionic bonding
226.5 ....One of the cyclos is a 1,2-thiazine (e.g.,1,2-benzothiazines, etc.)
226.8 ...1,3-Thiazines
227.2 ....Chalcogen or nitrogen bonded directly to ring carbon of the six-membered hetero ring
227.5 ...1,4-Thiazines
227.8 ....Additional hetero ring attached directly or indirectly to the 1,4-thiazine by nonionic bonding
228.2 .....Polycyclo ring system having the additional hetero ring as one of the cyclos
228.5 ......Three or more ring hetero atoms in the polycyclo ring system
228.8 ..Hetero ring is six-membered and includes at least nitrogen and oxygen as ring hetero atoms (e.g., monocyclic 1,2- and 1,3-oxazines, etc.)
229.2 ...Three or more ring hetero atoms in the six-membered hetero ring
229.5 ...Polycyclo ring system having the six-membered hetero ring as one of the cyclos (e.g., maytansinoids, etc.)
229.8 ....Tricyclo ring system having the six-membered hetero ring as one of the cyclos
230.2 .....Ring nitrogen shared by two of the cyclos
230.5 ....Bicyclo ring system having the six-membered hetero ring as one of the cyclos (e.g., 1,4-benzoxazines, etc.)
230.8 ...Chalcogen bonded directly to ring carbon of 1,4-oxazine ring
231.2 ...Morpholines (i.e., fully hydrogenated 1,4- oxazines)
231.5 ....Additional hetero ring attached directly or indirectly to the morpholine ring by nonionic bonding
231.8 .....Plural morpholine rings attached directly or indirectly to each other by nonionic bonding
232.2 ......Additional hetero ring attached directly or indirectly to the morpholines by nonionic bonding
232.5 ....Polycyclo ring system having the additional hetero ring as one of the cyclos
232.8 .....Polycyclo ring system having the additional hetero ring as one of the cyclos
233.2 ......Ring nitrogen shared by two of the cyclos
233.5 ......Bicyclo ring system having the additional hetero ring as one of the cyclos
233.8 ....Plural ring hetero atoms in the bicyclo ring system
234.2 ....Three or more ring hetero atoms in the bicyclo ring system
234.5 ....Plural ring nitrogens in the bicyclo ring system
234.8 ....Quinoxalines (including hydrogenated)
235.2 ....Ring nitrogen in the bicyclo ring system
235.5 .....Ring nitrogen in the additional hetero ring
235.8 ......Plural ring nitrogens in the additional hetero ring (e.g., imidazole, pyrazine, etc.)
236.2 ....Three or more ring hetero atoms in the additional hetero ring
236.5 ....The ring nitrogens are bonded directly to each other (e.g., pyridazine, etc.)
236.8 ......Ring chalcogen in the additional hetero ring (e.g., oxazole, etc.)
237.2 ......The additional hetero ring is attached indirectly to the morpholine ring by an acyclic chain having a hetero atom as a chain member
237.5 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the morpholine ring
237.8 ....Nitrogen attached indirectly to the morpholine ring by acyclic nonionic bonding
238.2 .....Chalcogen attached directly to the nitrogen by nonionic bonding
238.5 .....The nitrogen is double or triple bonded directly to carbon
238.8 ....Chalcogen attached indirectly to the morpholine ring by acyclic nonionic bonding
239.2 .....The chalcogen is bonded directly to two carbon atoms
239.5 ....Carbocyclic ring attached indirectly to the morpholine ring by nonionic bonding
241 ..Hetero ring is six-membered consisting of three nitrogens and three carbon atoms
242 ...Asymmetrical (e.g., 1,2,4-triazine, etc.)
243 ....Polycyclo ring system having the hetero ring as one of the cyclos
244 ...Hexamethylenetetramines
245 ...Nitrogen bonded directly to ring carbon of the hetero ring
246 ...Polycyclo ring system having a 1,3,5-triazine as one of the cyclos
247 ..Hetero ring is six-membered consisting of two nitrogens and four carbon atoms (e.g., pyridazines, etc.)
248 ...Polycyclo ring system having a 1,2- or 1,4-diazine as one of the cyclos
249 ....1,4-diazine as one of the cyclos
250 .....At least three rings in the polycyclo ring system

.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
..Hetero ring is six-membered consisting of two nitrogens and four carbon atoms (e.g., pyridazines, etc.)
...Polycyclo ring system having a 1,2- or 1,4-diazine as one of the cyclos
....1,4-diazine as one of the cyclos
.....At least three rings in the polycyclo ring system
251 ......Isoalloxazine (e.g., riboflavins, Vitamin B2, etc.)
252 ...1,2- or 1,4-diazine compound having two or more hetero rings
253 ....Hetero ring other than 1,2- or 1,4-diazine is part of a polycyclo ring system
254 .....Diazine is bonded directly to the polycyclo ring system
255 ...1,4-diazines
256 ...1,3-diazines (e.g., pyrimidines, etc.)
257 ....Polycyclo ring system having 1,3-diazine as one of the cyclos
258 .....Bicyclo ring system having 1,3-diazine as one of the cyclos
259 ......Quinazolines (including hydrogenated)
260 ....Nitrogen bonded directly to the 1,3-diazine at 2-position
261 ......Purines (including hydrogenated)
262 ....Chalcogen bonded directly to a ring carbon of the purine
263 ....At both 2- and 6-positions (e.g., theophilline, etc.)
264 ....With an additional active ingredient or stabilizer
265 ....Additional hetero ring
266 ....Additional hetero ring
267 .....Tricyclo ring system having 1,3-diazine as one of the cyclos
268 ......Perimidine (including hydrogenated)
269 ....Pyrimidines with chalcogen bonded directly to a ring carbon of said pyrimidine moiety
270 .....Barbituric acid or derivative (including thioanalogs)
271 ......Two or more barbituric acid compounds or with an additional active ingredient or stabilizer
272 .....Nitrogen bonded directly to the 1,3-diazine at 2-position
273 ......The nitrogen is part of a hetero ring
274 .....Chalcogen bonded directly to pyrimidine at 2-position
275 ....Nitrogen bonded directly to the 1,3-diazine at 2-position by a single bond
276 ....Thiamines (e.g., vitamin B1, etc.)
277 ..Hetero ring is six-membered consisting of one nitrogen and five carbon atoms
278 ...Spiro ring system
279 ...Polycyclo ring system having the six-membered hetero ring as one of the cyclos
280 ....Pentacyclo ring system having the six-membered hetero ring as one of the cyclos
281 .....Two of the cyclos share at least three ring members (i.e., bridged)
282 ......One of the five cyclos is five-membered and includes ring chalcogen (e.g., codeine, morphine, etc.)
283 .....Ring nitrogen in the pentacyclo ring system is shared by five-membered cyclo and six-membered cyclo (e.g., vincamine, etc.)
284 ....Tetracyclo ring system having the six-membered hetero ring as one of the cyclos
285 .....Plural hetero atoms in the tetracyclo ring system (e.g., acronycines, etc.)
286 ......Two of the cyclos share at least three ring members (i.e., bridged)
287 ......Three or more hetero atoms in the tetracyclo ring system
288 ......Ring carbon is shared by three of the cyclos
289 .....Two of the cyclos share at least three ring members (i.e., bridged) (e.g., morphinans, etc.)
290 ....Tricyclo ring system having the six-membered hetero ring as one of the cyclos
291 .....Plural hetero atoms in the tricyclo ring system
292 ......Plural ring nitrogens in the tricyclo ring system
293 ....Three or more hetero atoms in the tricyclo ring system
294 .....Ring nitrogen is shared by two of the cyclos
295 .....Two of the cyclos share at least three ring carbons (i.e., bridged) (e.g., benzomorphans, etc.)
296 .....Ring carbons shared by each of the three cyclos (e.g., 1,8-naphthalimides, etc.)
297 .....Acridines (including hydrogenated)
298 .....Phenanthridines (including hydrogenated)
299 ....Bicyclo ring system having the six-membered hetero ring as one of the cyclos
300 .....Plural hetero atoms in the bicyclo ring system
301 ......Ring sulfur in the bicyclo ring system
302 ......Ring oxygen in the bicyclo ring system
303 ......Exactly three ring nitrogens in the bicyclo ring system
304 .....Tropanes (including nor or dehydro form)
305 .....Quinuclidines (including unsaturation)
306 .....Quinolizines (including hydrogenated)
307 .....Isoquinolines (including hydrogenated)
308 ......Plural isoquinoline ring systems attached directly or indirectly to each other by nonionic bonding
309 ......Chalcogen attached directly to the six-membered hetero ring by nonionic bonding
310 ......Nitrogen, other than as nitro or nitroso, attached directly to the isoquinoline ring system by nonionic bonding
311 .....Quinolines (including hydrogenated)

.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
..Hetero ring is six-membered consisting of one nitrogen and five carbon atoms
...Polycyclo ring system having the six-membered hetero ring as one of the cyclos
....Bicyclo ring system having the six-membered hetero ring as one of the cyclos
.....Quinolines (including hydrogenated)
312 ......Chalcogen attached directly to the six-membered hetero ring by nonionic bonding
313 ......Nitrogen, other than as nitro or nitroso, attached directly to the six-membered hetero ring by nonionic bonding
314 ......Additional hetero ring attached directly or indirectly to the quinoline ring system by nonionic bonding
315 ...Piperidines
316 ....Plural piperidine rings
317 ....Additional ring containing
318 .....The additional ring is a six-membered hetero ring consisting of one nitrogen and five carbon atoms
319 .....The additional ring is one of the cyclos in a polycyclo ring system
320 ......Hetero ring in the polycyclo ring system
321 ....Plural hetero atoms in the polycyclo ring system
322 ....Plural ring nitrogens in the polycyclo ring system
323 ....Ring nitrogen in the polycyclo ring system
324 ....Ring sulfur in the polycyclo ring system
325 ......Polycyclo ring system is tricyclo-carbocyclic
326 .....The additional ring is a hetero ring
327 .....Chalcogen bonded directly to ring carbon of the piperidine ring
328 ......Plural chalcogens bonded directly to ring carbons of the piperidine ring
329 .....Nitrogen attached directly to the piperidine ring by nonionic bonding
330 .....C=X bonded directly to the piperidine ring (X is chalcogen)
331 .....Nitrogen attached indirectly to the piperidine ring by nonionic bonding
332 ...Plural six-membered hetero rings consisting of one nitrogen and five carbon atoms
333 ....Additional hetero ring other than the six-membered hetero rings
334 ....The six-membered hetero rings are bonded directly to each other
335 ....Chalcogen bonded directly to a ring carbon of the six-membered hetero ring
336 ...Additional hetero ring containing
337 ....The additional hetero ring is one of the cyclos in a polycyclo ring system
338 .....Plural hetero atoms in the polycyclo ring system
339 .....Ring nitrogen in the polycyclo ring system
340 ....Ring nitrogen in the additional hetero ring (e.g., oxazole, etc.)
341 .....The additional hetero ring consists of two nitrogens and three carbons
342 .....Ring sulfur in the additional hetero ring
343 .....The additional hetero ring consists of one nitrogen and four carbons (e.g., nicotine, etc.)
344 ...Cyano bonded directly to the six-membered hetero ring
345 ...Chalcogen bonded directly to ring carbon of the six-membered hetero ring
346 ....Chalcogen and acyclic nitrogen bonded directly to the same carbon
347 ....Chalcogen bonded directly to chalcogen
348 ....Chalcogens bonded directly to at least two ring carbons of the six-membered hetero ring
349 ....Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
350 ....C=O bonded directly to the six-membered hetero ring
351 ....Nitrogen attached indirectly to the six-membered hetero ring by nonionic bonding
352 ...Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
353 ....Plural acyclic nitrogens bonded directly to the same carbon or bonded directly to each other
354 ...C=O bonded directly to the six-membered hetero ring
355 ....At 3-position
356 .....C=O in a C(=O)O group (e.g., nicotinic acid, etc.)
357 ...Nitrogen attached indirectly to the six-membered hetero ring by nonionic bonding
358 ...The ring nitrogen of the six-membered hetero ring is pentavalent (e.g., quaternary pyridinium salt, etc.)
359 ..Five-membered hetero ring containing at least one nitrogen ring atom (e.g., 1,2,3-triazoles, etc.)
360 ...Plural ring chalcogens in the hetero ring
361 ...Plural ring nitrogens and a single chalcogen in the hetero ring
362 ....1,2,5-thiadiazoles (including hydrogenated)
363 ....1,3,4-thiadiazoles (including hydrogenated)
364 ....Oxadiazoles (including hydrogenated)
365 ...1,3-thiazoles (including hydrogenated)
366 ....Polycyclo ring system having the thiazole ring as one of the cyclos
367 .....Bicyclo ring system having the thiazole ring as one of the cyclos
368 ......Ring nitrogen is shared by the cyclos of the bicyclo ring system (e.g., tetramisole, etc.)
369 ....Chalcogen bonded directly to ring carbon of the thiazole ring
370 ....Nitrogen bonded directly to ring carbon of the thiazole ring

.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
..Five-membered hetero ring containing at least one nitrogen ring atom (e.g., 1,2,3-triazoles, etc.)
...1,3-thiazoles (including hydrogenated)
....Nitrogen bonded directly to ring carbon of the thiazole ring
371 .....C=X bonded directly to the nitrogen which is bonded directly to the thiazole ring (X is chalcogen)
372 ...1,2-thiazoles (including hydrogenated)
373 ....Polycyclo ring system having the thiazole ring as one of the cyclos
374 ...1,3-oxazoles (including hydrogenated)
375 ....Polycyclo ring system having the oxazole ring as one of the cyclos
376 ....Chalcogen bonded directly to ring carbon of the oxazole ring
377 ....Nitrogen bonded directly to ring carbon of the oxazole ring
378 ...1,2-oxazoles (including hydrogenated)
379 ....Polycyclo ring system having the oxazole ring as one of the cyclos
380 ....Chalcogen or nitrogen bonded directly to ring carbon of the oxazole ring
381 ...Tetrazoles (including hydrogenated)
382 ....Additional chalcogen containing hetero ring
383 ...1,2,4-triazoles (including hydrogenated)
384 ....Chalcogen bonded directly to the triazole ring
385 ...1,3-diazoles
386 ....Divalent chalcogen or acyclic nitrogen double bonded directly to ring carbon of the diazole ring, or tautomeric equivalent
387 .....Polycyclo ring system having the diazole ring as one of the cyclos
388 ......Nitrogen double bonded directly at 2-position of the diazole ring, or tautomeric equivalent
389 .....Divalent chalcogen or acyclic nitrogen double bonded directly at both 2- and 4- positions, or tautomeric equivalent (e.g., hydantoin, etc.)
390 ......Chalcogen or nitrogen bonded directly at 1-, 3-, or 5-position by nonionic bonding
391 ......Benzene ring bonded directly to the diazole ring by nonionic bonding
392 .....Divalent chalcogen or acyclic nitrogen double bonded at 2-position, or tautomeric equivalent
393 ....Polycyclo ring system having the diazole ring as one of the cyclos
394 .....Benzo fused at 4,5-positions of the diazole ring
395 ......Chalcogen or nitrogen bonded directly at 1-, 2- or 3-position of the diazole ring by nonionic bonding
396 ....Imidazoles
397 .....Additional hetero ring
398 .....Chalcogen or nitrogen bonded directly to the imidazole ring by nonionic bonding
399 .....Chalcogen or nitrogen bonded indirectly to the imidazole ring by nonionic bonding
400 ......At imidazole ring carbon
401 ....2-imidazolines
402 .....Additional hetero ring
403 ...1,2-diazoles
404 ....Divalent chalcogen or acyclic nitrogen double bonded directly to ring carbon of the diazole ring, or tautomeric equivalent
405 .....Polycyclo ring system having the diazole ring as one of the cyclos
406 ....Pyrazoles
407 .....Chalcogen or nitrogen bonded directly to the pyrazole ring by nonionic bonding
408 ...The five-membered hetero ring consists of one nitrogen and four carbons
409 ....Spiro ring system
410 ....Polycyclo ring system having the five-membered hetero ring as one of the cyclos
411 .....Tricyclo ring system having the five-membered hetero ring as one of the cyclos
412 .....Bicyclo ring system having the five-membered hetero ring as one of the cyclos
413 ......Ring nitrogen is shared by the cyclos of the bicyclo ring system
414 ......Additional hetero ring which is not part of the bicyclo ring system
415 ......The bicyclo ring system consists of the five-membered hetero ring and a benzene ring (e.g., indole, etc.)
416 ....The ring nitrogen is bonded directly to nonshared ring carbons of the five-membered hetero ring (e.g., isoindole, etc.)
417 ....Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., phthalimide, etc.)
418 ....Chalcogen bonded directly to ring carbon of the five-membered hetero ring
419 ....C=X bonded directly or indirectly by an acyclic carbon or carbon chain to ring carbon of the five-membered hetero ring (e.g., tryptophan, etc.) (X is chalcogen)
420 ....Indomethacine per se or ester thereof
421 ......Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., adrenochrome, etc.)
422 ....Additional hetero ring
423 ....C=X bonded directly to the five-membered hetero ring by nonionic bonding (X is chalcogen)
424 ....Chalcogen bonded directly to the five-membered hetero ring by nonionic bonding
425 .....Plural chalcogens bonded directly to the five-membered hetero ring by nonionic bonding
426 ....Nitrogen bonded directly to the five-membered hetero ring by nonionic bonding

.Heterocyclic carbon compounds containing a hetero ring having chalcogen (i.e., O,S,Se or Te) or nitrogen as the only ring hetero atoms DOAI
..Five-membered hetero ring containing at least one nitrogen ring atom (e.g., 1,2,3-triazoles, etc.)
...The five-membered hetero ring consists of one nitrogen and four carbons
427 ....Two double bonds between ring members of the five-membered hetero ring (e.g., pyrrole, etc.)
428 ....Chalcogen bonded indirectly to the five-membered hetero ring by acyclic nonionic bonding
429 ....Carbocyclic ring bonded directly to the five-membered hetero ring
430 ..Sulfur containing hetero ring
431 ...The hetero ring has at least seven members
432 ...The hetero ring is six-membered
433 ....Plural hetero atoms in the hetero ring
434 .....Polycyclo ring system having the hetero ring as one of the cyclos
435 .....Three or more hetero atoms in the hetero ring
436 .....Two ring sulfurs in the hetero ring
437 ....Tricyclo ring system having the hetero ring as one of the cyclos
438 ...The hetero ring is five-membered
439 ....Plural hetero atoms in the hetero ring
440 .....Only two ring sulfurs in the hetero ring
441 ......Chalcogen bonded directly to ring carbon of the hetero ring
442 ......Nitrogen bonded directly to the hetero ring by nonionic bonding
443 ....Polycyclo ring system having the hetero ring as one of the cyclos
444 ....Additional hetero ring
445 ....Chalcogen bonded directly to ring carbon of the hetero ring
446 ....Chalcogen bonded directly to ring sulfur by nonionic bonding
447 ....Nitrogen bonded directly to the hetero ring
448 ....C=O bonded directly to the hetero ring (X is chalcogen)
449 ..Oxygen containing hetero ring
450 ...The hetero ring has at least seven members
451 ...The hetero ring is six-membered
452 ....Plural ring oxygens in the hetero ring
453 ....Polycyclo ring system having the hetero ring as one of the cyclos
454 .....Tricyclo ring system having the hetero ring as one of the cyclos
455 ......Chalcogen bonded directly to ring carbon of the hetero ring
456 .....Bicyclo ring system having the hetero ring as one of the cyclos (e.g., chromones, etc.)
457 ......Coumarins (including hydrogenated)
458 ......Tocopherols (e.g., vitamin E, etc.)
459 ....Nitrogen containing
460 ....Chalcogen bonded directly to ring carbon of the hetero ring
461 ...The hetero ring is five-membered
462 ....Spiro ring system
463 ....Plural ring oxygens in the hetero ring
464 .....Bicyclo ring system having the hetero ring as one of the cyclos (e.g., methylenedioxyphenyl group, etc.)
465 ......The hetero ring is substituted
466 ......Nitrogen containing
467 .....Only two ring oxygens in the hetero ring which is not a polycyclo ring system (e.g., dioxolane, etc.)
468 ....Polycyclo ring system having the hetero ring as one of the cyclos
469 .....Bicyclo ring system having the hetero ring as one of the cyclos
470 ......Chalcogen or nitrogen bonded directly to the hetero ring
471 ....Nitrogen containing
472 .....The nitrogen bonded directly to the hetero ring
473 ....Chalcogen bonded directly to the hetero ring
474 .....Ascorbic acid or derivative (e.g., vitamin C, etc.)
475 ...The hetero ring is three-membered
476 .N-C(=X)X containing (X is chalcogen) DOAI
477 ..N-C(=X)-X-N containing
478 ..N-C(=X)-X-C containing
479 ...With an additional active ingredient
480 ...Polycyclo ring system attached by nonionic bonding
481 ....Naphthyl ring system
482 ...N-C(=X)-N, N-C(=N)N, N-N, nitrogen directly bonded to oxygen by nonionic bonding or cyano containing
483 ...Plural N-C(=X)-X groups
484 ...Ring in acid moiety
485 ....The ring is a benzene ring
486 .....Phenoxy in acid moiety
487 .....The benzene ring is attached to nitrogen through an acyclic carbon or carbon chain
488 .....Ring in alcohol moiety
489 ...Ring in alcohol moiety
490 ....Ring attached directly to oxygen of oxygen of N-C(=O)-O
491 ..With an additional active ingredient
492 .Heavy metal containing DOAI
493 ..Tin
494 ..Zinc
495 ..Gold or silver
496 ..Mercury
497 ...Nitrogen containing
498 ..Lead
499 ..Copper
500 ...With an additional active ingredient
501 ..Nickel or cobalt
502 ..Iron
503 ..Antimony or bismuth
504 ..Arsenic
505 ..Cadmium or chromium
506 .Ester DOAI
507 ..R-C(=X)-N-X-C containing (e.g., hydroxamic acid ester, etc.) (R is C or H and X is chalcogen)
508 ..X-C=N containing (e.g., imidoester, etc.) (X is chalcogen)
509 ..(O=)N(=O)-O-C containing (e.g., nitrate ester, etc.)
510 ..Polycyclo ring system
511 ...Two of the cyclos share at least three ring members (i.e., bridged)
512 ..X-C(=X)-X containing (e.g., carbonic acid ester, thiocarbonic acid ester, etc.) (X is chalcogen)

.Ester DOAI
513 ..C-C(=X)-X-C containing (X is chalcogen and at least one X is other than oxygen)
514 ..Carbon bonded to -NCX or -XCN (e.g., cyanate, thiocyanate or isothiocyanate, etc.) (X is chalcogen)
515 ...With an additional active ingredient
516 ...Containing plural -NCX or -XCN groups or a cyano
517 ..S-X-C containing (e.g., sulfates, etc.) (X is chalcogen)
518 ...S of S-X-C attached directly to a benzene ring
519 ..Cyano or isocyano bonded directly to carbon
520 ...Benzene ring containing
521 ....C=O other than as ketone or aldehyde
522 .....The cyano is bonded directly to a benzene ring
523 ....Additional nitrogen other than cyano
524 .....The cyano is bonded directly to a benzene ring
525 ....Two or more of the cyano groups
526 ...Acyclic
527 ....C=O other than as ketone or aldehyde
528 .....C(=O)N containing
529 ..Z-C(=O)-O-Y wherein Z is hydrogen or an organic radical bonded to the C(=O) by a carbon and Y is an organic radical bonded to the oxygen by a carbon
530 ...Z contains a cyclopentyl or cyclopentene ring
531 ...Z contains a cyclopropyl or cyclopropene ring
532 ...Z-C(=O)-O-Y, wherein Z contains a benzene ring
533 ....Compound contains two or more C(=O)O groups indirectly bonded together by only conalent bonds
534 ....Z or Y radical contains a nitrogen atom
535 .....The nitrogen of the Z radical is directly bonded to a benzene ring which is directly bonded to the C(=O) group
536 ......With an agent to enhance topical absorption or with a stabilizing agent
537 ......With an additional active ingredient
538 .....Nitrogen bonded to carbon in Z moiety
539 ......Plural separated benzene rings in Z moiety
540 ......Nitrogen in Y moiety
541 ......Aldehyde or ketone in Z or Y radical
542 ......Z radical contains two or more nitrogen atoms at least one of which forms a C(=X)N group (X is chalcogen)
543 ....Z forms a phenoxy alkyl or phenoxy alkenyl radical
544 ....C(=O)O attached directly through the carbon to a benzene ring
545 ....Ketone in Z radical
546 ...ZC(=O)OY, wherein Z is an acyclic radical bonded to the C=O by a carbon and Y is an organic radical bonded to the oxygen by a carbon
547 ....Compound contains two or more C(=O)O groups
548 .....Ring is alcohol moiety
549 ....Z radical contains carbon to carbon unsaturation
550 ....Z radical contains sulfur or halogen
551 ....Z radical contains nitrogen
552 ....Z contains an unbroken chain of at least seven carbon atoms bonded directly to the C(=O) group
553 .Radical -XH acid, or anhydride, acid halide or salt thereof (X is chalcogen) DOAI
554 ..Amine addition salt of the acid
555 ...Benzene ring in acid moiety
556 ..Inner quaternary ammonium salt (e.g., betaine, etc.)
557 ..Carboxylic acid, percarboxylic acid, or salt thereof (e.g., peracetic acid, etc.)
558 ...Higher fatty acid or salt thereof
559 ....Ring containing
560 ....Carbon to carbon unsaturation
561 ...Nitrogen other than as nitro or nitroso nonionically bonded
562 ....Sulfur nonionically bonded
563 ....RC(=O)N containing (i.e., carboxamide) (R is C or H)
564 ....Plural nitrogens nonionically bonded
565 .....N-N or N=C(-N)-N containing (e.g., hydrazines, hydrazones, or quanidines, etc.)
566 .....Polycarboxylic acid
567 ....Benzene ring nonionically bonded
568 ...Benzene ring nonionically bonded
569 ....Polycyclo ring system
570 ....Carboxy or salt thereof only attached indirectly to the benzene ring
571 .....Ether oxygen single bonded to carboxylic acid, percarboxylic acid or salt thereof through an acyclic carbon or acyclic carbon chain
572 ...Cyclic carboxylic acid containing three to five carbons or cyclic percarboxylic acid containing three to five carbons or salt thereof
573 ....Cyclopentyl or cyclopentene (e.g., prostaglandins, etc.)
574 ...Polycarboxylic acid or salt thereof
575 ..Hydroxamic acid or salt thereof
576 ..Benzene ring containing
577 ...Polycyclo ring system
578 ..Acyclic acid or salt thereof
579 .Nitrogen containing other than solely as a nitrogen in an inorganic ion of an addition salt, a nitro or a nitroso DOAI
580 ..Thioureas (i.e., N-C(=S)-N
581 ...Thiocarbazides or thiosemicarbazides (i.e., N-N-C(=S)-N containing)
582 ....Thiocarbazones or thiosemicarbazones (i.e., C=N-N-C(=S)-N containing)
583 .....Benzene ring containing
584 ...C=O, sulfur or cyano attached directly to thiourea nitrogen by nonionic bonding
585 ...Benzene ring containing
586 ....Nitrogen attached indirectly to the -C(=S)-group by nonionic bonding
587 ....Oxygen containing
588 ..Ureas (i.e., N-C(=O)-N)
589 ...Nitro or nitroso bonded directly to amino nitrogen (e.g., nitramine, nitrosamine, nitro-urea, etc.)
590 ...Carbazides or semicarbazides (i.e., N-N-C(=O)-N containing)
591 ...Biurets (i.e., N-C(=O)-N-C(=O)-N)
592 ...Sulfur attached directly to urea nitrogen by nonionic bonding

.Nitrogen containing other than solely as a nitrogen in an inorganic ion of an addition salt, a nitro or a nitroso DOAI
..Ureas (i.e., N-C(=O)-N)
...Sulfur attached directly to urea nitrogen by nonionic bonding
593 ....Sulfur is part of a substituent which contains additional nitrogen
594 ...Additional C=O bonded directly to urea nitrogen
595 ...Benzene ring containing
596 ....Benzene ring bonded directly to urea nitrogen
597 .....Benzene ring is part of a substituent which contains nitrogen
598 .....Benzene ring is part of a substituent which contains oxygen
599 ..Thiocarboxamides, (i.e., C(=S)-N)
600 ..Sulfamides (i.e., N-(O=)S(=O)-N)
601 ..Sulfonamides (i.e., Q-(O=)S(=O)-N, wherein Q is a substituent and wherein any substituent attached to the nitrogen will be referred to as E)
602 ...Q contains benzene ring
603 ....Nitrogen in Q
604 ....Q is monocyclic
605 ...Q is acyclic and benzene ring in a substituent E
606 ..N-S-S containing
607 ..N-S-N containing or contains a nitrogen bonded directly to a S=O group (e.g., sulfinamides, etc.)
608 ..Sulfur attached directly to amino nitrogen by nonionic bonding (e.g., sulfenamides, etc.)
609 ..Cyanamides (i.e., compounds containing cyano bonded directly to amino nitrogen)
610 ..Nitramines (i.e., compounds containing nitro bonded directly to amino nitrogen)
611 ..Nitrosamines (i.e., compounds containing nitroso bonded directly to amino nitrogen)
612 ..Haloamines (i.e., compounds containing halogen attached directly to amino nitrogen by nonionic bonding)
613 ..Carboxamides (i.e., R-C(=O)-N, wherein R is a radical having carbon bonded directly to the C(=O)-N or is hydrogen and wherein any substituent attached to nitrogen will be referred to as E)
614 ...N-N containing (e.g., aminimine, hydrazine, etc.)
615 ....R contains benzene ring
616 ...Plural carboxamide groups or plural C=O groups bonded directly to the same nitrogen
617 ...R contains benzene ring
618 ....Sulfur in R
619 ....Nitrogen in R
620 .....The nitrogen in R is an amino nitrogen attached indirectly to a ring by acyclic bonding
621 ....C=O in R
622 ....C-O- group in R
623 ...Plural alicyclic rings in R
624 ...Three-membered ring in R
625 ...R is acyclic
626 ....Nitrogen in R
627 ....Carbon to carbon unsaturation in R
628 ....Halogen bonded directly to carbon in R
629 ....R is hydrogen or a lower saturated alkyl of less than seven carbons
630 .....A ring or polycyclo ring system in a substituent E is attached indirectly to the carboxamide nitrogen or to an amino nitrogen in substituent E by acyclic nonionic bonding
631 ..Amidines (i.e., N=C-N)
632 ...Amidino hydrazines or hydrazones (i.e., N-N=C-N or N=C-N-N)
633 ...Amidoximes (i.e., N-C=N-O)
634 ...Guanidines (i.e., N=C(-N)-N)
635 ....Biguanides (i.e., N=C(-N)-N(N-)C=N)
636 ...Polyamidines
637 ...Benzene ring containing
638 ..Nitrogen double bonded directly to carbon
639 ...Hydrazones (i.e., C=N-N)
640 ...Oximes (i.e., C=N-O-)
641 ...Aldimines or ketimines which contain a benzene ring (i.e., RC=N wherein R is C or H)
642 ..Quaternary ammonium containing
643 ...Benzene ring containing
644 ..Amine oxides
645 ..Nitroxides, oxyamines or hydroxylamines (i.e., N-O or N-OH)
646 ..Benzene ring containing
647 ...Amino nitrogen and a ring bonded directly to the same ring and any other amino nitrogen in the compound is bonded directly to one of the rings
648 ...Two aryl rings or aryl ring systems bonded directly to the same acyclic carbon
649 ...Amino nitrogen attached to aryl ring or aryl ring system by an acyclic carbon or acyclic chain
650 ....The aryl ring or aryl ring system is bonded directly to another ring or ring system
651 ....Ether oxygen is part of the chain
652 .....Alkanol group only between the amino nitrogen and an ether oxygen which is bonded directly to the aryl ring or aryl ring system (i.e., aryloxy alkanol amines)
653 ....Hydroxy, bonded directly to carbon, attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding (e.g., beta hydroxy phenethylamines, etc.)
654 ....The chain consists of two or more carbons which are unsubtituted or have acyclic hydrocarbyl substituents only
655 ....The aryl ring or aryl ring system and amino nitrogen are bonded directly to the same acylic carbon, which carbon additionally has only hydrogen or acyclic hydrocarbyl substituents bonded directly thereto
656 ...Polycyclo ring system
657 ....Bicyclo ring system
658 ...Two benzene rings bonded directly to the same nitrogen
659 ..Alicyclic ring or ring system and amino nitrogen are attached indirectly by an acyclic carbon or acyclic chain
660 ..Plural alicyclic rings
661 ...Polycyclo ring system
662 ....Tricyclo ring system

.Nitrogen containing other than solely as a nitrogen in an inorganic ion of an addition salt, a nitro or a nitroso DOAI
663 ..Acyclic
664 ...N-N containing (e.g., aminimine, hydrazine, etc.)
665 ...Sulfur containing
666 ...Aldehyde or ketone containing
667 ...C-O-group containing
668 ....Polyether
669 ....Polyhydroxy
670 ....Monoether
671 ...Carbon to carbon unsaturation
672 ...Halogen bonded directly to carbon
673 ...Plural amino nitrogens
674 ....Three or more amino nitrogens
675 .Ketone DOAI
676 ..Nitrogen containing
677 ...Bicyclo ring system having a benzene ring as one of the cyclos
678 ..Benzene ring containing
679 ...Plural rings
680 ....Polycyclo ring system
681 .....Bicyclo
682 ......Naphthyl ring system
683 ....Alicyclic ring
684 .....Five-membered alicyclic ring
685 ....C=O bonded directly to benzene ring
686 .....Two benzene rings bonded directly to the same C=O
687 ......Oxygen single bonded to carbon
688 ...C=O bonded directly to benzene ring (e.g., acetophenone, etc.)
689 ....Oxygen single bonded to carbon
690 ..Alicyclic ring containing
691 ...Plural alicyclic rings
692 ....Camphor or nuclear substituted derivatives thereof
693 .Aldehyde DOAI
694 ..Formaldehyde
695 ...With polycyclo compound
696 ...With alcohol
697 ...With nitrogen containing compound
698 ..With preservative or stabilizer
699 ..Benzene ring containing
700 ...Polycyclo ring system
701 ...Acyclic carbon to carbon unsaturation
702 ..Sulfur containing
703 ..Carbon to carbon unsaturation
704 ..Nitrogen containing
705 ..Plural C=O groups
706 .Sulfur, selenium or tellurium compound (e.g., thioalcohols, mercaptans, etc.)
707 ..Persulfide (e.g., R-S-S-R, etc.)
708 ..Oxygen bonded directly to sulfur (e.g., sulfoxides, etc.)
709 ...Plural oxygens bonded directly to the same sulfur (e.g., sulfones, etc.)
710 ....Acyclic carbon to carbon unsaturation
711 ....Acyclic
712 ..Thioether
713 ...Acyclic carbon to carbon unsaturation
714 .Peroxide DOAI
715 .Ether DOAI
716 ..Nitrogen containing
717 ..Benzene ring containing
718 ...Plural oxygens
719 ....Alicyclic ring
720 ....Acyclic carbon to carbon unsaturation
721 ....Plural benzene rings
722 ..Acyclic
723 ...Plural oxygens
724 .C-O-group (e.g., alcohol, alcoholate, etc.) DOAI
725 ..Vitamin A compound or derivative
726 ..Diphenyl-substituted acyclic alcohol or alcoholate
727 ..Nitrogen containing
728 ...C of C-O- group is nuclear C of a benzene ring (e.g., phenol, phenolate, etc.)
729 ..Alicyclic ring containing
730 ..Benzene ring containing
731 ...C of C-O- group is nuclear C of a benzene ring (e.g., phenol, phenolate, etc.)
732 ....Polycyclo ring system (e.g., naphthols, etc.)
733 ....Acyclic carbon to carbon unsaturation
734 ....Two or more separate aryl-O-groups
735 .....Nuclear halogenated
736 ....Additional benzene ring containing
737 ....Nuclear halogenated
738 ..Polyhydroxy
739 ..Carbon to carbon unsaturated
740 .Nitrogen containing compound DOAI
741 ..Benzene ring containing
742 ..Polynitro
743 .Halogenated hydrocarbon DOAI
744 ..Unsaturated aliphatic compound
745 ...Alkyne
746 ...Plural halogenated hydrocarbon compounds
747 ..Carbocyclic
748 ...Two benzene rings directly attached to an acyclic hydrocarbon or acyclic halogenated hydrocarbon (e.g., D.D.T., etc.)
749 ....Fluorine containing
750 ....With organic ether or -OH containing compound non-DOAI
751 ...Benzene ring containing
752 ....Alkyne
753 ....Polycyclo ring system
754 ....Plural benzene rings
755 ...Polycyclo ring system
756 ....Bicyclo
757 ..Two or more halogenated hydrocarbons
758 ..Chlorine as only halogen
759 ..Fluorine as only halogen
760 ..Bromine and chlorine as only halogens
761 ..Bromine and fluorine as only halogens
762 .Hydrocarbon DOAI
763 ..Carbocyclic
764 ...Benzene ring containing
765 ....Polycyclo ring system
766 ...Polycyclo ring system
767 ..With phosphorus containing non-DOAI
768 ..With sulfur containing non-DOAI
769 DESIGNATED INORGANIC NONACTIVE INGREDIENT OR ELEMENTAL MATERIAL OTHER THAN WATER
770 .Siliceous or calcareous material (e.g., clay, earth, etc.)
771 .Oxygen gas containing
772 DESIGNATED ORGANIC NONACTIVE INGREDIENT CONTAINING OTHER THAN HYDROCARBON
773 .Peptide containing
774 ..Gelatin or derivative
775 ..Casein (milk protein) or derivative
776 ..Albumin or derivative
777 .Carbohydrate or lignin, or derivative
778 ..Starch or derivative
779 ..Algin or derivative
780 ..Locust bean gum
781 ..Cellulose or derivative
782 .Natural gum or resin
783 .Plant extract or plant material of undetermined constitution

DESIGNATED ORGANIC NONACTIVE INGREDIENT CONTAINING OTHER THAN HYDROCARBON
784 .Carboxylic acid or salt thereof
785 .Carboxylic acid ester
786 ..Glyceride
787 ..Beeswax
788 .Nitrogen containing

708 .Water utilized
709 INCLUDING REGENERATION OF CATALYST
710 .Solvent utilized
711 WATER UTILIZED DURING THE FISCHER-TROPSCH STEP OF THE PROCESS
712 TEMPERATURE CONTROL OR REGULATION OF THE FISCHER-TROPSCH REACTION
713 GROUP IB METAL CONTAINING CATALYST UTILIZED FOR THE FISCHER-TROPSCH REACTION (i.e., Cu, Ag, or Au)
714 GROUP VIB METAL CONTAINING CATALYST UTILIZED FOR THE FISCHER-TROPSCH REACTION (i.e., Cr, Mo, or W)
715 GROUP VIII METAL CONTAINING CATALYST UTILIZED FOR THE FISCHER-TROPSCH REACTION (i.e., Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, or Pt)
716 .Rhodium containing catalyst
717 .Group IA or IIA light metal containing material utilized during the Fischer-Tropsch step of the process (i.e., Li, Na, K, Rb, Cs, Be, Mg, Ca, Sr, or Ba)
718 ..In the form of a salt
719 .Iron containing catalyst
720 ..Pretreatment of the catalyst
721 ..The catalyst contains a metal in addition to the iron, or another material utilized contains a metal other than iron (e.g., as a promoter, retarder, etc.)
722 ADSORPTION WITH A SOLID MATERIAL
723 SALT CONTAINING EXTRACTANT UTILIZED
724 SOLVENT EXTRACTION UTILIZED
725 .Alcohol containing extractant utilized
726 HYDROGENATION WITH GASEOUS HYDROGEN TO PURIFY OR RECOVER
727 FORMING SALTS OR OXIMES OF OXYGEN CONTAINING COMPOUNDS TO PURIFY OR RECOVER
728 MISCELLANEOUS

CLASS 520 PART OF THE CLASS 520 SERIES -- SYNTHETIC RESINS OR NATURAL RUBBERS

DECEMBER 1990

Class 520, Synthetic Resins or Natural Rubbers, subclass 1, is to be considered an integral part of Class 260, while retaining all pertinent definitions and class lines of Class 260.

Class 520, subclass 1, is the generic subclass for synthetic resins or natural rubbers. All the other classes of the 520 Series, i.e., 521, 522, 523, 524, 525, 526, 527, and 528 are indented thereunder.

Retrieval of information in the Class 520 series is identical to retrieval of the information in any ordinary class that has subclasses rather than classes indented thereunder. Each of the classes indented, e.g., 521, 525, 528, etc., merely recites an art area that for convenience of numbering has been categorized as a class rather than a conventional subclass.

For ease of readability all of the one dot subclasses have been indicated by upper case letters.

The following notations have been adopted for use in the schedule of Class 520, subclass 1

SPIC - specified intermediate condensation product (consistent with Glossary)
SPFI - specified polymer-forming ingredient (consistent with Glossary)
SP - solid polymer (consistent with Class 520, subclass 1)
NRM - nonreactant material (defined in Class 523, subclass 1)
DNRM - designated nonreactant material (defined in Class 523, subclass 1)

Natural rubber is classified in the 520 series as if equivalent to a solid polymer derived from isoprene, e.g., from a reactant containing two or more ethylenic groups, etc.

1 SYNTHETIC RESINS OR NATURAL RUBBERS

CLASS 521 PART OF THE CLASS 520 SERIES -- SYNTHETIC RESINS OR NATURAL RUBBERS

DECEMBER 1990

SYNTHETIC RESINS (Class 520, Subclass 1)
25 .ION-EXCHANGE POLYMER OR PROCESS OF PREPARING
26 ..Process of regenerating
27 ..Membrane or process of preparing
28 ..Previously formed solid ion-exchange polymer admixed with nonreactive material or ion-exchange polymer
29 ..Polymer characterized by defined size or shape other than bead or pearl
30 ..Chemically treated solid polymer
31 ...Solid polymer derived from ethylenically unsaturated reactant only
32 ....Treated with nitrogen-containing material
33 ....Treated with sulfur-containing material
34 ...Solid polymer derived from at least one 1,2-epoxy containing reactant
35 ...Solid polymer derived from aldehyde or derivative
36 ....Treated with nitrogen-containing material
37 ....Treated with sulfur-containing reactant
38 ..From ethylenically unsaturated reactant only
39 ..From aldehyde or derivative
40 .PROCESS OF TREATING SCRAP OR WASTE PRODUCT CONTAINING SOLID ORGANIC POLYMER TO RECOVER A SOLID POLYMER THEREFROM
40.5 ..Process of treating scrap or waste product containing at least one polymer derived from ethylenic unsaturated monomers only
41 ...Treating rubber (or rubberlike materials) or polymer derived from a monomer having at least two ethylenic unsaturated moieties
41.5 ....Treating with organic phosphorus-containing material
42 ....Treating with organic nitrogen-containing material
42.5 ....Treating with organic chalcogen-containing material
43 .....Containing organic sulfur
43.5 .....Containing carboxylic acid or anhydride group
44 .....Containing hydroxyl group
44.5 ....Treating with hydrocarbon or halogenated hydrocarbon material
45 ....Treating with steam or water
45.5 ....Treating with mechanical action and in the absence of a chemically reactive additive or solvent
46 ...Treating polymer derived from a monomer containing only carbon, hydrogen, and halogen or only carbon and halogen; or treating a polymer which has been derived from at least one hydrocarbon and which has been subsequently halogenated
46.5 ....Treating polymer derived from vinyl chloride monomer
47 ...Treating polymer derived from hydrocarbon monomers only
47.5 ..Treating polysiloxane
48 ..Treating polyester
48.5 ...Treating with alcohol
49 ..Treating polyurethane, polyurea (excluding urea-formaldehyde polymers), polyisocyanurate or polycarbodiimide
49.5 ...Treating with alcohol or amine
49.8 ..Treating polycarbonamide
50 .CELLULAR PRODUCTS OR PROCESSES OF PREPARING A CELLULAR PRODUCT, E.G., FOAMS, PORES, CHANNELS, ETC.
50.5 ..Compositions to be polymerized by wave energy in order to prepare a cellular product wherein said composition contains a rate-affecting material; or compositions to be modified by wave energy to prepare a cellular product wherein said composition contains a rate-affecting material; or processes of preparing or treating a solid polymer utilizing wave energy in order to prepare a cellular product
51 ..Processes of preparing a cellular product having an integral skin
52 ..Reticulated cellular product or processes of preparing a reticulated cellular product
53 ..Treating a cellular solid polymer by adding a material thereto which reacts with the polymer or forms a composition therewith, or products of said treating process
54 ...Treating a cellular solid polymer by adding a solid polymer or solid polymer-forming composition
55 ...Treating a cellular solid polymer by adding a material thereto which forms a composition therewith
56 ..Particle which is expandible, process of preparing an expandible particle, or process of expanding a particle to form a cellular product
57 ...Including step of surface coating a particle or process of expanding a surface coated particle
58 ...Expanding utilizing plural expansion steps
59 ...Expandible system contains two or more solid polymers or at least one solid polymer and at least one polymer-forming system
60 ...Adding expanding agent subsequent to solid polymer formation
61 ..Process of preparing a cellular product by removal of material from a solid polymer-containing matrix without expanding the matrix; composition which is nonexpandible and is designed to form a cellular product by said process; or process of preparing said composition
62 ...Mixture of solid polymers present during cell formation
63 ...Cellular product-forming process wherein the removable material is present or is produced in situ during the solid polymer formation step
64 ...Removing a liquid to form a cellular product
65 ..Process of forming a cellular product from an aqueous latex, aqueous dispersion, or aqueous emulsion containing a solid polymer; process of preparing a latex, dispersion, or emulsion containing a solid polymer which is designed to be formed into a cellular product, or composition thereof
66 ...Treating a latex, dispersions, or emulsion containing a solid polymer at 32 degrees F. or below, e.g., freezing, etc.

SYNTHETIC RESINS (Class 520, Subclass 1)

.CELLULAR PRODUCTS OR PROCESSES OF PREPARING A CELLULAR PRODUCT, E.G., FOAMS, PORES, CHANNELS, ETC.

..Process of forming a cellular product from an aqueous latex, aqueous dispersion, or aqueous emulsion containing a solid polymer; process of preparing a latex, dispersion, or emulsion containing a solid polymer which is designed to be formed into a cellular product, or composition thereof

67 ...Adding -N=C=X material to a latex, dispersion, or emulsion containing a solid polymer

68 ...Adding fibrous material to a latex, dispersion, or emulsion containing a solid polymer

69 ...Latex, dispersion, or emulsion contains an additional solid polymer-forming system

70 ...Latex, dispersion, or emulsion contains two or more solid polymers

71 ...Solid polymer is derived from a conjugated diene monomer

72 ...Utilizing cell forming agent other than air

73 ..Process of preparing a cellular product of a plastisol of a solid polymer derived solely from ethylenically unsaturated monomers; forming a plastisol of a solid polymer derived solely from an ethylenically unsaturated monomer which is designed to be formed into a cellular product, or composition thereof

74 ...By incorporation of material in gaseous state

75 ...System contains two or more solid polymers or contains at least one solid polymer and at least one polymer-forming system

76 ..Preparing a cellular product utilizing a stated ingredient which is surface coated or is a discrete solid particle containing a fluid encapsulated therein, processes of forming an expandible composition, containing said stated ingredient or composition therefrom

77 ..Preparing a cellular product by decomposition of a solid polymer; or process of forming a composition containing a solid polymer which decomposes so as to subsequently form a cellular polymer, or composition therefrom

78 ..Preparing a cellular product by spraying a solid polymer containing material

79 ..Extruding a solid polymer containing material to form a cellular product

80 ...Including solid polymer formation in or during extruding step

81 ...System contains a mixture of solid polymer or at least one solid polymer and at least one solid polymer-forming system

82 ..Process of forming a cellular product subsequent to solid polymer formation in the presence of a stated ingredient, noncellular composition capable of forming a cellular product and containing a stated ingredient, or process of preparing same

83 ...Ingredient is asphaltic, bituminous, or water settable inorganic material, e.g., cement, plaster of Paris, etc.

84.1 ...Ingredient is protein, carbohydrate, or natural resin

85 ...Ingredient contains a boron or phosphorus atom

86 ...Ingredient is organic silicon compound

87 ...Ingredient is aldehyde or ketone

88 ...Ingredient is ether, alcohol, or inorganic alcoholate, e.g., phenol, etc.

89 ...Ingredient contains a sulfur atom

90 ...Ingredient is a heterocyclic compound

91 ...Ingredient contains a silicon atom

92 ...Ingredient contains a metal atom

93 ....Metal atom is part of an organic compound

94 ...Ingredient is a nitrogen containing compound

95 ....Nitrogen compound contains a nitrogen atom bonded to a nitrogen or oxygen atom

96 ...Ingredient contains an -O-O- group

97 ...Ingredient contains a carbon atom double-bonded to oxygen, e.g., carbon dioxide, carboxylic acid, etc.

98 ...Ingredient contains only C and H atoms, only C and halogen atoms, or only C, H, and halogen atoms

99 ..Cellular product formation prior to or during solid polymer formation in the presence of a stated ingredient other than water

100 ...Ingredient is water settable inorganic composition

101 ...Ingredient is bituminous or asphaltic material

102 ...Ingredient is a protein containing material

103 ...Ingredient contains a boron atom

104 ....Boron trihalide or complex thereof

105 ....Boron atom is part of an organic compound

106 ...Ingredient contains a phosphorus atom

107 ....Phosphorus atom is part of an organic compound

108 .....Organic phosphorus compound contains a phosphorus atom bonded to an atom other than oxygen

109.1 ...Ingredient is carbohydrate, or natural resin

110 ...Ingredient contains a silicon atom as part an organic compound

111 ....Organic silicon atom compound contains an atom other than oxygen, hydrogen, silicon, or carbon

112 ....Organic silicon compound contains an ether group

113 ...Ingredient is aldehyde or ketone

114 ...Ingredient contains a -C-X-C- group wherein X is a chalcogen atom and none of the C atoms bonded to the chalcogen are double-bonded to an additional chalcogen atom

SYNTHETIC RESINS (Class 520, Subclass 1)

.CELLULAR PRODUCTS OR PROCESSES OF PREPARING A CELLULAR PRODUCT, E.G., FOAMS, PORES, CHANNELS, ETC.

..Cellular product formation prior to or during solid polymer formation in the presence of a stated ingredient other than water

...Ingredient contains a -C-X-C- group wherein X is a chalcogen atom and none of the C atoms bonded to the chalcogen are double-bonded to an additional chalcogen atom

115 ....-C-X-C- compound contains a nitrogen atom

116 ....-C-X-C- compound contains a -C-XH group wherein X is a chalcogen atom

117 ...Ingredient contains a -C-XH group wherein X is a chalcogen atom and the carbon atom is not double-bonded to a chalcogen atom, phenol, etc.

118 ....-C-XH ingredient contains a nitrogen atom

119 ...Ingredient is inorganic halogen containing material

120 ...Ingredient contains a sulfur atom

121 ....Sulfur atom is part of an organic compound

122 ...Ingredient contains a silicon atom

123 ...Ingredient contains a metal atom

124 ....Metal atom is part of an organic compound

125 .....Organic metal compound contains a Group I or Group II metal atom

126 .....Organic metal compound contains tin

127 ......Tin compound is dibutyl tin dilaurate or stannous octoate

128 ...Ingredient is a nitrogen containing compound

129 ....Nitrogen compound contains a nitrogen atom bonded to three carbon atoms and wherein none of the carbon atoms are double-bonded to oxygen

130 ...Ingredient contains a carbon atom double bonded to oxygen, e.g., carboxylic acid, etc.

131 ...Ingredient contains only carbon and hydrogen atoms, only C and halogen atoms, or only C, H, and halogen atoms

132 ....Said ingredient is substantially nonvolatile material, e.g., hydrocarbon waxes, greases, etc.

133 ...Ingredient is gaseous at ambient conditions, e.g., air, oxygen, etc.

134 ..Cellular product derived from two or more solid polymers or from at least one solid polymer and at least one polymer-forming system

135 ...At least one polymer is derived from reactant containing two or more three-membered heterocyclic rings having two carbon atoms and one chalcogen atom or polymer-forming system contains the same type of reactant

136 ...At least one polymer is derived from an aldehyde or derivative or wherein the polymer-forming system contains the same type of reactant

137 ...At least one polymer is derived from a -N=C=X reactant wherein X is a chalcogen atom or wherein the polymer-forming system contains the same type of reactant

138 ...At least one polymer is derived from a polycarboxylic acid or derivative and a polyol or wherein the polymer-forming system containing the same type of reactants

139 ...At least one polymer is derived from an ethylenically unsaturated aromatic reactant or wherein the polymer-forming system contains the same type of reactant

140 ...At least one polymer is derived from reactant containing two or more ethylenic groups or wherein the polymer-forming system contains the same type of reactant

141 ..Cellular vinyl alcohol polymer

142 ..Cellular product derived from ethylenically unsaturated reactants only

143 ...From acyclic mono-unsaturated hydrocarbon as only reactant

144 ....Interpolymer

145 ...From acyclic mono-unsaturated halogenated reactant

146 ...From aromatic reactant

147 ....With oxygen or nitrogen containing reactant

148 ....With conjugated diene reactant

149 ...From oxygen containing reactant

150 ...From reactant containing two or more ethylenic unsaturated groups

151 ..Cellular polymer derived from tar, pitch, bitumen, asphalt, or plant material of unknown constitution, e.g., nut shell liquor, etc.

152 ..Cellular product derived from boron containing reactant

153 ..Cellular product derived from aluminum or heavy metal containing reactant

154 ..Cellular product derived from silicon containing reactant

155 ..Cellular product derived from a -N=C=X containing reactant wherein X is a chalcogen atom

156 ...With three-membered heterocyclic reactant containing two carbon atoms and a hetero atom (i.e., nitrogen or a chalcogen atom)

157 ...With a C-C(=X)-XH or C-C(=X)-X-C(=X)-C- reactant wherein X is a chalcogen atom, e.g., carboxylic acid or anhydride, etc.

158 ...With ketone, aldehyde, or aldehyde derivative

159 ...N=C=X reactant having at least two C-NH-C(=X)- groups, e.g., prepolymers, etc.

160 ...Two or more N=C=X reactants

161 ...N=C=X reactant contains a heterocyclic ring

162 ...N=C=X reactant contains atoms other than carbon and hydrogen and other than nitrogen and chalcogen as part of the N=C=X group

163 ...With nitrogen containing reactant

164 ....Nitrogen reactant contains a C-XH group wherein X is a chalcogen atom and wherein the C atom is not double-bonded to a chalcogen atom

165 .....Phosphorus containing reactant

	SYNTHETIC RESINS (Class 520, Subclass 1)
	.CELLULAR PRODUCTS OR PROCESSES OF PREPARING A CELLULAR PRODUCT, E.G., FOAMS, PORES, CHANNELS, ETC.
	..Cellular product derived from a -N=C=X containing reactant wherein X is a chalcogen atom
	...With nitrogen containing reactant
	....Nitrogen reactant contains a C-XH group wherein X is a chalcogen atom and wherein the C atom is not double-bonded to a chalcogen atom
166	.....Nitrogen reactant contains a nitrogen containing heterocyclic ring
167	.....Nitrogen reactant contains a N-(C-C-O)-group
168	...With phosphorus containing reactant
169	....Phosphorus reactant contains a -O-(C-C-O-)-group
170	...With -XH reactant wherein X is a chalcogen atom
171	....-XH reactant contains a halogen atom
172	....-XH reactant contains a C=X group, e.g., carboxylic acid ester, etc.
173	.....With non -C=X containing reactant
174	....-XH reactant contains a C-X-C group
175	.....C-X-C reactant contains a carbohydrate group
176	.....With non -C-X-C- containing reactant
177	.....C-X-C reactant contains a carbocyclic ring, e.g., aromatic, etc.
178	..Cellular product derived from a reactant containing two or more three-membered heterocyclic rings wherein two of the ring members are carbon atoms and the remaining ring member is a chalcogen atom
179	...With -C(=X)-X containing reactant wherein X is a chalcogen atom
180	..Cellular product derived from a phenol, phenol ether, or inorganic phenolate reactant
181	...With reactant which is an aldehyde or aldehyde derivative
182	..Cellular product derived from a -C-C(=X)-X containing reactant wherein X is a chalcogen atom, e.g., phthalic acid, etc.
183	...Nitrogen containing reactant
184	....Nitrogen reactant contains at least two amino nitrogen atoms
185	.....Carbocyclic reactant containing -C-C(=X)-X, e.g., containing carboxyl, etc.
186	..Cellular product derived from reactant which is an aldehyde or aldehyde derivative
187	...Nitrogen containing reactant
188	....Nitrogen reactant contains a -N-C(=X)-N group wherein X is a chalcogen atom, e.g.,urea, etc.
189	..Cellular product derived from reactant containing a carbon to chalcogen bond

CLASS 522 PART OF THE CLASS 520 SERIES--SYNTHETIC RESINS OR NATURAL RUBBERS

SYNTHETIC RESINS (Class 520, Subclass 1)

1 .COMPOSITIONS TO BE POLYMERIZED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR COMPOSITIONS TO BE MODIFIED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR PROCESSES OF PREPARING OR TREATING A SOLID POLYMER UTILIZING WAVE ENERGY

2 ..Processes of forming or modifying a solid polymer by laser; or compositions therefore

3 ..Processes of forming or modifying a solid polymer wherein specified mixing, stirring, agitating, movement of material or directional orientation is employed; or compositions therefore

4 ..Processes of forming or modifying a solid polymer by wave energy wherein at least two distinct external radiant energy sources are utilized; or compositions therefore

5 ..Processes of forming or modifying a solid polymer by wave energy wherein a temperature less than 0 degree C (32 degree F) or greater than 250 degree C (482 degree F) is employed; or compositions therefore

6 ..Compositions to be polymerized or modified by wave energy wherein said composition contains at least one specified rate-affecting material; or processes of preparing or treating a solid polymer utilizing wave energy in the presence of at least one specified rate-affecting material; e.g., nitrogen containing photosensitizer, oxygen containing photoinitiator, etc.

7 ...Contains two or more rate-affecting materials, at least one of which is specified

8 ....At least two specified rate-affecting materials containing keto group not part of a ring; or contains a nonspecified photoinitiator or photosensitizer and specified ketone containing material wherein the keto group is not part of a ring

9 .....With a heterocyclic specified rate-affecting material

10 .....With a tertiary amine specified rate-affecting material

11 ....Contains compound containing keto group not part of a ring and nonspecified rate-affecting material other than mere photoinitiator or photosensitizer

12 ....Contains compound containing keto group not part of a ring and a specified rate-affecting material; or contains a specified rate-affecting material and a nonspecified photoinitiator or photosensitizer

13 .....Specified rate-affecting material is a peroxide or azo compound

14 .....Specified rate-affecting material is an amide or tertiary amine

15 .....Specified rate-affecting material contains onium group

16 .....Specified rate-affecting material is heterocyclic

17 .....Specified rate-affecting material contains sulfur

18 .....Specified rate-affecting material contains phosphorous, arsenic, antimony or nitrogen atom

19 .....Specified rate-affecting material is an aldehyde or aldehyde derivative

20 .....Specified rate-affecting material is a carboxylic acid or derivative

21 .....Specified rate-affecting material contains C-OH or C-O-C group

22 .....Specified rate-affecting material contains an inorganic compound

23 .....Specified rate-affecting material contains only carbon, hydrogen, or halogen and at least one atom of carbon is bonded to hydrogen or a halogen atom

24 ....Specified rate-affecting material is a peroxide

25 ....Specified rate-affecting material contains onium group

26 ....Specified rate-affecting material is heterocyclic

27 ....Specified rate-affecting material contains sulfur

28 ....Specified rate-affecting material contains phosphorous, arsenic, antimony or nitrogen

29 ....Specified rate-affecting material is a metal-containing organic compound

30 ....Specified rate-affecting material is organic

31 ...Specified rate-affecting material contains onium group

32 ....Diazonium containing material

33 ...Specified rate-affecting material contains keto group not part of a ring

34 ....Containing ethylenic unsaturation

35 ....Contained in polymeric rate-affecting material, e.g., synthetic resin, etc.

36 ....Containing two or more ketone groups

37 .....Adjacent (C=O)* groups where * is at least two

38 ....Containing phosphorous

39 ....Containing nitrogen

40 ....Containing C-CO-CHOH, e.g., benzoin, etc.

41 .....Containing C-CO-CHOH-CHOR wherein R is organic

42 ....Containing C-CO-C(R)(OH) wherein R is organic

43 ....Containing C-CO-C(H)(OR) wherein R is organic, e.g., benzoin methyl ether, etc.

44 ....Containing C-CO-C(R)(OR) wherein R is organic, e.g., diethoxyacetophenone, etc.

45 ....Containing halogen, e.g., chloroacetone, etc.

46 ....At least two aryl groups connected directly to same carbonyl carbon, e.g., benzophenone, etc.

47 ...Specified rate-affecting material is a quinone

48 ....Quinone ring is part of polynuclear system, e.g., anthraquinone, etc.

49 ...Specified rate-affecting material contains chalcogen other than as oxygen

50 ....Hetero nitrogen ring

51 .....Containing mercapto or mercaptide group, e.g., (thio)mercaptobenzoxazole, etc.

SYNTHETIC RESINS (Class 520, Subclass 1)
.COMPOSITIONS TO BE POLYMERIZED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR COMPOSITIONS TO BE MODIFIED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR PROCESSES OF PREPARING OR TREATING A SOLID POLYMER UTILIZING WAVE ENERGY
..Compositions to be polymerized or modified by wave energy wherein said composition contains at least one specified rate-affecting material; or processes of preparing or treating a solid polymer utilizing wave energy in the presence of at least one specified rate-affecting material; e.g., nitrogen containing photosensitizer, oxygen containing photoinitiator, etc.
...Specified rate-affecting material contains chalcogen other than as oxygen
....Hetero nitrogen ring
52 .....Containing halogen
53 ....Hetero sulfur ring
54 ....C-(S)*-C wherein * is at least two
55 ....Sulfide
56 ....Mercapto group attached directly to aromatic ring, e.g., thiophenol, etc.
57 ....Nitrogen containing compound
58 ....Sulfenate, e.g., R-O-S-R, etc.
59 ....(O=S=O), e.g., sulfuryl or sulfonyl containing, etc.
60 ...Specified rate-affecting material is a peroxide
61 ....Hydroperoxide
62 ...Specified rate-affecting material contains a C-N=N-C-group
63 ...Specified rate-affecting material contains nitrogen or oxygen atom in heterocyclic ring
64 ...Specified rate-affecting material contains phosphorous
65 ...Specified rate-affecting material contains nitrogen
66 ...Specified rate-affecting material contains metal atom
67 ...Specified rate-affecting material contains halogen
68 ...Specified rate-affecting material contains oxygen
69 ....Phenolic, e.g., hydroquinone, etc.
70 ...Specified rate-affecting material contains only carbon and hydrogen
71 ..Processes of preparing or treating a solid polymer by wave energy in the presence of a designated nonreactant material (DNRM); or compositions therefore
72 ...Carbohydrate or derivative DNRM
73 ...Coal, asphaltic, or bituminous material DNRM
74 ...Organic DNRM
75 ....Heterocyclic ring containing DNRM
76 ....Phosphorous containing DNRM
77 ....Silicon containing DNRM
78 ....Nitrogen containing DNRM
79 ....Oxygen containing DNRM
80 ....Carbon and hydrogen only containing DNRM
81 ...Heavy metal containing DNRM
82 ...Phosphorous or sulfur containing DNRM
83 ...Oxygen containing DNRM
84 ....Water
85 .....Reacting an ethylenic monomer in the presence of a solid polymer
86 .....Treating a solid polymer
87 ..Processes involving protein as reactant or as solid polymer; or compositions therefore
88 ..Processes involving carbohydrate as reactant or as solid polymer; or compositions therefore
89 ...Preparing a polymer from carbohydrate and ethylenic reactant
90 ..Processes involving a polyurethane having terminal ethylenic unsaturation as reactant or as solid polymer; or compositions therefore
91 ...With a polysiloxane reactant or polymer
92 ...With a reactant containing ethylenic unsaturation derived from poly 1,2-epoxide or polymer
93 ...With polycarboxylic acid or derivative and a polyol, a condensate or solid polymer thereof reactant
94 ...With aldehyde or aldehyde derivative reactant, condensate or solid polymer thereof
95 ...With solid polymer derived solely from ethylenic monomers
96 ...With ethylenic reactant
97 ...Polyurethane has an oxygen other than as part of a urethane or carboxylic acid ester group
98 ...Polyurethane has at least one non-terminal ethylenic group
99 ..Processes involving a polysiloxane having ethylenic unsaturation as reactant or as solid polymer; or compositions therefore
100 ..Processes involving an ethylenically unsaturated material derived from poly 1,2-epoxide as reactant or a solid polymer; or compositions thereof
101 ...With polycarboxylic acid or derivative and a polyol, condensate or solid polymer thereof
102 ...With solid polymer derived solely from ethylencally unsaturated monomers
103 ...With ethylenic reactant
104 ..Processes involving an ethylenically unsaturated polyester derived from a polycarboxylic acid or derivative and polyol, condensate or solid polymer thereof; or compositions therefore
105 ...With aldehyde or aldehyde derivative reactant or polymer thereof
106 ...With solid polymer derived from ethylenically unsaturated monomers only
107 ...With ethylenic reactant
108 ...Condensate or solid polymer contains oxygen other than as part of a carboxylic acid ester moiety
109 ..Processes of chemically modifying a blend of two or more solid polymers in the presence of a chemical reactant; or compositions therefore
110 ...At least one solid polymer derived from ethylenic monomers has at least two ethylenic groups
111 ..Processes of treating a blend of two or more solid polymers or reacting one solid polymer with another solid polymer; or compositions therefore

SYNTHETIC RESINS (Class 520, Subclass 1)

.COMPOSITIONS TO BE POLYMERIZED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR COMPOSITIONS TO BE MODIFIED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR PROCESSES OF PREPARING OR TREATING A SOLID POLYMER UTILIZING WAVE ENERGY

..Processes of treating a blend of two or more solid polymers or reacting one solid polymer with another solid polymer; or compositions therefore

112 ...At least two solid polymers derived from ethylenic monomers only

113 ..Processes of chemically modifying a solid polymer derived only from ethylenically unsaturated monomers by treating polymer with a chemical reactant; or compositions therefore

114 ...Chemical reactant is ethylenically unsaturated

115 ....Phosphorus

116 ....Nitrogen

117 .....Chemical reactant has two or more ethylenic groups

118 ....Sulfur

119 .....Chemical reactant has two or more ethylenic groups

120 ....Oxygen

121 .....Chemical reactant has two or more ethylenic groups

122 .....Hetero oxygen

123 .....Contains C-OH group other than as part of a COO-moiety

124 ....Carbon, hydrogen and halogen or carbon and halogen only

125 ....Carbon and hyrogen only

126 ...Chemical reactant contains nitrogen

127 ...Chemical reactant contains sulfur

128 .] ..Elemental sulfur

129 ...Chemical reacant contains oxygen

130 ....Contains C=O moiety

131 ...Chemical reactant is elemental halogen

132 ....Solid polymer treated contains halogen

133 ....Solid polymer derived from single monomer

134 ..Processes of chemically modifying a solid polymer or SICP derived from at least one saturated monomer by treating solid polymer or SICP with a chemical reactant; or compositions therefor

135 ...Chemical reactant is ethylenically unsaturated

136 ....Nitrogen

137 .....Chemical reactant has two or more ethylenic groups

138 .....Hetero nitrogen

139 .....N-C=O containing

140 ......Two or more N-C=O groups

141 ....Chalcogen

142 .....Chemical reactant has two or more ethylenic groups

143 .....Hetero oxygen

144 .....Carboxylic acid or derivative

145 ....Chemical reactant has two or more ethylenic groups and contains only carbon and hydrogen

146 ...Chemical reactant contains chalcogen

147 ...Chemical reactant contains halogen

148 ..Processes of treating a solid polymer or SICP derived from silicon containing reactant; or compositions therefore

149 ..Processes of treating a reaction product of a solid polymer and ethylenic reactant; or compositions therefore e.g., graft- or graft-type polymer, etc.

150 ..Processes of treating a solid polymer derived from ethylenic monomers only; or compositions therefore

151 ...Solid polymer derived from nitrogen containing monomer

152 ....Nitrogen containing monomer contains oxygen

153 ...Solid polymer derived from carboxylic acid or derivative monomer

154 ....Oxygen other than as part of carboxylic acid or derivative moiety

155 ...Solid polymer derived from halogen containing monomer

156 ....Halogen is fluorine

157 ...Solid polymer derived from monomer containing only carbon and hydrogen

158 ....At least one reactant contains two or more ethylenic groups

159 .....Polyisoprene or natural rubber

160 ....Carbocyclic ring containing, e.g., styrene, etc.

161 ....Derived from ethylene

162 ..Processes of treating a solid polymer or SICP derived from at least one nonethylenic reactant or compositions therefore

163 ...Solid polymer or SICP derived from reactant having halo-C(=O)-halo,halo-C(=O)-O, or -O-C(=O)-O-group

164 ...Solid polymer or SICP derived from polycarboxylic acid or derivative and organic amine or from organic amine salt of a polycarboxylic acid

165 ...Solid polymer or SICP derived from polycarboxylic acid or derivative and polyol

166 ...Solid polymer or SICP derived from at least one heterocyclic monomer or aldehyde or aldehyde derivative

167 ..Processes of preparing a solid polymer from heterocyclic nitrogen monomers; or compositions therefore, e.g., carbazole, etc.

168 ..Processes of preparing a solid polymer from a heterocyclic chalogen monomer; or compsitions therefore

169 ...Two or more hetero atoms in hetero ring at least one of which is oxygen

170 ...1,2 epoxy

171 ..Processes of preparing a solid polymer from at least one phosphorous containing monomer; or compositions therefore

172 ..Processes of preparing a solid polymer from at least one silicon containing monomer; or compositions therefore

173 ..Processes of preparing a solid polymer from at least one nitrogen containing monomer; or compositions therefore

174 ...Nitrogen containing reactant contains a N-C=O or N-C=O moiety

175 ....Acrylamide or methacrylamide

176 ...Organic polyamine and polycarboxylic acid or derivative or from an organic amine salt of a polycarboxylic acid

177 ...Acrylonitrile or methacrylonitrile

SYNTHETIC RESINS (Class 520, Subclass 1)
.COMPOSITIONS TO BE POLYMERIZED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR COMPOSITIONS TO BE MODIFIED BY WAVE ENERGY WHEREIN SAID COMPOSITION CONTAINS A RATE-AFFECTING MATERIAL; OR PROCESSES OF PREPARING OR TREATING A SOLID POLYMER UTILIZING WAVE ENERGY
178 ..Processes of preparing a solid polymer from at least one oxygen containing monomer; or compositions therefore
179 ...Polycarboxylic acid or derivative and polyol, or condensate thereof, e.g., dimethylterephthalate, etc.
180 ...Sulfur containing
181 ...Ether group
182 ...Carboxylic acid or derivative
183 ....Oxygen other than as part of a COO-group
184 ..Processes of preparing a solid polymer from ethylenic reactants only; or compositions therefore
185 ...Carbon, hydrogen and halogen only reactant contains at least three carbon atoms
186 ...At least one reactant contains two or more ethylenic groups
187 ...At least one reactant contains halogen
188 ...Derived from aromatic hydrocarbon
189 ...Derived from ethylene only

CLASS 523 PART OF THE CLASS 520 SERIES -- SYNTHETIC RESINS OR NATURAL RUBBERS

DECEMBER 1990

SYNTHETIC RESINS (Class 520, Subclass 1)

1 .PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF

100 ..Food or tobacco contact composition or process of preparing

101 ...Food release coating

102 ..Odor masked, odor reduced or perfumed composition or process of preparing

103 ..Composition having reduced health risks upon exposure thereto during incidental handling or body contact or process of preparing; other than fricton elements

105 ..Nonmedicated composition specifically intended for contact with living animal tissue or process of preparing; other than apparel

106 ...Contact lens making composition

107 ....Silicon-containing organic polymer

108 ....Polymer of a heterocyclic N-vinyl polymerizable compound

109 ...Dental or body impression taking material

111 ...Wound protective composition, tape adhesive, binder, or impregnate for body fluid absorbent device

112 ...Non-thrombogenic

113 ...Composition suitable for use as tissue or body member replacement, restorative, or implant

114 ....Composition which anchors by ingrowth of surrounding tissue

115 ....Composition suitable for use as tooth or bone replacement, restorative, or implant

116 .....Cement or filling composition

117 ......Radio- or X-ray opaque

118 ....Sealant or adhesive

120 ...Denture plate repair, adhesive, cushion or modification composition, e.g., modification of denture base to improve fit, etc.

121 ...Aperture affecting composition, e.g., earplug, dilator, etc.

122 ..Composition having ingredient providing biocidal or biostatic protection thereto or process of preparing

123 ..Plant receptacle composition or process of preparing

124 ..Composition containing an additive which enhances degradation by environmental stimuli or process of preparing

125 ...By light, heat, or radiation

126 ....Containing organic salt of a transition metal

127 ....Containing organohalogen additive

128 ...Containing carbohydrate or cellular material derived from plant or animal

129 ..Composition containing nonresinous organic material derived from municipal solid waste disposal system or process of preparing

130 ..Composition for plugging pores in wells or other subterranean formations; consolidating formations in wells or cementing a well or process of preparing

131 ...Composition for treating unconsolidated or loose strata, e.g., sand consolidation, etc.

132 ..Composition for in situ soil conditioning or treating or process of preparing

134 ..Battery container or battery container cover composition or process of preparing

135 ..Solar energy absorption or solar reflection composition or process of preparing

136 ..Composition sensitive to or resistant to radioactive material or cathode rays (e.g., electron bombardment, etc.) or process of preparing

137 ..Electromagnetic wave absorbing composition or process of preparing (excludes visible, IR or UV portions of spectrum)

138 ..Composition for contact with hot propulsion or exhaust gas or process of preparing

139 ..Composition related to metal foundry molding or metallurgical furnace or process of preparing

140 ...Hot-top or taphole plug composition or process of preparing

141 ...Composition for metallurgical furnace or oven or process of preparing

142 ...Organic polyisocyanate or derived from polyisocyanate

143 ....Phenolic, amine, or ketone condensate with aldehyde

144 ...Furan-type material

145 ...Phenolic or amine or ketone condensate with aldehyde

146 ....With or derived from carboxylic acid or salt thereof, or organic sulfur material

147 ....With or derived from organic hydroxyl group containing material containing eight or more carbon atoms

148 ...Polyester based

149 ..Friction element composition or process of preparing

150 ...Nonskid or nonslip composition for vehicle or pedestrian movement

152 ...For wheeled vehicle

153 ....Containing fibrous or polycrystalline refractory oxide

155 ....Composition devoid of asbestos

156 .....Containing at least two organic materials, e.g., binder plus other organic material, etc.

157 ....Containing at least two organic materials, e.g., binder plus other organic material, etc.

158 .....Composition contains a phenolic, amine, or ketone condensate with aldehyde plus a polymer derived from ethylenic monomers only

159 ....Containing asbestos and at least one inorganic material

160 ..Printing ink composition for glass or ceramic substrate or process of preparing

161 ..Invisible, ballpoint, or typewriter ink compositions or process of preparing; or composition for correction ribbons or correction fluids or process of preparing

164 ..Lead pencil or marking crayon composition or process of preparing

166 ..Composition for puncture proof tire liner or in emergency tire repair (e.g., tire inflation, etc.) or process of preparing

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF

167 ..Composition utilized in the manufacturing or repairing of shoes (excluding shoe heels or soles or polish) or process of preparing
168 ..Optical glass cementing or slide mounting composition or process of preparing
169 ..Antifogging or water repellent composition for optical or windshield application or process of preparing
170 ..Glass enamel composition or process of preparing
171 ..Composition having opalescent, pearlescent, or variegated color or process of preparing
172 ..Pavement or sign marking or reflex reflecting composition or process of preparing
173 ..Cable filling or flooding composition or process of preparing
174 ..Phonograph record molding composition or process of preparing
175 ..Liquid-solid drag reduction composition or process of preparing
176 ..Anaerobic adhesive or thread sealing composition or process of preparing
177 ..Coating or adhesive composition for application to a wet or contaminated surface (e.g., underwater or oil-contaminated, etc.) or process of preparing
179 ..Intumescent coating or ablative composition or process of preparing
180 ..Solid propellant binder composition or process of preparing
181 ..Composition devoid of magnetic materials and suitable for preparation of magnetic tape recording or process of preparing
200 ..Process of forming a composition of a solid polymer or solid polymer-forming system by admixing a product in the form of a surface coated, impregnated, encapsulated, or surface modified fiber, sheet, particle, or web, with a material; or composition which is the result of said admixing
201 ...Solid polymer particle enclosed in layer of diverse solid polymer, e.g., core-shell, etc.
202 ...Product having a monomeric ethylenic reactant material
203 ....Silicon ethylenic reactant
204 ...Product having an inorganic material surface coated onto an organic substrate
205 ...Product having a solid synthetic polymer or solid polymer-forming system
206 ....Product having two or more solid synthetic polymers, or a solid polymer and a solid polymer-forming system
207 ....Solid polymer or solid polymer-forming system is encapsulated in or impregnated in a nonreactant material
208 ....Solid polymer or solid polymer-forming system is or derived from an aldehyde or derivative
209 ....Product having a silicon atom
210 ...Product having a material encapsulated in or impregnated in a nonreactant material
211 ....Reactant or catalyst is material encapsulated or impregnated
212 ...Product having a silicon atom as part of an organic compound
213 ....Silicon containing organic material having an atom other than Si, C, H, or oxygen
214 ....Product having glass
215 ...Product having elemental carbon
216 ...Product having a silicon atom
217 ....Glass
218 ..Process of forming a composition having a nonreactant material selected for its special void characteristic; or composition containing same, e.g., syntactic foam, etc.
219 ...Glass void
220 ..Process of forming a composition having two or more solid materials having defined physical dimensions or surface areas; or composition containing same
221 ...Two or more solid synthetic polymers having defined physical dimension or surface area
222 ..Process of forming a composition having a fiber which is twisted, coiled, or involves specific mechanically interengaged fibers other than fibers solely of glass; or composition containing same, e.g., textiles, cloth, fiber bundles, mats, etc.
223 ..Process of forming a composition of a spheroidal material having physical dimension or composition containing same
300 ..Utilizing direct application of magnetic, electrical, or wave energy
303 ..Controlling process in response to a stated measurement or test
305 ..Adding material to maintain a stated equilibrium condition wherein the added material does not merely displace an equal amount from the treatment zone
306 ..Utilizing energy potential described as obtained as waste or by-product from a prior or concurrent operation
307 ..Utilizing a temperature greater than 250 degrees C (482 degrees F) or less than 0 degrees C
309 ...With removal or comminution of material at a temperature greater than 250 degrees C or less than 0 degrees C, e.g., freeze drying, etc.
310 ..Utilizing an ion exchanger or a solid sorptive material or semipermeable membrane
312 ..Utilizing quiescent treatment condition
313 ..Utilizing mixing in a manner designed to avoid or minimize turbulence or shear, e.g., laminar flow, etc.

SYNTHETIC RESINS (Class 520, Subclass 1)

.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF

315 ..Utilizing streams or masses moving relative to each other at a described angle of coincidence other than mere pouring, e.g., counter-current mixing, etc.

318 ..Utilizing stream or mass moving in a described attitude of presentment relative to a zone, vessel, or another apparently stationary mass or stream, excluding mere "pouring into", e.g., from above, below, tangentially, etc.

319 ..Utilizing treating or forming motion described by numerical data other than mere temperature, pressure, time, or amounts of material

322 ...Rotational rate (RPM) or velocity

323 ...Work input, e.g., horsepower-hour/pound, etc.

324 ..Utilizing a treatment zone specifically described by shape (other than nominally helical) or at least a part of which zone is specifically described by dimension, material, proportion, or angle or orientation

326 ..Adding steam or hot water (T at least 60 degrees C. i.e., 140 degrees F)

328 ...Removal of material by treatment with hot water or steam, e.g., steam stripping, etc.

330 ..Utilizing a gaseous stream to suspend or agitate a particulate solid polymer composition, e.g., fluidized bed, etc.

331 ..Drying a composition which is situated on a moving substrate or drying utilizing a thin film evaporator

332 ..Extracting material from solid polymer latex or aqueous dispersion or suspension with a liquid nonreactant material, e.g., solvent stripping, coprecipitation, etc.

333 ..Admixing a nonreactive additive ingredient in the form of a slurry, dispersion, or suspension (liquid-solid); said slurry dispersion or suspension containing no solid polymer or SICP

334 ...Slurried, dispersed, or suspended ingredient admixed with previously formed latex, aqueous dispersion or aqueous suspension of a solid polymer

335 ..Creaming, agglomerating, or coalescing a solid polymer latex or aqueous dispersion wherein solid polymer latex or aqueous dispersion is the result

336 ..Inverting phase relationships or reapportioning the distribution of ingredients among phases

337 ...Inversion to form water-in-oil system

339 ...With removal of a phase

340 ..Removing material at reduced pressure, e.g., flashing, sublimation, spray drying, etc.

342 ...With step of spraying or centrifuging

343 ..Treating an intentional composition with a step of removing and recycling material into the composition

344 ..Multistep operation achieved within a stated interval of time, e.g., total cycle time, etc.

346 ..Utilizing plural mixing operations of specified varying intensity, e.g., intensity of each mixing is reduced, etc.

347 ..Utilizing plural discrete pressures different than ambient

348 ..Utilizing plural interconnected distinct forming or treating zones or locations other than nominal screw extruder, e.g., zones interconnected in parallel or having varying flow velocity, etc.

351 ..Utilizing plural mixing operations in preparation of a solid polymer inert ingredient concentrate, e.g., master batch, etc.

352 ..Utilizing multistage coagulation of a solid polymer latex

353 ..Utilizing plural discrete mixing operations in specifically described distinct noninterconnected zones

375 ..Radioactive or Group VIIIA atom containing NRM

400 ..Process of forming a composition containing a nonreactive material (NRM) and a polymer containing more than one 1,2-epoxy group, or a preformed polymer derived from or admixed with a reactant containing more than one 1,2-epoxy group, or with a polymer derived from an epihalohydrin and a polyhydric phenol or polyol; or composition or product thereof

401 ...Contains inorganic water settable material NRM

402 ...Product contains water per se or water of hydration as designated nonreactive material (DNRM)

403 ....Two or more polymers containing more than one 1,2-epoxy group, two or more polymers derived from reactants containing more than one 1,2-epoxy group, or combination thereof, or one of said polymers and a reactant containing at least one 1,2-epoxy group

404 .....With organic nitrogen or organic sulfur reactant

406 ....Solid polymer derived from ethylenic reactants only (includes in situ reactants from plural 1,2-epoxides)

407 .....Polymer derived from ethylenic reactants only is graft, graft-type, block, or block-type copolymer

408 .....Two or more polymers derived from ethylenic reactants only

409 .....Polymer derived from ethylenic reactants only derived from reactant-containing chalcogen

410 ......Polymer derived from ethylenic reactant only derived from reactant-containing oxygen heterocycle

411 ......Polymer derived from ethylenic reactants only derived from reactant-containing nitrogen

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF
..Process of forming a composition containing a nonreactive material (NRM) and a polymer containing more than one 1,2-epoxy group, or a preformed polymer derived from or admixed with a reactant containing more than one 1,2-epoxy group, or with a polymer derived from an epihalohydrin and a polyhydric phenol or polyol; or composition or product thereof
...Product contains water per se or water of hydration as designated nonreactive material (DNRM)
....Solid polymer derived from ethylenic reactants only (includes in situ reactants from plural 1,2-epoxides)
.....Polymer derived from ethylenic reactants only derived from reactant-containing chalcogen
412 ......Polymer from ethylenic reactants only derived from reactant-containing carboxylic acid ester
413 .....Polymer derived from ethylenic reactants only derived from plural unsaturated reactant
414 ....Polymer contains more than one 1,2-epoxy group or one derived from reactant containing more than one 1,2-epoxy group is further derived from or reacted with organic nitrogen or sulfur
415 .....Organic nitrogen compound contains isocyanate group
416 .....Organic nitrogen compound is amine-aldehyde condensation product
417 .....Two or more organic nitrogen compounds as reactants
418 .....Organic nitrogen compound contains N-(C)*-(C=O)- group where *= subscript 0,1,2 . . ., e.g., protein, etc.
420 .....Organic nitrogen compound contains three or more nitrogen atoms other than as solid polymer, e.g., diethylene triamine, etc.
421 .....Organic nitrogen compound contains element other than C, H, O, or N
423 ....Polymer is graft, graft-type, block, or block-type copolymer
424 ....Polymer is phenol-aldehyde condensation product
425 ....Polymer derived from silicon reactant
426 ....Carboxylic acid, ester, or salt thereof DNRM
427 ...Composition wherein two or more polymers or a polymer and a reactant all contain more than one 1,2-epoxy group, or product thereof
428 ....With reactant nitrogen or sulfur compound
429 .....Organic nitrogen compound contains N-heterocycle
433 ....Polymer derived from reactant containing element other than C, H, O, or N or chlorine-containing reactant of three or more carbon atoms
434 ....Polymer derived from ethylenic reactants only
435 ...Solid polymer derived from reactant containing element other than C, H, O, or N or chlorine-containing reactant of three or more carbon atoms
436 ...Polymer is graft, graft-type, block, or block-type
437 ...Two or more polymers derived from ethylenic reactants only
438 ....Polymer derived from ethylenic reactants only derived from plural unsaturated reactant
439 ...Polymer derived from ethylenic reactants only derived from heterocyclic reactant other than 1,2-epoxy solely
440 ...Designated nonreactive material (DNRM) has numerically specified characteristics, e.g., particle size, density, etc., other than viscosity, m.p., b.p., molec. wt., chemical composition or percentage range
442 ....Heavy or transition metal or compound thereof
443 ....Silicon
444 .....Glass
445 ...Boron DNRM
446 ...Biologically derived cellular material other than cereal, cotton, or diatomaceous earth DNRM
447 ...Carbohydrate or derivative including tannin or derivative DNRM
448 ....Cellulose derivative containing -C(=O)OR or N
449 ...Protein or biologically active polypeptide DNRM
450 ...Coal, asphaltic, or bituminous material DNRM
451 ...Phosphorus DNRM
452 ....Phosphorus directly bonded to nitrogen
453 ...Organic sulfur compound DNRM
454 ...Ketone or aldehyde DNRM
455 ...Carboxylic acid or derivative devoid of heavy metal atom DNRM
456 ...Organic chalcogen compound DNRM
457 ...Elemental metal or metal compound other than as silicate DNRM
458 ....Transition metal
459 ....Heavy metal
460 .....Group VA metal (As, Sb, Bi)
461 ...Organic nitrogen compound DNRM
462 ...Halogenated hydrocarbon other than carbon tetrachloride, chloroform, or methylene chloride DNRM
463 ...Hydrocarbon other than xylenes, benzene, or toluene DNRM
464 ....Hydrocarbon having ethylenic unsaturation
465 ....Hydrocarbon wax
466 ...Inorganic SI-O bond DNRM
467 ....Polymer derived from ethylenic reactants only
468 ...Elemental carbon DNRM

SYNTHETIC RESINS (Class 520, Subclass 1)

.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF

500 ..Process of forming a composition of an ethylenically unsaturated reactant or ethylenically unsaturated polymer admixed with nonreactive material (NRM) and a polyester whose polymer backbone was derived through the direct formation of the ester linkage, e.g., polyethylene terephthalate, polycaprolactone, etc., or product thereof

501 ...Product contains water per se or water of hydration as DNRM or admixed with other designated nonreactant material

502 ....Composition contains water-in-oil or oil-in-water mixture

503 ....Organic nitrogen DNRM

504 ....Organic chalcogen DNRM

505 ....Metal compound other than silicate as DNRM

506 ...Phosphorus DNRM

507 ...Organic sulfur DNRM

508 ...Organic compound containing nitrogen DNRM

509 ...Carbohydrate or derivative including tannin or derivative DNRM

510 ...Phenol, phenol ether, or phenolate salt DNRM

511 ...Organic chalcogen other than metallocarboxylate salt, e.g., diethylene glycol, etc., DNRM

512 ...Elemental metal or elemental carbon DNRM

513 ...Designated nonreactive material (DNRM) has numerically specified characteristic, e.g., particle size, density, etc., other than viscosity, m.p., b.p., molec. wt., chemical composition or percentage range

514 ...Metal atom other than as silicate DNRM

515 ....Transition metal atom

516 ....Heavy metal atom

517 ...Halogenated hydrocarbon other than methylene chloride, chloroform, or carbon tetrachloride DNRM

518 ...Bituminous, coal, or hydrocarbon other than benzene, toluene, or xylene or mixtures thereof DNRM

521 ...Inorganic silicon atom other than glass DNRM

522 ...Contains graft, graft-type, block, or block-type copolymer

523 ...Contains solid polymer derived from ethylenic reactants only, one of which contains chalcogen; or solid polymer reacted with ethylenic reactant-containing chalcogen

526 ...Contains polymer derived from ethylenically unsaturated reactant only

527 ...Glass DNRM

SYNTHETIC RESINS (Class 520, Subclass 1)

.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.

1 ..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof

2 ...Water settable inorganic compound as nonreactive material

3 ....Solid polymer or specified intermediate condensation product derived from reactant-containing atom other than C, H, O, N, or halogen and which is devoid of a fused or bridged ring system

4 ....Solid polymer or specified intermediate condensation product derived from at least one oxygen-containing reactant and which is devoid of a fused ring or bridged ring system

5 .....Derived from carboxylic acid or derivative

6 .....Derived from phenolic compound or aldehyde-containing reactant

7 ....Solid polymer derived from halogen-containing reactant

8 ....Solid polymer derived from ethylenically unsaturated hydrocarbon only

9 ...Cellular material derived from plant or animal source DNRM other than: cotton, farinaceous meals or flours, blood, diatomaceous earth, chalk, or other fossilized matter

10 ....Animal derived

11 .....Leather

12 .....Hair removed from pelt, e.g., wool, etc.

13 ....Wood or wood cellulose fiber or flour

14 .....At least one solid polymer or SICP derived from at least one nonethylenic reactant

15 ....Vegetable shell, hull, or cob ingredient, e.g., nut shells, pits, etc.

16 ....Bark or cork

17 ...Protein or biologically active polypeptide DNRM excluding wheat flour or natural cereals which may contain protein ingredient

18 ....With natural resin or carbohydrate DNRM

19 ....Hydrocarbon material DNRM which is nonsolid polymer, e.g., wax, etc.

20 ....Two or more diverse proteins or polypeptides

21 ....Animal derived protein or polypeptide other than casein, e.g., blood, egg albumin, etc.

22 .....Gelatin

23 ......Solid polymer derived from ethylenic reactants only

24 ....Derived from carboxylic acid or derivative

25 ....Casein or derivative or soy protein

26 .....Solid polymer or SICP derived from carboxylic acid or derivative

27 ...Carbohydrate or derivative DNRM

28 ....Algin or derivative

29 ....Atom other than O, H, C, S, or Group IA metal

30 .....Atom other than N, O, H, C, S, or Group IA metal

31 .....Cellulose derivative

32 ......Solid polymer derived from ethylenic reactants only

33 ......Solid polymer or SICP derived from at least one aldehyde or aldehyde derivative reactant

34 ....Paper plant solid waste material or cotton, e.g., white liquor, etc.

35 ....Cellulose

36 .....Sulfur-containing ester, e.g., viscose, xanthate, etc.

37 .....Carboxylic acid ester

38 ......Mixed carboxylate ester

39 ....Acetate

40 ....At least one solid polymer derived from ethylenic reactants only

41 ......Acetate

42 .....Ether group containing, other than solely linking carbohydrate groups directly to each other

43 ......Hydroxyalkyl

44 ....Hydroxyethyl

45 ......Carboxyalkyl or alkali metal salt thereof

46 ......Alkyl

47 ....Starch or derivative or farinaceous meal or flour

48 .....Dextrin or derivative

49 .....Aldehyde reaction product

50 .....Ether group, other than solely linking of carbohydrate groups directly to each other

51 .....Ester

52 .....Solid polymer derived from ethylenic reactants only

53 ......At least one carboxylic acid ester

54 ....Dextran or derivative

55 ....Gum or derivative

56 ....Disaccharide or trisaccharide, e.g., sucrose, etc.

57 .....Ester

58 ....Monosaccharide, e.g., glucose, fructose, etc.

59 ...Coal, bituminous additive, extract, or derivative thereof; or oil shale; or fatty still residue DNRM

60 ....With water additive DNRM

61 .....With nitrogen-containing additive DNRM

62 ....With hydrocarbon DNRM additive which is nonresinous and which is nonbituminous, or noncoal derived, e.g., cutback asphalt, kerosene, paraffin wax, etc.

63 ....Coke additive

64 ....Asphaltene or maltene additive

65 ....Coal derived additive, e.g., lignite, etc.

66 .....Tar or pitch

67 ....Oil shale

68 ....Two or more solid polymers, or graft or graft-type, or block or block-type solid copolymer

69 ....Solid polymer derived from ethylenic reactants only at least one of which contains a carboxylic acid or derivative

70 ....Solid polymer derived from ethylenic reactants only, at least one of which is propylene

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...Coal, bituminous additive, extract, or derivative thereof; or oil shale; or fatty still residue DNRM
71 ....Solid polymer derived from ethylenic reactants only, at least one of which is a hydrocarbon other than ethylene
72 ...Lignin or tannin or derivative DNRM
73 ....Reaction product of lignin or tannin or derivative with an oxygen or nitrogen-containing organic reactant
74 ....Solid polymer or specified intermediate condensation product derived from a phenolic compound
75 ....Solid polymer contains halogen
76 ....Solid polymer derived from ethylenically unsaturated hydrocarbon only
77 ...Natural resin or modified forms thereof other than rosin or its modified forms DNRM, e.g., shellac, dammar, etc.
78 ...Residue of undetermined constitution derived from destructive distillation of a plant or animal source or plant or animal extract of undetermined constitution DNRM
79 ...DNRM is derived from pyrolysis of previously formed solid synthetic polymer
80 ...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
81 ....Organic DNRM
82 .....Sulfur atom as part of a hetero ring DNRM
83 ......Hetero ring contains sulfur and at least one diverse hetero atom
84 ......Five-membered sulfur ring
85 ......Three-membered sulfur ring
86 .....Nitrogen atom as part of a hetero ring DNRM
87 ......Nitrogen ring directly fused or bridged to a ring system
88 ....Tetrabenzoporphyrazine nucleus containing, e.g., phthalocyanine, etc.
89 ....Nitrogen ring is part of a ring system having three or more rings fused or bridged together
90 ....Nitrogen ring is part of a ring system having five or more rings fused or bridged together
91 ....Three or more nitrogen atoms in the fused or bridged ring system
92 ....Two nitrogen atoms in the fused or bridged ring system
93 ....1,3-diazole
94 ....Five-membered nitrogen containing ring
95 ......At least one diverse hetero atom in same ring
96 ....Six-membered nitrogen ring having at least one diverse hetero atom, e.g., morpholine, etc.
97 ....Two or more nitrogen rings
98 ......Nitrogen ring having at least seven ring members
99 ......Six-membered nitrogen ring, e.g., pyridine, etc.
100 ....Six-membered nitrogen ring having two or more ring nitrogen atoms
101 ....Three oxygen atoms are directly bonded to three nuclear carbon atoms of the nitrogen ring, e.g., (iso) cyanurate, etc.
102 ....Two or more nitrogen rings
103 ....Nonhetero nitrogen
104 ......Five-membered nitrogen ring
105 ....Two or more nitrogen rings
106 ....Five-membered nitrogen ring having two or more ring nitrogen atoms
107 .....At least one chalcogen atom as part of a hetero ring (chalcogen=O, Se, Te) DNRM
108 ......Two or more chalcogen atoms in the same hetero ring
109 ......Two or more chalcogen rings
110 ......Six-membered chalcogen ring
111 ......Five-membered chalcogen ring
112 ....Cyclic polycarboxylic acid anhydride
113 ....Tetrahydrofuran per se
114 ......Three-membered chalcogen ring
115 .....Phosphorus organic compound DNRM
116 ......Phosphorus is part of a covalent ring
117 ....Oxygen ring atom
118 ....Halogen
119 ....Two or more phosphorus rings
120 ....Spiro ring
121 ......Two or more phosphorus atoms directly or indirectly bonded together by only covalent bonds
122 ....Phosphorus double bonded to an atom other than C or O
123 ....Phosphorus bonded directly to three chalcogen atoms and having only one P-C linkage, e.g., phosphonate, etc.
124 ....Nitrogen
125 ....Aryl group
126 ....Phosphorus bonded directly to only two chalcogen atoms and having at least one P-C linkage, e.g., phosphinate, phosphonite, etc.
127 ....Phosphorus bonded directly to four chalcogen atoms, e.g., phosphate, etc.
128 ....Phosphorus bonded directly to three chalcogen atoms only, e.g., phosphite, etc.
129 ....Phosphorus directly bonded to at least one chalcogen and only H or C, e.g., phosphine oxide, etc.
130 ......Phosphorus bonded to three chalcogen atoms and having only one P-C linkage
131 ....Chalcogen other than directly bonded to P
132 ....Aryl group
133 ......Phosphorus bonded to only two chalcogen atoms and having at least one P-C linkage

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
....Organic DNRM
.....Phosphorus organic compound DNRM
......Phosphorus bonded to only two chalcogen atoms and having at least one P-C linkage
134 ....Sulfur
135 ....Aryl group
136 ......Pentavalent phosphorus atom directly bonded to at least one oxygen atom
137 ....P directly bonded to S
138 ....P directly bonded to two or more N
139 ....Phosphorus directly bonded to at least one O and at least one H or C only
140 ....P directly bonded to oxygen only
141 ....Aryl group
142 ....Halogen
143 ....Cresyl phosphate, e.g., di, etc.
144 ....Halogen
145 ....-C-O-P-O-C, or C-O-P-OH group, e.g., phosphate ester, lecithin, etc.
146 ......Phosphorus directly bonded to sulfur
147 ......Phosphorus directly bonded to oxygen
148 ....Atom other than C, O, H, P, or Hal
149 ....Halogen
150 ....Five or more aryl groups
151 ....Two or more aryl groups
152 ....OH group
153 ....Triphenyl phosphite per se
154 ......Phosphorus directly bonded to carbon atoms only
155 .....Organic compound having a sulfur bonded directly to oxygen DNRM
156 ......Sulfur bonded directly to four oxygen atoms
157 ......Sulfur bonded directly to three oxygen atoms
158 ....Aryl group
159 ....Nitrogen
160 ....Fused or bridged ring system
161 ....Metal
162 ....At least two separate aryl groups
163 ....Halogen
164 ....Halogen
165 ....Halogen
166 ....Metal
167 ......Sulfur bonded directly to two oxygen atoms, e.g., sulfones, etc.
168 ....Sulfur bonded directly to nitrogen
169 ....Aryl group which is not fused or bridged
170 ....Aryl group
171 ....Oxygen atom other than as part of a sulfur bonded directly to two oxygen atoms
172 ....Atom other than C, H, S, O, or metal
173 ......Sulfur directly bonded to oxygen and devoid of an aryl group, e.g., dimethyl sulfoxide, etc.
174 .....Organic compound having at least one metal atom directly bonded to a carbon or hydrogen atom DNRM
175 ......Heavy metal directly bonded to carbon or hydrogen atom
176 ....Transition metal (at. no. 21-29, 39-47, 57-79)
177 ....Group VA metal (Sb, Bi, As)
178 ....Tin atom
179 ....At least one sulfur atom
180 ....Sulfur directly bonded to tin
181 ....With additional tin compound DNRM
182 ....At least two tin atoms
183 .....Boron organic compound DNRM
184 ......Atom other than B, O, H, or C
185 ....Atom is N
186 .....Organo nitrogen compound other than unsubstituted ammonium salt as sole nitrogen atom DNRM
187 ......Contains rosin or derivative DNRM
188 ......Silicon atom
189 ......Nitrogen to nitrogen bond
190 ....N=N group
191 ....X=C-N group wherein X is a chalcogen
192 ....Two or more N-N bonds
193 ....Aryl-OH
194 ....Aryl-OH
195 ......N=C=N or N=C-N- group, e.g., carbodiimide , isourea, etc.
196 ......N=C=X group wherein X is a chalcogen, e.g., isocyanate, etc.
197 ....At least one solid polymer derived from ethylenic reactants only
198 ......N-(C=O)-O-, e.g., urethane, carbamate, etc.
199 ....Oxygen other than as part of a N-(C=O)-O- group
200 ....Atom other than N, H, C, or O
201 ......N(C=X)X wherein X is a chalcogen, e.g., thiocarbamate, etc.
202 ....Metal or ammonium group
203 ....With chalcogen nonreactive organic compound
204 ......Heavy metal or aluminum
205 ......Nitrile group
206 ....Nitrogen atom other than as part of a nitrile group
207 ....Atom other than C, H, or N
208 ....Atom other than C, H, or N
209 ....Two or more nitrile groups
210 ......N-C=X group wherein X is a chalcogen
211 ....N-(C=X)N, e.g., urea, etc.
212 ....Two or more -N-(C=X)N groups
213 ....Atom other than C, N, H, or chalcogen; or contains nitrogen or chalcogen atom other than as part of a N(C=X)
214 ....Carbocyclic group
215 ....With water NRM
216 ....At least one solid polymer derived from ethylenic reactants only

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
....Organic DNRM
.....Organo nitrogen compound other than unsubstituted ammonium salt as sole nitrogen atom DNRM
......N-C=X group wherein X is a chalcogen
217 ....N atom other than as part of a N-C=X group
218 ....C=X group other than as part of a N-C=X group
219 ....(C=X)X group
220 ....C-O-C group
221 ....C-OH group
222 ....Aryl-OH group
223 ....Two or more N-C=X groups or two or more C-OH groups
224 ....At least one solid polymer derived from ethylenic reactants only
225 ....Atom other than N, C, H, or oxygen
226 ....Carbocyclic group
227 ....Two or more N-C=O groups
228 ....At least one solid polymer derived from ethylenic reactants only
229 ....At least one solid polymer derived from acyclic monoethylenic hydrocarbon reactant
230 ....N-(C=O)alkyl wherein alkyl group contains eight or more carbon atoms
231 ....Two or more organo N-C=O compounds DNRM or with nonreactant organo nitrogen compound DNRM
232 ....At least one solid polymer derived from ethylenic hydrocarbon reactants only
233 ....Dialkyl amides, e.g., dimethyl formamide, dimethyl acetamide, etc.
234 ....Two or more N-C nitrogen nonreactant materials or with an organo oxygen or nitrogen-containing nonreactant material
235 ....At least one solid polymer derived from nitrile-containing ethylenic reactant
236 ......Trivalent or tetravalent nitrogen atom other than unsubstituted ammonium
237 ....Carbon bonded to three N atoms, -C=NH, or C=N-C group
238 ....(C=X)X group wherein X is chalcogen
239 ....Two or more (C=X)X groups
240 ....Aryl group
241 ....C=X group where X is chalcogen
242 ....Two or more C=X groups
243 ....C-O-C group
244 ....C-OH
245 ....Two or more C-OH groups
246 ....Aryl group
247 ....C-OH group
248 ....Aryl-OH group
249 ....Two or more nitrogen atoms or two or more C-OH groups
250 ....Four or more C-OH groups
251 ....N, C, and H atoms only
252 ....Two or more nitrogen atoms
253 ....With water NRM
254 ....Aryl
255 ....Two or more separate aryl ring systems
256 ....At least one aryl ring which is part of a fused or bridged ring system
257 ....Aryl
258 ....Two or more separate aryl ring systems
259 ......Nitrogen as part of a nitro group
260 ....Nitro compound has an atom other than C, H, N, or O or has an oxygen or nitrogen atom other than as part of a nitro group
261 .....Organic silicon compound having at least one oxygen atom DNRM
262 ......Atom other than Si, O, C, or H
263 ....Halogen
264 ......Ethylenic group
265 ......Oxygen atom other than as Si-O-Si and at least one Si-C or Si-H group
266 ....Silicon containing SICP or solid polymer
267 ......Two or more Si atoms and at least one Si-C or Si-H group
268 ....Silicon containing SICP or solid polymer
269 ....Solid polymer derived from ethylenic reactants only
270 .....Rosin or tall oil or modified forms thereof as DNRM, e.g., colophony, abietic acid, ester gum, etc.
271 ......Two or more solid polymers or at least one solid polymer and at least one specified intermediate condensation product
272 ......Solid polymer derived from at least one ethylenic compound containing a carboxylic acid or derivative
273 ......Solid polymer contains halogen
274 ......Solid polymer derived from ethylenically unsaturated hydrocarbon only
275 .....Oxygen wax DNRM
276 ......With water NRM
277 ......Carnauba wax, beeswax, montan wax, or oxidized microcrystalline wax or modified forms thereof
278 ....Solid polymer contains halogen
279 ....Solid polymer contains nitrogen
280 .....X(C=X)X wherein X is chalcogen DNRM, e.g., carbonate, etc.
281 ......Aryl group
282 .....C(C=X)X wherein at least one X is a chalcogen other than oxygen DNRM
283 ......Oxygen atom which is not part of the -C(C=X)X group
284 .....Carboxylic acid or derivative and wherein the derivative is other than a metal salt DNRM

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
....Organic DNRM
.....Carboxylic acid or derivative and wherein the derivative is other than a metal salt DNRM
285 ......Cycloaliphatic group or bridged or fused ring system, e.g., camphoric acid, etc.
286 ....Naphthenic acid or derivative
287 ......Aryl group
288 ....Atom other than C, H, or O
289 ....Sulfur
290 ....Oxygen atom other than as part of a carboxylic acid or ester group
291 ....OH group other than as part of a COOH group, e.g., salicylic acid, etc.
292 ....Carbonyl of a carboxylic acid or ester group directly attached to an aryl group, e.g., dipropylene glycol dibenzoate, etc.
293 ....Carboxylic acid or ester groups each directly attached to separate aryl groups through the carbonyl of the carboxylic acid or ester group
294 ....Two or more carboxylic acids or ester groups each directly attached to a nuclear carbon of the same aryl group through the carbonyl of the carboxylic acid or ester group
295 ....A single aryl group
296 ....Only two carboxylic acid or ester groups directly attached to an aryl group, e.g., phthalic acid, etc.
297 ....Dioctyl or dibutyl ester, e.g., di-(2-ethylhexyl) phthalate, etc.
298 ....Three or more carboxylic acid or ester groups
299 ....Two or more aryl groups
300 ......Two or more carbon atoms
301 ....Metal
302 ....Sulfur, e.g., factice, etc.
303 ....Only two carboxylic acid or ester groups, e.g., distearyl thiodipropionate, etc.
304 ....With a nonreactive material
305 ....Nonreactive material contains atom other than C, H, or O
306 ....Ester having at least two carboxylic acid ester groups
307 ....Atom other than C, H, or O
308 ....Oxygen atom other than as part of a carboxylic acid ester group
309 ....C=O group other than as part of COO group
310 ....OH group other than as part of a COOH group, e.g., castor oil, etc.
311 ....Three or more carboxylic acid ester groups
312 ....Derived from glycerol
313 ....Fatty acid triglyceride, e.g., drying oil, etc.
314 ....Ester derived from dicarboxylic acid
315 ....Carboxylic acid ester
316 ....Atom other than C, H, or O
317 ....Oxygen atom other than as part of a carboxylic acid group, e.g., glycolic ester, etc.
318 ....Acyl group of the carboxylic acid has at least fifteen carbon atoms, e.g., butyl stearate, etc.
319 ....Halogen
320 ....Oxygen atom other than as part of a COOH or derivative group
321 ....Two or more carboxylic acid or derivative groups
322 ....Acyl group of the carboxylic acid or derivative has at least fifteen carbon atoms, e.g., stearic acid, etc.
323 .....Aryl-OH or salt or aryl-O-metal bond DNRM
324 ......Fused or bridged ring system
325 ....Fused or bridged ring system having at least three rings
326 ......Cycloaliphatic group
327 ......Metal
328 ....Group VIII metal (i.e., Fe, Ru, Os, Co, Rh, Ir, Ni, Pd, Pt)
329 ....Group IVA metal (i.e., Ge, Sn, Pb)
330 ......Atom other than C, H, O, or halogen
331 ....Two or more sulfur atoms
332 ....S-S linkage
333 ....Two or more separate aryl-OH groups
334 ......Oxygen other than as part of an aryl-OH group
335 ....C=O group
336 ....A single C=O group
337 ....Aryl group having two or more OH groups directly attached to nuclear carbons thereof
338 ....Two or more aryl-OH groups
339 ....C-O-C linkage
340 ....Aryl compound having only one aryl ring and having one or more OH groups directly attached to nuclear carbons of the aryl
341 ......Halogen
342 ......Two or more separate aryl-OH groups
343 ....Only two aryl-OH groups
344 ....Aryl group other than as part of an aryl-OH
345 ......Polyhydric aryl-OH compound
346 ....1,3-dihydroxy, e.g., resorcinol, etc.
347 ....1,4-dihydroxy, e.g., hydroquinone, etc.
348 ......Two or more aryl-OH DNRM compounds
349 ......Three or more substituents on the aryl-OH compound
350 ....With other nonreactive material
351 ......Two substituents on the aryl-OH compound

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
....Organic DNRM
.....Aryl-OH or salt or aryl-O-metal bond DNRM
352 ......A single substituent on the aryl-OH compound
353 ....With nonreactive organic material
354 .....Aldehyde DNRM,i.e., C-(C=O) H
355 ......Aryl
356 .....Ketone or ketene DNRM, i.e., C(C=O)C or C=C=O
357 ......Two or more C(C=O)C groups
358 ....Carbocyclic ring wherein at least two of the nuclear carbons thereof are double bonded directly to oxygens atom so as to form two or more C=O groups therewith, e.g., quinone, etc.
359 ......Carbocyclic ring, e.g., benzophenone, etc.
360 ....Carbocyclic ring wherein one of the nuclear carbons thereof is double bonded directly to an oxygen atom so as to form a C=O group therewith, e.g., cyclohexanone, etc.
361 ......Only C, H, and oxygen atoms
362 ....Ten or more carbon atoms
363 ....Two or more C=O DNRM compounds
364 ....With water, hydrocarbon, halohydrocarbon, or organic oxygen containing nonreactive material
365 ....Solid polymer derived from ethylenic reactants only
366 .....C-O-C compound DNRM
367 ......Fused or bridged ring system or a cycloaliphatic group
368 ......Atom other than C, H, O, or halogen
369 ......Aryl group other than as part of a phenoxy group
370 ......Aryl-O-aryl
371 ....Halogen
372 ......Two or more phenoxy groups
373 ....Halogen
374 ....At least two diverse halogen atoms
375 ......Phenoxy group
376 ......OH group, e.g., Cellosolve, etc.
377 ....Two or more OH groups
378 ......Only C, H, and O atoms
379 .....Carbon atom single bonded to an oxygen atom and wherein the carbon atom is not double bonded to a chalcogen atom DNRM, e.g., alcohols, etc.
380 ......Halogen or ethylenic unsaturation
381 ......Non C-OH oxygen atom, or element other than C, O, or H, e.g., tartaric acid metal salt, etc.
382 ....Heavy metal
383 ......Carbocyclic ring
384 ....Aryl group
385 ......Only a single -C-OH group and at least six carbon atoms
386 ......At least two -OH groups
387 ....At least four -OH groups, e.g., pentaerythritol, etc.
388 ....At least one solid polymer derived from ethylenic reactants only
389 ......Two or more compounds containing -OH groups, or with water NRM
390 ......With hydrocarbon or halogenated hydrocarbon NRM
391 ......Solid polymer or SICP derived from at least one nonethylenic reactant
392 .....Organic chalcogen other than oxygen as DNRM
393 ......Atom other than S, C, H, or a metal
394 .....Oxygen atom or metal atom DNRM, e.g., metal stearate, etc.
395 ......Atom other than C, O, H, or a metal
396 ......Carbocyclic group, e.g., aryl, etc.
397 ......Ethylenic group; or at least two (C=O)O groups bonded to each other directly or only by carbon atoms
398 ......Transition metal atom (atomic no. 21-29, 39-47, 57-79)
399 ......Heavy metal or aluminum (atomic no. 13, 30-33, 48-51, 80-83)
400 ......Group IIA metal (Be, Mg, Ca, Sr, Ba)
401 ....Inorganic compound devoid of a silicon atom DNRM
402 .....Chalcogen atom other than sulfur or oxygen DNRM
403 .....At least one element of the lanthanide series (atomic no.57-71) or contains a noble metal atom (i.e., Au, Ag, Hg, Pt, Pd, Ir, Rh, Ru, Os)DNRM
404 .....Boron atom DNRM
405 ......Boron directly bonded to oxygen
406 .....Group VIB metal atom DNRM (i.e., Cr, Mo, W)
407 ......Chromium
408 .....Group V metal atom DNRM (i.e., V, Nb, Ta, As, Bi, Sb)
409 ......Antimony
410 ....Atom other than Sb and oxygen
411 ....With halogenated nonreactant material
412 ....Halogen atom other than Cl
413 .....Transition metal other than Group VIII DNRM (i.e., Sc, Ti, Mn, Cu, Y, Zr, Tc, Hf, Re)
414 .....Phosphorus atom DNRM
415 ......Atom other than P, O, H, or a metal
416 ....Ammonium phosphate
417 ......Phosphorus atom directly bonded to four oxygen atoms, e.g., phosphoric acid, etc.
418 .....Sulfur atom DNRM
419 ......Two or more sulfur atoms; or at least one atom other than S, O, H, or a metal
420 ......Devoid of an oxygen atom, e.g., sulfide, etc.
421 ......At least one hydrogen atom
422 ....Sulfuric acid

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...DNRM which is other than silicon dioxide, glass, titanium dioxide, water, halohydrocarbon, hydrocarbon, or elemental carbon
....Inorganic compound devoid of a silicon atom DNRM
.....Sulfur atom DNRM
423 ......Sulfate group, e.g., calcium sulfate, etc.
424 .....Carbon atom DNRM
425 ......Calcium carbonate, e.g., limestone, marble, etc.
426 ....Solid polymer derived from at least one diene monomer
427 ....Solid polymer derived from unsaturated hydrocarbon monomer
428 .....Nitrogen atom DNRM
429 ......Nitrogen directly bonded to an oxygen atom, e.g., nitric acid, etc.
430 .....A single type of metal atom and only oxygen atoms DNRM, e.g., metal oxide, etc.
431 ......Transition metal atom (i.e., Fe,Co,Ni)
432 ......Group IIB metal atom (i.e., Zn or Cd)
433 ......Group IIA metal atom (i.e., Be, Mg, Ca, Sr, Ba)
434 .....Heavy metal atom DNRM
435 ......Transition metal atom (i.e., Fe, Co, Ni)
436 .....Group IIA metal DNRM (i.e., Be, Mg, Ca, Sr, Ba)
437 .....Aluminum DNRM
438 .....Nonmetal compound DNRM
439 ....Elemental metal DNRM
440 .....Transition metal atom DNRM
441 .....Aluminum DNRM
442 ....Soil or inorganic silicon DNRM (other than silicon dioxide, glass, quartz, novaculite, or silicon dioxide type)
443 .....Atom other than Si, O, H, Al, Fe, or a Group IA or IIA metal atom DNRM, e.g., slag, mineral wool, etc.
444 .....Aluminum atom DNRM
445 ......Clay, e.g., fullers earth, fire clay, etc.
446 ....With water NRM
447 ....Kaolin or bentonite
448 ......Diatomite or diatomaceous earth, e.g., kieselguhr, infusorial earth, etc.
449 ......Mica
450 ......Metal atom other than aluminum, e.g., zeolites, etc.
451 .....Talc (soapstone) DNRM
452 .....Asbestos DNRM
453 ......Aldehyde-nitrogen SICP or solid polymer thereof
454 ......SICP or solid polymer thereof
455 ......Halogen containing polymer
456 .....Group IIA metal atom DNRM
457 ...Polymerizing an ethylenic monomer in the presence of a preformed SICP or solid polymer and in the presence of a nonreactive material so as to form an aqueous dispersion, latex, suspension, or emulsion therewith; or product thereof
458 ....Polymerizing in the presence of water and in the presence of a solid polymer derived from ethylenic reactants only
459 .....Solid polymer utilized contains vinyl alcohol units
460 .....Solid polymer utilized is derived from an unsaturated carboxylic acid or salt
461 ....Polymerizing in the presence of a solid polymer derived from ethylenic reactants only
462 ...Mixing with fluorine- or iodine-containing organic compound or composition; or product thereof DNRM
463 ....Contains two or more fluorine or iodine organic compounds
464 ...Mixing with chlorine- or bromine-containing organic compound hydrocarbon mixture or composition or product thereof DNRM
465 ...Mixing with two or more chlorine- or bromine-containing organic compounds; or with a chlorine- or bromine-containing organic compound other than carbon tetrachloride, chloroform, or methylene chloride, and having numerical limitations other than amount, e.g., included herein, are m.p., b.p., m.w, structure, etc., or composition or product thereof, DNRM
466 ....Two or more chlorine-or bromine-containing organic compounds
467 ....Chlorine or bromine organic compound containing a bridged, fused, or cycloalphatic ring
468 ....Chlorine or bromine organic compound containing ethylenic unsaturation
469 ....Bromine-containing organic compound
470 ....Chlorine-containing aromatic compound
471 .....Aromatic compound containing two or more aromatic rings
472 ....Chlorine-containing wax
473 ....Organic compound containing two or more chlorine atoms
474 ...Mixing two or more hydrocarbons; or a hydrocarbon other than benzene, toluene, or xylene per se and having numerical limitations other than amount, e.g., included herein are m.p., b.p., viscosity, structure, m.w., etc. or composition or product thereof, DNRM
475 ....With water NRM
476 ....Two or more hydrocarbons
477 .....At least two solid hydrocarbons
478 ......At least one microcrystalline wax
479 ....Mixture contains three or more waxes
480 ....Mixture contains microcrystalline wax having specified melting point
481 ....Unsaturated hydrocarbon
482 .....Unsaturated hydrocarbon contains a bridged or fused ring

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...Mixing two or more hydrocarbons; or a hydrocarbon other than benzene, toluene, or xylene per se and having numerical limitations other than amount, e.g., included herein are m.p., b.p., viscosity, structure, m.w., etc. or composition or product thereof, DNRM
....Unsaturated hydrocarbon
483 .....Unsaturated hydrocarbon contains plural unsaturation
484 ....Aromatic hydrocarbon
485 .....Aromatic hydrocarbon contains a bridged or fused ring
486 .....Aromatic hydrocarbon contains two or more aromatic rings
487 ....Hydrocarbon wax
488 .....Microcrystalline wax
489 .....Wax having melting point above 120 deg. F (49 deg. C)
490 ....Hydrocarbon having a specified molecular weight or chain length
491 ....Hydrocarbon having a specified viscosity
492 ...Mixing inorganic silicon-containing material having color or numerical limitations other than amount, e.g., included herein are m.p., chemical composition, particle size, surface area, etc., or composition or product thereof, DNRM
493 ....Inorganic silicon-containing material having specified dimensions
494 .....Material contains glass
495 ...Mixing with carbon, e.g., graphite, etc., having numerical limitations, other than amount, e.g., included herein are particle size, surface area, etc., or composition or product thereof, DNRM
496 ....Carbon particle having specified dimension
497 ...Mixing with titanium dioxide material having numerical limitations other than amount, e.g., included herein are particle size, etc., composition or product thereof, DNRM
498 ...Solid polymer or solid SICP derived from or reacted with protein or biologically active polypeptide or product thereof
499 ...Solid polymer derived from monomer from unsaturated petroleum hydrocarbon fraction or product thereof
500 ...Containing two or more solid polymers; solid polymer or SICP and a SICP, SPFI, or an ethylenic reactant or product thereof
501 ....Producing an aqueous system by mixing two or more aqueous emulsions, suspensions, dispersions, or solutions, or any of the above in admixture with one another and wherein each individually contains a solid polymer or SICP
502 ....At least one solid polymer derived from ethylenic reactants only
503 .....Polyvinyl alcohol or modified form thereof
504 .....Solid graft or solid graft-type copolymer with other solid polymer, SICP, or SPFI
505 .....Solid block or solid block-type copolymer with other solid polymer, SICP or SPFI
506 .....With solid polymer derived from at least one Si-H or Si-C reactant wherein at least one of the reactants forming the solid polymer is saturated; or with SPFI or SICP derived from a Si-H or Si-C reactant wherein at least one of the necessary reactants is saturated
507 .....With solid polymer derived from at least one -N=C=X (X is chalcogen) reactant wherein at least one of the reactants forming the solid polymer is saturated; or with SPFI or SICP derived from a -N=C=X reactant wherein at least one of the necessary reactants is saturated
508 .....With solid polymer derived from at least one reactant wherein at least one of the reactants forming the solid polymer is a phenol or inorganic phenolate; or with SPFI or SICP derived from phenol or inorganic phenolate wherein at least one of the necessary reactants is saturated
509 ......With aldehyde or aldehyde-type reactant
510 ....Water DNRM containing
511 ....Ethylenic polymer derived from at least one reactant containing two or more ethylenic groups
512 .....With solid polymer derived from at least one reactant wherein at least one of the reactants forming the solid polymer is an aldehyde or derivative; or with SPFI or SICP derived from an aldehyde or derivative wherein at least one of the necessary reactants is saturated
513 .....With polycarboxylic acid or derivative and a polyol at least one of which is saturated or with solid polymer thereof
514 .....With polycarboxylic acid or derivative and a polyamine, or with nitrogen-containing carboxylic acid or derivative reactant at least one of which is saturated or with solid polymer thereof
515 .....Two or more solid polymers derived from ethylenic reactants only
516 ......Solid polymer derived from nitrogen heterocycle monomer
517 ......Solid polymer from oxygen heterocycle monomer

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...Containing two or more solid polymers; solid polymer or SICP and a SICP, SPFI, or an ethylenic reactant or product thereof
....At least one solid polymer derived from ethylenic reactants only
.....Two or more solid polymers derived from ethylenic reactants only
518 ......Solid polymer derived from fused or bridged ring monomer
519 ......Solid polymer derived from halogen-containing monomer other than vinyl or vinylidene chloride
520 ....Fluorine-containing monomer
521 ......Solid polymer derived from a monomer containing an atom other than C, O, H, or chlorine
522 ......Solid polymer derived from carboxylic acid-containing monomer
523 ......Solid polymer derived from carboxylic acid ester monomer
524 ....Ester derived from an unsaturated alcohol and a saturated acid, e.g., vinyl acetate, etc.
525 ......Solid polymer derived from monomer containing two or more ethylenic groups
526 ....Two or more polymers derived from reactant containing two or more ethylenic groups
527 ......Solid polymer derived from chlorine-containing reactant
528 ......Solid polymer derived from acyclic hydrocarbon
529 .....Solid polymer derived from ethylenic monomers only admixed with ethylenic monomer
530 ......Ethylenic monomer contains a nitrogen heterocycle
531 ......Ethylenic monomer contains a chalcogen heterocycle
532 ......Ethylenic monomer contains a fused or bridged ring system
533 ......Ethylenic monomer contains at least one carboxylic acid ester group
534 ......Ethylenic monomer contains at least two ethylenic groups
535 ......Ethylenic monomer contains at least one atom which is other than C, H, or O
536 ......Ethylenic monomer is an acyclic hydrocarbon
537 ....Solid polymer or SICP derived from an -O-(C=O)O- or hal-(C=O)-O- containing reactant
538 ....Solid polymer or SICP derived from at least one nitrogen-containing carboxylic acid or derivative reactant or from a carboxylic acid or derivative and a polyamine
539 ....Solid polymer or SICP derived from at least one carboxylic acid or derivative reactant
540 ....Solid polymer or SICP derived from at least one phenol or inorganic phenolate reactant
541 .....Aldehyde or derivative reactant
542 ....Solid polymer or SICP derived from at least one aldehyde or derivative or ketone reactant
543 ...Polymer derived from ethylenic reactants only
544 ....From fluorine-containing monomer
545 .....Fluorine-containing monomer contains F and C only or only F, C, and H
546 ......Four or more fluorine atoms
547 ....From reactant-containing atom other than O, N, C, halogen, or hydrogen
548 ....From heterocyclic monomer
549 .....Five-membered oxygen ring, e.g., coumarone-indene, etc.
550 ....From acetylenic monomer
551 ....From halogen-containing monomer containing three or more carbon atoms and wherein at least one halogen atom is present in other than salt form
552 .....Diene
553 ....From cycloaliphatic or fused or bridged ring monomer
554 .....Cycloaliphatic, fused, or bridged monomer contains at least two unsaturated groups
555 ....From nitrogen-containing monomer other than acrylonitrile or methacrylonitrile
556 ....From carboxylic acid or ester thereof monomer
557 .....Polyvinyl alcohol or modified forms thereof
558 .....Acid or ester contains an oxygen atom which is other than part of a free carboxyl group or carboxylic acid ester group
559 .....Ester contains two or more ester groups or at least one carboxylic ester group and at least one free acid group; or carboxylic acid contains two or more free carboxyl groups
560 .....From ester derived from at least one unsaturated carboxylic acid and a saturated alcohol, e.g., methyl methacrylate, etc.
561 ......Interpolymerized with diverse carboxylic acid ester
562 ......Interpolymerized with hydrocarbon containing a single ethylenic group
563 .....From ester derived from ethylenically unsaturated alcohol and saturated carboxylic acid, e.g., vinyl acetate, etc.
564 ......Interpolymerized with diverse carboxylic acid ester or with carboxylic acid reactant
565 ....From acrylonitrile or methacrylonitrile monomer
566 .....Inorganic nonreactive material
567 ....From halogen-containing monomer
568 .....Vinylidene chloride
569 .....Plasticizer additive
570 ....From hydrocarbon monomer
571 .....Conjugated diene hydrocarbon monomer

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Adding a NRM to a preformed solid polymer or preformed specified intermediate condensation product, composition thereof; or process of treating or composition thereof
...Polymer derived from ethylenic reactants only
....From hydrocarbon monomer
.....Conjugated diene hydrocarbon monomer
572 ......Adding nonreactive material to chemically modified solid polymer
573 ......Interpolymer of two or more diene monomers
574 ......Interpolymer with at least one aliphatic hydrocarbon monomer, e.g., butyl rubber, etc.
575 ......Interpolymer with at least one aromatic hydrocarbon monomer
575.5 ......Natural rubber
576 .....Adding nonreactive material to chemically modified solid polymer
577 .....From aromatic hydrocarbon monomer
578 ......Interpolymer with at least one aliphatic hydrocarbon monomer
579 .....From hydrocarbon containing four or more carbon atoms
580 .....Adding nonreactive material to solid polymer and subsequently chemically modifying the polymer or product
581 ......Solid polymer derived from ethylene
582 .....From propylene as sole reactant monomer
583 ......Organic NRM additive
584 ......Inorganic NRM additive other than water
585 .....From ethylene as sole reactant monomer
586 ......Inorganic NRM additive
587 ......High density polymer
588 ...From silicon-containing reactant
589 ...From -N=C=X reactant or blocked N=C=X reactant (X is chalcogen)
590 ....With reactant containing at least one C-OH, (C=O)-OH or -C-O-C- group
591 .....Water DNRM
592 ...From ketone or ketene reactant
593 ...From aldehyde or derivative reactant
594 ....With phenol or inorganic phenolate
595 .....Containing reactant having atom other than C, H, or O
596 .....Water DNRM
597 ....Nitrogen-containing reactant
598 .....Water DNRM
599 ...From carboxylic acid or derivative reactant
600 ....Carboxylic acid contains three or more acid groups or derivative thereof
601 ....From dicarboxylic acid or derivative and at least one polyol; or from a diester of a polycarboxylic acid as sole reactant
602 .....Nitrogen-containing reactant
603 .....Reactant contains atom other than C, H, or O
604 .....At least one polyol containing only two -C-OH groups reactant
605 ......Derived from terephthalic acid or derivative
606 ....Nitrogen-containing reactant
607 .....Two or more carboxylic acids or derivatives, or two or more nitrogen-containing compounds
608 .....Water DNRM containing
609 ...From sulfur-containing reactant
610 ...From reactant-containing atom other than N, C, H, O, or halogen
611 ...From phenol reactant
612 ...From at least one oxygen or nitrogen-containing reactant
650 ..Inorganic water settable material containing
700 ..Preparation of intentional or desired composition by formation of a solid polymer (SP) or SICP in presence of a designated nonreactant material (DNRM) other than solely water, hydrocarbon, silicon dioxide, glass, titanium dioxide or elemental carbon, composition thereof; or process of treating or composition thereof
701 ...Boron-containing DNRM
702 ...Cellular material derived from biological source as DNRM other than farinaceous flour or cotton or diatomaceous earth
703 ....Corncob, bark, or cork
704 ...Protein or biologically active polypeptide as DNRM
705 ...Coal or bituminous material, extract or derivative thereof, oil shale, or fatty still residue thereof, as DNRM
706 ...P-containing DNRM
707 ....Nitrogen
708 .....Phosphorus bonded directly to nitrogen
709 ....Tri organo phosphine or phosphonium compound
710 ....Organic compound having phosphorus bonded directly to oxygen or sulfur
711 .....Containing a metal atom DNRM
712 .....Containing halogen DNRM
713 ....Containing phenol or carboxylic acid or derivative DNRM
714 ...N-containing organic compound excluding unsubstituted ammonium as sole nitrogen in DNRM
715 ....N=N linkage, e.g., azo dyes, etc.
716 ....Carbohydrate or derivative, e.g., nitrocellulose, etc.
717 ....Heterocyclic structure other than per se N-alkyl pyrrolidone
718 .....Hetero nitrogen
719 ......Containing hetero chalcogen DNRM
720 ......Plural hetero N, i.e., same or different ring
721 ....Containing aryl-OH or salt thereof DNRM
722 ....Amine nitrogen directly bonded to aromatic ring
723 ....Sulfur, e.g., sulfonamides, etc.
724 ....ROH or COOH, or salts thereof, e.g., alkanol amine or amino acid, etc.
725 ....Nitrile
726 ....Formamide or N,N-dialkyl amide or N-alkyl pyrrolidone
727 .....With metal-containing material DNRM
728 ....(C=O)N

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Preparation of intentional or desired composition by formation of a solid polymer (SP) or SICP in presence of a designated nonreactant material (DNRM) other than solely water, hydrocarbon, silicon dioxide, glass, titanium dioxide or elemental carbon, composition thereof; or process of treating or composition thereof
729 ...X(C=X)X wherein X is chalcogen DNRM, e.g., carbonate, etc.
730 ...Si-C, Si-H contains DNRM, metal-C or metal-H bond or organic compound containing Si
731 ....Diorgano siloxane contains units of -((R)Si(R)-O-)* where * is subscript two or more
732 ...Carbohydrate or derivative as DNRM
733 ....Cellulose or derivative, e.g., cotton, paper pulp, etc.
734 ....Starch or derivative, farinaceous flour or meal
735 ...Lignin, tannin, or derivative as DNRM
736 ...Aryl-OH or salt thereof as DNRM
738 ....Plural separate aryl-OH groups or polyhydric aryl-OH, or salts thereof: e.g., resorcinol, etc.
739 .....Plural separate aryl-OH or salt groups bonded through carbon or a chalcogen-containing radical, e.g., bisphenol A, etc.
740 ....Aryl-OH or salt compound having at least one chalcogen-containing substituent, e.g., hydroxy anisole, etc.
741 ....Aryl-OH or salt compound having two or more substituents
742 ...Elemental or organic sulfur compound as DNRM
743 ....Sulfone, e.g., sulfolane, etc.
744 ....DMSO with additional oxygen or halogen compound DNRM
745 ....Sulfate, sulfonate ester, sulfonic acid, or salt thereof
746 .....Halogenated
747 .....Containing ether or hydroxyl group DNRM
748 .....Containing COOH or salt thereof or ester thereof DNRM
750 ....Mercaptan, mercaptide, or thioether, e.g., aryl-SH, etc.
751 ...Heterocyclic chalcogen compound as DNRM
752 ....With organic chalcogen compound, hydrocarbon, or halogenated hydrocarbon DNRM
753 ....Carboxylic acid ester linkage, e.g., oxyalkylated sorbitan ester, etc.
754 ....Plural hetero oxygen
755 ...Ether compound DNRM, e.g., aryl ether, dimethylether, etc.
757 ....Mixture of ether compounds; or only two ether oxygens bonded to a carbon atom, e.g., formal, acetal, etc.
758 ....Halogenated
759 ....Containing carboxylic acid or derivative DNRM
760 .....Carboxylic acid or derivative has two or more ether linkages
761 ....Containing hydroxyl group DNRM
762 .....Two or more ether linkages in the hydroxyl group bearing molecule
763 ...Oxygen containing wax as DNRM, e.g., carnauba, montan, ceresin, bees wax, oxidized petroleum wax, etc.
764 ...Natural resin or derivative as DNRM, e.g., rosin, shellac, etc., excluding tall oil per se
765 ...Alcohol compound as DNRM, i.e., R-OH
766 ....Two or more alcohols
767 ....With water NRM
768 ....With hydrocarbon or halogenated hydrocarbon NRM
769 ....Chalcogen other than as R-OH
770 ...Ketone or aldehyde as DNRM
771 ....With hydrocarbon or halogenated hydrocarbon NRM
772 ....Carboxylic acid or derivative, e.g., acetoacetic acid or ester or salt thereof, etc.
773 ...Carboxylic acid or derivative not containing a heavy metal atom as DNRM, e.g., anhydride, acyl halide, ester or salt, etc.
774 ....Cycloaliphatic group, e.g., dimer acids containing thirty six carbon atoms, tall oil, etc.
775 ....Aryl group
776 .....Solid polymer derived from ethylenic monomers only
777 ....Group IA, unsubstituted ammonium, or Group IIA salt
778 .....Solid polymer or SICP derived from at least one nonethylenic monomer
779 ...Elemental metal or metal compound not containing silicon DNRM
780 ....Heavy metal
781 .....Copper
783 .....Group IV or Group IIB, i.e., Ge, Sn, Pb, Zr, Ti, Hf, Zn, Cd, Hg
784 ......Tin
785 .....Group VIII, i.e., Fe, Ru, Os, Co, Rh, Ir, Ni, Pd, Pt
786 ....Al
787 ....Inorganic metal compound having S, C, or N, e.g., KSCN, etc.
788 .....Calcium, e.g., calcium carbonate, etc.
789 ...Elemental silicon, soil, or inorganic silicon compound as DNRM
790 ....With reactive coupling agent
791 ....Alkali or alkali earth silicate
792 ...Halogenated hydrocarbon DNRM
793 ....Halogenated hydrocarbon contains ethylenic unsaturation
794 ....With water NRM
795 ....Fluorinated
796 ...Nitrogen, halogen, or compounds thereof DNRM
797 ..Solid polymer or SICP derived from protein or biologically active polypeptide and ethylenic monomer or SPFI
798 ..Solid polymer or SICP derived from natural resin or natural resin derivative and ethylenic monomer or SPFI, e.g., shellac, rosin, etc.
799 ..Solid polymer or SICP derived from lignin or tannin and ethylenic monomer or SPFI

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
800 ..Preparation of intentional or desired composition by formation of solid polymer or SICP in the presence of water as a designated nonreactant material (DNRM), or products thereof
801 ...Process of preparing water-in-oil emulsion or dispersion, or product thereof
802 ...Aqueous carboxyl-bearing solid polymer or SICP composition chemically treated with aziridine, mono 1,2-epoxide, or cyclic sulfonium compound
803 ...Polyvinyl alcohol or partially hydrolyzed polyvinyl acetate or chemically modified forms thereof
804 ...Solid polymer derived from ethylenic monomers only
805 ....Fluorine-containing monomer
806 ....Silicon-containing monomer
807 ....Monomer-containing element other than C, H, O, N, S, Hal, or Group IA metal atom
808 ....Monomer contains nitrogen atom as part of a heterocyclic ring
809 .....Two or more nitrogen atoms in a single ring
811 ....Monomer contains chalcogen atom as part of heterocyclic ring
812 ....N-containing monomer other than: unsubstituted ammonium as sole nitrogen, acrylamide, methylol acrylamide, acrylonitrile and the corresponding methacryl compounds or mixtures thereof
813 .....Nitrogen-carbon-oxygen bond containing monomer, e.g., allyl isocyanate, etc.
814 .....N-monomer contains S
815 .....Quaternary nitrogen-containing monomer, e.g., tetramethyl ammonium, etc.
816 .....N-monomer contains carboxylic acid or salt thereof
817 ....S-containing monomer
818 ....Aldehyde or ketone containing monomer
819 ....Hydrocarbon monomer with carboxylic acid, salt, or nonnitrogen containing derivative monomer
820 .....With N monomer
821 ......Hydrocarbon monomer contains at least two ethylenic groups
822 .....Two or more hydrocarbon monomers
823 .....Two or more monomers-containing carboxylic acid or derivative
824 ......Aromatic monomer
825 .....With halogenated hydrocarbon monomer
827 ....N-containing monomer
828 .....With hydrocarbon monomer
829 .....Two or more N monomers
831 .....With unsaturated carboxylic acid or ester monomer
832 ....Monomer is carboxylic acid or derivative
833 .....Two or more carboxylic acids or derivatives
834 ....Halogenated hydrocarbon monomer
835 .....Two or more halogenated hydrocarbon monomers
836 ....Hydrocarbon monomer only
837 ...Solid polymer or SICP derived from Si-containing reactant
838 ....N-containing reactant
839 ...Solid polymer or SICP derived from -N=C=X (X is chalcogen) containing reactant
840 ....N=C=X reactant has ionic group attached thereto, e.g., carboxyl sulfonic, etc.
841 ...Solid polymer or SICP derived from a phenolic reactant
842 ....With carbohydrate reactant, e.g., starch, cellulose, or sugar, etc.
843 ...Solid polymer or SICP derived from an aldehyde or aldehyde derivative reactant
844 ....With carbohydrate reactant, e.g., starch, cellulose, cork, etc.
845 ...Solid polymer derived from a reactant which is a carboxylic acid or derivative
846 ...Polymer of an ethylenic reactant with a saturated reactant
847 ..Carbon, titanium dioxide, glass, or silicon dioxide having specified crystalline form or numerical limitation other than amount, e.g., included herein are particle size, shape, etc., as DNRM
848 ..Hydrocarbon material other than solely a fused ring, or cycloaliphatic hydrocarbon, benzene, toluene, or xylene or mixtures thereof; said material or mixture of materials having specified numerical limitations other than amount, e.g., included herein are m.p., b.p., viscosity, particle size, etc., as DNRM
849 ..Solid polymer from ethylenic monomer only, said polymer formed in the presence of a nonreactant material
850 ...N-containing monomer
851 ...Halogen-containing monomer
852 ...Chalcogen atom containing monomer other than ether oxygen as sole chalcogen
853 ....Carboxylic acid or derivative monomer
854 .....Monomer containing at least two carboxylic acid or derivative groups
855 ...From unsaturated hydrocarbon monomer solely
856 ....Contains two or more ethylenic unsaturated groups
857 ..Boron or metal-containing reactant forming a solid polymer or SICP in the presence of a nonreactant material
858 ..Si-containing reactant forming a solid polymer or SICP in the presence of a nonreactant material
859 ...Silicate containing compound as sole Si-containing reactant, e.g., ortho silicate esters, etc.
860 ...Poly (di organo siloxane) reactant, i.e., (R-Si(R)-O)-* where R is an organic radical and * is subscript two or more
861 ....Si-H containing reactant
862 .....With ethylenically unsaturated reactant

SYNTHETIC RESINS (Class 520, Subclass 1)
.PROCESSES OF PREPARING A DESIRED OR INTENTIONAL COMPOSITION OF AT LEAST ONE NONREACTANT MATERIAL AND AT LEAST ONE SOLID POLYMER OR SPECIFIED INTERMEDIATE CONDENSATION PRODUCT, OR PRODUCT THEREOF.
..Si-containing reactant forming a solid polymer or SICP in the presence of a nonreactant material
...Poly (di organo siloxane) reactant, i.e., (R-Si(R)-O)-* where R is an organic radical and * is subscript two or more
863 ....Poly (di organo siloxane) reactant has at least one SiO other than as Si-O-Si, e.g., Si-O-C, or SiOH group, etc.
864 .....With N-containing reactant
865 .....With ethylenic unsaturated reactant
866 ....Ethylenically unsaturated reactant
868 ...Heterocyclic reactant
869 ...N-containing reactant
871 ..N=C=X containing reactant forming a solid polymer or SICP in the presence of a nonreactant material (X is chalcogen)
872 ...Two or more N=C=X containing reactants (other than conventional isomer mixtures)
873 ...Aliphatic or cycloaliphatic N=C=X compound
874 ...With N-containing reactant
875 ...With two or more alcohol hydroxyl compounds
876 ..Phenolic reactant forming a solid polymer or SICP in the presence of a nonreactant material
877 ..Aldehyde or derivative or ketone as reactant forming a solid polymer or SICP in the presence of a nonreactant material
878 ..Carboxylic acid or derivative, excluding nitrile as sole derivative as reactant forming a solid polymer in the presence of a nonreactant material
879 ...Nitrogen-containing reactant
881 ..Ethylenically unsaturated compound, or compound containing element other than C, H, O, or N (e.g., P, S, etc.) as reactant forming a solid polymer in the presence of an NRM

CLASS 525 PART OF THE CLASS 520 SERIES -- SYNTHETIC RESINS OR NATURAL RUBBERS

SYNTHETIC RESINS (Class 520, Subclass 1)

7 .ETHYLENICALLY UNSATURATED REACTANT ADMIXED WITH A PREFORMED REACTION PRODUCT DERIVED FROM: (a) AT LEAST ONE POLYCARBOXYLIC ACID, ESTER, OR ANHYDRIDE; (b) AT LEAST ONE POLYHYDROXY COMPOUND; AND (c) AT LEAST ONE FATTY ACID GLYCEROL ESTER, OR A FATTY ACID OR SALT DERIVED FROM A NATURALLY OCCURRING GLYCERIDE, TALL OIL, OR A TALL OIL FATTY ACID

7.1 ..Mixed in the presence of a specified material

7.2 ..Mixed with silicon-containing reactant or polymer derived therefrom

7.3 ..Mixed with aldehyde or derivative as reactant or polymer derived therefrom

7.4 ..Mixed with previously formed solid polymer or SPFI

8 .ETHYLENICALLY UNSATURATED REACTANT ADMIXED WITH A PREFORMED REACTION PRODUCT DERIVED FROM: (a) AT LEAST ONE POLYCARBOXYLIC ACID, ESTER, OR ANHYDRIDE; (b) AT LEAST ONE POLYHYDROXY COMPOUND; AND (c) AT LEAST ONE NATURAL RESIN, PROTEIN, OR BIOLOGICALLY ACTIVE POLYPEPTIDE, OR CARBOHYDRATE OR DERIVATIVE

10 .ETHYLENICALLY UNSATURATED REACTANT ADMIXED WITH EITHER (A) A POLYMER DERIVED FROM A SATURATED DI- OR HIGHER ESTER OF A POLYCARBOXYLIC ACID AS SOLE REACTANT, OR (B) REACTION PRODUCT OF ONLY POLYCARBOXYLIC ACIDS OR ANHYDRIDES WITH ONLY COMPOUNDS HAVING AT LEAST TWO HYDROXYL GROUPS AT LEAST ONE OF WHICH IS SATURATED AND WHEREIN THE REACTION PRODUCT FORMED IS NOT AFTERTREATED PRIOR TO ADMIXTURE WITH THE UNSATURATED REACTANT EXCEPT WITH A POLYCARBOXYLIC ACID, POLYCARBOXYLIC ACID ANHYDRIDE, OR A POLYOL, AND WHEREIN NO SOLID POLYMER DERIVED FROM ETHYLENIC REACTANTS ONLY IS MIXED THEREWITH

11 ..Mixed in presence of specified material or a polymerizable composition contains a specified material

12 ...Specified material contains boron or silicon atom

13 ...Specified material contains metal atom other than from group IA metal atom (Li, Na, K, Rb, Cs, Fr)

14 ....Material contains Group IB metal atom (Cu, Ag, Au)

15 ....Material contains Group IIB metal atom (Zn, Cd, Hg) or IIIA metal atom (Al, Ga, In, Tl)

16 ....Material contains Group VB metal atom (V, Nb, Ta)

17 ....Material contains Group VIII metal atom (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)

18 ....Material contains Group IVA metal atom (Ge, Sn, Pb)

19 ....Material contains Group IIA metal atom (Be, Mg, Ca, Sr, Ba, Ra)

20 ...Specified material contains phosphorus atom

21 ...Specified material contains ketone group

22 ...Specified material contains an aldehyde or derivative thereof

23 ...Specified material contains sulfur atom

24 ....Sulfur is part of heterocyclic ring

25 ...Specified material contains nitrogen atom

26 ....Nitrogen is part of heterocyclic ring

27 ...Specified material contains a peroxy group, i.e., -O-O-

28 ..Mixed with -N=C=X reactant or polymer derived therefrom (X is chalcogen)

29 ..Mixed with silicon-containing reactant or polymer derived therefrom

30 ..Mixed with a solid polymer or specified intermediate condensation product derived from at least one amine-, N-C(=X)- or N-S-(=O)- containing reactant and at least one aldehyde or aldehyde-type reactant (X is chalcogen)

31 ..Mixed with an 1,2-epoxy compound containing more than one 1,2-epoxy group per mole or polymer derived therefrom

32 ..Mixed with a phenolic reactant and an aldehyde or aldehyde-type reactant or reaction product thereof

32.1 ..Polymer derived from polycarboxylic acid and polyhydroxyl compound is derived from at least one polycarboxylic acid reactant which is a dimer or trimer of an ethylenically unsaturated aliphatic monocarboxylic acid having at least ten carbon atoms; or adducts of said unsaturated monocarboxylic acid with an alpha, beta ethylenically unsaturated carboxylic acid or derivative

32.2 ..Ethylenic reactant or polymer derived from polycarboxylic acid or anhydride and polyol is derived from a carbohydrate or derivative

33 ..Polymer derived from polycarboxylic acid and polyhydroxy compound is derived from at least one polycarboxylic acid containing at least three carboxyl groups or more than one anhydride group

34 ..Polymer derived from polyhydroxy reactant and polycarboxylic acid is derived from at least one reactant containing at least three hydroxyl groups

35 ..Polymer derived from polycarboxylic acid or anhydride and polyhydroxy compound is derived from at least two polycarboxylic acid reactants or two polycarboxylic acid anhydrides or mixture thereof

36 ...At least one of said polycarboxylic acid reactants or anhydrides contains ethylenic unsaturation

37 ....Polymer mixed with unsaturated reactant containing phosphorus atom

38 ....Polymer mixed with unsaturated reactant containing nitrogen atom

39 ....Polymer mixed with unsaturated reactant containing carboxylic acid, ester, salt or anhydride group

40 ....Polymer mixed with unsaturated reactant containing aryl ring

41 ..Polymer derived from polycarboxylic acid or anhydride and polyhydroxy compound is derived from at least two polyhydroxy compounds

SYNTHETIC RESINS (Class 520, Subclass 1)

.ETHYLENICALLY UNSATURATED REACTANT ADMIXED WITH EITHER (A) A POLYMER DERIVED FROM A SATURATED DI- OR HIGHER ESTER OF A POLYCARBOXYLIC ACID AS SOLE REACTANT, OR (B) REACTION PRODUCT OF ONLY POLYCARBOXYLIC ACIDS OR ANHYDRIDES WITH ONLY COMPOUNDS HAVING AT LEAST TWO HYDROXYL GROUPS AT LEAST ONE OF WHICH IS SATURATED AND WHEREIN THE REACTION PRODUCT FORMED IS NOT AFTERTREATED PRIOR TO ADMIXTURE WITH THE UNSATURATED REACTANT EXCEPT WITH A POLYCARBOXYLIC ACID, POLYCARBOXYLIC ACID ANHYDRIDE, OR A POLYOL, AND WHEREIN NO SOLID POLYMER DERIVED FROM ETHYLENIC REACTANTS ONLY IS MIXED THEREWITH

42 ..Polymer derived from polycarboxylic acid or anhydride and polyhydroxy compound is derived from polyhydroxy compound containing ether linkage

43 ..Polymer derived from polycarboxylic acid or anhydride and polyhydroxy compound wherein at least one of the reactants contains ethylenic unsaturation

44 ...Polymer mixed with unsaturated reactant containing two or more unsaturated groups

45 ....Wherein unsaturated reactant contains three nitrogen atoms in the same ring

46 ...Polymer mixed with unsaturated reactant containing nitrogen atom

47 ....Unsaturated reactant contains nitrogen heterocycle

48 ...Polymer mixed with unsaturated carboxylic acid, ester, salt, or anhydride

49 ...Polymer mixed with unsaturated aromatic compound

The following notation has been adopted for use in the schedule of this Class:

SICP = specified intermediate condensation product

SPFI = specified polymer-forming ingredients

See Class 525 Definition, subclass 50 for specific definition of these terms.

50 .MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

51 ..Effecting a change in a process in response to a measurement or test

52 ..Utilizing a tubular or loop reactor

53 ..Utilizing an apparatus with two or more physically distinct zones

54 ..Removing and recycling material from one zone to another

54.1 ..Containing chemically combined protein or biologically active polypeptide

54.11 ...Solid polymer treated by stepwise reaction with naturally occurring alpha or beta amino acid or a material which contains a residue of said amino acid, e.g., a functionally protected amino acid, etc.

54.2 ..Previously formed solid polymer chemically reacted with carbohydrate or derivative

54.21 ...Cellulose or derivative as chemical reactant

54.22 ....Previously formed solid polymer is derived from N=C=X reactant or contains N=C=X group wherein X is chalcogen

54.23 ....Previously formed solid polymer is derived from ethylenically unsaturated reactants only

54.24 ...Starch, starch flour or meal, or derivative as chemical reactant

54.26 ....Previously formed solid polymer derived from ethylenic reactants only

54.3 ..Previously formed solid polymer containing chemically combined carbohydrate admixed with a chemical treating or ethylenic agent, SPFI, SICP, or solid polymer

54.31 ...Carbohydrate containing polymer is derived from starch, or starch containing flour or meal

54.32 ....Carbohydrate containing polymer derived from acrylonitrile

54.4 ..Containing chemically combined natural resin or derivative thereof other than tall oil

54.41 ...Shellac

54.42 ...Previously formed solid polymer chemically reacted with natural resin or derivative

54.44 ....At least one previously formed solid polymer derived from ethylenic monomers only

54.45 ...Previously formed solid polymer containing chemically combined natural resin or derivative admixed with an ethylenic agent or a chemical treating agent other than SICP or SPFI

54.5 ..Chemically combined coal, bituminous material, extract, or derivative thereof; oil shale; or fatty still residue

55 ..At least one solid polymer derived from ethylenic reactants only

56 ...Polyvinyl alcohol

57 ....With solid polymer derived from ethylenic reactants only

58 ....With SICP, SPFI, or polymer thereof

59 ....With ethylenic reactant

60 ....Interpolymers

61 ....Chemical modification utilizing a chemical treating agent

62 ....Processes only of preparing polyvinyl alcohol

63 ...Mixing of solid graft or graft-type copolymer with other solid polymer wherein one of said solid polymers is not derived from ethylenic reactants only; mixing of said polymer mixture with a chemical treating agent; or mixing of graft or graft-type copolymer with a SICP or SPFI; or processes of forming or reacting; or the resultant product of any of the above operations

64 ....Solid graft or graft-type copolymer derived from ethylenic reactants only

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..At least one solid polymer derived from ethylenic reactants only

...Mixing of solid graft or graft-type copolymer with other solid polymer wherein one of said solid polymers is not derived from ethylenic reactants only; mixing of said polymer mixture with a chemical treating agent; or mixing of graft or graft-type copolymer with a SICP or SPFI; or processes of forming or reacting; or the resultant product of any of the above operations

....Solid graft or graft-type copolymer derived from ethylenic reactants only

65 .....With saturated 1,2-epoxy reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom; or with solid copolymer derived from at least one unsaturated 1,2-epoxy reactant wherein the epoxy reactant contains more than one 1,2-epoxy group per mole and at least one saturated reactant

66 .....With solid polymer derived from at least one nitrogen-containing reactant wherein at least one of the reactants forming the solid polymer is saturated; or with SPFI wherein at least one of the necessary ingredients contains a nitrogen atom or with a reaction product thereof; or with nitrogen-containing SICP

67 .....With solid polymer derived from at least one hal-C(=O)-hal, O-C(=O)-O or hal-C(=O)-O- reactant wherein at least one of the reactants forming the solid polymer is saturated; or with SPFI wherein at least one of the necessary ingredients is a hal-C(=O)-hal, O-C(=O)-O, or hal-C(=O)-O containing reactant or reaction product thereof; or with a SICP containing a hal-C(=O)- or O-C(=O)-O- group

68 .....With solid polymer derived from at least one phenolic reactant wherein at least one of the reactants forming the solid polymer is saturated; or with SPFI wherein at least one of the necessary ingredients is a phenolic reactant or with a reaction product thereof; or with phenolic-containing SICP

69 ....Solid graft or graft-type copolymer contains backbone derived from ethylenic reactants only

70 ...Mixing of solid graft or graft-type copolymer derived from ethylenic reactants only with other solid polymer derived from ethylenic reactants only; or treating said mixture with chemical treating agent; or processes of forming or reacting; or the resultant product of any of the above operations

71 ....Contains two or more graft or graft-type copolymers or a graft or a graft-type copolymer and at least one block or block-type copolymer

72 ....Mixture contains solid polymer derived from reactants containing an atom other than C, H, O, N, or chlorine

73 ....Mixture contains solid polymer derived from reactant containing nitrogen heterocycle

74 ....Mixture contains solid polymer derived from reactant containing oxygen heterocycle

75 ....Mixture contains solid polymer derived from reactant containing a fused- or bridged-ring system or from cycloaliphatic reactant

76 ....Mixture contains solid polymer derived from chlorine-containing reactant other than from vinyl(idene) chloride

77 ....Mixture contains solid polymer derived from reactant containing nitrogen other than from (meth)acrylonitrile

78 ....Mixture contains solid polymer derived from reactant containing carboxylic acid group

79 ....Mixture contains solid polymer derived from reactant containing ether or hydroxyl group

80 ....Mixture contains solid polymer derived from reactant containing carboxylic acid ester group

81 .....Reactant contains at least two ester groups

82 ......Ester derived from a polyol

83 .....Substrate polymer derived from hydrocarbon containing plural unsaturation

84 ......Polymer substrate derived from hydrocarbon reactants only

85 .....Polymer substrate derived from an unsaturated carboxylic acid ester

86 ....Mixture contains solid polymer derived from nonaromatic reactant containing plural ethylenically unsaturated groups

87 .....Solid polymer other than graft or graft-type derived from nonaromatic plural ethylenically unsaturated reactant

88 ...Mixing of solid block or block-type copolymer with other solid polymer; mixing of said polymer mixture with a chemical treating agent; mixing of a block or block-type copolymer with SICP or with SPFI; or processes of forming or reacting; or the resultant product of any of the above operations

89 ....Mixture contains two or more solid block or block-type copolymers

SYNTHETIC RESINS (Class 520, Subclass 1)
.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
..At least one solid polymer derived from ethylenic reactants only
...Mixing of solid block or block-type copolymer with other solid polymer; mixing of said polymer mixture with a chemical treating agent; mixing of a block or block-type copolymer with SICP or with SPFI; or processes of forming or reacting; or the resultant product of any of the above operations
90 ....Mixture contains solid block copolymer wherein at least one block is derived from ethylenic reactants only and at least one block is derived from at least one saturated reactant
91 .....Block derived from at least one saturated reactant containing a heterocycle
92 ....Mixture contains solid polymer derived from at least one saturated reactant, SICP, or SPFI
93 ....Mixture contains solid polymer derived from reactant containing chalcogen
94 .....Solid block or block-type copolymer derived from reactant containing carboxylic acid ester group
95 ....Mixture contains solid block or block-type copolymer derived from ethylenically unsaturated hydrocarbon reactants only at least one of which contains at least four carbon atoms
96 .....With solid polymer derived from reactant containing an atom other than C, H or chalcogen
97 .....Mixture contains solid polymer derived from reactant containing a fused- or bridged-ring system
98 .....Solid block or block-type copolymer derived from reactant containing plural unsaturation
99 ......With solid polymer derived from reactant containing plural unsaturation
100 ...With saturated Si-C or Si-H reactant or polymer thereof; or with solid copolymer derived from at least one Si-C or Si-H reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients contains a Si-C or Si-H bond or with a reaction product thereof; or with a SICP containing a Si-H or Si-C bond
101 ....Contacting with nonsilicon-containing SICP, nonsilicon-containing SPFI, or polymer thereof; or with two or more solid polymers
102 ....Si-H or Si-C reactant contains an atom other than C, H, O, or Si bonded to a carbon atom
103 ....Solid polymer from ethylenic reactants only is derived from heterocyclic reactant
104 ....Solid polymer from ethylenic reactants only is derived from reactant containing halogen atom
105 ....Solid polymer from ethylenic reactants only is derived from plural unsaturated hydrocarbon
106 ....Solid polymer from ethylenic reactants only is derived from unsaturated hydrocarbon
107 ...With saturated 1,2-epoxy reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom; or with solid copolymer derived from at least one saturated reactant and at least one unsaturated 1,2-epoxy reactant wherein the epoxy reactant contains more than one 1,2-epoxy group per mole
108 ....Contacting two or more solid polymers derived from ethylenic reactants only with a poly 1,2-epoxy-containing reactant; or contacting a solid polymer derived from ethylenic reactants only with a poly 1,2-epoxy-containing reactant and subsequently contacting with an additional polymer derived from ethylenic reactants only
109 ...With phenolic reactant or polymer thereof and is free of 1,2-epoxy groups
110 ....With reactant which is an aldehyde, aldehyde derivative, or polymer thereof, and which is free of an 1,2-epoxy group (included herein are alkylated methylol groups)
111 ....With reactant which is free of an 1,2-epoxy group and which contains a -N=C=X group or polymer thereof (X is chalcogen); or with a polyol and a polycarboxylic acid or reaction product thereof which is free of an 1,2-epoxy group
111.5 ....With a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil
112 ....Contacting polymer from ethylenic reactants only with ethylenic reactant wherein said contacting is either concurrent with or subsequent to the contacting with the saturated poly 1,2-epoxy reactant
113 ....With nitrogen-containing reactant, or wherein the poly 1,2-epoxy reactant contains a nitrogen atom
114 ....With additional heterocyclic reactant free of 1,2-epoxy group
115 ....Poly 1,2-epoxy reactant contains an atom other than C, H, or O
116 ....Polymer derived from ethylenic reactants only derived from reactant containing an atom other than C, H, N, O, or halogen
117 ....Polymer derived from ethylenic reactants only derived from heterocyclic reactant

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..At least one solid polymer derived from ethylenic reactants only

...With saturated 1,2-epoxy reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom; or with solid copolymer derived from at least one saturated reactant and at least one unsaturated 1,2-epoxy reactant wherein the epoxy reactant contains more than one 1,2-epoxy group per mole

118 ....Polymer derived from ethylenic reactants only derived from reactant containing an alcohol or ether group (includes phenols)

119 ....Polymer derived from ethylenic reactants only derived from reactant containing a -COOH group

120 ....Polymer derived from ethylenic reactants only derived from nonaromatic monoolefin

121 ....Polymer derived from ethylenic reactants only derived from reactant containing a halogen atom

122 ....Polymer derived from ethylenic reactants only derived from unsaturated hydrocarbon

123 ...With saturated -N=C=X (X is chalcogen) reactant or polymer thereof; or with solid copolymer derived from at least one -N=C=X reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients contains a -N=C=X group or with a reaction product thereof; or with SICP containing a -N=C=X group

124 ....Blocked isocyanate reactant

125 ....Contacting two or more solid polymers derived from ethylenic reactants only with a -N=C=X reactant or polymer thereof; or contacting a polymer derived from an ethylenic reactant only with a -N=C=X reactant or polymer thereof and subsequently adding thereto a solid polymer derived only from ethylenic reactants

126 ....Contacting solid polymer from ethylenic reactants only with ethylenic reactant wherein said contacting is either concurrent with or subsequent to contacting of said solid polymer with the -N=C=X reactant or polymer thereof

127 ....Contacting with a -N=C=X-containing reactant which has been previously reacted with an organic compound containing a hydroxyl, amine, or -C(=O)-O- group

128 .....-N=C=X reactant has been previously reacted with an organic amine

129 .....Solid polymer from ethylenic reactants only derived from halogen-containing reactant

130 .....Solid polymer from ethylenic reactants only derived from hydrocarbon reactant

131 ....Contacting with -N=C=X-containing reactant and with additional organic reactant containing a hydroxyl or amine group or polymer thereof

132 ...With saturated phenolic reactant or polymer thereof; or with solid copolymer derived from at least one phenolic reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients is a phenolic reactant or with a reaction product thereof; or with a SICP containing a phenolic group

133 ....Contacting two or more solid polymers with a phenolic reactant; or contacting a solid polymer with a phenolic reactant and subsequently contacting the treated polymer with an additional solid polymer

133.5 ....With a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

134 ....Contacting with aldehyde or aldehyde-type reactant or polymer therefrom

135 .....At least two distinct phenols, phenol ethers, inorganic phenolates, or mixtures thereof prior to reaction with aldehyde or aldehyde-type reactant

136 .....Phenolic reactant prior to contact with aldehyde or aldehyde-type reactant contains an atom other than C, H, or O

137 .....Phenolic reactant prior to contact with aldehyde or aldehyde-type reactant contains at least two aryl rings each of which contains phenolic substituents

138 .....With nonethylenic, nonaldehyde, or nonaldehyde-type reactant containing an atom other than C, H, or O

139 .....Solid polymer derived from ethylenic reactants only is derived from reactant containing at least two ethylenic groups

140 ......Phenolic reactant has at least two nuclear carbon atoms directly bonded to extracyclic carbon atoms which extracyclic carbon atoms are not part of a methylol group

141 ......Solid polymer from ethylenic reactants only is derived from both a reactant containing two ethylenic groups and an acyclic monoethylenic hydrocarbon

142 .....Solid polymer derived from ethylenic reactants only is derived from a nitrogen-containing reactant

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..At least one solid polymer derived from ethylenic reactants only

...With saturated phenolic reactant or polymer thereof; or with solid copolymer derived from at least one phenolic reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients is a phenolic reactant or with a reaction product thereof; or with a SICP containing a phenolic group

....Contacting with aldehyde or aldehyde-type reactant or polymer therefrom

143 .....Solid polymer derived from ethylenic reactants only is derived from a reactant containing a carboxylic acid or derivative thereof

144 .....Solid polymer derived from ethylenic reactants only is derived from a reactant containing at least one halogen atom

145 .....Solid polymer derived from ethylenic reactants only is derived from an acyclic hydrocarbon

146 ....With a -O-C(=O)-O-, -O-C(=O)-hal or hal-C(=O)-hal group-containing reactant or polymer thereof

147 .....Two or more diverse phenolic reactants; or phenolic reactant contains an atom other than C, H, or O

148 .....Solid polymer derived from ethylenic reactants only is derived from a reactant containing a carboxylic acid or derivative thereof

149 ....Contains ethylenic reactant other than from a solid polymer derived from ethylenic reactants only, e.g., reaction product from a phenol and unsaturated hydrocarbon, etc.

150 ....Phenolic reactant contains a phosphorus or sulfur atom or with phosphorus- or sulfur-containing reactant

151 ....Solid polymer derived from ethylenic reactants only is derived from a reactant containing at least one halogen atom

152 ....Solid polymer derived from ethylenic reactants only is derived from a reactant containing a polycyclic ring system or two or more ethylenic groups

153 ...With saturated ketone reactant or polymer thereof; or with solid copolymer derived from at least one ketone reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients is a ketone or with a reaction product thereof; or with a SICP containing a ketone group

154 ...With saturated aldehyde or aldehyde derivative (including methylol ethers or condensates) reactant or solid polymer thereof; or with solid copolymer derived from at least one aldehyde or aldehyde derivative reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients is an aldehyde or aldehyde derivative reactant or with a reaction product thereof; or with SICP containing an aldehyde or aldehyde derivative

155 ....Contacting two or more solid polymers derived from ethylenic reactants only with an aldehyde or aldehyde-type reactant; or contacting a polymer derived from ethylenic reactant and subsequently contacting with a solid polymer derived from ethylenic reactants only

156 ....Contacting with a hydrocarbon and an aldehyde or aldehyde derivative as reactants at least one of which is saturated, their condensate or solid polymer thereof

157 ....Contacting with an amine, a material containing a N-C(=X)- or N-S(=O)- (X is chalcogen) reactant and an aldehyde or aldehyde derivative at least one of which is saturated, their condensate or solid polymer thereof

158 .....Reactant, condensate, or solid polymer contains an element other than C, H, N, or O; or wherein a coreactant is not an aldehyde or aldehyde-type reactant, alcohol, amine, or reactant containing a N-C(=O)- group

159 .....Reactant derived from alcohol containing an aryl group or eight or more carbon atoms

160 .....Solid polymer derived from ethylenic reactants only contains an element other than C, H, O, or N

161 .....Solid polymer derived from ethylenic reactants only derived from reactant containing a heterocyclic ring or fused-, bridged-ring system excluding an anhydride group which produces the fused- or bridged-ring system or heterocyclic ring

162 .....Solid polymer derived from ethylenic reactant only derived from reactant containing hydroxyl or ether group

163 .....Solid polymer derived from ethylenic reactants only containing a carboxylic acid, ester, or anhydride group

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..At least one solid polymer derived from ethylenic reactants only

...With saturated aldehyde or aldehyde derivative (including methylol ethers or condensates) reactant or solid polymer thereof; or with solid copolymer derived from at least one aldehyde or aldehyde derivative reactant wherein at least one of the reactants forming the solid copolymer is saturated; or with SPFI wherein at least one of the necessary ingredients is an aldehyde or aldehyde derivative reactant or with a reaction product thereof; or with SICP containing an aldehyde or aldehyde derivative

....Contacting with an amine, a material containing a N-C(=X)- or N-S(=O)- (X is chalcogen) reactant and an aldehyde or aldehyde derivative at least one of which is saturated, their condensate or solid polymer thereof

164 .....Solid polymer derived from unsaturated hydrocarbon

165 ...With polycarboxylic acid or derivative and a polyol at least one of which is saturated, a condensate or solid polymer thereof; or with solid polymer derived from at least one polycarboxylic acid or derivative and at least one polyol wherein at least one the reactants forming the solid polymer is saturated

166 ....Two or more solid polymers present other than derived from a polycarboxylic acid or derivative and a polyol

167 ....Polycarboxylic acid or derivative or polyol contains an atom other than C, H, or O; or wherein a polycarboxylic acid or derivative or polyol or condensate thereof is reacted with a reactant containing atoms other than C, H, or O prior to blending with the solid polymer; or wherein a coreactant with the polycarboxylic acid or derivative or polyol contains an atom other than C, H, or O

167.5 ....With a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

168 ....Polycarboxylic acid or derivative, polyol, or other coreactant contains an ethylenic group; or wherein a condensate thereof has been prepared from a polycarboxylic acid or derivative and a polyol and subsequently reacted with an ethylenic reactant

169 .....Solid polymer derived from ethylenic reactants only derived from at least one reactant containing an atom other than C, H, or O

170 .....Solid polymer derived from ethylenic reactants only derived from at least one reactant containing an oxygen atom

171 .....Solid polymer derived from ethylenic reactants only derived from at least one hydrocarbon reactant containing at least two ethylenic groups

172 ....Polycarboxylic acid or derivative contains three or more carboxylic acid groups or derivatives thereof; or wherein a polyol contains at least three hydroxyl groups

173 ....From two or more polyols

174 ....From two or more carboxylic acids or derivatives thereof

175 ....Solid polymer derived from ethylenic reactants only derived from at least one reactant containing an atom other than C, H, O, or Hal

176 ....Solid polymer derived from ethylenic reactants only derived from at least one reactant containing an oxygen atom

177 ....Solid polymer derived from ethylenic reactants only derived from unsaturated hydrocarbon

178 ...With a polycarboxylic acid or derivative and a polyamine or the corresponding salt thereof; or with a lactam; or with an aminocarboxylic acid; or with the corresponding polymers; and wherein the monomer or polymer was derived from at least one saturated reactant

179 ....Two or more solid polymers other than prepared from a polycarboxylic acid or derivative and a polyamine, a lactam, an aminocarboxylic acid or derivative, or from a polyamine salt of a polycarboxylic acid

180 ....Polycarboxylic acid or derivative contains three or more carboxylic acid groups; or polyamine contains three or more amino groups; or from an amino-containing polycarboxylic acid or derivative other than amine solely in salt form; or from polyamino carboxylic acid or derivative other than wherein amino groups are solely in salt form

181 ....With ethylenically unsaturated reactant; or reactant contains a heterocyclic ring other than solely as a lactam or cyclic anhydride of a polycarboxylic acid

182 ....Solid polymer derived from ethylenically unsaturated reactant only is one derived from a reactant containing a heterocyclic ring and is other than solely a cyclic anhydride of a polycarboxylic acid

SYNTHETIC RESINS (Class 520, Subclass 1)
.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
..At least one solid polymer derived from ethylenic reactants only
...With a polycarboxylic acid or derivative and a polyamine or the corresponding salt thereof; or with a lactam; or with an aminocarboxylic acid; or with the corresponding polymers; and wherein the monomer or polymer was derived from at least one saturated reactant
183 ....Solid polymer derived from ethylenically unsaturated reactant only is derived from a reactant containing a carboxylic acid or derivative
184 ....Solid polymer derived from ethylenically unsaturated hydrocarbon
185 ...With additional solid polymer derived from at least one nonethylenic reactant
186 ....At least one reactant which forms additional polymer contains a heterocyclic ring
187 .....Heterocyclic ring is an 1,2-epoxy ring
188 ....At least one reactant which forms additional polymer contains a phosphorus atom
189 ....At least one reactant which forms additional polymer contains a sulfur atom
190 ....At least one reactant which forms additional polymer contains a carboxylic acid or derivative
191 ...Polymer mixture of two or more solid polymers derived from ethylenically unsaturated reactants only; or mixtures of said polymer mixture with a chemical treating agent; or products or processes of preparing any of the above mixtures
192 ....Treating polymer or polymer mixture with a chemical treating agent other than solid polymer
193 .....Agent contains an ethylenic group
194 .....Agent is an organic material
195 ......Contains a metal atom
196 .....Agent contains a metal atom
197 ....Specified blending process
198 .....With subsequent physical treatment
199 ....Solid polymer derived from fluorine-containing ethylenic reactant
200 .....Fluorine reactant contains atoms other than C, H, or Hal
201 ....Solid polymer derived from metal-containing ethylenic reactant
202 ....Solid polymer derived from reactant containing an acetylenic group
203 ....Solid polymer derived from ethylenic reactant containing a heterocyclic nitrogen
204 .....Heterocyclic reactant contains at least two hetero atoms in the same ring and at least one of which is nitrogen
205 .....Heterocyclic reactant is an imide or lactam
206 ....Solid polymer derived from reactant containing a chalcogen atom (O, S, Se, Te) as part of a heterocyclic ring
207 .....Heterocyclic reactant contains anhydride group
208 .....Heterocyclic reactant contains 1,2-epoxy group
209 ....Solid polymer derived from reactant containing elements other than C, H, O, N, S, or Cl
210 ....Solid polymer derived from reactant containing a fused- or bridged-ring system
211 .....Fused- or bridged-ring reactant contains at least two ethylenic groups
212 ....Solid polymer derived from sulfur-containing reactant
213 ....Solid polymer derived from chlorine-containing reactant other than vinyl(idene) chloride
214 .....Halogenated hydrocarbon other than vinyl(idene) chloride
215 ......Halogenated hydrocarbon contains at least two ethylenic groups and is devoid of an aryl ring
216 ....Solid polymer derived from cycloaliphatic-containing reactant
217 ....Solid polymer derived from reactant containing nitrogen atom other than from (meth)acrylonitrile
218 .....Nitrogen reactant contains a carboxylic acid amide group
219 ....Solid polymer derived from reactant containing a phenolic group
220 ....Solid polymer derived from reactant containing a carbonyl group other than as part of a carboxylic acid or derivative
221 ....Solid polymer derived from reactant containing a carboxylic acid group
222 ....Solid polymer derived from reactant containing a carboxylic acid ester group
223 .....Ester contains an oxygen atom other than as part of a carboxylic acid ester group
224 .....Ester derived from both an unsaturated carboxylic acid and an unsaturated alcohol
225 .....Ester contains at least two carboxylic acid ester groups
226 ......Ester derived from polyol
227 .....Ester derived from an unsaturated carboxylic acid
228 ......At least two polymers derived from carboxylic acid ester reactants
229 ....Ester derived from an unsaturated alcohol
230 ......Polymer derived from nitrogen-containing reactant
231 ....Solid polymer derived from oxygen-containing reactant
232 ....Solid polymer derived from reactant containing at least two ethylenic groups and is devoid of aryl ring
233 .....Polymer derived from nitrogen-containing reactant
234 ......At least two polymers derived from nitrogen-containing reactants

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..At least one solid polymer derived from ethylenic reactants only

...Polymer mixture of two or more solid polymers derived from ethylenically unsaturated reactants only; or mixtures of said polymer mixture with a chemical treating agent; or products or processes of preparing any of the above mixtures

....Solid polymer derived from reactant containing at least two ethylenic groups and is devoid of aryl ring

235 .....Polymer derived from halogen-containing reactant

236 .....At least two polymers derived from reactants containing two or more ethylenic groups and devoid of an aryl ring

237 ......At least one of these polymers is derived from two or more reactants

238 ....Solid polymer derived from (meth)acrylonitrile

239 ....Solid polymer derived from vinyl(idene) chloride

240 ....Solid polymer derived from ethylene or propylene

241 ....Solid polymer derived from an aromatic hydrocarbon reactant

242 ...Polymer derived from ethylenic reactants only mixed with ethylenic reactant

243 ....Reactions with ethylenic reactants in two or more diverse phases, e.g., bulk, emulsion, melt, solution, etc.

244 ....Contacting a solid polymer derived from ethylenic reactants only with an ethylenic reactant in the presence of a specified material

245 .....Specified material contains transition metal atom

246 ......In presence of water

247 ......Contains nontransition metal atom

248 .....Specified material contains a carbon or hydrogen atom bonded directly to a metal atom

249 ......Metal atom is aluminum

250 ......Metal atom is Group IA metal atom (Li, Na, K, Rb, Cs, Fr)

251 .....Specified material contains a boron atom

252 .....Specified material is a carbohydrate or is a solid synthetic polymer not intended to be in the final product

253 ......Material contains a free alcohol group or is alcoholate thereof

254 .....Specified material contains silicon atom

255 .....Specified material contains a phosphorus atom

256 .....Specified material contains a heterocyclic ring

257 .....Specified material contains a ketone group

258 .....Specified material contains an ether group

259 .....Specified material contains an organic nitrogen compound

260 ......Organic nitrogen compound contains an azo group, i.e., -N=N-

261 .....Specified material contains an organic sulfur compound

262 .....Specified material contains a carboxylic acid or derivative

263 .....Specified material contains a peroxy group, i.e., -O-O-

264 ......Contains nonperoxy compound or inorganic peroxy compound

265 ......Aromatic or cycloaliphatic peroxy compound

266 .....Specified material contains an organic chalcogen compound

267 ....Including step of preparing a polymer in the presence of a specified material and in the absence of a preformed polymer derived from ethylenic reactant only

268 .....Specified material contains a transition metal atom

269 ......Transition metal is other than Group IVB, VB, or VIB metal atom

270 ......With nonmetal, nonhydrocarbon compound

271 .....Specified material contains a Group IA atom in elemental form or bonded to hydrogen or carbon

272 ......Contains an atom other than Group IA, C, or H

273 .....Specified material contains a compound containing a peroxy group, i.e., -O-O-

274 ....Ethylenic reactant contains a metal atom

275 ....Ethylenic reactant contains an acetylenic group

276 ....Ethylenic reactant contains a fluorine atom

277 ....Ethylenic reactant contains a carbonate group

278 ....Ethylenic reactant contains a carbamate group

279 ....Ethylenic reactant contains nitrogen heterocycle, e.g., pyridine, diazines, etc.

280 .....Block copolymer

281 .....Nitrogen heterocycle contains at least two nitrogen atoms in the same ring

282 .....Imide

283 .....Lactam

284 ....Ethylenic reactant contains a chalcogen heterocycle

285 .....Cyclic anhydride

286 .....Three-membered ring containing two carbon and one chalcogen atom

287 ....Ethylenic reactant contains a phosphorus atom

288 ....Ethylenic reactant contains atoms other than C, H, O, N, S, or Cl

289 ....Ethylenic reactant contains a fused- or bridged-ring system

290 .....Dicyclopentadiene-containing group

291 ....Ethylenic reactant contains a sulfur atom

292 ....Ethylenic reactant contains a chlorine atom and is other than vinyl(idene) chloride

293 ....Ethylenic material contains a nitrogen atom and is other than (meth)acrylonitrile

SYNTHETIC RESINS (Class 520, Subclass 1)
.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
..At least one solid polymer derived from ethylenic reactants only
...Polymer derived from ethylenic reactants only mixed with ethylenic reactant
....Ethylenic material contains a nitrogen atom and is other than (meth)acrylonitrile
294 .....Block copolymer derived from nitrogen-containing reactant
295 .....Nitrogen atom is part of a nitrile group and is other than (meth)acrylonitrile
296 .....Nitrogen atom is part of a carboxylic acid amide group
297 ....Ethylenic reactant contains a cycloaliphatic group
298 ....Ethylenic reactant contains an oxygen atom
299 .....Block copolymer derived from oxygen-containing reactant
300 .....Oxygen atom is part of a ketone or ketene group
301 .....Oxygen atom is part of a carboxylic acid group
301.5 ......Unsaturated fatty acid derived from a naturally occurring glyceride, tall oil, or an unsaturated fatty acid derived from tall oil
302 .....Oxygen atom is part of a carboxylic acid ester group
303 ......Ester contains an oxygen atom other than as a carboxylic acid ester group
304 ......Ester contains at least two carboxylic acid ester groups
305 ....Ester is derived from a polyol
306 ....Ester is derived from an unsaturated alcohol
307 ......Ester is derived from an unsaturated carboxylic acid and an unsaturated alcohol
308 ......Ester is derived from an unsaturated carboxylic acid
309 ....Ester derived from an unsaturated carboxylic acid is reacted in the presence of a solid polymer
310 ....Ester reactant derived from an unsaturated carboxylic acid is reacted in the presence of a solid polymer substrate derived from a polyene hydrocarbon
311 ......Ester reactant derived from an unsaturated alcohol is reacted in the presence of a solid polymer
312 .....Oxygen atom is part of an ether group
313 ....Ethylenic reactant contains at least two unsaturated groups and is devoid of an aromatic group
314 .....Block copolymer derived from reactant containing at least two unsaturated groups and is free of an aromatic group
315 .....Ethylenic reactant reacted in the presence of a solid polymer substrate derived from reactant containing two unsaturated groups and is devoid of an aromatic group
316 ......Ethylenic reactant is an aromatic hydrocarbon
317 ....Ethylenic reactant is vinyl(idene) chloride
318 .....Block copolymer derived from vinyl(idene) chloride
319 ....Ethylenic reactant is acyclic hydrocarbon
320 .....Acyclic hydrocarbon contains five or more carbon atoms
321 ......Block copolymer derived from acyclic hydrocarbon containing five or more carbon atoms
322 .....Acyclic hydrocarbon is propylene
323 ......Block copolymer derived from propylene
324 .....Acyclic hydrocarbon is ethylene
326.1 ...Chemically after treated solid polymers derived from ethylenically unsaturated monomers only
326.2 ....Polymer derived from fluorine monomer
326.3 .....Vulcanized or crosslinked in presence of chemical treating agent
326.4 .....Halogen containing chemical treating agent; or dehalogenated
326.5 ....Polymer derived from silicon monomer
326.6 ....Polymer derived from monomer containing atom other than: C, H, N, O, S, halogen or group IA or IIA carboxylate
326.7 ....Polymer derived from monomer containing nitrogen atom as part of a heterocyclic ring
326.8 .....Oxygen atom in ring or bonded directly to the nuclear carbon of ring monomer
326.9 ......Lactam monomer, e.g., vinyl pyrrolidone, etc.
327.1 .....6 membered ring containing 5 carbons and 1 nitrogen, monomer, e.g., vinyl pyridine, etc.
327.2 ....Polymer derived from monomer containing chalcogen as part of heterocyclic ring other than solely as cyclic anhydride of ethylenically unsaturated dicarboxylic acid
327.3 .....Three membered chalcogen ring monomer, e.g., oxirane, etc.
327.4 ....Polymer derived from carboxylic acid anhydride monomer
327.5 .....Sulfur containing chemical treating agent
327.6 .....Nitrogen containing chemical treating agent other than unsubstituted ammonium as sole nitrogen
327.7 .....Esterified, i.e., preparation of COOR linkage
327.8 .....Hydrolyzed; neutralized; or metal containing chemical treating agent
327.9 ....Polymer from unsaturated petroleum hydrocarbon fraction as monomer
328.1 ....Polymer derived from acetylenic monomer

	SYNTHETIC RESINS (Class 520, Subclass 1)
	.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
	..At least one solid polymer derived from ethylenic reactants only
	...Chemically after treated solid polymers derived from ethylenically unsaturated monomers only
328.2	....Polymer derived from monomer containing nitrogen other than: unsubstituted ammonium, acrylonitrile, acrylamide, methylolacrylamide and the corresponding methacryl materials
328.3	.....At least one monomer containing two or more ethylenic groups
328.4	.....Monomer containing two or more nitrogen atoms, or two or more nitrogen containing monomers
328.5	....Polymer derived from sulfur monomer
328.6	....Polymer derived from ketone monomer
328.7	....Polymer derived from aldehyde monomer
328.8	....Polymer derived from alcohol monomer
328.9	....Polymer derived from ether monomer
329.1	....Polymer derived from acrylonitrile or methacrylonitrile monomer
329.2	.....Interpolymers
329.3	......Contains monomer having two or more ethylenic groups
329.4	....Polymer derived from acrylamide or methacrylamide monomer
329.5	....Polymer derived from carboxylic acid or derivative monomer other than: vinyl acetate; or acrylic-or-methacrylic-acid, or derivatives
329.6	.....Butene dioic acid or derivative monomer
329.7	....Polymer derived from acrylic or methacrylic acids, acid halides or salt monomers
329.8	.....Sulfur or phosphorus containing chemical treating agent
329.9	.....Nitrogen containing chemical treating agent
330.1	.....Esterified, i.e., preparation of COOR linkage
330.2	.....Hydrolyzed; neutralized; or metal containing chemical treating agent
330.3	....Polymer derived from acrylic or methacrylic esters, or vinyl acetate monomer
330.4	.....Sulfur or phosphorus containing chemical treating agent
330.5	.....Nitrogen containing chemical treating agent
330.6	.....Alcoholized; transesterified; hydrolyzed; or metal containing chemical treating agent; e.g., saponified, etc.
330.7	....Polymer derived from halogen monomer
330.8	.....At least one monomer contains two or more ethylenic groups
330.9	......Vulcanized or crosslinked, in the presence of a chemical treating agent, e.g., cured, etc.
331.1	.......Nitrogen containing chemical treating agent
331.2	.......Halogen containing chemical treating agent
331.3	......Nitrogen containing chemical treating agent
331.4	.....Monomer contains chlorine
331.5	......Vinyl chloride or vinylidene chloride
331.6	.......Halogen containing chemical treating agent
331.7	....Ethylene-propylene terpolymer, e.g., EPT, EPDM, EPR, etc.
331.8	.....Sulfur containing chemical treating agent
331.9	....Polymer derived from monomer containing at least two ethylenic groups or diene rubber
332.1	.....Monomer contains non-conjugated diene group or at least one fused or bridged ring or at least one cycloaliphatic structure
332.2	......Divinyl benzene
332.3	.....Halogen containing chemical treating agent
332.4	......Sulfur containing chemical treating agent
332.5	.....Vulcanized in the presence of a chemical treating agent, e.g., cured, crosslinked, etc.
332.6	......Sulfur containing chemical treating agent
332.7	.......Nitrogen containing chemical treating agent
332.8	.....Interpolymer with aliphatic hydrocarbon monomer (includes additional diene monomer)
332.9	.....Interpolymer with aromatic hydrocarbon
333.1	.....Isoprene or diene rubber other than butadiene rubber
333.2	.....Butadiene homopolymer
333.3	....Polymer derived from aromatic hydrocarbon monomer, e.g., styrene, etc.
333.4	.....Halogenated polymer
333.5	.....Sulfur containing chemical treating agent
333.6	.....Nitrogen containing chemical treating agent
333.7	....Polymer derived from acyclic hydrocarbon monomer only
333.8	.....Air, elemental oxygen, ozone or peroxide chemical treating agent
333.9	.....Sulfur containing chemical treating agent
334.1	.....Halogenated polymer
337	...Chemical treating agent contains boron or boron-containing compound other than boron trihalide or nonmetal complex thereof
338	...Chemical treating agent contains elemental hydrogen or an elemental hydrogen-liberating compound, e.g., hydrogenation, etc.
339	....Treating in the presence of an elemental metal or inorganic metallic compound
340	...Chemical treating agent contains a phosphorus atom
341	....Contains a sulfur atom
342	...Chemical treating agent contains a silicon atom
343	...Chemical treating agent contains a sulfur atom
344	....Inorganic sulfur compound contains sulfur atom bonded to at least two oxygen atoms
345	....With peroxide, ozone, or free oxygen

SYNTHETIC RESINS (Class 520, Subclass 1)
.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
..At least one solid polymer derived from ethylenic reactants only
...Chemical treating agent contains a sulfur atom
346 ....With sulfur-free organic compound
347 .....Sulfur-free organic compound contains heterocyclic nitrogen
348 ....Sulfur-containing heterocyclic compound
349 .....Heterocyclic ring contains sulfur and nitrogen atoms
350 ....Mercaptan or mercaptide
351 ....Organic compound contains sulfur and nitrogen atoms
352 .....One or more sulfur atoms of the nitrogen-containing compound are double-bonded to carbon
353 ....Sulfur compound contains sulfur atom bonded to at least two oxygen atoms, e.g., sulfonate, etc.
354 ....Elemental sulfur or inorganic sulfur compound
355 ...Chemical treating agent contains hydrogen halide, elemental halogen, organic halogen-containing compound, or compound containing only halogen atoms
356 ....Treating in the presence of elemental halogen
357 .....Treating in the presence of a metal or metal-containing compound
358 .....Treating in the presence of water
359.1 ....Treating in the presence of organic halogen-containing compound
359.2 .....Organic halogen-containing compound contains a hetero ring
359.3 .....Organic halogen-containing compound contains oxygen
359.4 ......Organic halogen-containing compound contains a (C=O)O group or an aromatic group
359.5 .....Organic halogen-containing compound contains only carbon, hydrogen, and halogen
359.6 ......Organic halogen-containing compound contains an aromatic group
360 ...Chemical treating agent contains elemental metal or metal-containing compound
361 ....Two or more diverse elemental metals or compounds thereof; or same metal in two or more distinct compounds; or diverse metals in same compound
362 .....Elemental metal or inorganic compound thereof only
363 ......Aluminum or Group IIB (Zn, Cd, Hg) metal or compound thereof
364 .....Organometallic compound and elemental metal or inorganic compound thereof
365 ......Aluminum metal or compound thereof
366 ....Contains Group IA (Li, Na, K, Rb, Cs, Fr) or Group IIA (Be, Mg, Ca, Sr, Ba, Ra) elemental metal or compound thereof
367 .....Elemental metal or inorganic metal compound
368 ......Metal oxide
369 ......Metal hydroxide
370 ....Contains Group IB (Cu, Ag, Au), IIB (Zn, Cd, Hg), IIIA (Al, Ga, In, Tl), IV (Ti, Zr, Hf, Ge, Sn, Pb), and VIII (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt) elemental metal or compound thereof
371 .....Elemental metal or inorganic compound thereof
372 ......Metal oxide
373 ....Group IIB metal (Zn, Cd, Hg) oxide
374 ...Chemical treating agent is a nitrogen-containing compound
375 ....Contains nitrogen atom in a heterocyclic ring
376 ....Nitrogen-containing compound has at least one nitrogen-to-nitrogen bond
377 ....Nitrogen-containing compound contains at least one nitrile or isonitrile group; or a nitrogen-to-oxygen bond which is other than as an amine or ammonium salt
378 ....Ammonia, ammonium hydroxide, or salts thereof
379 ....Organic amine
380 .....Amine contains a hydroxyl group
381 .....Three or more amine groups
382 .....Two amine groups
383 ...Chemical treating agent contains elemental oxygen or oxygen-containing compound
384 ....Oxygen compound contains at least one alcohol group
385 ....Oxygen compound contains an ether group
386 ....Oxygen compound is a carboxylic acid, ester, anhydride, or lactone thereof
387 ....Oxygen compound contains a peroxy group (-O-O-)
388 ....Specified oxygen-containing compound is air, elemental oxygen, or ozone
389 ..Solid polymer derived from reactant containing atoms other than C, H, N, Si, P, chalcogen, halogen, or an alkali or alkaline earth metal in salt form
390 ..Solid polymer derived solely from phenolic reactants wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
391 ...Mixed with ethylenically unsaturated reactant or polymer derived therefrom
392 ....Unsaturated aromatic reactant or polymer thereof
393 ...Mixed with silicon-containing reactant or polymer derived therefrom
394 ...Mixed with -O-C(=O)-O-, hal-C(=O)-O-, or hal-C(=O)-hal containing reactant or polymer derived therefrom
395 ...Mixed with -N=C=X-containing reactant or polymer therefrom (X is chalcogen)
396 ...Mixed with 1,2-epoxy containing reactant or polymer therefrom, or wherein polymer contains at least one 1,2-epoxy group

SYNTHETIC RESINS (Class 520, Subclass 1)
.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
..Solid polymer derived solely from phenolic reactants wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
397 ...Mixed with carboxylic acid or derivative reactant or polymer derived therefrom
398 ..Solid polymer derived from aldehyde, aldehyde derivative, or liquid polymer thereof as sole reactant and wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
399 ...Mixed with -N=C=X-containing reactant or polymer derived therefrom (X is a chalcogen)
400 ...Mixed with carboxylic acid or derivative reactant or polymer derived therefrom
401 ...Mixed with ethylenically unsaturated reactant or polymer derived therefrom
402 ...Solid polymer derived from aldehyde or derivative containing halogen
403 ..Solid polymer is derived from 1,2-epoxy compound containing only one 1,2-epoxy group as sole reactant and wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
404 ...Mixed with ethylenically unsaturated reactant or polymer therefrom
405 ...Mixed with aldehyde or aldehyde derivative reactant or polymer therefrom
406 ....Contains amine-, N-C(=X)-, or N-S(=O)- containing reactant (X is chalcogen)
407 ...Mixed with 1,2-epoxy reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom
408 ...Mixed with carboxylic acid or derivative or polymer derived therefrom
409 ...Solid polymer derived only from 1,2-epoxy reactants containing only C, H, and O
410 ..Solid polymer derived from hetero-O-cyclic compounds as sole reactants wherein at least one reactant contains a hetero-O-ring other than solely as a 1,2-epoxy or anhydride, and wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
411 ...Mixed with carboxylic acid or derivative reactant or polymer therefrom
412 ...Mixed with unsaturated reactant or polymer therefrom
413 ...Mixed with -O-C(=O)- or hal-C(=O)- reactant or polymer derived therefrom
414 ...Mixed with aldehyde or aldehyde derivative or polymer derived therefrom
415 ...Solid polymer derived from carboxylic acid cyclic ester, e.g., lactone, etc.
416 ..Solid polymer derived from hydrocarbon or halogenated hydrocarbon as sole reactant or mixture thereof
417 ..Solid polymer derived from heterocyclic materials as sole reactants wherein each of the heterocyclic materials contains a hetero ring other than solely as a lactam, 1,2-epoxy or carboxylic acid anhydride and wherein none of the reactants contains a plurality of methylol groups or derivatives thereof
418 ..Solid polymer derived from at least one carboxylic acid or derivative
419 ...Solid polymer derived from at least one lactam; from an amino carboxylic acid or derivative; or from a polycarboxylic acid or derivative
420 ....Solid polymer derived from an amino carboxylic acid or derivative; from a polyamine and a polycarboxylic acid or derivative; from at least one lactam; or from a polyamine salt of a polycarboxylic acid
420.5 .....Solid polymer derived from a polycarboxylic acid which is a dimer or trimer of an aliphatic acyclic monocarboxylic acid having at least ten carbon atoms or adducts of unsaturated aliphatic acyclic monocarboxylic acids, having ten carbon atoms with an alpha, beta ethylenically unsaturated carboxylic acid or derivative
421 .....Solid polymer derived from reactant containing ethylenic unsaturation
422 ......Solid polymer derived from imide reactant
423 .....Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom
424 .....Mixed with -N=C=X reactant or polymer derived therefrom (X is chalcogen)
425 .....Mixed with polycarboxylic acid or derivative and polyhydroxy reactant or polymer therefrom
426 .....Mixed with ethylenically unsaturated reactant or polymer therefrom
427 .....Mixed with aldehyde or aldehyde derivative reactant or polymer therefrom
428 ......Contains amine-, N-C(=X)-, or N-S(=O)- containing reactant or polymer thereof (X is chalcogen)
429 ......Contains phenolic reactant or polymer thereof
430 .....Mixed with a reactant containing a single 1,2-epoxy group per mole or polymer derived therefrom
431 .....Mixed with silicon containing reactant or polymer derived from

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..Solid polymer derived from at least one carboxylic acid or derivative

...Solid polymer derived from at least one lactam; from an amino carboxylic acid or derivative; or from a polycarboxylic acid or derivative

....Solid polymer derived from an amino carboxylic acid or derivative; from a polyamine and a polycarboxylic acid or derivative; from at least one lactam; or from a polyamine salt of a polycarboxylic acid

432 .....Mixed with additional polycarboxylic acid and a polyamine; amino carboxylic acid or derivative; polyamine salt of a polycarboxylic acid; lactam; or polymer derived therefrom

433 .....Mixed with O-C(=O)-O-, hal-C(=O)-, or hal-C(=O)-hal reactant or polymer derived therefrom

434 .....Solid polymer derived from hydroxyl group-containing reactant

435 .....Solid polymer derived from compound containing more than two amine groups

436 .....Solid polymer derived from compound containing more than two carboxylic acid groups or derivatives thereof

437 ....Solid polymer derived from polyhydroxy reactant and polycarboxylic acid or derivative reactant; or derived from di- or higher ester of a polycarboxylic acid as sole reactant

438 .....Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom

439 .....Mixed with O-C(=O)-O-, hal-C(=O)-O-, or hal-C(=O)-hal containing reactant or polymer derived therefrom; or wherein solid polymer is derived from a hal-C(=O)-hal, O-C(=O)-O-, or hal-C(=O)-O-, a polycarboxylic acid or derivative and a polyhydroxy reactant

440 .....Mixed with -N=C=X reactant or polymer derived therefrom (X is chalcogen); or wherein solid polymer is derived from a -N=C=X reactant and also a polycarboxylic acid or derivative and a polyhydroxy reactant

441 .....Mixed with aldehyde or aldehyde derivative reactant or polymer derived therefrom

442 ......Contains phenolic reactant or polymer thereof

443 ......Contains an amine-, N-C(=X)-, or N-S(=O)-containing reactant or polymer thereof (X is chalcogen)

444 .....Mixed with polycarboxylic acid or derivative and polyhydroxy reactant or polymer thereof

444.5 ......Solid polymer derived from or system contains a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or fattly acid derived from tall oil

445 .....Mixed with ethylenically unsaturated reactant or polymer therefrom

446 .....Mixed with silicon-containing reactant or polymer derived therefrom

447 .....Solid polymer derived from polycarboxylic acid or derivative and a polyhydroxy compound derived from reactant containing ethylenic unsaturation

448 .....Solid polymer derived from polycarboxylic acid or derivative and polyhydroxy compound is derived from two or more polycarboxylic acids or derivatives

449 ....Mixed with 1,2-epoxy reactant or polymer derived therefrom

450 ...Solid polymer derived from hydroxy-containing carboxylic acid or derivative reactant

451 ...Solid polymer derived from carboxylic acid or derivative derived from ethylenically unsaturated reactant

452 ..Solid polymer derived from -N=C=X reactant (X is chalcogen)

453 ...Solid polymer derived from -N=C=X reactant and polyhydroxy reactant

454 ....Mixed with carboxylic acid or derivative reactant or polymer derived therefrom; or with heterocyclic reactant containing more than one heterocyclic ring; or polymer therefrom

455 ....Mixed with ethylenically unsaturated reactant or polymer therefrom

456 ....Mixed with aldehyde or aldehyde derivative reactant or polymer therefrom

457 ....Mixed with -N=C=X reactant or polymer therefrom

458 .....Contains polyhydroxy reactant; or additional polymer derived from -N=C=X and polyhydroxy reactant

459 ....Solid polymer derived from -N=C=X reactant and polyhydroxy reactant also derived from polyamine reactant

460 ....Solid polymer derived from -N=C=X reactant and polyhydroxy reactant derived from polyhydroxy reactant containing an ether group

461 ..Solid polymer derived from O-C(=O)-O- or hal-C(=O)-containing reactant

462 ...Solid polymer derived from O-C(=O)-O- or hal-C(=O)-containing reactant and polyhydroxy reactant

463 ....Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom

464 ....Mixed with silicon-containing reactant or polymer derived therefrom

465 ....Mixed with aldehyde or aldehyde derivative reactant or reaction product therefrom

SYNTHETIC RESINS (Class 520, Subclass 1)

.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS

..Solid polymer derived from O-C(=O)-O- or hal-C(=O)-containing reactant

...Solid polymer derived from O-C(=O)-O- or hal-C(=O)-containing reactant and polyhydroxy reactant

466 ....Mixed with polycarboxylic acid or derivative and polyhydroxy reactants or polymer thereof; or di- or higher ester of polycarboxylic acid as sole reactant or polymer therefrom

467 ....Mixed with nitrogen-containing reactant or polymer therefrom

468 ....Mixed with ethylenically unsaturated reactant or polymer therefrom

469 ....Solid polymer derived from O-C(=O)-O- or hal-C(=O)- and polyhydroxy reactant derived from at least two polyhydroxy reactants

470 ....Solid polymer derived from O-C(=O)-O- or hal-C(=O)- reactant and polyhydroxy reactant contains an atom other than C, H, O, or halogen bonded to a C(=O) group

471 ..Solid polymer derived from ketone reactant and wherein none of the reactants forming the solid polymer contains an aldehyde group or is an aldehyde-type reactant or polymer derived therefrom

472 ..Solid polymer derived from aldehyde or aldehyde-type reactant and wherein none of the reactants forming the solid polymer contains a phenol-, amine-, -N=C=X, -N-S(=O)- or ketone group or a condensate thereof except when an amine group appears in hexamethylenetetramine or a derivative thereof (X is chalcogen)

473 ...Solid polymer derived from aldehyde or aldehyde-type reactant containing atoms other than C, H, or O and wherein when hexamethylenetetramine or derivative is a reactant, there is additionally present a reactant containing atoms other than C, H, or O

474 ..Solid polymer derived from silicon-containing reactant

475 ...Mixed with aluminum- or heavy metal-containing reactant or polymer therefrom

476 ...Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom

477 ...Mixed with silicon-containing reactant or polymer therefrom

478 ....Wherein one of said silicon materials contains Si-H bond

479 ...Mixed with ethylenically unsaturated reactant or polymer derived therefrom

480 ..Solid polymer or specified intermediate condensation product derived from at least one phenolic reactant and at least one aldehyde or aldehyde-type reactant or polymer therefrom

481 ...Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom

482 ....Phenolic-aldehyde or phenolic-aldehyde-type reaction product modified with 1,2-monoepoxide prior to mixing with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom

483 .....Contains sulfur-containing reactant or polymer therefrom

484 .....Contains nitrogen reactant or polymer therefrom

485 ....With specified material

486 .....Specified material contains nitrogen

487 ....With silicon-containing reactant or polymer derived therefrom

488 ....With carboxylic acid or derivative reactant or polymer derived therefrom

489 ....With additional aldehyde or aldehyde-type reactant or polymer therefrom which is distinct from aldehyde or aldehyde-type reactant used in forming solid polymer or SICP; or with nitrogen-containing reactant

490 ....Wherein phenolic-aldehyde or phenolic-aldehyde-type solid polymer or SICP contains nitrogen or ethylenic unsaturation

491 ...Mixed with additional aldehyde or aldehyde-type reactants which are part of a SPFI system or polymer thereof

492 ....Additional material is a hydrocarbon-aldehyde- or hydrocarbon-aldehyde-type polymer, condensate, or reactants therefrom

493 ....Additional material is ketone-aldehyde- or ketone-aldehyde-type polymer, condensate, or reactants thereof

494 .....Contains nitrogen-containing reactant or polymer therefrom

495 ....Additional material is amine-, N-C(=X)-, or N-S(=O)-containing reactant- aldehyde or -aldehyde derivative polymer, condensate, or reactants therefrom (X is chalcogen)

496 .....Contains 1,2-epoxy-containing reactant or polymer derived therefrom

497 .....Heterocyclic nitrogen reactant or polymer therefrom, e.g., melamine, etc.

498 ......-N-C(=X)-N-containing reactant or polymer, e.g., urea, etc. (X is chalcogen)

499 .....Contains sulfur reactant or polymer therefrom

500 ....Wherein the phenolic-aldehyde- or phenolic-aldehyde-type solid polymer or SICP is derived from a reactant or polymer containing an atom other than C, H, or O

	SYNTHETIC RESINS (Class 520, Subclass 1)
	.MIXING OF TWO OR MORE SOLID POLYMERS; MIXING OF SOLID POLYMER OR SICP WITH SICP OR SPFI; MIXING OF SICP WITH AN ETHYLENIC AGENT; MIXING OF SOLID POLYMER WITH A CHEMICAL TREATING OR ETHYLENIC AGENT; OR PROCESSES OF FORMING OR REACTING; OR THE RESULTANT PRODUCT OF ANY OF THE ABOVE OPERATIONS
	..Solid polymer or specified intermediate condensation product derived from at least one phenolic reactant and at least one aldehyde or aldehyde-type reactant or polymer therefrom
	...Mixed with additional aldehyde or aldehyde-type reactants which are part of a SPFI system or polymer thereof
501	....Additional phenol-aldehyde- or -aldehyde-type polymer, condensation product or reactants therefrom
501.5	...Mixed with reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil; or the reaction product of any of the above with a polycarboxylic acid or ester forming derivative and a polyhydroxy compound
502	...Mixed with unsaturated reactant or polymer derived therefrom
503	...Mixed with aldehyde or aldehyde-type chemical treating agent
504	...Mixed with nitrogen-containing chemical treating agent
505	...Mixed with sulfur-containing chemical treating agent
506	...Mixed with a boron- or polyvalent metal-containing chemical treating agent
507	...Mixed with an 1,2-epoxy-containing chemical treating agent
508	...Mixed with carboxylic acid- or derivative-containing chemical treating agent
509	..Solid polymer or SICP derived from at least one amine-, N-C(=X)- or N-S(=O)- containing reactant and at least one aldehyde or aldehyde-type reactant (X is chalcogen)
510	...Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom
511	....With specified material
512	....Amine-, N-C(=X)- or N-S(=O)-containing reactant (X is chalcogen) aldehyde or a -aldehyde-type condensation product or polymer thereof contains atoms other than C, H, O, N, or S
513	....With sulfur-containing reactant or polymer therefrom
514	....With carboxylic acid or derivative reactant or polymer derived therefrom
515	...Mixed with additional aldehyde or aldehyde-type solid polymer; or SICP; or aldehyde or aldehyde-type reactant
516	....Contains a phenolic reactant or polymer thereof
517	....Amine-, N-C(=X)- or N-S(=O)-containing reactant-aldehyde or -aldehyde-type polymer or condensation product contains atoms other than C, H, O, N, or S (X is chalcogen)
517.5	...Mixed with a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil; or the reaction product of any of the above with a polycarboxylic acid or ester forming derivative and a polyhydroxy compound
518	...Mixed with unsaturated reactant or polymer derived therefrom
519	...Mixed with carboxylic acid or derivative reactant or polymer therefrom
520	....Contains -N=C=X reactant or polymer therefrom (X is chalcogen)
521	..Solid polymer or SICP derived from at least one ketone reactant and at least one aldehyde or aldehyde derivative reactant
522	...Mixed with reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom
523	..Solid polymer contains more than one 1,2-epoxy group or is derived from reactant containing at least one 1,2-epoxy group
524	...Mixed with a reactant containing more than one 1,2-epoxy group per mole or polymer derived therefrom
525	....Wherein at least one of said 1,2-epoxy reactants or polymer derived therefrom contains atoms other than C, H, or O
526	.....Contains nitrogen atom
527	.....Contains halogen atom
528	...Mixed with -N=C=X-containing reactant or polymer therefrom
529	...Mixed with unsaturated reactant or polymer derived therefrom
530	....Wherein unsaturated reactant is a carboxylic acid or derivative or polymer derived therefrom
531	.....Wherein unsaturated reactant contains only one free carboxyl group
532	.....Contains polyol reactant or polymer derived therefrom
533	...Mixed with carboxylic acid or derivative reactant or polymer therefrom
534	..Solid polymer derived from phenolic reactant
535	..Solid polymer derived from sulfur-containing reactant
536	...Solid polymer derived from sulfur dioxide and ethylenically unsaturated reactant
537	...Solid polymer derived from alkali metal sulfide and halogenated aromatic reactant, e.g., polyarylene sulfide, etc.
538	..Solid polymer derived from phosphorus-containing reactant
539	..Solid polymer derived from at least one unsaturated reactant and at least one saturated reactant
540	..Solid polymer derived from nitrogen-containing reactant

CLASS 526 PART OF THE CLASS 520 SERIES -- SYNTHETIC RESINS OR NATURAL RUBBERS

SYNTHETIC RESINS (Class 520, Subclass 1)
59 .EFFECTING A CHANGE IN A POLYMERIZATION PROCESS IN RESPONSE TO A MEASUREMENT OR TEST
60 ..Change responsive to composition property other than density
61 ..Change responsive to pressure or temperature
62 .POLYMERIZING IN REACTOR OF SPECIFIED MATERIAL, OR IN REACTOR IN WHICH SURFACE CONTACTING POLYMERIZING MATERIAL HAS BEEN TREATED
63 .POLYMERIZING IN PRESENCE OF INERT SOLID MASSES SO AS TO HEAT, COOL, OR GRIND POLYMERIZING MASS
64 .POLYMERIZING IN TUBULAR OR LOOP REACTOR
65 .POLYMERIZING IN TWO OR MORE PHYSICALLY DISTINCT ZONES
66 ..Adding material to polymerization zone in an incremental or sequential manner
67 .REMOVING AND RECYCLING REMOVED MATERIAL FROM AN ONGOING POLYMERIZATION ZONE TO A POLYMERIZATION ZONE
68 ..Recycling monomer
69 ..Recycling catalyst
70 ..Recycling diluent
71 .REMOVING ONLY NONPOLYMERIZED OR NONPOLYMERIZABLE MATERIAL DURING POLYMERIZATION PROCESS
72 .POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING
73 ..Polymerization involving two or more specified temperature or pressure conditions
74 ..Utilizing material during polymerization to prevent or remove reactor buildup, e.g., fouling, clogging, etc.
75 ..Including step of synthesis of monomer or pre-polymer
76 ...Polymerizable material derived from petroleum fraction
77 ..Including step of purifying monomer
78 ..Adding material to an on-going polymerization reaction, said addition being other than the continuous addition of the initial charge
79 ...Adding in an incremental or sequential manner
80 ....Polymerizing in the presence of water
81 .....Added material is other than monomer per se, or composition containing monomer
82 ...Adding polymerization inhibitor or terminator, e.g., short-stopper, etc.
83 ....Added material contains nitrogen compound
84 ....Added material contains oxygen compound
85 ....Added material contains sulfur atom
86 ...Adding catalyst or catalyst component
87 ...Adding monomer
88 ..Polymerization involving specified mixing, stirring, agitating, or movement of material
89 ..Polymerizing in the presence of a specified material other than monomer
90 ...Material contains transition metal or compound thereof
91 ....In presence of water
92 .....Carbon-metal bond
93 .....Group VIII transition metal (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)
94 ......With organo-sulfur compound or organic-transition metal compound containing sulfur atom
95 ....Material contains transition metal oxide (other than peroxide)
96 .....Contains elemental transition metal or a non-oxide compound of a transition metal
97 ......Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
98 .....Contains non-metallic halogen-containing material
99 .....Contains compound containing aluminum to halogen bond and wherein the same aluminum atom is not bonded to a hydrogen or carbon atom
100 .....Contains non-metal organic N, O, S or P containing compound
101 .....Two or more transition metal oxides, at least two of said oxides being other than oxides of Ti, Zr, Hf, or Th
102 .....Contains non-transition heavy metal or compound thereof
103 .....Group VIII metal oxide (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)
104 .....Group VIB metal oxide (Cr, Mo, W)
105 ......Contains non-transition elemental metal, hydride thereof, or nontransition metal to carbon atom bond
106 ......Metal oxide is of chromium
107 .....Group IVB metal oxide (Ti, Zr, Hf)
108 ....Contains one or more elemental transition metal atoms
109 .....With peroxy compound (-O-O-)
110 .....With non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
111 ......With non-metal P, S, O, or N containing material
112 .....With transition metal compound
113 ....Two or more diverse transition metal atoms in distinct compounds or in the same compound
114 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
115 ......Contains Group VIII metal atom (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)
116 ......At least one Group IVB metal atom (Ti, Zr, Hf) and at least one Group VB meta 1 (V, Nb, Ta)
117 .....Contains Group VIII metal atom (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)
118 ....Material contains two or more different compounds of same transition metal
119 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
120 ....Material contains compound of non-transition heavy metal wherein non-transition heavy metal is not bonded to hydrogen or carbon
121 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond

SYNTHETIC RESINS (Class 520, Subclass 1)
.POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING
..Polymerizing in the presence of a specified material other than monomer
...Material contains transition metal or compound thereof
....Material contains compound of non-transition heavy metal wherein non-transition heavy metal is not bonded to hydrogen or carbon
.....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
122 ......Non-transition heavy metal compound is halogen-containing
123 ....Material contains compound of Group IA (Li, Na, K, Rb, Cs, Fr) or Group IIA (Be, Mg, Ca, Sr, Ba, Ra) metal wherein IA or IIA metal is not bonded to hydrogen or carbon
124 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
125 ......Group IA or Group IIA compound is halogen-containing
126 ....Material contains silicon atom
127 .....Contains non-transition free metal, hydride thereof, or carbon to non-transition metal atom bond
128 ......Silicon present in organic non-metal compound
129 ......Silicon present in inorganic oxygen-containing compound
130 .....Silicon present in inorganic oxygen-containing compound
131 ....Material contains boron atom
132 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
133 ......Boron compound is halogen-containing
134 .....Boron compound contains boron bonded to hydrogen or to carbon atom
135 ....With non-metal N, P, O, S, Se, Te, or halogen material other than nitrogen gas
136 .....Contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
137 ......Non-metal material is inorganic halogen-containing material
138 ......Non-metal material is inorganic oxygen-containing material
139 ......Non-metal material is organic phosphorus-containing compound
140 ......Non-metal material is organic sulfur-containing compound
141 ......Non-metal material is organic nitrogen-containing compound
142 ......Non-metal material is organic oxygen-containing compound
143 ....Non-metal organic oxygen compound is halogen-containing
144 ......Non-metal material is organic halogen-containing compound
145 .....Non-metal phosphorus-containing material
146 .....Non-metal sulfur-containing material
147 .....Non-metal nitrogen-containing material
148 ....Contains two or more diverse non-transition elemental metals, different non-transition hydride compounds, different carbon to non-transition metal compounds, or mixture thereof
149 .....At least one atom of As, Sb, or Bi, in elemental form or bonded to hydrogen or carbon atom
150 .....At least one atom of Ge, Sn, or Pb in elemental form or bonded to hydrogen or carbon atom
151 .....At least one atom of Group IIIA metal (Al, Ga, In, Tl) in elemental form or bonded to hydrogen or carbon atom
152 ......At least one atom of Group IA metal (Li, Na, K, Rb, Cs, Fr) in elemental form or bonded to hydrogen or carbon atom
153 ......Two or more Group IIIA metals in elemental form or bonded to hydrogen or carbon atom
154 ....Material contains aluminum compound wherein aluminum atom is not bonded to hydrogen or carbon atom
155 .....Contains non-transition elemental metal, hydride thereof or carbon to non-transition metal atom bond
156 ......Inorganic oxygen containing aluminum compound
157 ......Aluminum trihalide
158 ....With Group IVB transition metal compound (Ti, Zr, Hf)
159 ....Material contains non-transition elemental metal, hydride thereof, or carbon to non-transition metal atom bond
160 .....Transition metal bonded to carbon atom
161 .....Transition metal compound contains P, S, or N atom
162 .....Non-transition metal is bonded to carbon atom in compound which contains ethylenic unsaturation
163 .....Non-transition metal hydride or carbon to non-transition metal metal atom bond compound contains P, S, or N atom
164 .....Transition metal is IB, IIIB, VIIB or atomic number 58-71, 88, 90 or higher
165 .....Non-transition metal to carbon atom bond compound contains at least two atoms of same or different non-transition metal
166 .....Group IVA (Ge, Sn, Pb) or Group VA (As, Sb, Bi) metal is bonded to hydrogen or carbon atom
167 .....Elemental non-transition metal atom
168 .....Elemental carbon
169 .....Transition metal is Group VB, VIB or VIII metal
169.1 ......Transition metal is Group VIII
169.2 ......Transition metal is vanadium
169.3 .....At least one monomer is nonhydrocarbon material
170 ....Transition metal bonded to carbon atom
171 .....Transition metal is Group VIII (Fe, Co, Ni, Ru, Ph, Pd, Os, Ir, Pt)
172 ....Transition metal compound has at least one atom of P, S, N or O therein

SYNTHETIC RESINS (Class 520, Subclass 1)
.POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING
..Polymerizing in the presence of a specified material other than monomer
173 ...Material contains elemental alkali metal, hydride thereof, or alkali metal to carbon atom bond (Li, Na, K, Rb, Cs, Fr)
174 ....Contains at least two diverse alkali metal atoms, at least one of which is in the form of a free alkali metal, or in the form of a hydride, or has an alkali metal to carbon atom bond
175 ....Contains two or more separate chemical entities containing atoms of the same alkali metal, with at least one atom in elemental form, or in the form of a hydride, or has an alkali metal to carbon atom bond
176 ....Contains heavy metal atom
177 ....Contains aluminum atom
178 ....Contains boron or silicon atom
179 ....Contains phosphorus atom
180 ....Contains compound of nitrogen
181 ....Contains oxygen atom
182 ....Contains halogen atom
183 ...Material contains metal atom bonded to a carbon atom
184 ....With free oxygen or peroxy compound (-O-O-)
185 ....Metal bonded to carbon is aluminum
186 .....Contains aluminum not bonded to carbon
187 .....Contains Group IA or IIA atom
188 .....Contains heavy metal atom
189 .....Contains P, N, S, or O atom
190 ....Metal bonded to carbon atom is a heavy metal atom
191 ...Material contains elemental metal
192 ...Material contains a heavy metal atom containing organic compound
193 ...Material contains organic compound having a phosphorus atom
194 ...Material contains Si, Te, Se, or Group VIIIA atom, e.g., He, Ne, etc.
195 ...Material contains boron compound other than boron trihalide or non-metal organic complex of boron trihalide
196 ....Boron bonded to hydrogen or carbon atom compound
197 .....With free oxygen or peroxy compound
198 .....Contains P, S, or N atom other than as elemental nitrogen
199 ...Material contains polypeptide, e.g., protein, gelatin, etc.
200 ...Material contains carbohydrate, e.g., starch, sugar, etc.
201 ...Material contains previously formed normally solid polymer which is distinct from polymer to be formed and is a polymer formed from at least one ethylenic monomer
202 ....Normally solid polymer contains free alcohol group or alcoholate thereof
203 ....Normally solid polymer is formed from ethylenically unsaturated dicarboxylic acid, ester, salt, or anhydride thereof
204 ...Material contains heterocyclic compound
205 ....Sulfur and nitrogen together in a single ring
206 ...Material contains halogenated hydrocarbon wherein at least one halogen atom is other than chlorine, and mixtures of water and a halogenated hydrocarbon
207 ...Material contains water and a hydrocarbon
208 ...Material contains aldehyde or ketone or polymeric reaction product thereof, e.g., urea-formaldehyde, etc.
209 ...Material contains ether
210 ...Material contains alcohol or alcoholate
211 ....Alcohol or alcoholate has at least one atom of nitrogen or sulfur chemically combined therewith
212 ....Alcohol contains a single hydroxy group or is alcoholate thereof
213 ...Material contains carboxylic acid, salt, ester, or anhydride thereof
214 ....Derived from carboxylic acid containing at least one atom of halogen or sulfur
215 ....Derived from carboxylic acid containing at least one atom of nitrogen
216 ....Derived from aliphatic acid
217 ...Material contains organic nitrogen compound
218.1 ....Organic compound contains N=N or N-N group
219 .....Organic N-N or N=N containing compound also contains at least one S or O chemically bound therein
219.1 .....Organic N=N or N-N group containing compound contains carbocyclic group or element other than C,H, or N
219.2 .....N=N or N-N group-containing compound is a catalyst admixed with at least one other catalyst, co-catalyst, or accelerator, e.g., redox catalyst, etc.
219.3 .....Contains specified ingredient other than the N=N or N-N group containing compound, or water, or defined hydrocarbon or defined halogenated hydrocarbon
219.4 ......Ingredient contains halogenated hydrocarbon
219.5 ......Ingredient contains water, e.g., an emulsion, dispersion, etc.
219.6 .....Azobisisobutyronitrile (AIBN)
220 ....Organic nitrogen compound contains at least one S or O atom chemically bound therein
221 ...Material contains inorganic heavy metal compound
222 ...Material contains organic sulfur compound
223 ....Organic sulfur compound contains -S-S- or -O-O-group
224 ....Mercaptan
225 ....Organic compound contains hexavalent S atom, e.g., organosulfate, sulfonate, etc.

SYNTHETIC RESINS (Class 520, Subclass 1)

.POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING

..Polymerizing in the presence of a specified material other than monomer

226 ...Material contains aluminum compound other than aluminum trihalide or nonmetallic organic complex of aluminum trihalide

227 ...Material contains peroxy group compound (-O-O-)

228 ....Two or more peroxide compounds

229 ....Inorganic peroxide, e.g., persulfate, hydrogen peroxide, etc.

229.5 .....Nitrogen- or halogen-containing inorganic -O-O- compound free of sulfur, or wherein an -O-O- compound is in admixture with a compound devoid of sulfur and containing a N, halogen or P atom

230 ....Hydroperoxide

230.5 ....Peroxy carbonate

231 ....Peroxide contains halogen atom chemically combined therein

232 ....Peroxide contains an aryl group

232.1 .....Benzoyl peroxide

232.3 ....Two or more peroxy groups in same compound

232.5 ....Cycloaliphatic or ethylenically unsaturated peroxy-containing compound

233 ...Material contains elemental phosphorus or inorganic phosphorus compound

234 ...Material contains sulfur or inorganic sulfur compound

235 ...Material contains free oxygen, air, or ozone

236 ...Material contains nitrogen compound

237 ...Material contains metal halide, boron halide or organic complexes thereof, hydrogen halide, elemental halogen, or compound containing only halogen atoms

238 ....At least one monomer is nonhydrocarbon material

238.1 ..From protein or biologically active polypeptide containing monomer

238.2 ..From carbohydrate, tannin, or derivative containing monomer

238.21 ...Cellulose or derivative containing monomer

238.22 ...Starch or derivative containing monomer, e.g., starch-acrylamide, etc.

238.23 ...Mono- or di-saccharide containing monomer, e.g., allyl sucrose, etc.

238.3 ..From natural resin or derivative containing monomer

239 ..From boron containing monomer

240 ..From metal containing monomer

241 ...Transition metal containing other than Zn, Cd, or Hg

242 ..From fluorine containing monomer

243 ...Fluorine-containing monomer contains a sulfur atom

244 ...Fluorine-containing monomer is a ketone or aldehyde

245 ...Fluorine containing monomer is a mono-carboxylic acid ester

246 ....Alcohol derived portion of ester contains ether group

247 ...Fluorine containing monomer is an ether

248 ...Fluorine containing monomer contains nitrogen atom

249 ...Fluorine containing monomer contains at least one diverse halogen atom

250 ...Fluorine containing monomer contains F, C and H only or F and C only

251 ....Aromatic

252 ....Fluorine compound contains two or more ethylenic groups

253 ....Five or more fluorine atoms

254 .....Contains only carbon and fluorine atoms

255 ....Two or more fluorine atoms, e.g., vinylidene fluoride, etc.

256 ..From monomer containing sulfur atom as part of a heterocyclic ring

257 ...Sulfur-containing ring contains additional hetero atom, i.e., N, O, Se, Te

258 ..From monomer containing nitrogen atom as part of a heterocyclic ring

259 ...Nitrogen atom is part of a bridged or fused ring system

260 ...5- or 6-membered nitrogen ring compound having at least one oxygen in the ring

261 ...Three or more nitrogen atoms in a single ring

262 ...Imide monomer

263 ...Nitrogen of ring is bonded directly or indirectly to extracyclic ethylenic moiety

264 ....Lactam monomer

265 ...6-membered ring contains a single nitrogen atom

266 ..From monomer containing oxygen as part of a heterocyclic ring

267 ...Polymer contains coumarone and indene

268 ...From cyclic ether which is bridged or fused to a ring system

269 ...Hetero-oxygen ring compound contains a carbonate group, i.e., -O-C(=O)-O- as ring atoms

270 ...5-membered heterocyclic ring compound contains at least one oxygen atom

271 ....Acid anhydride

272 .....Interpolymerized with hydrocarbon monomer

273 ...3-membered heterocyclic ring contains at least one oxygen atom

274 ..From monomer containing a phosphorus atom

275 ...Phosphorus is part of a ring

276 ...Phosphorus is bonded to a nitrogen atom

277 ...Phosphorus atom is pentavalent

278 ....Pentavalent phosphorus is bonded to at least one atom of carbon

279 ..From monomer containing a silicon atom

280 ..From fused or bridged ring containing monomer

281 ...Bridged monomer

282 ....Contains an exterior ethylenic substituent bonded to a single carbon atom of the bridged ring system

283 ....Compound containing dicyclopentadiene moiety

284 ...Contains an exterior ethylenic substituent bonded directly or indirectly to a single carbon atom of the fused ring system

285 ..From monomer containing an acetylenic group

286 ..From S-containing monomer

SYNTHETIC RESINS (Class 520, Subclass 1)

.POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING

..From S-containing monomer

287 ...From monomer containing three or more oxygen atoms bonded to a single sulfur atom, e.g., sulfonate, etc.

288 ...From sulfur monomer containing nitrogen atom

289 ...From sulfide-containing monomer

290 ..Monomer from unsaturated petroleum hydrocarbon fraction; from unsaturated coal or bituminous material, extract, or derivative thereof; or from unsaturated fatty still residue

291 ..From halogen containing monomer having at least three carbon atoms

292.1 ...Halogen monomer is carboxylic acid ester

292.2 ....Contains nitrogen

292.3 ....Contains oxygen other than as part of a carboxylic acid ester group

292.4 ....Contains two or more carboxylic acid ester groups

292.5 ....Contains carbocyclic ring, e.g., aryl, etc.

292.6 ....Interpolymerized with a monomer containing atom other than carbon, hydrogen, or halogen

292.7 ....Interpolymerized

292.8 ...Halogen monomer is nitrile

292.9 ...Halogen monomer contains an ether group

292.95 ...Halogen monomer contains a carboxylic acid, salt, or carboxylic acid amide

293 ...Aromatic

294 ...Plural halogen atom

295 ...Plural ethylenic groups

296 ..From bromine or iodine containing monomer, dichloroethylene, trichloroethylene or tetrachloroethylene

297 ..From nitrile group containing monomer other than acrylonitrile or methacrylonitrile

298 ...Contains non-nitrile nitrogen atom or contains an oxygen atom

299 ...Aromatic

300 ...Plural nitrile group-containing

301 ..From monomer containing a >N-C(=O)-O- group, e.g., carbamic acid, etc.

302 ..From monomer containing a >N-C(=O)-N< or N-C(=O)-N< group, e.g., urea, etc.

303.1 ..From carboxylic acid amide-containing monomer

304 ...Contains oxygen atom other than in amide form bonded to a carbon atom

305 ...Cycloaliphatic or aromatic

306 ...Plural amide group containing

307 ...Non-amide nitrogen containing

307.1 ...N- substituted unsaturated hydrocarbon group

307.2 ...With monomer containing carboxylic acid amide group

307.3 ...With monomer containing nitrogen other than (meth)-acrylonitrile

307.4 ...With monomer containing oxygen

307.5 ....Oxygen atom is part of ether or hydroxyl group

307.6 ....Oxygen atom is part of carboxylic acid group

307.7 ....Oxygen atom is part of ester group derived from unsaturated carboxylic acid

307.8 ...With hydrocarbon monomer

308 ..From cycloaliphatic monomer

309 ...Contains atoms other than carbon and hydrogen

310 ..From nitrogen containing monomer other than acrylonitrile or methacrylonitrile

311 ...Nitrogen bonded to oxygen atom (including nitrogen containing salts)

312 ...Contains oxygen atom bonded to a carbon atom

313 ..From phenol, phenol ether, or inorganic phenolate monomer

314 ..From monomer containing a carbonate group, i.e., -O-C(=O)-O-

315 ..From aldehyde monomer

316 ..From ketone or ketene monomer

317.1 ..From carboxylic acid monomer

318 ...Carboxylic acid contains ester group

318.1 ...Carboxylic acid contains aryl group, or two or more ethylenic groups

318.2 ...Carboxylic acid contains two or more carboxyl groups

318.25 ....With hydrocarbon, vinyl chloride or vinylidene chloride monomer

318.3 ...Carboxylic acid other than acrylic or methacrylic acid

318.4 ...With ester monomer

318.41 ....Monomer contains chalcogen other than in C(=O)-O- chalcogen in any monomer)

318.42 .....Hydroxyl group

318.43 ....Monomer contains two or more ester groups

318.44 ....Two or more ester monomers

318.45 ....With hydrocarbon monomer

318.5 ...With chalcogen containing monomer, e.g., additional carboxyl monomer, etc.

318.6 ...With hydrocarbon monomer

319 ..From carboxylic acid ester monomer

320 ...Ether or hydroxy containing

321 ...Monomer containing at least two carboxylic acid ester groups

322 ....Derived from an ethylenically unsaturated alcohol

323 .....Derived from an ethylenically unsaturated acid containing plural carboxylic acid groups

323.1 ....Diester derived from an ethylenically unsaturated monocarboxylic acid and polyol

323.2 .....With additional monomer

324 ....Interpolymerized with hydrocarbon monomer

325 ....Interpolymerized with monomer of diverse carboxylic ester

326 ...Aromatic

327 ...Derived from an ethylenically unsaturated carboxylic acid and an ethylenically unsaturated alcohol

328 ...Derived from an ethylenically unsaturated carboxylic acid

328.5 ....With additional monomer

329 .....Interpolymerized with hydrocarbon monomer

329.1 ......Hydrocarbon monomer containing at least two ethylenic groups, e.g., butadiene, etc.

329.2 ......Aromatic, e.g., styrene, etc.

329.3 .....Additional monomer is acrylonitrile or methacrylonitrile

	SYNTHETIC RESINS (Class 520, Subclass 1)
	.POLYMERS FROM ONLY ETHYLENIC MONOMERS OR PROCESSES OF POLYMERIZING, POLYMERIZABLE COMPOSITIONS CONTAINING ONLY ETHYLENIC MONOMERS AS REACTANTS OR PROCESSES OF PREPARING
	..From carboxylic acid ester monomer
	...Derived from an ethylenically unsaturated carboxylic acid
	....With additional monomer
329.4	.....Additional monomer is a halogen-containing monomer
329.5	.....Additional monomer is an ester derived from saturated carboxylic acid
329.6	.....Additional monomer contains an ether group
329.7	....Polymer derived from methyl acrylate or methyl methacrylate
330	...Interpolymer of an ester derived from ethylenically unsaturated alcohol, e.g., interpolymer of vinyl acetate, etc.
331	....Interpolymerized with hydrocarbon monomer
332	..From monomer containing an ether group
333	...Plural ether groups
334	...Aromatic or plural ethylenic groups
335	..From hydrocarbon monomer containing at least two ethylenic groups, e.g., butadiene, etc.
336	...Ethylenic groups are non-conjugated, e.g., divinylbenzene, etc.
337	...Interpolymerized with at least one diverse hydrocarbon monomer containing at least two ethylenic groups
338	...Interpolymerized with non-hydrocarbon monomer
339	...Interpolymerized with aliphatic hydrocarbon
340	...Interpolymerized with aromatic hydrocarbon
340.1	...Polymerized in the presence of a water medium
340.2	...From hydrocarbon having only five carbon atoms
340.3	...From hydrocarbon having at least six carbon atoms
340.4	...Butadiene homopolymer contains at least 75% cis-1,4-configuration
341	..From acrylonitrile or methacrylonitrile
342	...Interpolymerized
343	..From vinylidene chloride
344	..From vinyl chloride
344.1	...Bulk or mass polymerization of vinyl chloride only
344.2	...Polymerization of vinyl chloride only in an aqueous medium
344.3	...Polyvinyl chloride characterized by physical shape, e.g., fiber, sheet, etc.
345	...Interpolymerized
346	..From aromatic hydrocarbon
347	...Interpolymerized
347.1	...Monomer other than styrene
347.2	...Crystalline polystyrene
348	..From hydrocarbon
348.1	...Stretched product
348.2	...At least six carbon atoms
348.3	....Ten or more carbon atoms
348.4	....Six carbon atoms only
348.5	.....N-hexene
348.6	...At least four carbon atoms
348.7	....Isobutylene
348.8	...With nonhydrocarbon monomer
351	...From propylene only
352	...From ethylene only
352.2	....Low density

SYNTHETIC RESINS (Class 520, Subclass 1)

100 .FROM REACTANT WHICH IS A CELLULAR MATERIAL DERIVED FROM PLANT OR ANIMAL SOURCE AND IS OTHER THAN DIATOMACEOUS EARTH, BLOOD, COTTON, OR FARINACEOUS FLOUR, E.G., CITRUS PULP, WALNUT SHELL FLOUR, ETC.
101 ..Animal derived, e.g., hair, leather, horn, etc.
102 ...With ethylenic reactant
103 ..Wood or wood cellulose fiber or flour
105 ...With aldehyde or derivative
200 .FROM PROTEIN OR BIOLOGICALLY ACTIVE POLYPEPTIDE REACTANT
201 ..With ethylenically unsaturated reactant
202 ...Polymerization in the presence of a specified material
203 ...With nonethylenically unsaturated reactant
204 ..With N=C=X reactant wherein X is chalcogen
205 ..With aldehyde or derivative or ketone reactant
206 ...With phenolic reactant
207 ..With carboxylic acid or derivative reactant
300 .FROM CARBOHYDRATE OR DERIVATIVE AS A REACTANT
301 ..With N=C=X reactant wherein X is chalcogen
302 ...Oxyalkylated carbohydrate
303 ..With phenolic reactant
304 ..With ketone reactant other than as a ketose
305 ..With aldehyde or derivative as a reactant other than as an aldose
306 ...Ethylenically unsaturated reactant
309 ...Nitrogen-containing reactant
310 ..With phosphorus-containing reactant
311 ..With di- or higher ester of polycarboxylic acid; or with polycarboxylic acid or derivative and a compound containing two or more hydroxyl groups or salts thereof as reactants
312 ..With nitrogen-containing reactant
313 ..Ethylenically unsaturated reactant
314 ...Unsaturated carboxylic acid or derivative reactant
315 ...With heterocyclic reactant other than carbohydrate
400 .FROM LIGNIN, TANNIN, OR DERIVATIVE REACTANT
401 ..With N=C=X reactant wherein X is chalcogen or polyepoxide reactant
403 ..With phenolic reactant
500 .FROM COAL OR BITUMINOUS MATERIAL, EXTRACT OR DERIVATIVE THEREOF, OR FATTY STILL RESIDUE REACTANT
501 ..With polyepoxide reactant or N=C=X reactant wherein X is chalcogen
503 ..With phenolic reactant or aldehyde reactant
600 .FROM NATURAL RESIN OR DERIVATIVE REACTANT EXCLUDING TALL OIL OR DERIVATIVE
601 ..With polyepoxide reactant
602 ..With phenolic reactant
603 ...With ethylenically unsaturated reactant
604 ..With polycarboxylic acid or derivative and a compound having two or more hydroxyl groups as reactants

SYNTHETIC RESINS (Class 520, Subclass 1)

1 .FROM PLANT MATERIAL OF UNKNOWN CONSTITUTION

2 ..From cashew material with a sulfur-containing reactant

3 ..From cashew material with an aldehyde or derivative

4 .FROM BORON REACTANT HAVING AT LEAST ONE BORON TO HYDROGEN OR BORON TO CARBON BOND

5 ..Boron reactant contains a silicon atom

6 ..Boron reactant contains a phosphorus atom

7 ..Boron reactant contains a nitrogen atom

8 ..Boron reactant contains a boron atom bonded to at least one atom of oxygen

9 .FROM HEAVY METAL OR ALUMINUM REACTANT HAVING AT LEAST ONE HYDROGEN-TO-HEAVY METAL OR -ALUMINUM BOND OR AT LEAST ONE CARBON-TO-HEAVY METAL OR -ALUMINUM BOND

10 .FROM SILICON REACTANT HAVING AT LEAST ONE SILICON-TO-HYDROGEN OR -CARBON BOND

12 ..Polymerizing in the pressence of a specified material other than a reactant

13 ...Material is a boron-containing material

14 ...Material is a metal-containing material

15 ....Material contains a Group VIII metal atom

16 ....Material contains a Group IIIA metal

17 ....Material contains a Group IVB metal atom

18 ....Material contains a Group IVA metal atom

19 ....Material contains a heavy metal atom

20 ...Material contains an alcohol, alcoholate, or ether compound

21 ...Material is a nitrogen-containing compound

22 ....Nitrogen-containign silicon compound

23 ...Material contains a phosphorus or sulfur atom

24 ...Material contains a compound having an O-O group, e.g., peroxide, etc.

25 ..With organic silicon-free reactant

26 ...Organic Si-free reactant is a carboxylic acid or derivative

26.5 ....Reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

27 ...Organic Si-free reactant contains a heterocyclic ring

28 ...Organic Si-free reactant is a nitrogen-containing compound

29 ...Organic Si-free reactant is an alcohol or alcoholate

30 ..From silicon-containing reactant having at least one polyvalent atom other than carbon, oxygen, or nitrogen

31 ..Silicon reactant contains a silicon-to-hydrogen bond

32 ..Silicon reactant contains an ethylenically unsaturated group

33 ..Silicon reactant contains two or more silicon atoms

34 ...With silicon reactant containing a single silicon atom

35 ...Silicon reactamt contains only carbon atom, only a carbon chain, or chain of carbon and oxygen atoms only between two silicon atoms

36 ...Silicon reactant contains at least one halogen atom bonded to a carbon atom which carbon atom is not an acyl halide carbon atom

37 ...Reactant contains a silicon atom as a ring member of a cyclic compound

38 ..Silicon reactant contains an amine nitrogen atom

39 ..With silicon reactant which is free of any silicon to carbon bond

40 ..Silicon reactant contains a fused, bridged, or cycloaliphatic ring

41 ..Silicon containing carboxylic acid or derivative or from a silicon derivative of a nonsilicon containing carboxylic acid

42 ..Silicon reactant contains at least one halogen atom bonded to a carbon atom which carbon atom is not an acyl halide carbon atom

43 ..Silicon reactant contains an aryl group

44 .FROM REACTANT HAVINC AT LEAST ONE -N=C=X GROUP (WHEREIN X IS A CHALCOGEN ATOM) AS WELL AS PRECURSORS THEREOF, E.G., BLOCKED ISOCYANATE, ETC.

45 ..From at least one blocked -N=C=X group

48 ..Process of polymerizing in the presence of a specified material other than reactant

49 ...Material contains only one -C-XH,-C-C(=X)-XH or carbon to -NH or HNH group

50 ...Material contains compound having a -O-O- group, e.g., peroxide, etc.

51 ...Material contains a phosphorus atom

52 ...Material is organic nitrogen-containing compoud

53 ....Organic nitrogen compound contains a nitrogen atom bonded to three atoms or carbon

54 .....Nitrogen compound wherein nitrogen atom is bonded to three atoms of carbon contains a bridged- or fused-ring system, e.g., triethylene diamine, etc.

55 ...Material contains at least one metal atom

56 ....Material contains a transition metal atom

57 ....Material contains at least one group IA or group IIA metal atom

58 ....Material contains at least one atom of tin

59 ..From N=C=X reactant having at least two -C-NH-C(=X)- groups

60 ...With reactant compound containing three or more XH, -C(=X)-XH, -NH, =NH, or HNH groups or combination thereof

61 ...With organic nitrogen reactant which contains two NH, =NH, or HNH groups

62 ....Organic NH, =NH, or HNH nitrogen-containing reactant contains a heterocyclic ring

63 ....Organic NH, =NH, HNH nitrogen reactant contains at least one halogen atom

64 ....Organic NH, =Nh or HNH nitrogen reactant contains a carbocyclic or aromatic ring

65 ...With reactant having two -XH groups

SYNTHETIC RESINS (Class 520, Subclass 1)

.FROM REACTANT HAVING AT LEAST ONE -N=C=X GROUP (WHEREIN X IS A CHALCOGEN ATOM) AS WELL AS PRECURSORS THEREOF, E.G., BLOCKED ISOCYANATE, ETC.

..From N=C=X reactant having at least two -C-NH-C(=X)- groups

...With reactant having two -XH groups

66 ....Reactant having two -XH groups contains two or more -C-X-C- groups or two or more carboxylic acid ester groups

67 ..From two or more reactants containing -N=C=X groups

68 ..With organic compound reactant containing at least two NH, HNH or =NH groups and wherein the reactant composition is devoid of -C-XH, -C(=X)XH or anhydride

69 ..Reactant contains a single -N=C=X group

70 ..Reactant contains a fluorine atom

71 ..Reactant contains at least one salt group, e.g., quaternary ammonium salt, etc.

72 ..Reactant contains at least one phosphorus atom

73 ..Reactant contains at least one heterocyclic ring

74 ..Reactant contains at least one bridged- or fused-ring system

74.5 ..Reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

75 ..Reactant contains at least one ethylenically unsaturated group

76 ..With ether or thioether compound containing at least two -C-X-C- groups

77 ...Ether or thioether compound contains three or more -XH groups

78 ...Ether or thioether contains at least one nitrogen atom other than as a C-NH, C=NH, or C-N(H)-H

79 ...Ether or thioether contains a carbocyclic or aromatic group

80 ..With reactant compound containing at least two -C-C(=X)-X-C groups and which compound is devoid of C-NH, C=NH or C-N(H)-H groups

81 ...Reactant compound which contains at least two -C-C(=X)-X-C groups contains three or more XH groups

82 ...Reactant which contains at least two -C-C(=X)-X-C groups contains tertiary nitrogen atom

83 ...Reactant which contains at least two -C-C(=X)-X-C groups has been derived from only a dicarboxylic acid or derivative and only a dihydric alcohol or alcoholate derivative

84 ..With reactant containing at least two -C-C(=X)-X groups

85 ..With reactant containing at least two -XH groups

86 .FROM PHENOL, PHENOL ETHER, OR INORGANIC PHENOLATE

87 ..From 1,2-epoxy-containing phenolic reactant or with 1,2-epoxy-containing reactant

88 ...Polymerizing in the presence of a specified material other than reactant

89 ....Material contains a phosphorus atom

90 ....Material contains a sulfur atom

91 ....Material contains a boron atom

92 ....Material contains a polyvalent metal atom

93 ....Material contains a nitrogen compound

94 .....Nitrogen material contains a nitrogen atom as part of a heterocyclic ring

95 ....Material contains a Group IA metal atom (Li, Na, K, Rb, Cs, Fr)

96 ...Phenolic reactant contains a heterocyclic group other than a 1,2-epoxy group per se

97 ...Phenolic reactant contains a fused-or bridged-ring other than as a 1,2-epoxy group fused to carbocyclic or aromatic ring

98 ...Phenolic reactant contains at least three distinct aromatic or carbocyclic rings or mixtures thereof

99 ...Phenolic reactant contains at least one nitrogen, phosphorus, or sulfur atom

100 ...Phenolic reactant contains a carboxylic acid or carboxylic acid derivative thereof

101 ...Phenolic reactant contains ethylenic unsaturation or contains a 1,2-epoxy group fused to a carbocyclic ring

102 ...Phenolic reactant contains a halogen atom directly bonded to a nuclear carbon atom of the aryl-oxygen group

103 ...Two or more 1,2-epoxy reactants

103.5 ....1,2-epoxy reactant having at least one carboxylic ester group, e.g., epoxidized linseed oil, etc.

104 ...Two or more phenolic reactants

105 ...Phenolic reactant contains only one, 1,2-epoxy group

106 ...With at least one nonepoxy or nonphenolic reactant

107 ....Non-1,2-epoxy or nonphenolic reactant is an aldehyde or derivative

108 ....Non-1,2-epoxy, or nonphenolic reactant is a phosphorus-containing material

109 ....Non-1,2-epoxy, or nonphenolic reactant is a sulfur-containing material

110 ....Non-1,2-epoxy, or nonphenolic reactant is an alcohol, inorganic alcoholate, or ether

111 .....Nitrogen-containing alcohol, inorganic alcoholate, or ether

111.3 ....Non 1,2-epoxy or nonphenolic reactant which is a dimer or trimer of an ethylenically unsaturated aliphatic monocarboxylic acid having at least ten carbon atoms; or adduct of said unsaturated monocarboxylic acid with an alpha, beta ethylenically unsaturated carboxylic acid or derivative

111.5 ....Non 1,2-epoxy or nonphenolic reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

SYNTHETIC RESINS (Class 520, Subclass 1)
.FROM PHENOL, PHENOL ETHER, OR INORGANIC PHENOLATE
..From 1,2-epoxy-containing phenolic reactant or with 1,2-epoxy-containing reactant
...With at least one nonepoxy or nonphenolic reactant
112 ....Non-1,2-epoxy or nonphenolic reactant is a carboxylic acid, salt thereof, or carboxylic acid anhydride
113 .....With nitrogen-containing reactant
114 .....Nitrogen-containing carboxylic acid, salt thereof, or anhydride, or nitrogen-containing salt of a non-nitrogen-containing carboxylic acid
115 .....At least two carboxylic acids, salts thereof, or carboxylic acid anhydrides, or mixtures thereof
116 ....Non-1,2-epoxy or nonphenolic reactant contains a heterocyclic ring
117 .....Five-membered heterocyclic ring contains at least one nitrogen atom as a ring member
118 .....Six-membered heterocyclic ring contains at least one nitrogen atom as a ring member
119 ....Non-1,2-epoxy or nonphenolic reactant contains one or more nitrogen atoms
120 .....Two or more nitrogen-containing reactants
121 .....Nitrogen reactant contains at least one amino-nitrogen atom
122 ......Nitrogen reactant having at least one amino-nitrogen atom contains a cycloaliphatic ring
123 ......Nitrogen reactant having at least one amino-nitrogen atom contains three or more nitrogen atoms
124 ......Nitrogen reactant having at least one amino-nitrogen atom contains at least one aryl group
125 ..From ketone-containing phenolic reactant or with ketone-containing reactant
126 ...Polymerizing in the presence of a specified material other than reactant
127 ...With nonketone- or nonphenolic-aldehyde or derivative as a reactant
128 ...With nonphenolic or nonketone reactant
129 ..With aldehyde or derivative
137 ...Polymerizing in the presence of a specified material other than a reactant
138 ....Material contains a boron atom
139 ....Material contains an aluminum or heavy metal atom
140 ....Material contains a Group IIA metal atom (Be, Mg, Ca, Sr, Ba, Ra)
141 ....Material contains a phosphorus atom
142 ....Material contains an alcohol, inorganic alcoholate, or ether
143 ....Material contains a sulfur atom
144 ....Material contains a carboxylic acid, anhydride thereof, ester thereof, or salt thereof
145 ....Material contains a nitrogen compound
146 .....Nitrogen-containing material contains a nitrogen atom directly bonded to a carbon atom
147 ....Material contains a Group IA metal atom (Li, Na, K, Rb, Cs, Fr)
148 ...Phenolic reactant contains a carboxylic acid or carboxylic acid salt group
149 ...Phenolic reactant contains a nitrogen atom
150 ...Phenolic reactant contains a sulfur atom
151 ...Phenolic reactant contains a halogen atom directly bonded to a nuclear carbon atom of the benzene-oxygen group
152 ...Phenolic reactant contains an ethylenically unsaturated group
153 ...Phenolic reactant contains at least two ring moieties (includes fused or bridged ring system)
154 ...Phenol ether
155 ...Two distinct phenolic reactants or two or more hydroxy groups or phenate groups bonded to nuclear carbon atoms of the same benzene ring
156 ...Two or more aldehydes or derivatives
157 ...Aldehyde or derivative is ethylenically unsaturated
158 ...With at least one nonaldehyde phosphorus- or sulfur-containing reactant
158.5 ...With a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil
159 ...With an ethylenically unsaturated reactant
160 ...With reactant having only carbon and hydrogen atoms or only carbon, hydrogen, and halogen atoms
161 ...With at least one reactant which is other than an aldehyde or derivative and which contains a carboxylic acid, anhydride thereof, salt thereof, or ester thereof
162 ...With nitrogen-containing reactant
163 ....Nitrogen-containing reactant is a heterocyclic ring compound containing at least one nitrogen atom as a ring member or is nitrogen-containing aromatic compound
164 ....Nitrogen-containing reactant contains the -N-C(=O)-N- group
165 ...Aldehyde or derivative is sole coreactant
166 ..Aluminum- or heavy metal-containing reactant
167 ..Phosphorus-containing reactant
168 ...Nitrogen-containing reactant
169 ...Halogen-containing reactant
170 ..Imide-containing reactant
171 ..Sulfur reactant contains sulfur directly bonded to oxygen
172 ...Nitrogen-containing compound is a reactant other than wherein nitrogen is solely present as a carboxylic acid derivative
173 ...Carboxylic acid or derivative is a reactant
174 ...Halogen-containing material is a reactant
175 ....Reactant contains a (O=)S(=O)-halo group

SYNTHETIC RESINS (Class 520, Subclass 1)
.FROM PHENOL, PHENOL ETHER, OR INORGANIC PHENOLATE
176 ..With polycarboxylic acid or derivative as reactant
179 ...Polymerizing in the presence of a specified material other than a reactant and other than Group IA or Group IIA material as sole metal atom
180 ....Material contains a metal atom
181 .....At least one transition metal atom
182 ....Material is a nitrogen-containing compound
183 ...Nitrogen reactant contains at least one amino-nitrogen atom
184 ....Nitrogen reactant having at least one amino-nitrogen atom contains a carboxylic acid group or is a derivative thereof
185 ....Phenolic reactant contains at least two aryl rings and two diverse phenolic to oxygen bonds
186 ....Nitrogen reactant contains at least three amino-nitrogen atoms bonded to one or more carbon atoms
187 .....At least one reactant contains three or more carboxylic acid groups or is derivative thereof
188 ....Reactant contains three or more carboxylic acid groups or is derivative thereof
189 .....Two or more polycarboxylic acids or derivatives or mixtures thereof
190 ...Reactant contains a fused- or bridged-ring other than solely as a polycarboxylic acid anhydride group
191 ...Reactant contains a halogen atom other than solely as halogen atom bonded to a carbonyl group
192 ...Ethylenically unsaturated reactant
193 ...Two or more phenolic reactants
194 ...Two or more polycarboxylic acids or derivatives as reactants
195 ...Reactant is a nonphenolic compound having at least two hydroxyl groups or salts thereof
196 ..With reactant having halo-C(=O)-halo, halo-C(=O)-O-, or -O-C(=O)-O- group
198 ...Polymerizing in the presence of a specified material other than a reactant and other than Group IA or Group IIA material as sole metal atom
199 ....Material is a nitrogen-containing compound
200 ....Material contains a metal atom
201 ...Fused- or bridged-ring-containing reactant other than solely as a polycarboxylic acid anhydride group
202 ...Reactant contains a halogen atom other than solely as halogen bonded to a carbonyl group
203 ...Reactant contains a nitrogen atom
204 ...Two or more phenolic reactants
205 ..Ethylenically unsaturated reactant
206 ..Phenolic reactant contains at least one carboxylic acid group or is derivative thereof
207 ...Polymerizing in the presence of a specified material other than a reactant and other than Group IA or Group IIA material as sole metal atom
208 ...Nitrogen-containing reactant
209 ...With nonphenolic compound having at least two hydroxyl groups or salts thereof as reactant
210 ..Phenolic reactant contains a nitrogen atom
211 ..With nitrogen-containing reactant
212 ..Phenolic reactant contains a single phenolic -OH group or a single inorganic phenolate thereof
214 ...Polymerizing in the presence of a specified material other than a reactant and other than Group IA or Group IIA material as sole metal atom
215 ....Material is a nitrogen-containing compound
216 .....Nitrogen-containing material is a heterocyclic compound containing at least one nitrogen atom as a ring member
217 ....Material contains a metal atom
218 ...Two or more phenolic reactants each of which contains a single -OH group or inorganic phenolate group, or with a compound containing a single ether oxygen atom bonded to two discrete aryl rings
219 ..Phenolic reactant contains two or more phenolic -OH groups, or two or more inorganic phenolate groups, or mixtures thereof
220 .FROM KETONE OR KETENE REACTANT
222 ..Polymerizing in the presence of a specified material other than a reactant
223 ...Material contains a phosphorus or sulfur atom
224 ...Material contains a nitrogen-containing compound
225 ...Material contains a boron or polyvalent metal atom
226 ..With sulfur-containing reactant
227 ..With aldehyde or derivative thereof as reactant
228 ..With nitrogen-containing reactant
229 ...Nitrogen-containing reactant contains an amine group
230 .FROM ALDEHYDE OR DERIVATIVE THEREOF AS REACTANT
232 ..Polymerizing in the presence of a specified material other than a reactant
233 ...Material contains a metal atom
234 ....Material contains a transition metal atom
235 .....Transition metal atom is a Group VIII metal atom
236 ....Material contains a heavy metal atom
237 .....Heavy metal is a Group IVA metal atom (Ge, Sn, Pb)
238 ....Material contains an aluminum atom
239 ....Material contains a Group IA metal atom (Li, Na, K, Rb, Cs, Fr)
240 ...Material contains a boron atom
241 ....Boron trihalide or organic complex thereof
242 ...Material contains a phosphorus or sulfur atom
243 ...Material contains nitrogen as part of a nitrogen-containing compound
244 ..Fluorine- or phosphorus-containing reactant
245 ..From glyoxal or compound having two or more -C(=O)-H groups per se

SYNTHETIC RESINS (Class 520, Subclass 1)

.FROM ALDEHYDE OR DERIVATIVE THEREOF AS REACTANT

245.3 ..With a polycarboxylic acid reactant which is a dimer or trimer of an ethylenically unsaturated aliphatic monocarboxylic acid having at least ten carbon atoms; or adduct of said unsaturated monocarboxylic acid with an alpha, beta ethylenically unsaturated carboxylic acid or derivative

245.5 ..With a reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil

246 ..Ethylenically unsaturated reactant other than unsaturation solely in heterocyclic ring containing only oxygen as hetero atom

247 ..With hydrocarbon or halogenated hydrocarbon reactant

248 ..With heterocyclic reactant which is not an aldehyde or derivative

249 ...Nonaldehyde or nonaldehyde derivative heterocyclic compound contains an oxygen atom as a ring member of the heterocyclic compound

250 ....Heterocyclic compound contains a 1,2-epoxy ring

251 ...Nonaldehyde or nonaldehyde derivative heterocyclic compound contains a sulfur atom as a ring member of the heterocyclic compound

252 ...Nonaldehyde or nonaldehyde derivative heterocyclic compound contains only two nitrogen atoms as ring members of the heterocyclic compound

253 ...Nonaldehyde or nonaldehyde derivative heterocyclic compound contains two or more heterocyclic rings and includes shared hetero atoms in a fused or bridged ring system

254 ...Nonaldehyde or nonaldehyde derivative heterocyclic reactant contains a six-membered ring having three nitrogen and three carbon atoms as ring members

255 ....Sulfur-containing heterocyclic compound having three nitrogen and three carbon atoms

256 ....With reactant containing >NC(=O)- or >N-C(=S)- group, e.g., urea, etc.

257 ....With reactant containing at least one noncyclic carbon atom bonded to at least three atoms of nitrogen, e.g., dicyanodiamide, etc.

258 ....Six-membered heterocycle is other than melamine per se or methylol derivative thereof

259 ..With >N-C(=X)-N< -containing reactant wherein X is a chalcogen atom

260 ...Two or more >N-C(=X)-N< -containing reactants

261 ...At least one reactant is a nonaldehyde or nonaldehyde derivative, non- >N-C(=X)-N< -containing reactant

262 ....Nonaldehyde reactant, non->N-C(=X)-N< reactant contains a nitrogen atom

263 .....Non- >N-C(=X)-N< nitrogen reactant is an organic compound containing two or more amino groups

264 ...>N-C(=X)-N< reactant is other than urea or thiourea per se

265 ..Sulfur-containing reactant

266 ..With nonaldehyde or nonaldehyde derivative nitrogen-containing compound

267 ...Nitrogen-containing nonaldehyde or nonaldehyde derivative contains a nitrile group

268 ...Nitrogen-containing nonaldehyde or nonaldehyde derivative contains three or more nitrogen atoms bonded to the same carbon atom, e.g., dicyanodiamide, etc.

269 ...Nitrogen-containing nonaldehyde or nonaldehyde derivative contains a single organic amine group

270 ..From aldehyde or aldehyde derivative as sole reactant (includes copolymer of only aldehydes or aldehyde derivatives)

271 .FROM CARBOXYLIC ACID OR DERIVATIVE THEREOF

272 ..From di- or higher ester of a polycarboxylic acid as sole reactant, or from a polycarboxylic acid or derivative with a compound containing two or more hydroxyl groups or salts thereof

274 ...Polymerizing in the presence of a specified material other than reactant

275 ....Material contains a metal atom

276 .....Metal atom in elemental form

277 .....Material contains a transition metal atom

278 ......Metal atom has atomic number of 57-71, or 89 and higher

279 ......Material contains a Group IVB metal atom (Ti, Zr, Hf)

280 ......Material contains a Group VIII metal atom (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir, Pt)

281 .....Material contains a Group IIB metal atom (Zn, Cd, Hg)

282 .....Material contains a Group IIIA metal atom (Al, Ga, In, Tl)

283 .....Material contains a Group IVA metal atom (Ge, Sn, Pb)

284 ......Material contains a lead atom

285 .....Material contains a Group VA metal atom (As, Sb, Bi)

286 ....Material contains a phosphorus atom

287 ...Phosphorus-containing reactant

288 ...Nitrogen-containing reactant

289 ....Final product contains nitrogen atom as a member of a heterocyclic ring

290 ....Sulfur-containing reactant

291 ....Nitrogen-containing polyhydroxy compound or salt of a nitrogen-containing polyhydroxy compound

292 ....Nitrogen-containing polycarboxylic acid or nitrogen-containing polycarboxylic acid derivative

293 ...Sulfur-containing reactant

294 ....Sulfur-containing polyhydroxy compound or salt of a sulfur-containing polyhydroxy compound

295 ....Sulfur-containing aryl compound

	SYNTHETIC RESINS (Class 520, Subclass 1)
	.FROM CARBOXYLIC ACID OR DERIVATIVE THEREOF
	..From di- or higher ester of a polycarboxylic acid as sole reactant, or from a polycarboxylic acid or derivative with a compound containing two or more hydroxyl groups or salts thereof
295.3	...Polycarboxylic acid reactant which is a dimer or trimer of an ethylenically unsaturated aliphatic monocarboxylic acid having at least ten carbon atoms; or adduct of said unsaturated monocarboxylic acid with an alpha, beta ethylenically unsaturated carboxylic acid or derivative
295.5	...Reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil
296	...Reactant contains three or more carboxylic acid groups or is derivative thereof
297	...1,2-epoxy containing reactant
298	...Fused- or bridged-ring-containing reactant other than solely as cyclic acid anhydride group
299	...Halogen-containing reactant other than solely as halogen atom bonded to a carbonyl group
300	...Polyhydroxy-containing compound or salt thereof having an ether-oxygen atom as reactant
301	....Acyclic ether-oxygen compound
302	...Two or more carboxylic acid or derivatives or mixtures thereof
303	....Ethylenically unsaturated carboxylic acid or ethylenically unsaturated derivative
304	.....Aryl-containing carboxylic acid or derivative of an aryl-containing carboxylic acid
305	....Each of the carboxylic acids or derivatives contains an aryl group
306	...Ethylenically unsaturated carboxylic acid or derivative of an ethylenically unsaturated carboxylic acid
307	...Cycloaliphatic ring-containing reactant (other than aryl)
308	...Aryl-containing carboxylic acid or derivative of an aryl-containing dicarboxylic acid
308.1	....Polyethylene Terephthalate per se
308.2	.....Physically after-treated solid polymer
308.3	.....Processes of preparing
308.4	......In presence of hydrocarbon, steam or water
308.5	......At least two claimed distinct temperature or pressure gradients
308.6	....Contains terephthalic acid or substituted forms thereof
308.7	.....Derived from at least two reactants simultaneously containing a C-OH group
308.8	.....Processes of preparing
309.1	......At least two claimed distinct temperature or pressure gradients
310	..From imide- or lactam-containing compound, or from an amino-nitrogen-containing carboxylic acid, or derivative of an amino-nitrogen-containing carboxylic acid
312	...Polymerizing in the presence of a specified material other than reactant
313	....Material contains a phosphorus or sulfur atom
314	....Material contains a nitrogen atom as a ring member of a heterocyclic ring other than where nitrogen heterocycle is solely part of a lactam ring
315	....Material is a nitrogen-containing compound other than a lactam
316	....Material is a ketone, aldehyde, or derivative
317	....Material is an alcohol, ether, or inorganic alcoholate
318	....Material is a carboxylic acid, acyl halide thereof, ester thereof, or lactone thereof
319	....Material contains a polyvalent metal atom
320	....Material contains a silicon atom
321	...Phosphorus- or sulfur-containing reactant
322	...Imide-containing reactant
323	...Lactam-containing reactant
324	....With two or more reactants one of which is a carboxylic acid or derivative and one of which is an organic compound containing at least two amino-nitrogen atoms
325	....Two or more lactam reactant or with an amino-containing carboxylic acid or derivative of an amino-containing carboxylic acid
326	....Lactam reactant contains 3-5 or 12 or more carbon atoms in the lactam ring
327	...Heterocyclic reactant or a reactant which contains a nitrogen atom bonded directly to another nitrogen atom
328	...From N-C-(C=O)-OH containing reactant or acid derivative thereof, e.g., alpha amino acid, etc.
329.1	...With two or more reactants one of which is a carboxylic acid or derivative thereof which is devoid of an amine group and one reactant which is a polyamine which is devoid of a carboxylic acid group or carboxylic acid derivative group
330	...Cycloaliphatic ring-containing reactant
331	...Aryl-containing reactant
332	..With organic amine, or from organic amine salt of a carboxylic acid
335	...From dicarboxylic acid or derivative thereof and an organic amine, or from an organic amine salt of a dicarboxylic acid
336	....Polymerizing in the presence of a specified material
337	....Phosphorus- or sulfur-containing reactant
338	....From at least two dicarboxylic acids or derivatives or mixtures thereof and at least two organic polyamines
339	....From at least two dicarboxylic acids or derivatives or mixtures thereof

SYNTHETIC RESINS (Class 520, Subclass 1)
.FROM CARBOXYLIC ACID OR DERIVATIVE THEREOF
..With organic amine, or from organic amine salt of a carboxylic acid
...From dicarboxylic acid or derivative thereof and an organic amine, or from an organic amine salt of a dicarboxylic acid
....From at least two dicarboxylic acids or derivatives or mixtures thereof
339.3 .....Polycarboxylic acid reactant which is a dimer or trimer of an ethylenically unsaturated aliphatic monocarboxylic acid having at least ten carbon atoms; or adduct of said unsaturated monocarboxylic acid with an alpha, beta ethylenically unsaturated carboxylic acid or derivative
339.5 .....Reactant which is a fatty acid glycerol ester, a fatty acid or salt derived from a naturally occurring glyceride, tall oil, or a fatty acid derived from tall oil
340 ....From at least two organic polyamines
341 ....Heterocyclic-containing reactant other than cyclic acid anhydride as sole hetero ring
342 ....From reactant containing at least three amino-nitrogen-containing groups or with a carboxylic acid containing at least three carboxylic acid groups or deivatives thereof
343 ....Carboxylic acid containing (C=O)-(C=O) or is a derivative thereof, e.g., oxalic acid, etc.
344 ....Bridged- or fused-ring-containing reactant other than as anhydride fused to a nonfused- or bridged-ring system
345 ....Ethylenically unsaturated reactant
346 ....Cycloaliphatic ring-containing reactant
347 ....Aryl ring-containing reactant
348 .....All reactants contain at least one aryl ring
349 ....Reactant contains three carbon atoms directly bonded to a single carbon atom
350 ...From carboxylic acid having three or more carboxylic acid groups or derivatives thereof, and an organic amine, or from an organic amine salt of a tri-or higher carboxylic acid
351 ....Polymerizing in the presence of a specified material other than a reactant
352 ....Phosphorus- or sulfur-containing reactant
353 ....Carboxylic acid contains at least four carboxylic acid groups or is a derivative of a carboxylic acid containing at least four carboxylic groups
354 ..From compound having -C-C(=O)-O-C- group as part of a heterocyclic ring, e.g., lactone, etc.
355 ...Polymerizing in the presence of a specified material other than a reactant
356 ....Material contains a phosphorus or sulfur atom
357 ....Material contains a metal atom
358 .....Material contains a Group IA (Li, Na, K, Rb, Cs, Fr) or Group IIA metal atom (Be, Mg, Ca, Sr, Ba, Ra)
359 ...Heterocyclic ring compound is a four-membered ring containing one oxygen and three carbon atoms -C-C(=O)-O-C-
360 ..From sulfur-containing carboxylic acid
361 ..From ether, metal alcoholate, or alcohol group-containing carboxylic acid; or from a derivative of a carboxylic acid which derivative contains an ether, metal alcoholate, or alcohol group
362 ..From organic nitrile group-containing compound
363 ..With nitrogen-containing reactant
364 ..With sulfur-containing reactant
365 ..With reactant containing at least one cyclic ether group
366 ...Contains a single 1,2-epoxy group
367 .FROM REACTANT HAVING A NITROGEN ATOM DIRECTLY BONDED TO THE CARBON ATOM OF A CARBONYL GROUP, I.E., N-C(=O)-
368 ..Polymerizing in the presence of a specified material other than a reactant
369 ..N-C(=O)-OH containing reactant or ester, salt, anhydride, or acyl halide thereof
370 .FROM REACTANT HAVING A HALOGEN ATOM OR OXYGEN SINGLE BONDED TO A CARBONYL GROUP, E.G., HALO-C(=O)-, -O-C(=O)-O, ETC.
371 ..Polymerizing in the presence of a specified material other than a reactant
372 ..Reactant contains a halogen atom directly bonded to a carbon atom of a carbonyl group, i.e., halo-C(=O)-
373 .FROM SULFUR-CONTAINING REACTANT
374 ..From mercaptan or mercaptide-containing reactant
375 ...Two or more mercaptan or mercaptide reactants, or mixture thereof, or with additional reactant-containing sulfur
376 ...With ethylenically unsaturated reactant
377 ..From heterocyclic compound containing a sulfur atom as a ring member
378 ...Polymerizing in the presence of a specified material other than a reactant
379 ....Material contains a Group IA (Li, Na, K, Rb, Cs, Fr) or Group IIA metal atom (Be, Mg, Ca, Sr, Ba, Ra)
380 ...Heterocyclic reactant contains a ring composed solely of carbon atoms and a single sulfur atom
381 ..From inorganic sulfur-containing reactant
382 ...Sulfur dioxide is a reactant
383 ....Polymerizing in the presence of a specified material other than a reactant
384 .....Material contains a metal atom
385 .....Material is free oxygen, peroxide, air, or ozone
386 ....With reactant containing only hydrogen and carbon atoms
387 ...Carbon disulfide or hydrogen sulfide is reactant

SYNTHETIC RESINS (Class 520, Subclass 1)
.FROM SULFUR-CONTAINING REACTANT
..From inorganic sulfur-containing reactant
388 ...Inorganic sulfur reactant contains at least one metal atom or contains an ammonium ion
389 ...Elemental sulfur is reactant
390 ..From organic reactant containing a -C(=S)-group
391 ..From organic reactant containing a sulfur to oxygen bond, e.g., -S(=O), etc.
392 .POLYMER OF AN ETHYLENICALLY UNSATURATED REACTANT WITH A SATURATED REACTANT
393 ..At least one reactant contains a three-membered heterocyclic ring having two carbon and one oxygen atoms, e.g., oxirane, etc.
394 .FROM BORON-CONTAINING REACTANT
395 .FROM ALUMINUM- OR HEAVY METAL-CONTAINING REACTANT
396 .FROM HYDROCARBON REACTANT
397 .FROM HALOGENATED HYDROCARBON REACTANT
398 .FROM PHOSPHORUS-CONTAINING REACTANT
399 ..Phosphorus reactant contains a nitrogen atom
400 ..With alcohol or alcoholate reactant
401 .FROM FLUORINE-CONTAINING REACTANT
402 ..Fluorine reactant contains a heterocyclic ring having a -C-O-C- group as part of the hetero ring atoms
403 .FROM HETEROCYCLIC REACTANT CONTAINING AS RING ATOMS OXYGEN, SELENIUM OR TELLURIUM, E.G., EPOXY, ETC.
405 ..With reactant which is devoid of a heterocyclic ring containing oxygen, selenium or tellurium atoms as ring members
406 ...Heterocyclic reactant contains at least two heterocyclic rings having oxygen, selenium or tellurium as ring members
407 ....Reactant which is devoid of a heterocyclic ring containing oxygen, selenium or tellurium as ring atoms, contains at least one nitrogen atom
408 ..Polymerizing in the presence of a specified material other than a reactant
409 ...Material contains a metal atom
410 ....Material contains a transition metal atom
411 .....Material contains a Group IVB metal atom (Ti, Zr, Hf)
412 .....Material contains a Group VIII metal atom (Fe, Co, Ni, Pd, Ru, Os, Ir, Rh, Pt)
413 ....Material contains a Group IIA metal atom (Be, Mg, Ca, Sr, Ba, Ra)
414 ....Material contains a Group IIB metal atom (Zn, Cd, Hg)
415 .....Material contains at least two diverse metal atoms either in the same compound or in different compounds
416 ....Material contains a Group IIIA metal atom (Al, Ga, In, Tl)
417 ..Reactant contains a single hetero-atom in a ring and at least three carbon atoms, e.g., oxetane, etc.
418 ..Reactant contains two or more rings each of said rings having a single oxygen and two carbon atoms
419 ..Two or more heterocyclic reactants containing rings of one oxygen and two carbon atoms
420 ..Reactant has a three-membered ring of oxygen and two carbon and contains a nitrogen atom
421 ..Reactant has a three-membered ring containing oxygen and two carbon atoms, i.e., 1,2-epoxy
422 .NITROGEN-CONTAINING REACTANT
423 ..Reactant contains nitrogen as a ring member of a heterocyclic ring
424 ...Heterocyclic nitrogen-containing ring contains a single atom of nitrogen and two atoms of carbon as ring members
425 .FROM ORGANIC OXYGEN-CONTAINING REACTANT
480 .TREATING POLYMER CONTAINING MATERIAL OR TREATING A SOLID POLYMER OR A RESINIFIABLE INTERMEDIATE CONDENSATION PRODUCT
481 ..Treating at 0 Deg C (32 Deg F) or below, or at 200 Deg C (392 Deg F) or above
482 ..Contacting with ion exchange material or solid sorbent
483 ..Contacting with exteriorly produced specified gaseous agent other than drying, blanket, or carrier gas
484 ..Preventing or removing reactor or processing equipment buildup
485 ..Contacting with aluminum or heavy metal material
486 ..Contacting with carboxylic acid, salt, or anhydride thereof
487 ..Contacting with sulfur or phosphorus-containing material
488 ..Contacting with alkali (Li, Na, K, Rb, Cs, Fr) or alkaline earth (Be, Mg, Ca, Sr, Ba) metal or compound thereof
489 ...Oxide or hydroxide
490 ..Contacting with specified element or with specified inorganic compound other than water, elemental nitrogen, air and the inert gases (Group VIII A)
491 ..Contacting with organic material
492 ...Nitrogen containing
493 ...Aldehyde or ketone
494 ...Ether
495 ...Alcohol
496 ....Contains one to four carbon atoms
497 ...Hydrocarbon
498 ....Acyclic
499 ..Contacting with water
500 ...Steam stripping or steam distilling
501 ..With distilling or pressured reduction step to remove material, e.g., flashing, autorefrigeration, etc.
502 ..Physical treatment
503 ..Temperature maintaining, heating or cooling

CLASS 530 CHEMISTRY, NATURAL RESINS OR DERIVATIVES; PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF

IN THIS SERIES OF CLASSES, CLASS 530 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

200 NATURAL RESINS OR DERIVATIVES (E.G., WOOD OR PINE TAR; CATIVO RESIN DERIVATIVES, ETC.)
201 .Shellac containing starting material used in process, or product thereof (e.g., lac, sticklac, seedlac, flake shellac, bleached shellac, etc.)
202 .Cut wood starting material used in process, or product thereof (e.g., using pine stumps, chips, bark, etc., as starting material)
203 .Plant sap or fossil starting material used in process, or product thereof (e.g., using copal, coal, amber, dammar, etc., as starting material)
204 ..Pine oleoresin starting material used in process, or product thereof (e.g., using gum turpentine, pine gum, pine resin, etc., as starting material)
205 .Recovery of tall oil or derivatives from papermaking waste, purification of tall oil, or separation of components of tall oil; or product thereof (e.g., separation of rosin, fatty acids, sterols, etc.; decolorizing, etc.)
206 ..Organic sulfur or nitrogen containing material used in the process, or product thereof
207 ..Esterification used in the process, or product thereof
208 ..Inorganic material used in the process, or product thereof (e.g., using sulfuric acid, boric acid, etc.)
209 ...Phosphorus or heavy metal containing material, elemental hydrogen, sulfur dioxide, or carbon dioxide used in the process, or product thereof
210 .Rosin or derivative used as starting material in process, or product thereof (e.g., using gum rosin, wood rosin, solid tall oil rosin, etc.)
211 ..Polymerization or product thereof (e.g., dimer rosin, etc.)
212 ...Chemical treatment or color modification of polymerized rosin or derivative, or product thereof (e.g., hydrogenation or esterification of polymerized rosin; removal of color bodies from polymerized rosin, etc.)
213 ..Boron or phosphorus containing material used in the process, or product thereof
214 ..Diels-Alder adducts (e.g., of maleic anhydride, fumaric acid, etc., with conjugated dienes, such as rosin acids, terpenes, etc.)
215 ..Esterification of rosin or derivative via carboxyl group, or product thereof
216 ...Chemical treatment or color modification of esterified rosin or derivative, or product thereof (e.g., partial saponification of rosin triglycerides; removal of color bodies from rosin esters, etc.)
217 ...Oxygen containing ring or halogen containing material used in the esterification, or product thereof (e.g., using alkylene oxides, polysaccharides, alkyl halides, etc.)
218 ...Polyhydroxy material used in the esterification, or product thereof (e.g., forming ester gum, etc.)
219 ..Sulfur, selenium, or tellurium containing material used in the process, or product thereof (e.g., disproportionation of rosin, etc.)
220 ...The sulfur, selenium, or tellurium containing material is inorganic
221 ..Nitrogen containing material used in the process, or product thereof
222 ...The nitrogen containing material is inorganic
223 ..Hydrogenation or product thereof (e.g., forming dihydro rosin acids; rosinyl alcohol or derivatives; etc.)
224 ..Metal containing material used to form salts of rosin acids, or product thereof
225 ...Alkali metal containing material (i.e., Li, Na, K, Rb or Cs)
226 ..Heat treatment of rosin or derivative in the absence of nonrosin organic reactants, or product thereof (e.g., forming rosin oil; disproportionated, dehydrogenated, or isomerized rosin; etc.)
227 ...Metal, halogen, or silicon containing material used in the process, or product thereof (e.g., using clay, zeolites, etc.)
228 ..Purification process or product thereof
229 ...Immiscible solvents used in the process, or product thereof
230 .Tall oil or derivative used as starting material in process, or product thereof (e.g., metal salts of tall oil fatty acids; tall oil pitch, etc.)
231 ..Nitrogen containing material used in the process, or product thereof
232 ..Esterification of tall oil acids, or product thereof
233 ..Sulfur, boron, phosphorus, or iodine containing material used in the process, or product thereof
300 PEPTIDES OF 3 TO 100 AMINO ACID RESIDUES
301 .Thymopoietin or Lipotropin; related peptides
302 .Endorphin and Enkephalin; related peptides
303 .Insulin; related peptides
304 ..Metal complexes, e.g., Zn-insulin, etc.
305 ..Isolation or purification
306 .Corticotropin (ATCH); related peptides
307 .Calcitonin; related peptides
308 .Glucagon; related peptides
309 .Secretin or gastrin; related peptides
310 .Gramicidin or Tyrocidin; related peptides
311 .Somatostatin (SRIF); related peptides
312 .Melanotropin (MSH) or eledoisin; related peptides

PEPTIDES OF 3 TO 100 AMINO ACID RESIDUES
313 .Lutenizing hormone releasing factor (LRF); related peptides
314 .Bradykinin; kallidin; related peptides
315 .Oxytocin; vasopressin; related peptides
316 .Angiotensin; related peptides
317 .Cyclic peptides
318 ..The cyclisation occurring through the 4-amino radical of 2,4-diamino-butanoic acid
319 ...Polymyxin; related peptides
320 ..Bacitracin; related peptides
321 ..Containing only normal peptide links in the ring, i.e., homodetic cyclic peptides
322 .Peptides containing saccharide radicals, e.g., bleomycins, etc.
323 .Peptides with at least one nonpeptide bond other than a disulfide bond joining two or more sequences of amino acid residues, e.g., homomeric heterodectic peptide other than cyclic disulfide, depsipeptides, etc.
324 .25 or more amino acid residues in defined sequence
325 .24 amino acid residues in defined sequence
326 .15 to 23 amino acid residues in defined sequence
327 .11 to 14 amino acid residues in defined sequence
328 .8 to 10 amino acid residues in defined sequence
329 .6 to 7 amino acid residues in defined sequence
330 .4 to 5 amino acid residues in defined sequence
331 .Tripeptides, e.g., tripeptide thyroliberin (TRH), melanostatin (MIF), etc.
332 .Containing at least one abnormal peptide link, e.g., gamma peptide bonded, etc.
333 .Synthesis of peptides
334 ..Polymer supported synthesis, e.g., solid phase synthesis, Merrifield synthesis, etc.
335 ..Protecting or removing protective groups, e.g., carboxyl group protection, etc.
336 ...Of side chain or sulfur containing group
337 ...Of amino group
338 ..Solution phase synthesis
339 ...Segment condensation, e.g., Ugi condensation, etc.
340 ...With phosphorus containing material
341 ...With use of carbonimide or imidiazole
342 ...Mixed anhydride synthesis
343 ..By hydrolysis
344 .Separation or purification
345 .Chemical aftertreatment, e.g., acylation, methylation, etc.
350 PROTEINS, I.E., MORE THAN 100 AMINO ACID RESIDUES
351 .Lymphokines, e.g., interferons, interlukins, etc.
352 .Phosphoproteins, e.g., phosvitin, vitellogenin, etc.
353 .Scleroproteins, e.g., fibroin, elastin, silk, etc.
354 ..Gelatin
355 ...Separation, purification or synthesis
356 ..Collagen
357 ..Keratin
358 .Nucleoproteins, e.g., chromatin, chromosomal proteins, histones, protamines, salmine, etc.
359 .Lipoproteins, e.g., egg yolk proteins, cylomicrons, etc.
360 .Casein or caseinate
361 ..Separation, purification or synthesis
362 .Albumin
363 ..Serum albumin, e.g., BSA, HSA, etc.
364 ...Separation, purification or synthesis
365 ..Lactalbumin, e.g., milk source, etc.
366 ...Separation, purification or synthesis
367 ..Ovalalbumin, e.g., avidin, conalbumins, etc.
368 ...Separation, purification or synthesis
369 ..Separation, purification or synthesis
370 .Plant proteins, e.g., derived from legumes, algae or lichens, etc.
371 ..Derived from fungi, e.g., yeasts, mushroom, etc.
372 ..Derived from grain, e.g., prolamines, etc.
373 ...Zein
374 ...Gluten or gliadin
375 ...Derived from wheat
376 ...Derived from corn
377 ..Derived from oil seed, e.g., cotton seed, rapeseed, sunflower, etc.
378 ...Derived from soybean
379 ..Derived from leafy green plants, e.g., alfalfa pollen, etc.
380 .Blood proteins or globulins, e.g., proteoglycans, platelet factor 4, thyroglobulin, thyroxine, etc.
381 ..Blood coagulation factors and fibrin, e.g., thromboplastin, etc.
382 ...Fibrin or fibrin intermediates, e.g., fibrinogen, etc.
383 ...Blood coagulation factor VIII, AHF
384 ...Blood coagulation factor II or factor II + VII + IX + X, i.e., prothrombin complex or factor
385 ..Hemoglobins or globins
386 ..Globulins
387 ...Immunoglobulins, antibodies, or binding proteins
388 ....Immunoglobulin or antibody fragments, e.g., Fab, Fc, Bence-Jones protein, etc.
389 ....After treatments including a chemical reaction
390 .....Sulfur containing reactant
391 .....Nitrogen containing reactant
392 ...Alpha globulins, e.g., ceruloplastin, haptoglobins, etc.
393 ....Antithrombin III
394 ...Beta globulins, e.g., transferrin, etc.
395 .Glycoprotein, e.g., mucins proteoglycans, etc.
396 ..Lectins, e.g., concanavalin, hemagglutinin, etc.
397 ..Glycoprotein hormones
398 ...Gonadatropins
399 .Hormones, e.g., prolactin, thymosin, growth factors, etc.
400 .Metal containing, e.g., chromoproteins, ferritin, ferredoxins, etc.
401 ..Cytochromes, e.g., chlorophyl, orgotein, etc.
402 .Chemical modification or the reaction product thereof, e.g., covalent attachment or coupling, etc.
403 ..Protein is identified as an antigen, e.g., immunogenic carriers, etc.
404 ...Sulfur containing reactant
405 ...Nitrogen containing reactant

	PROTEINS, I.E., MORE THAN 100 AMINO ACID RESIDUES
	.Chemical modification or the reaction product thereof, e.g., covalent attachment or coupling, etc.
	..Protein is identified as an antigen, e.g., immunogenic carriers, etc.
406	...Oxygen containing reactant
407	..Hydrolysis of protein
408	..Sulfur containing reactant
409	..Nitrogen containing reactant
410	..Oxygen containing reactant
411	...Oxygen containing is saccharide
412	.Separation or purification
413	..Immunological separation or affinity chromatography
414	..Ultra filtration or osmosis
415	..Selective absorbtion, e.g., Ca phosphate sorbents, etc.
416	...Ion exchange
417	...Chromatography or by septum selective as to material, e.g., gel filtration, molecular sieve dialysis, etc.
418	..Precipitation
419	...With added material
420	....Inorganic
421	....Polymeric, e.g., polyethylene glycol, etc.
422	..Solvent extraction
423	...Oxygenated material
424	....Alcohol
425	....Carboxyl containing
426	...Hydrocarbon or halogenated hydrocarbon
427	..Physical treatment
500	LIGNINS OR DERIVATIVES
501	.Aldehyde, ketone or ozone reacted with a lignin or lignin containing substance, or product thereof
502	.Compound which includes phenolic hydroxy or oxygen containing hetero ring reacted with a lignin or lignin containing substance, or product thereof
503	.Hydrogenation of a lignin or lignin containing substance, or product thereof
504	.Carboxylic acid anhydride, or a compound having halogen bonded directly to acyclic carbon by nonionic bonding, reacted with a lignin or lignin containing substance, or product thereof
505	.Compound containing nitrogen attached directly or indirectly to carbon by nonionic bonding reacted with a lignin or lignin containing substance, or product therof
506	.Heavy metal, aluminum, silicon or phosphorus containing
507	.Processes utilizing an organic solvent or a compound having alcoholic hydroxy bonded directly to an acyclic carbon, or product thereof

CLASS 532 PART OF THE CLASS 532 - 570 SERIES -- ORGANIC COMPOUNDS

1 ORGANIC COMPOUNDS
(This subclass presently has no patents. It is intended to be the generic subclass for the 532-570 series of class when Class 260 is abolished. It does have a glossary of terms used in that serie).

CLASS 534 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 534 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)

7 .Noble gas containing (i.e., He, Ne, Ar, Kr, Xe, or Rn containing)

10 .RADIOACTIVE METAL CONTAINING (At. No. 43, 61 or 84+; or radioactive isotope of another metal)

11 ..Actinide series metal (At. No. 89+)

12 ...Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl containing, etc.)

13 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

14 ..Technetium containing (At. No. 43; Tc)

15 .RARE EARTH METAL CONTAINING (At. No. 21, 39, 57-60 or 62-71)

16 ..Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens

550 .Diazoamino (e.g., triazenes, etc.)

551 ..Hetero ring containing

552 ..Chalcogen or additional nitrogen bonded directly to the diazoamino group

553 ..Noncarbon atom double or triple bonded and the diazoamino group bonded directly to the same acyclic carbon

554 ..Plural benzene rings bonded directly to the diazoamino group

555 ..Processes

556 .Diazooxide or diazotate (e.g., -N=N-O-, etc.)

557 ..Sulfur attached directly to a ring by nonionic bonding

558 .Diazo or diazonium (e.g., -N=N-C, etc.)

559 ..With preservative or stabilizer

560 ..Hetero ring containing

561 ..Plural diazo or diazonium groups

562 ..Heavy metal or aluminum containing

563 ..Polycyclo ring system having at least three cyclos

564 ..Aldehyde or ketone group containing

565 ..Formation of diazonium group

566 .Azoxy

567 ..Hetero ring containing

568 ..Azodioxy

569 ..Heavy metal or aluminum containing

570 ..Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)

571 ...Stilbene containing

572 ..Formation of azoxy group

573 .Azo

574 ..Quaternary azo group containing

575 ..Specified crystalline form

576 ..With preservative or stabilizer

577 ..Liquid crystal (e.g., pleochroic, etc.)

578 ..Formation of azo group by oxidative coupling

579 ..Formation of azo group by simultaneous diazotization and coupling

580 ..Formation of azo group from diazoamino group

581 ..Formation of azo group by coupling diazonium compound with coupling component in presence of an additional organic compound

582 ..Formation of azo group by coupling diazonium compound with coupling component at a specified pH range

583 ..Formation of azo group by coupling diazonium compound with coupling component in presence of ammonia, a Group IIA light metal hydroxide or a Group IA or IIA light metal phosphate

584 ..Formation of azo group by coupling diazonium compound with coupling component in other than stoichiometric proportions

585 ..Formation of azo group by reduction of nitro group

586 ..Formation of azo group from group having nitrogen single bonded to nitrogen

587 ..Formation of azo group directly from nitrogen containing compound by process other than diazotization and coupling

588 ..Process utilizing azo compound as reactant

589 ...Formation of quaternary ammonium or hydrazinium group

590 ...Ring formation

591 ...Formation of -C(=X)HNH group, wherein X is chalcogen (substitution may be made for hydrogen only)

592 ...Formation of sulfonamide group

593 ...Additional reactant containing phosphorus or sulfur

594 ....Sulfonic acid group formed or added to the azo reactant (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)

595 ...Formation of -C(=X)X- ester group, wherein the X's may be the same or diverse chalcogens

596 ...Etherification of hydroxy group

597 ...Replacement of halogen by cyano group

598 ...Replacement of halogen by amino nitrogen

599 ...Hydrolysis

600 ...Reduction of nitro or nitrogen oxide group

601 ...Nitration

602 ...Metallization of the azo reactant in presence of an additional organic compound

603 ..Quaternary ammonium or hydrazinium attached indirectly to an azo group by nonionic bonding

604 ...Hetero ring containing

605 ....The pentavalent nitrogen is a ring member

606 .....Azo bonded directly to a hetero ring or to a polycyclo ring system having a hetero ring as one of the cyclos

607 ......The hetero ring contains the pentavalent nitrogen

608 ....Plural azo groups in the same azo moiety attached indirectly to each other by nonionic bonding

609 ....Acyclic carbon bonded directly to the azo group

610 ....Additional hetero ring or polycyclo ring system having a hetero ring as one of the cyclos bonded directly to the azo group

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)
.Azo
..Quaternary ammonium or hydrazinium attached indirectly to an azo group by nonionic bonding
...Hetero ring containing
....The pentavalent nitrogen is a ring member
.....Azo bonded directly to a hetero ring or to a polycyclo ring system having a hetero ring as one of the cyclos
......The hetero ring contains the pentavalent nitrogen
611 ....The hetero ring is one of the cyclos in a polycyclo ring system
612 .....Acyclic -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the hetero ring by nonionic bonding
613 ...Heavy metal or aluminum containing
614 ...Plural azo groups attached indirectly to each other by nonionic bonding
615 ...Plural nitrogens bonded directly to the same alkylene chain (e.g., diamino alkylene, etc.)
616 ..Nitrogen oxide, other than as nitro or nitroso, containing
617 ..Fiber- or substrate-reactive azo compound
618 ...Formazan containing (i.e., HNH-N=CH-N=NH, wherein substitution may be made for hydrogen only)
619 ...Heavy metal or aluminum containing
620 ....Halogen attached directly to a hetero ring or to an alicyclic ring by nonionic bonding
621 .....Stilbene containing
622 .....The hetero ring is six-membered and contains at least two nitrogens
623 ......Diverse azo moieties bonded to the same metal
624 ......At least two such hetero rings attached indirectly to each other by nonionic bonding
625 ......Plural azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
626 ......Chalcogen or carbon bonded directly to the six-membered hetero ring and is between the hetero ring and the azo group
627 ......Plural halogens attached directly to the hetero ring by nonionic bonding
628 ......Diverse hetero ring containing
629 ....Alkylene, alkenyl or alkenylene bonded directly to sulfonyl or sulfonamide, which sulfonyl or sulfonamide is between a ring and the alkylene, alkenyl or alkenylene
630 ...Halogen attached directly to a hetero ring or to an alicyclic ring by nonionic bonding
631 ....Stilbene containing
632 ....The hetero ring is six-membered and contains at least two nitrogens
633 .....Polycyclo ring system having the hetero ring as one of the cyclos
634 .....At least two such hetero rings attached indirectly to each other by nonionic bonding
635 .....Additional hetero ring containing
636 ......Pyrazole containing (including hydrogenated)
637 .....Plural azo groups attached indirectly to each other by nonionic bonding
638 .....The hetero ring and benzene ring, to which an azo group is bonded directly, bonded directly to the same nitrogen
639 ...Aziridine containing (including unsaturated)
640 ...Alkylene, alkenyl, alkenylene, alkynyl or alkynylene attached directly or indirectlyto a ring by nonionic bonding
641 ....Alkylene, alkenyl or alkenylene bonded directly to sulfonyl or sulfonamido, which sulfonyl or sulfonamido is between a ring and the alkylene, alkenyl or alkenylene
642 .....The alkylene, alkenyl or alkenylene and the ring are both bonded directly to the same sulfonyl group
643 ....Alkylene, alkenyl or alkenylene bonded directly to carboxamido, urea or -C(=X)-, wherein X is chalcogen, which group is between a ring and the alkylene, alkenyl or alkenylene
644 ....Alkylene, alkenyl or alkenylene and a ring bonded directly to the same chalcogen or to plural chalcogens which are bonded directly to each other
645 ..Plural sulfonyl groups bonded directly to same amino nitrogen (e.g., sulfonylaminosulfonyl, etc.)
646 ..Sulfonyl and carbonyl bonded directly to the same amino nitrogen (e.g., sulfonylaminocarbonyl, etc.)
647 ..Plural amino nitrogens bonded directly to the same sulfonyl (e.g., aminosulfonylamino, etc.)
648 ..Alkyl, having at least eight carbons specified, or plural alkyl chains, each having at least five carbons specified, bonded directly to a ring, which ring is attached directly or indirectly to an acyclic carbon chain, which chain is bonded directly to a urea or carboxamide nitrogen that is between the chain and an additional ring
649 ..Alkyl chain having at least eight carbons specified bonded directly to a ring
650 ..Sulfonyl or -C(=X)-, wherein X is chalcogen, between a ring and an alkyl chain having at least eight carbons specified
651 ...The sulfonyl or -C(=X)- is bonded directly to the ring
652 ..Formazan containing (i.e., HNH-N=CH-N=NH, wherein substitution may be made for hydrogen only)
653 ..Polycyclo carbocyclic ring system having at least three cyclos
654 ...The polycyclo ring system consists of three six-membered cyclos and has plural oxygens bonded directly thereto
655 ....Hetero ring containing
656 ....At least two such ring systems having plural oxygens bonded directly thereto
657 ...The polycyclo ring system has no azo group bonded directly thereto

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)
.Azo
..Polycyclo carbocyclic ring system having at least three cyclos
658 ...Chalcogen double bonded directly to the polycyclo ring system
659 ..Bicyclo carbocyclic ring system consisting of a six-membered ring and a five-membered ring (e.g., indane, etc.
660 ..Hydroxy and carbonyl of -COO- bonded directly to a monocyclic benzene ring (H or hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a metal)
661 ...Heavy metal or aluminum containing
662 ....Hetero ring containing
663 ....Plural azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
664 ...Hetero ring containing
665 ....Azo bonded directly to the hetero ring or to a polycyclo ring system which contains the hetero ring as one of the cyclos
666 ...At least three azo groups attached indirectly to each other by nonionic bonding
667 ....Plural monocyclic benzene rings, each having hydroxy and carbonyl of -COO- bonded directly thereto
668 ....Additional monocyclic benzene ring having plural hydroxy groups, hydroxy and nitrogen, or plural nitrogens bonded directly thereto, wherein the nitrogen is other than as nitro, nitroso or azo
669 ....Additional -C(=X)-, wherein X is chalcogen
670 ...Two azo groups attached indirectly to each other by nonionic bonding
671 ....Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)
672 .....Plural monocyclic benzene rings, each having hydroxy and carbonyl of -COO- bonded directly thereto
673 .....Additional -C(=X)-, wherein X is chalcogen
674 ...Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)
675 ....Azo attached indirectly to the monocyclic benzene ring by nonionic bonding
676 ..Plural -HNH groups or -OH and -HNH bonded directly to a monocyclic benzene ring (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)
677 ...Plural azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
678 ....Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)
679 .....Plural monocyclic benzene rings, each having -OH and -HNH or plural -HNH groups bonded directly thereto
680 .....Exactly three azo groups attached indirectly to each other by nonionic bonding
681 ...Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by a substituted or unsubstituted ammonium ion or metal)
682 ..Plural hydroxy groups or esters thereof bonded directly to a monocyclic benzene ring (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or metal)
683 ...Azo bonded directly to the benzene ring
684 ....Heavy metal or aluminum containing
685 ....At least three azo groups attached indirectly to each other by nonionic bonding
686 .....Hetero ring containing
687 .....Plural monocyclic benzene rings, each having plural hydroxy groups or esters thereof bonded directly thereto
688 ....Two azo groups attached indirectly to each other by nonionic bonding
689 ..Stilbene containing
690 ...Heavy metal or aluminum containing
691 ...Hetero ring containing
692 ..Heavy metal or aluminum containing
693 ...Amine salt
694 ...Arsenic containing
695 ...Azo moiety and moiety which contains acyclic -CH=N- group bonded to the same metal
696 ...Diverse azo moieties bonded to the same metal
697 ....Hetero ring containing
698 .....Hetero ring in each azo moiety
699 ....Plural azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
700 ...Azo bonded directly to an acyclic carbon which is bonded directly to two acyclic carbons, each of which is double or triple bonded to an atom
701 ...Hetero ring containing
702 ....Polycyclo ring system containing the hetero ring as one of the cyclos
703 .....Azo bonded directly to the polycyclo ring system
704 ......The azo group is attached indirectly in the same azo moiety to an additional azo group or to an acyclic chain which contains a -CH=N- group by nonionic bonding
705 ......Plural ring nitrogens in the polycyclo ring system
706 ......Quinoline or isoquinoline containing (including hydrogenated)
707 ....Azo bonded directly to the hetero ring
708 .....At least three azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
709 .....Two azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
710 .....Pyrazole (including hydrogenated)
711 ......Sulfonyl bonded directly to a ring
712 ....Additional chalcogen bonded directly to the sulfonyl
713 ...Benzene ring containing

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)
.Azo
..Heavy metal or aluminum containing
...Benzene ring containing
714 ....At least three azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
715 .....Plural monocyclic benzene rings attached directly to each other by nonionic bonding and are between azo groups
716 ....Two azo groups in the same azo moiety attached indirectly to each other by nonionic bonding
717 .....Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)
718 ......Plural monocyclic benzene rings attached directly or indirectly to each other by acyclic nonionic bonding and are between the azo groups
719 .....Plural monocyclic benzene rings attached directly or indirectly to each other by acyclic nonionic bonding and are between the azo groups
720 ....Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)
721 .....Nitrogen bonded directly to the -C(=X)- group (e.g., carboxamide, etc.)
722 ....Plural bicyclo carbocyclic ring systems bonded directly to the azo group
723 ....Sulfonyl bonded directly to amino nitrogen (e.g., sulfonamide, etc.)
724 ....Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of -OH may be replaced by the ammonium ion or a metal)
725 .....Amino nitrogen containing
726 ..Boron or silicon containing
727 ..Phosphorus attached indirectly to an azo group by nonionic bonding
728 ..Amine salt
729 ..Chain containing at least fifteen alkylene oxide groups
730 ..Sulfonic acid ester group containing
731 ...Hetero ring containing
732 ..Nitrogen, other than as azo, and chalcogen or -C(=X)X- bonded directly to a -C(=X)- group, wherein the X's may be the same or diverse chalcogens (e.g., carbamic, allophanic, etc.)
733 ...Hetero ring cntaining
734 ..Halogen bonded directly to sulfur or to a -C(=X)- group, wherein X is chalcogen
735 ..Containing acyclic -XCN or -NCX, wherein X is chalcogen (e.g., thiocyanato, isocyanato, etc.)
736 ..Thiosulfuric acid group containing (-S-(O=)S(=O)-OH, wherein H of the -OH may be replaced by the ammonium ion or Group IA or IIA light metal)
737 ..Cyano and carbon bonded directly to acyclic nitrogen
738 ..Acyclic chain which contains -CH=N- (substitution may be made for hydrogen only)
739 ..Azo bonded directly to an acylic carbon which is bonded directly to two acyclic carbons, each of which is double or triple bonded to an atom
740 ...Hetero ring or polycyclo ring system which contains a hetero ring as one of the cyclos bonded directly to an azo group
741 ...Hetero ring attached indirectly to an azo group by nonionic bonding
742 ....The acyclic carbon, to which the other two acyclic carbons are bonded, is between the hetero ring and the azo group
743 ...At least three azo groups attached indirectly to each other by nonionic bonding
744 ...Two azo groups attached indirectly to each other by nonionic bonding
745 ....Each azo group is bonded directly to an acyclic carbon which is bonded directly to two acyclic carbons, each of which is double or triple bonded to an atom
746 .....Plural benzene rings bonded directly to each other and are between the azo groups
747 ......Each benzene ring is bonded directly to an azo group
748 .....Plural amino nitrogens bonded directly to a benzene ring which is between the azo groups
749 ...Sulfonyl bonded directly to nitrogen
750 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly by nonionic bonding to the acyclic carbon to which the other two acyclic carbons are bonded
751 ..Hetero ring containing
752 ...Polycyclo ring system having a hetero atom shared by at least two rings or at least two hetero atoms which are not members of the same ring
753 ...Azo bonded directly to the hetero ring or to a polycyclo ring system which contains the hetero ring as one of the cyclos
754 ....At least three azo groups attached indirectly to each other by nonionic bonding
755 .....Additional hetero ring or polycyclo ring system which contains a hetero ring as one of the cyclos bonded directly to an azo group
756 ....Two azo groups attached indirectly to each other by nonionic bonding
757 .....Additional hetero ring or polycyclo ring system which contains a hetero ring as one of the cyclos bonded directly to an azo group
758 ......Both hetero rings or polycyclo ring systems are between the azo groups
759 ......Plural monocyclic benzene rings, each bonded directly to an azo group, are between the azo groups
760 ....The benzene rings are bonded directly to each other
761 .....Both azo groups are bonded directly to the hetero ring or to the polycyclo ring system
762 .....Polycyclo ring system having at least three cyclos, at least one of which is a hetero ring
763 .....Bicyclo carbocyclic ring system
764 .....Additional ring bonded directly to the hetero ring or to the polycyclo ring system

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)
.Azo
..Hetero ring containing
...Azo bonded directly to the hetero ring or to a polycyclo ring system which contains the hetero ring as one of the cyclos
765 ....Additional hetero ring or polycyclo ring system which contains a hetero ring as one of the cyclos bonded directly to the azo group
766 .....The hetero ring is six-membered and contains nitrogen (e.g., pyridine, etc.)
767 ......The hetero ring contains at least two nitrogens (e.g., pyrimidine, etc.)
768 ......The hetero ring is in a bicyclo ring system (e.g., quinoline, benzomorpholine, etc.)
769 .....Pyrazole (including hydrogenated)
770 ....The hetero ring is six-membered and consists of one nitrogen and five carbons (e.g., pyridine, etc.)
771 .....Acyclic oxygen bonded directly to the hetero ring
772 ......Plural acyclic chalcogens bonded directly to the hetero ring at the two positions adjacent to the ring nitrogen
773 .....Plural acyclic nitrogens, other than as nitro, nitroso or azo, bonded directly to the hetero ring at the two positions adjacent to the ring nitrogen
774 ....Additional hetero ring attached indirectly to the azo group by nonionic bonding
775 .....The additional hetero ring or a polycyclo ring system which contains the additional hetero ring as one of the cyclos is bonded directly to a ring, which ring is between the azo group and the additional hetero ring
776 .....A ring and the additional hetero ring or a polycyclo ring system which contains the additional hetero ring as one of the cyclos are bonded directly to the same nitrogen
777 .....The additional hetero ring or a polycyclo ring system which contains the additional hetero ring as one of the cyclos is bonded directly to an alkylene chain, which chain is between the azo group and the additional hetero ring
778 ....Bicyclo carbocyclic ring system bonded directly to the azo group
779 .....The bicyclo carbocyclic ring system is between the azo group and an additional carbocyclic ring
780 .....Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of the -OH may be replaced by the ammonium ion or Group IA or IIA light metal)
781 ....Sulfonic acid group containing (-(O=)S(=O)-OH, wherein H of the -OH may be replaced by the ammonium ion or a Group IA or IIA light metal)
782 .....The hetero ring is one of the cyclos in a polycyclo ring system
783 .....Additional sulfonyl containing
784 ......Plural sulfonic acid groups
785 .....Containing acyclic -C(=X)-, wherein X is chalcogen
786 ......The -C(=X)- is bonded directly to nitrogen
787 ....The hetero ring is one of the cyclos in a polycyclo ring system
788 .....The hetero ring consists of sulfur, nitrogen and carbon (e.g., benzothiazole, etc.)
789 .....Chalcogen double bonded directly to the hetero ring
790 .....The hetero ring is five-membered and consists of one nitrogen and four carbons (e.g., indole, etc.)
791 ....Carbocyclic ring bonded directly to the hetero ring or to the polycyclo ring system which contains the hetero ring
792 .....Pyrazole containing (including hydrogenated)
793 ......Sulfonyl containing
794 ....Carbocyclic ring attached indirectly to the azo group by nonionic bonding
795 ....The hetero ring is five-membered and contains at least one atom each of sulfur, nitrogen and carbon
796 ...At least three azo groups attached indirectly to each other by nonionic bonding
797 ...Two azo groups attached indirectly to each other by nonionic bonding
798 ...Plural carbocyclic rings bonded directly to the azo group
799 ....The hetero ring or a polycyclo ring system which contains the hetero ring as one of the cyclos is bonded directly to one of the carbocyclic rings or to a bicyclo ring system which contains the carbocyclic ring as one of the cyclos
800 .....The hetero ring is one of the cyclos in a polycyclo ring system
801 ....The carbocyclic ring or a bicyclo ring system which contains the carbocyclic ring as one of the cyclos and the hetero ring or a polycyclo ring system which contains the hetero ring as one of the cyclos are bonded directly to the same carboxamide group
802 ....The carbocyclic ring or a bicyclo ring system which contains the carbocyclic ring as one of the cyclos and the hetero ring or a polycyclo ring system which contains the hetero ring as one of the cyclos are bonded directly to the same nitrogen atom
803 .....The hetero ring is six-membered and contains at least two nitrogens
804 ....The hetero ring or a polycyclo ring system which contains the hetero ring as one of the cyclos is bonded directly to an alkylene chain, which chain is between the hetero ring and the carbocyclic ring
805 ..Exactly five or exactly six azo groups attached indirectly to each other by nonionic bonding
806 ..Exactly four azo groups attached indirectly to each other by nonionic bonding

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)

.Azo

..Exactly four azo groups attached indirectly to each other by nonionic bonding

807 ...Plural nitrogens bonded directly to the same -C(=X)- group, wherein X is chalcogen (e.g., urea, thiourea, etc.)

808 ...Benzidine containing

809 ..Exactly three azo groups attached indirectly to each other by nonionic bonding

810 ...Containing -C(=X)-, wherein X, is chalcogen or nitrogen (e.g., carbonyl, etc.)

811 ....Nitrogen single bonded directly to the -C(=X)- group (e.g., carboxamide, guanyl, etc.)

812 .....Plural -C(=X)- groups containing

813 ...Benzidine containing

814 ....Hydroxy and nitrogen, other than as nitro, nitroso or azo, bonded directly to the same bicyclo ring system (H of hydroxy may be replaced by the ammonium ion or a Group IA or IIA light metal)

815 ...Hydroxy bonded directly to a bicyclo ring system (H of hydroxy may be replaced by the ammonium ion or a Group IA or IIA light metal)

816 ..Exactly two azo groups attached indirectly to each other by nonionic bonding

817 ...Plural benzene rings bonded directly to the same urea or thiourea group and are between the azo groups

818 ....Bicyclo ring system containing

819 ...Plural benzene rings bonded directly to the same carboxamide or sulfonamide group and are between the azo groups

820 ....Plural carboxamide groups between the azo groups

821 ...Plural benzene rings bonded directly to the same chalcogen or -C(=X)- group, wherein X is chalcogen, and are between the azo groups

822 ...Plural benzene rings bonded directly to each other and are between the azo groups

823 ....Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)

824 ....Nitrogen, other than as nitro, nitroso or azo, attached indirectly to azo by nonionic bonding

825 .....Plural nitrogens, other than as nitro, nitroso or azo, attached indirectly to azo by nonionic bonding

826 ......Plural sulfonic acid groups bonded directly to the same bicyclo ring system (-(O=)S(=O)-OH, wherein H of the -OH may be replaced by the ammonium ion or a Group IA or IIA light metal)

827 ...Hydroxy bonded directly to a bicyclo ring system which is between the azo groups (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

828 ....Plural bicyclo ring systems, each having hydroxy bonded directly thereto

829 ...Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)

830 ....Hydroxy and the -C(=X)- are bonded directly to the same bicyclo ring system (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

831 ...Plural benzene rings bonded directly to each azo group

832 ....At least one of the benzene rings is part of a bicyclo ring system

833 .....Each of the benzene rings is part of a bicyclo ring system

834 .....Hydroxy bonded directly to the bicyclo ring system (H of hydroxy may be replaced by the ammonium ion or a Group IA or IIA light metal)

835 ......Plural bicyclo ring systems, each having hydroxy bonded directly thereto

836 ......Additional hydroxy or nitrogen, other than as nitro, nitroso or azo, bonded directly to the bicyclo ring system

837 ......Sulfonic acid group bonded directly to the bicyclo ring system (-(O=)S(=O)-OH, wherein H of the -OH may be replaced by the ammonium ion or a Group IA or IIA light metal)

838 ..Exactly one azo group containing or azo attached indirectly to an additional azo group by ionic bonding

839 ...Plural benzene rings bonded directly to the azo group

840 ....Each of the benzene rings is part of a bicyclo ring system

841 .....Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)

842 .....Hydroxy bonded directly at the 2-position of the bicyclo ring system (H of hydroxy may be replaced by the ammonium ion or a Group IA or IIA light metal)

843 ....Each of the benzene rings is monocyclic

844 .....Sulfonyl containing

845 ......Oxygen bonded directly to the sulfonyl group (e.g., sulfonic acid, etc.)

846 ....Plural oxygens bonded directly to the sulfonyl group (e.g., sulfuric acid, etc.)

847 ......The sulfonyl is part of a sulfonamide group (-(O=)S(=O)HNH, wherein substitution may be made for hydrogen only)

848 ......Containing -C(=X)-, wherein X is chalcogen

849 ....The -C(=X)- is bonded directly to nitrogen, which nitrogen is bonded directly to a ring

850 .....Containing -C(=X)-, wherein X is chalcogen

851 ......The -C(=X)- is bonded directly to one of the benezene rings

852 ......The -C(=X)- is in a -C(=X)X- group, wherein the X's may be the same or diverse chalcogens

853 ....The -C(=X)X- is in a -COOH group (H of OH may be replaced by the ammonium ion or a Group IA or IIA light metal)

ORGANIC COMPOUNDS (CLASS 532, SUBCLASS 1)
.Azo
..Exactly one azo group containing or azo attached indirectly to an additional azo group by ionic bonding
...Plural benzene rings bonded directly to the azo group
....Each of the benzene rings is monocyclic
.....Containing -C(=X)-, wherein X is chalcogen
......The -C(=X)- is in a -C(=X)X- group, wherein the X's may be the same or diverse chalcogens
854 ....Additional -C(=X)- bonded directly to nitrogen, which nitrogen is bonded directly to a ring
855 ......Chalcogen, having no direct bond to a ring, attached directly by a single bond to acyclic carbon
856 .....Nitrogen, other than as nitro or nitroso, attached indirectly to the azo group by nonionic bonding
857 ......Hydroxy bonded directly to acyclic carbon or carbon chain (H of hydroxy may be replaced by the ammonium ion or Group IA or IIA light metal)
858 ....Plural chalcogens bonded directly to the acyclic carbon or carbon chain
859 ......Chalcogen bonded directly to a ring
860 ....Acyclic -C(=X)- containing, wherein X is chalcogen (e.g., carbonyl, etc.)
861 .....Hydroxy bonded directly to a bicyclo ring system (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
862 ......Nitrogen bonded directly to the -C(=X)- group (e.g., carboxamide, etc.)
863 ....The -C(=X)- is bonded directly to the bicyclo ring system
864 ....Sulfonyl containing
865 ....Additional acyclic -C(=X)- group
866 ....Additional nitrogen bonded directly to the additional -C(=X)- group
867 ....At least three -C(=X)HNH groups, wherein substitution may be made for hydrogen only
868 ....Additional amino nitrogen
869 ....Plural oxygens bonded directly to the same monocyclic benzene ring
870 ....Halogen, acyclic carbon, the azo group and an additional halogen or acyclic carbon, all bonded directly to the same benzene ring
871 ....Acyclic carbon, carboxamide and chalcogen or an additional acyclic carbon, all bonded directly to the same benzene ring
872 ....The nitrogen is additionally bonded directly to the bicyclo ring system
873 ....Additional acyclic -C(=X)- group
874 ......The -C(=X)- is bonded directly to the bicyclo ring system
875 ....Nitrogen, other than as nitro or nitroso, attached indirectly to the azo group by nonionic bonding
876 .....Oxygen bonded directly to carbon
877 ......The nitrogen and the oxygen are bonded directly to the same bicyclo ring system
878 ....Sulfonyl bonded directly to the bicyclo ring system
879 ....Plural sulfonyl groups or plural nitrogens bonded directly to the bicyclo ring system
880 ....Additional sulfonyl which is attached indirectly to the bicyclo ring system by nonionic bonding
881 .....Sulfonyl and the nitrogen bonded directly to the same bicyclo ring system
882 ....Oxygen double bonded directly to sulfur
883 .....Sulfonyl bonded directly to a bicyclo ring system
884 ......Plural sulfonyl groups bonded directly to the same bicyclo ring system
885 ...Benzene ring bonded directly to the azo group
886 ...Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl, etc.)
887 ..Purification or recovery

IN THIS SERIES OF CLASSES, CLASS 536 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
1.1 .CARBOHYDRATES OR DERIVATIVES
2 ..Pectin or derivative
3 ..Algin or derivative
4.1 ..O- or S- Glycosides
4.4 ...Aescin or derivative
5 ...Cyclopentanohydrophenanthrene ring system
6 ....Oxygen containing six-membered hetero ring (e.g., oxathiane, etc.)
6.1 ....Oxygen containing five-membered hetero ring
6.2 .....Nitrogen, phosphorus or halogen containing
6.3 .....Processes of extracting from plant materials
6.4 ...Daunomycin or derivative
6.5 ...Oxygen containing hetero ring having at least twenty members (e.g., amphotericin, nystatin, pimaricin, etc.)
7.1 ...Oxygen containing hetero ring having 12-19 members (e.g., methymycin, carbomycin, spiramycin, etc.)
7.2 ....Erythromycin or derivative (e.g., oleandomycin, etc.)
7.3 .....Boron, phosphorus or sulfur containing
7.4 .....Additional nitrogen containing
7.5 .....Purification or recovery
8 ...Flavon sugar compounds
8.8 ...Coumermycin or derivative
13 ...Novobiocin or derivative
13.1 ...Antibiotic BM 123 or derivative
13.2 ...Neomycin B or neomycin C, or derivative
13.3 ...Paromomycin or derivative (e.g., neomycin E, etc.)
13.4 ...Antibiotic XK or derivative
13.5 ...Butirosin or derivative (e.g., ambutyrosin, etc.)
13.6 ...Gentamicin or derivative
13.7 ...Kanamycin or derivative
13.8 ....Carbonyl bonded directly to kanamycin nitrogen
13.9 ...Sisomicin or derivative
14 ...Streptomycin or derivative
15 ....Dihydrostreptomycin or derivative
16 ....Addition compounds
16.1 ...Fortimicin or derivative
16.2 ...Lincomycin or derivative
16.3 ....Cyano or -COO- containing
16.4 ....Additional sulfur containing
16.5 ....Phosphorus or halogen containing
16.6 ...Neamine or derivative (e.g., neomycin A, etc.)
16.7 ...Kasugamycin or derivative
16.8 ...Antibiotics
16.9 ....Purification or recovery
17.1 ...Boron, phosphorus, heavy metal or aluminum, containing
17.2 ...Nitrogen containing
17.3 ....Nitrogen containing hetero ring
17.4 .....Nitrogen in aglycone moiety
17.5 ....Sulfur containing (e.g., methylthiolincosaminide, etc.)
17.6 .....Nitrogen or sulfur in aglycone moiety
17.7 ....Nitro or nitroso containing
17.8 .....Nitrogen in aglycone moiety
17.9 ....Nitrogen in aglycone moiety
18.1 ...Polycyclo ring system (e.g., hellebrin, etc.)
18.2 ...Containing -C(=X)X- wherein the X's are the same or diverse chalcogens
18.3 ...Plural oxyalkylene groups bonded directly to each other
18.4 ...Halogen containing
18.5 ...Processes
18.6 ....Reacting a carbohydrate with an organic -O- containing compound (e.g., reacting glucose with methanol, etc.)
18.7 ..Nitrogen containing
20 ...Chitin or derivative
21 ...Heparin or derivative
22 ...N-Glycosides
23 ....Nitrogen containing hetero ring (e.g., morpholine, etc.)
24 .....Plural nitrogen containing hetero rings
25 ......Cobalamin
26 ......Adenosine or derivative
27 ....Phosphorus containing
28 ......Phosphorus containing
29 .....Phosphorus containing
30 ...Cellulose derivatives
31 ....Nitrogen containing hetero ring (e.g., morpholine, etc.)
32 ....Esters
33 .....Sulfur containing acid
34 .....Phosphorus containing acid
35 .....Nitrates
36 ......Mixed esters
37 ......With pretreatment process
38 ......Subsequent treatment process
39 ....Comminuting
40 ....Recovery from photographic film
41 ....Viscosity or degree of polymerization changed (e.g., degrading, cross-linking, etc.)
42 ....Stabilizing
43 ....Ethers
44 .....Mixed ethers
45 ...Starch derivatives
46 ....Dextrin derivatives
47 ....Cross-linked
48 ....Esters
49 .....Ether-esters or mixed esters
50 ....Ethers
51 ...Dextran derivatives
52 ...Gum derivatives
53 ...Oxygen double bonded and nitrogen bonded directly to the same carbon
54 ...Sulfur containing
55 ...Plural nitrogens containing
55.1 ....Polysaccharides
55.2 ...Glucosamine containing
55.3 ...Processes
56 ..Cellulose or derivative
57 ...Regenerated cellulose
58 ...Esters
59 ....Sulfur containing acid
60 .....Xanthate or viscose
61 ......Subsequent treatment process
62 ....Phosphorus containing acid
63 ....Carboxylic acid esters
64 .....Mixed carboxylate esters
65 ......Propionate, butyrate or isobutyrate containing
66 .....Ether-esters
67 .....Formates
68 .....Propionates, butyrates or isobutyrates

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.CARBOHYDRATES OR DERIVATIVES
..Cellulose or derivative
...Esters
....Carboxylic acid esters
69 .....Acetates
70 ......With pretreatment process
71 ....Acetic acid utilized in pretreatment
72 ....Halogen containing compound utilized in process
73 ....Sulfur containing compound utilized in pretreatment
74 ....Sulfur containing compound utilized in pretreatment
75 ....Halogen containing compound utilized in process
76 ......Subsequent treatment process
77 ....Comminuting or centrifuging
78 ....Recovery from photographic film
79 ....Corrosiveness reduced
80 ....Viscosity or degree of polymerization changed (e.g., degrading, cross-linking, etc.)
81 ....Stabilizing
82 ....Halogen containing compound utilized in process
83 ......Halogen containing compound utilized in process
84 ...Ethers
85 ....Subsequent treatment process
86 .....Comminuting
87 .....Liquid interaction properties changed (e.g., solubility, absorbability, etc.)
88 .....Viscosity, degree of polymerization or heat stability changed (e.g., degrading, cross-linking, etc.)
89 .....Acid employed in subsequent treatment
90 ....Mixed ethers
91 .....Hydoxyalkyl containing
92 ....Sulfur containing
93 ....Unsaturated
94 .....Aromatic nucleus containing
95 ....Hydroxyalkyl containing
96 .....Hydroxyethyl
97 ....Carboxyalkyl or salts thereof
98 .....Carboxymethyl or salts thereof
99 ....Alkyl or cycloalkyl
100 .....Ethyl
101 ...Metal containing
102 ..Starch or derivative
103 ...Dextrin or derivative
104 ...Aldehyde reaction product
105 ...Oxidized starch or derivative
106 ...Cross-linked
107 ...Esters
108 ....Ether-esters or mixed esters
109 ....Phosphorus or sulfur containing
110 ....Carboxylic
111 ...Ethers
112 ..Dextran or derivative
113 ...Iron containing
114 ..Gums or derivatives
115 ..Esters
116 ...Ether-esters
117 ...Phosphorus containing
118 ...Sulfur containing
119 ...Carboxylic
120 ..Ethers
121 ..Metal containing
122 ..Sulfur or halogen containing
123 ..Plural diverse saccharides containing (e.g., hetero polysaccharides, etc.)
124 ..Processes
125 ...Isomerization
126 ...Polymerization
127 ...Purification or recovery
128 ....From plant material

ORGANIC COMPOUNDS (Class 532, Subclass 1)

1 .HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS

2 ..Cyclopentanohydrophenanthrene ring system containing

3 ...Heavy metal or aluminum containing

4 ...Boron or silicon containing

5 ...Phosphorus attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding

6 ...Spiro

7 ....Plural spiro atoms

8 .....The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos

9 ......Nitrogen containing hetero ring as one of the cyclos of the polycyclo ring system

10 .....The cyclopentanohydrophenanthrene ring system shares spiro atoms with two hetero rings, each of which contains two oxygens (e.g., 3,17-bis-ketals, etc.)

11 .....The cyclopentanohydrophenanthrene ring system shares a spiro atom with a lactone ring (i.e., -C(=X)-O- is part of the ring, wherein X is chalcogen)

12 .....Plural oxygens in both rings which share a spiro atom (e.g., 17,20;20,21-bismethylenedioxy-pregnanes, etc.)

13 ......Nitrogen, sulfur, cyano or -C(=X)-, wherein X is chalcogen, bonded directly to the cyclopentanohydrophenanthrene ring system

14 ......Halogen attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by acyclic nonionic bonding

15 ....The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos

16 .....Hetero ring is one of the cyclos of the polycyclo ring system

17 ......The hetero ring is five-membered, consisting of one oxygen and four carbons, and shares the spiro atom with a six-membered oxygen containing hetero ring (e.g., sapogenins, etc.)

18 ....Purification or recovery

19 ....Chalcogen bonded directly at the 12-position of the cyclopentanohydrophenanthrene ring system (e.g., hecogenin, etc.)

20 ....Chalcogen bonded directly at the 11-position of the cyclopentanohydrophenanthrene ring system

21 ....Chalcogen bonded directly at the 7-position of the cyclopentanohydrophenanthrene ring system

22 ....Halogen, cyano, nitrogen or sulfur bonded directly to the cyclopentanohydrophenanthrene ring system

23 ......The spiro atom is the 17-position carbon of the cyclopentanohydrophenanthrene ring system

24 ......The hetero ring shares the 11,12,13-positions of the cyclopentanohydrophenanthrene ring system (i.e., bridged; e.g., 11,18-oxido steroids, etc.)

25 ......The hetero ring is three-membered consisting of one oxygen and two carbons (e.g., oxirane, etc.)

26 ....The hetero ring shares the 5,6-positions of the cyclopentanohydrophenanthrene ring system

27 ......The hetero ring contains two chalcogens which are bonded directly at the 16- and 17-positions of the cyclopentanohydrophenanthrene ring system

28 ....The spiro includes the cyclopentanohydrophenanthrene ring system and a hetero ring

29 .....Nitrogen in the spiro hetero ring

30 .....Sulfur in the spiro hetero ring

31 .....Plural oxygens in the spiro hetero ring

32 ......The A ring is a benzene ring

33 ......Chalcogen bonded directly to the spiro hetero ring

34 ......The spiro hetero ring shares the 3-position carbon of the cyclopentanohydrophenanthrene ring system

35 ....Halogen bonded directly to the cyclopentanohydrophenanthrene ring system

36 ....Nitrogen attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding

37 ....Plural cyclic ketal rings containing (e.g., 3,20-bis-ketals, etc.)

38 ....Chalcogen bonded directly at the 11-position of the cyclopentanohydrophenanthrene ring system

39 ....The cyclopentanohydrophenanthrene ring system is fully saturated

40 ....Carbon chain having carbon-to-carbon unsaturation bonded directly at the 17-position of the cyclopentanohydrophenanthrene ring system

41 .....The spiro hetero ring contains -C(=X)-O-, wherein X is chalcogen, as part of the ring (e.g., spiro-lactones, etc.)

42 ......Sulfur bonded directly to the cyclopentanohydrophenanthrene ring system

43 ......Chalcogen bonded directly at the 11-position of the cyclopentanohydrophenanthrene ring system

44 ......Chalcogen, halogen, or nitrogen attached indirectly to the cyclopentanohydrophenanthrene ring system by acyclic nonionic bonding

45 .....The spiro hetero ring is four-membered consisting of one oxygen and three carbons

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS

..Cyclopentanohydrophenanthrene ring system containing

...Spiro

....The spiro includes the cyclopentanohydrophenanthrene ring system and a hetero ring

46 .....The spiro hetero ring is three-membered consisting of one oxygen and two carbons (e.g., oxirane, etc.)

47 ...The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos

48 ....Hetero ring is one of the cyclos of the polycyclo ring system

49 .....The hetero ring contains nitrogen

50 ......Plural nitrogens in the hetero ring

51 ....The hetero ring is five-membered

52 ....The hetero ring consists of two nitrogens and three carbons and is ortho-fused to the A ring

53 ....Having -C(=X)-, wherein X is chalcogen, bonded directly at the 17-position of the cyclopentanohydrophenanthrene ring system

54 ....The hetero ring consists of two nitrogens and three carbons and is ortho-fused to the D ring

55 ......Chalcogen in the hetero ring

56 ....The hetero ring is five-membered

57 ....The hetero ring is ortho-fused to the A ring

58 ......The hetero ring is five-membered

59 .....The hetero ring contains sulfur

60 .....The hetero ring is a cyclic anhydride (i.e., containing -C(=X)-O-C(=Y)- as part of the ring, wherein X and Y are chalcogen; e.g., 5,8-maleic anhydride adduct of 5,7,9(11)-pregnatrien-3,20-dione, etc.)

61 .....The hetero ring contains plural oxygens

62 ......Two of the cyclos share at least three ring members or a ring carbon is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)

63 ......The hetero ring is ortho-fused to the D ring

64 ....At least six cyclos in the polycyclo ring system

65 ....Nitrogen or acyclic chalcogen bonded directly to the hetero ring (e.g., cyclic carbonates, etc.)

66 ....The A ring is a benzene ring

67 ....Sulfur or nitrogen attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by acyclic nonionic bonding

68 ....Halogen attached indirectly to the cyclopentanohydrophenanthrene ring system by acyclic nonionic bonding

69 ....Halogen bonded directly to the cyclopentanohydrophenanthrene ring system

70 ....Oxygen bonded directly at the 11-position of the cyclopentanohydrophenanthrene ring system

71 ....Oxygen attached directly to the B ring or indirectly to the A or B ring by acyclic nonionic bonding

72 .....The hetero ring is a lactone (i.e., containing -C(=X)-O- as part of the ring, wherein X is chalcogen)

73 ......The lactone ring shares at least three ring members with one other cyclo of the polycylo ring system (i.e., bridged)

74 ....The lactone ring shares the 11,12,13-positions of the cyclopentanohydrophenanthrene ring system (e.g., 11, 18-lactones, etc.)

75 ......The lactone ring shares a ring carbon with two other cyclos of the polycyclo ring system (e.g., peri-fused, etc.)

76 .....The hetero ring is three-membered consisting of one oxygen and two carbons (e.g., oxirane, etc.)

77 ......The polycyclo ring system contains plural oxirane rings

78 ......The hetero ring shares the 1,2-positions of the cyclopentanohydrophenanthrene ring system

79 ......The hetero ring shares the 4,5-positions of the cyclopentanohydrophenanthrene ring system

80 ......The hetero ring shares the 5,6-positions of the cyclopentanohydrophenanthrene ring system

81 ......The hetero ring shares the 6,7-positions of the cyclopentanohydrophenanthrene ring system

82 ......The hetero ring shares the 11,12-positions of the cyclopentanohydrophenanthrene ring system

83 ......The hetero ring shares the 14,15-positions of the cyclopentanohydrophenanthrene ring system

84 ......The hetero ring shares the 16,17-positions of the cyclopentanohydrophenanthrene ring system

85 ....Halogen bonded directly to the cyclopentanohydrophenanthrene ring system

86 ....Saturated A ring

87 ......The hetero ring shares the 9,11-positions of the cyclopentanohydrophenanthrene ring system

88 ....Halogen bonded directly to the cyclopentanohydrophenanthrene ring system

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS
..Cyclopentanohydrophenanthrene ring system containing
...The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos
....Hetero ring is one of the cyclos of the polycyclo ring system
.....The hetero ring is three-membered consisting of one oxygen and two carbons (e.g., oxirane, etc.)
......The hetero ring shares the 9,11-positions of the cyclopentanohydrophenanthrene ring system
89 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the cyclopentanohydrophenanthrene ring system
90 .....The hetero ring shares at least three ring members with one other cyclo of the polycyclo ring system (i.e., bridged)
91 ......Bridge consisting of oxygen and carbon between the 6- and 10-positions of the cyclopentanohydrophenanthrene ring system (e.g., 6,19-oxido steroids, etc.)
92 ......Bridge consisting of oxygen and carbon between the 11- and 13-positions of the cyclopentanohydrophenanthrene ring system (e.g., 11,18-oxido steroids, etc.)
93 .....The hetero ring shares a ring carbon with two other cyclos of the polycyclo ring system (e.g., peri-fused, etc.)
94 ...Hetero ring attached directly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
95 ....The hetero ring contains nitrogen
96 .....Plural nitrogen containing hetero rings bonded directly to the cyclopentanohydrophenanthrene ring system
97 .....The hetero ring is bonded directly at the 3-position of the cyclopentanohydrophenanthrene ring system
98 ......The A ring is a benzene ring
99 ......Halogen bonded directly to the cyclopentanohydrophenanthrene ring system
100 ....The hetero ring contains plural chalcogens
101 .....The hetero ring and acyclic chalcogen are both bonded directly at the 17-position of the cyclopentanohydrophenanthrene ring system
102 ....The hetero ring contains -C(=X)-O-, wherein X is chalcogen, as part of the ring (e.g., lactones, etc.)
103 .....Additional chalcogen, cyano, or -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
104 .....Nitrogen or sulfur attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
105 .....Chalcogen bonded directly at the 14-position of the cyclopentanohydrophenanthrene ring system or double bond in the D ring (e.g., cardenolides, etc.)
106 ...Nitrogen attached directly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
107 ...Nitrogen containing hetero ring attached indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
108 ....The hetero ring is five-membered and has plural hetero atoms
109 ....The hetero ring is in the 17-position substituent of the cyclopentanohydrophenanthrene ring system
110 .....The hetero ring is bonded directly to a -C(=X)- group, wherein X is chalcogen
111 .....Having -C(=X)-, wherein X is chalcogen, bonded directly at the 17-position of the cyclopentanohydrophenanthrene ring system
112 .....Chalcogen or nitrogen in chain between the hetero ring and the cyclopentanohydrophenanthrene ring system
113 ....Chalcogen in chain between the hetero ring and the cyclopentanohydrophenanthrene ring system
114 ...Oxygen containing hetero ring attached indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
115 ....The hetero ring contains -C(=X)-O-, wherein X is chalcogen, as part of the ring (e.g., lactones, etc.)
116 ....Additional hetero atom in the oxygen containing hetero ring
117 ....The A ring is a benzene ring
118 ....The hetero ring is bonded directly to chalcogen which is bonded directly to the cyclopentanohydrophenanthrene ring system
119 .....The chalcogen is bonded directly at the 17-position of the cyclopentanohydrophenanthrene ring system
120 ...Chalcogen attached indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding
121 ..Azaporphyrins
122 ...Phthalocyanines
123 ....Hetero ring attached directly or indirectly to the phthalocyanine ring system by nonionic bonding
124 .....The hetero ring is six-membered having nitrogen as a ring member
125 ......Plural hetero atoms in the six-membered hetero ring
126 ....Triazines (including hydrogenated)
127 .....The hetero ring is five-membered having plural hetero atoms, at least one of which is nitrogen
128 ....Boron, germanium, phosphorus or silicon containing

	ORGANIC COMPOUNDS (Class 532, Subclass 1)
	.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS
	..Azaporphyrins
	...Phthalocyanines
129	....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the phthalocyanine ring system (e.g., tetracarboxy copper phthalocyanine, etc.)
130	....Having -C(=X)-, wherein X is chalcogen, attached indirectly to ring carbon of the phthalocyanine ring system by nonionic bonding (e.g., phthalocyanine acetic acids, etc.)
131	....Sulfonyl bonded directly to ring carbon of the phthalocyanine ring system
132	.....Chalcogen bonded directly to the sulfonyl group
133	.....Nitrogen bonded directly to the sulfonyl group
134	......Additional nitrogen in the sulfonyl containing substituent
135	....Nitrogen attached indirectly to ring carbon of the phthalocyanine ring system by acyclic nonionic bonding
136	....Halogen bonded directly to ring carbon of the phthalocyanine ring system
137	.....At least eight halogens bonded directly to ring carbons of the phthalocyanine ring system
138	.....Processes of halogenating the phthalocyanine ring system
139	....Metal containing
140	.....Heavy metal or aluminum containing
141	......Specified crystalline form or processes of milling (e.g., alpha crystalline form, ball milling, acid milling, etc.)
142	......Processes of forming the phthalocyanine ring system
143	.......From reactant which contains plural cyano groups (e.g., preparing from phthalonitrile, etc.)
144	.......From reactant which contains plural carbonyl groups (e.g., preparing from phthalic anhydride, etc.)
145	..Porphyrins (including hydrogenated; e.g., chlorophyll, etc.)
200	..Hetero ring is four-membered containing nitrogen and having chalcogen double bonded directly to a ring carbon which is adjacent to the ring nitrogen
201	...Heavy metal containing
202	...Plural hetero atoms in the hetero ring
203	...Polycyclo ring system containing the hetero ring as one of the cyclos
204	....The ring nitrogen is shared by a ring containing at least seven members
205	....The ring nitrogen is shared by a six-membered ring
214	.....The six-membered ring contains sulfur
215	......1-thia-5-aza-bicyclo(4.2.0)oct ane (including unsaturated; e.g., cepham, etc.)
216	.......The 1-thia-5-aza-bicyclo(4.2.0)oct -ane is part of a polycyclo ring system having at least three cyclos
217	.......Double bond between the 2,3-positions of the bicyclo ring system (e.g., 2-cephem, etc.)
218	........Ring expansion to produce the bicyclo ring system
219	........7-amino cephalosporanic acid per se or salt thereof (i.e., 7-ACA or salt thereof)
220	........Purification or recovery
221	........7,7-disubstituted
222	........Additional hetero ring containing
223	.........2- or 4-position substituent contains hetero ring
224	.........3-position substituent contains a pyridine ring (e.g., quinoline, thienopyridine, lutidines, etc.)
225	..........7-position substituent contains hetero ring
226	.........3-position substituent contains sulfur
227	..........7-position substituent contains hetero ring
228	.........Alkyl, hydroxyalkyl, alkoxyalkyl or alkanoyloxyalkyl bonded directly to 3-position
229	........Sulfur containing substituent
230	........Alkyl, hydroxyalkyl, alkoxyalkyl or alkanoyloxyalkyl bonded directly to 3-position
300	.....The six-membered ring contains oxygen
301	......1-oxa-5-aza-bicyclo(4.2.0)octa ne (including unsaturated)
302	....The ring nitrogen is shared by a five-membered ring
303	.....The five-membered ring contains an additional hetero atom
304	......1-thia-4-aza-bicyclo(3.2.0)hep -tane (including unsaturated; e.g., penam, etc.)
305	.......The 1-thia-4-aza-bicyclo(3.2.0)hep -tane is part of a polycyclo ring system having at least three cyclos
306	.......Plural 1-thia-4-aza-bicyclo(3.2.0)hep -tane ring systems attached directly or indirectly to each other by nonionic bonding
307	.......Spiro
308	.......The 6-position substituent contains phosphorus attached directly or indirectly to the bicyclo ring system by nonionic bonding
309	.......Nitrogen containing hetero ring attached directly at the 3-position of the bicyclo ring system
310	.......Having -C(=X)-, wherein X is chalcogen, bonded directly at the 3-position of the bicyclo ring system
311	........Nitrogen or hydrogen bonded directly to the -C(=X)- group
312	........Nitrogen bonded directly at the 6-position of the bicyclo ring system

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS
..Hetero ring is four-membered containing nitrogen and having chalcogen double bonded directly to a ring carbon which is adjacent to the ring nitrogen
...Polycyclo ring system containing the hetero ring as one of the cyclos
....The ring nitrogen is shared by a five-membered ring
.....The five-membered ring contains an additional hetero atom
......1-thia-4-aza-bicyclo(3.2.0)hep-tane (including unsaturated; e.g., penam, etc.)
.......Having -C(=X)-, wherein X is chalcogen, bonded directly at the 3-position of the bicyclo ring system
........Nitrogen bonded directly at the 6-position of the bicyclo ring system
313 ....The 2-position substituent contains chalcogen, nitrogen or halogen
314 ....Having -C(=X)-, wherein X is chalcogen, single bonded directly to the nitrogen (e.g., penicillin F, etc.)
315 ....Processes utilizing penam containing compound
316 ....Introduction of -C(=X)- group, wherein X is chalcogen, onto nitrogen (e.g., carboxamide formation, etc.)
317 ....Boron, silicon or phosphorus containing reactant
318 ....Esterification of the 3-position -C(=X)X- group, wherein the X's may be the same or diverse chalcogens
319 ....Sulfur-oxidation, epimerization, 6-alkoxylation, de-esterification or reduction
320 ....Formation of solvate or anhydrous forms, or special crystalline forms
321 ....Conversion of amine salts to metal salts
322 ....Purification utilizing solid adsorbent
323 ....Base salt formation of 3-position -COOH group
324 ....Extracting solid from solution
325 ....The nitrogen is part of a hetero ring
326 ....Chalcogen, -C(=X)-, wherein X is chalcogen, or additional nitrogen bonded directly to the -C(=X)- group
327 ....Hetero ring or ring system bonded directly to the -C(=X)- group
328 ....Nitrogen containing ring or ring system attached by carbon or acyclic carbon chain to the -C(=X)- group
329 ....Polycyclo heterocyclic ring system in 6-position substituent
330 ....The polycyclo ring system is attached directly to a -C(=X)-NH- group, wherein X is chalcogen and substitution may be made for hydrogen only, which group is between the polycyclo ring system and the 1-thia-4-aza-bicyclo(3.2.0)hep-tane
331 ....Acyclic nitrogen or azide attached indirectly to the -C(=X)- group by acyclic nonionic bonding
332 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen
333 ....Hetero ring bonded directly to the -C(=X)- group
334 ....Chalcogen, additional nitrogen or additional -C(=X)- bonded directly to the -C(=X)- group
335 ....Additional acyclic nitrogen or acyclic chalcogen in the 6-position substituent
336 ....The -C(=X)- group, an unsubstituted benzene ring and -NHH bonded directly to the same carbon atom (e.g., ampicillin, etc.)
337 ....Cycloaliphatic ring in 6-position substituent
338 ....Benzene or hetero ring in 6-position substituent
339 ....The ring is bonded directly to the -C(=X)- group
340 ....Having -C(=X)X-, wherein the X's may be the same or diverse chalcogens, in chain between the ring and the -C(=X)- group
341 ....Chalcogen in the chain between the ring and the -C(=X)- group
342 ....Unsubstituted hydrocarbyl chain between the ring and the -C(=X)- group
343 ....Amine addition salts of 3-position -COOH group
344 ....Nitrogen containing hetero ring in the cation (i.e., amine moiety)
345 ....Plural nitrogens in the cation (i.e., amine moiety)
346 ....Processes
347 ......Bicyclo ring system which is 1-oxa-4-aza-bicyclo(3.2.0)hep-tane (including unsaturated)
348 ....Acyclic carbon double bonded directly at the 2-position of the bicyclo ring system
349 ....Chalcogen attached directly by a single bond to the carbon or to an acyclic carbon chain which contains the carbon
350 .....The ring system is 4-aza-bicyclo(3.2.0)heptane (including unsaturated) and has sulfur bonded directly at the 2-position
351 ......Thienamycin per se or salt thereof

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS
..Hetero ring is four-membered containing nitrogen and having chalcogen double bonded directly to a ring carbon which is adjacent to the ring nitrogen
...Polycyclo ring system containing the hetero ring as one of the cyclos
352 ....Five-membered hetero ring consisting of one nitrogen, one sulfur and three carbons as one of the cyclos of the polycyclo ring system
353 .....Double bond between ring members of the five-membered hetero ring
354 ...Additional chalcogen bonded directly to the hetero ring
355 ....The additional chalcogen is bonded directly to the ring nitrogen
356 ....The additional chalcogen is double bonded directly to the hetero ring
357 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the additional chalcogen
358 ....The additional chalcogen is sulfur which is bonded directly to chalcogen
359 .....The sulfur is double bonded directly to the chalcogen
360 ....Additional carbon bonded directly to the additional chalcogen
361 ...Halogen attached directly at the 4-position of the hetero ring by nonionic bonding
362 ...The 4-position of the hetero ring is unsubstituted or alkyl substituted only
363 ....Nitrogen bonded directly at the 3-position of the hetero ring
364 ...Nitrogen bonded directly at the 3-position of the hetero ring
450 ..The hetero ring contains at least eight members including nitrogen and carbon
451 ...Chalcogen double bonded directly to a ring carbon of the hetero ring which is adjacent to the ring nitrogen (e.g., laurolactam, etc.)
452 ....Heavy metal, aluminum, boron or silicon containing
453 ....Spiro
454 ....Chalcogen in the hetero ring
455 .....Polycyclo ring system which contains the hetero ring as one of the cyclos
456 ......Two of the cyclos share at least three ring members or a ring member is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)
457 ....A five-membered cyclo of the polycyclo ring system consists of four ring carbons and one ring oxygen (e.g., fused rifamycins, etc.)
458 ....Tetracyclo ring system which contains the hetero ring as one of the cyclos (e.g., rifamycin S, etc.)
459 ....Nitrogen, sulfur or halogen attached directly to the tetracyclo ring system by nonionic bonding
460 ....Plural nitrogens in the hetero ring
461 ....Polycyclo ring system which contains the hetero ring as one of the cyclos
462 .....Oxirane ring is one of the cyclos in the polycyclo ring system (e.g., maytansinol, etc.)
463 ....Nitrogen or additional chalcogen attached directly to the hetero ring by nonionic bonding
464 ....Utilizing oximes, oxime salts, hydroxylamines, hydroxylamine salts or nitrosating agents to form the hetero ring (i.e., formation of the lactam ring)
465 ...Heavy metal or aluminum containing
466 ...Spiro
467 ...The hetero ring contains chalcogen
468 ....Polycyclo ring system which contains the hetero ring as one of the cyclos
469 .....Plural nitrogens in the hetero ring
470 ...The hetero ring contains plural nitrogens
471 ....Polycyclo ring system which contains the hetero ring as one of the cyclos
472 .....Two of the cyclos share at least three ring members or a ring member is shared by three of the cyclos (e.g., bridged, peri-fused, etc., toxiferin)
473 .....Bicyclo ring system which contains the hetero ring as one of the cyclos
474 ....The hetero ring contains at least three nitrogens
475 .....Nitro bonded directly to ring nitrogen of the hetero ring (e.g., HMX, etc.)
476 ...Polycyclo ring system which contains the hetero ring as one of the cyclos
477 ....Two of the cyclos share at least three ring members or a ring member is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)
478 .....Containing additional heterocyclic polycyclo ring system having plural ring nitrogens (e.g., vinblastine, vincristine, etc.)
479 ....Tricyclo ring system which contains the hetero ring as one of the cyclos
480 ...Additional hetero ring attached directly or indirectly to the hetero ring by nonionic bonding
481 ....The additional hetero ring is six-membered and contains nitrogen
482 ...Chalcogen or nitrogen attached directly to the hetero ring by nonionic bonding
483 ...Plural nitrogens attached indirectly to the hetero ring by acyclic nonionic bonding
484 ..The hetero ring contains seven members including nitrogen and carbon
485 ...Chalcogen double bonded directly to a ring carbon adjacent to the ring nitrogen (e.g., caprolactam, etc.)
486 ....Heavy metal or aluminum containing
487 ....Silicon or phosphorus attached directly or indirectly to the hetero ring by nonionic bonding
488 ....Chalcogen in the hetero ring
489 .....Plural nitrogens in the hetero ring

	ORGANIC COMPOUNDS (Class 532, Subclass 1)
	.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS
	..The hetero ring contains seven members including nitrogen and carbon
	...Chalcogen double bonded directly to a ring carbon adjacent to the ring nitrogen (e.g., caprolactam, etc.)
	....Chalcogen in the hetero ring
490	.....Bicyclo ring system having the hetero ring as one of the cyclos
491	......The chalcogen and the nitrogen are in the 1,5-positions of the bicyclo ring system (e.g., 1,5-benzothiazepinone, etc.)
492	....Plural nitrogens in the hetero ring
493	.....Tetracyclo ring system having the hetero ring as one of the cyclos
494	......Nitrogen of the hetero ring is shared by an additional cyclo of the tetracyclo ring system
495	.....Tricyclo ring system having the hetero ring as one of the cyclos
496	......Nitrogen of the hetero ring is shared by an additional cyclo of the tricyclo ring system
497	.......Additional hetero atom in the additional cyclo of the tricyclo ring system
498	........The additional cyclo is five-membered consisting of nitrogen and carbon (e.g., imidazobenzodiazepinones, etc.)
499	.........The additional cyclo consists of three nitrogens and two carbons (e.g., triazolobenzodiazepinones, etc.)
500	.....Bicyclo ring system having the hetero ring as one of the cyclos
501	......At least three nitrogens in the hetero ring
502	......At least three hetero atoms in the bicyclo ring system
503	.......Chalcogen in the bicyclo ring system
504	......The bicyclo ring system is 1,4-benzodiazepine (including hydrogenated)
505	.......The chalcogen double bonded directly to the hetero ring is sulfur
506	.......Additional chalcogen bonded directly to ring carbon of the hetero ring
507	........The additional chalcogen is bonded directly at the 3-position of the bicyclo ring system
508	.........Nitrogen or -C(=X)-, wherein X is chalcogen, attached indirectly to the chalcogen by acyclic nonionic bonding
509	.......Acyclic nitrogen bonded directly to the hetero ring
510	.......Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
511	.......Halogen bonded directly to the hetero ring
512	.......Chalcogen attached indirectly to nitrogen of the hetero ring by acyclic nonionic bonding
513	.......Sulfur, -C(=X)-, wherein X is chalcogen, or nitrogen, other than as nitro or nitroso, bonded directly to the carbocyclic ring of the bicyclo ring system
514	.......Nitrogen in the 1-position substituent of the bicyclo ring system
515	.......Preparation by cyclizing benzophenones or imine derivatives thereof
516	.......Preparation from a compound containing a different hetero ring
517	......The bicyclo ring system is 1,5-benzodiazepine (including hydrogenated)
518	.......Additional chalcogen double bonded directly to ring carbon of the hetero ring
519	....Polycyclo ring system which contains the hetero ring as one of the cyclos
520	.....Two of the cyclos share at least three ring members or a ring member is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)
521	.....Plural hetero atoms in the polycyclo ring system
522	.....Tricyclo ring system which contains the hetero ring as one of the cyclos
523	.....Bicyclo ring system which contains the hetero ring as one of the cyclos
524	....Additional hetero ring containing
525	.....Plural seven-membered hetero rings
526	....Additional chalcogen bonded directly to the hetero ring
527	....Nitrogen bonded directly to the hetero ring
528	.....The nitrogen is bonded additionally only to hydrogen
529	....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
530	....Halogen bonded directly to the hetero ring
531	....Chalcogen or nitrogen attached indirectly to the hetero ring by nonionic bonding
532	....Preparing from a compound containing a hetero ring
533	.....The hetero ring is a lactam (i.e., -C(=X)-NH- is part of the ring, wherein X is chalcogen and substitution may be made for the hydrogen only)
534	....Preparing from a compound containing a cycloaliphatic ring
535	.....The reactant is a cyclic oxime
536	......Gas phase rearrangement
537	.....Acyclic -C(=X)X-, wherein the X's are the same or diverse chalcogens, attached directly to the cycloaliphatic ring by nonionic bonding
538	....Cyclization to form the hetero ring
539	.....Reactant contains a cyano group
540	....Purification or recovery
541	...Heavy metal or boron containing
542	...Phosphorus attached directly or indirectly to the hetero ring by nonionic bonding
543	...Spiro
544	...The hetero ring contains chalcogen

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS

..The hetero ring contains seven members including nitrogen and carbon

...The hetero ring contains chalcogen

545 ....Plural nitrogens in the heterocyclic ring

546 ....Polycyclo ring system which contains the hetero ring as one of the cyclos

547 .....Tricyclo ring system which contains the hetero ring as one of the cyclos

548 ......At least three ring hetero atoms in the tricyclo ring system

549 ......Sulfur and nitrogen are bonded directly to each other in the hetero ring

550 ......The nitrogen of the hetero ring is bonded directly to both remaining rings of the tricyclo ring system (e.g., dibenzo(b,e)(1,4)thiazepine, etc.)

551 ......Nitrogen bonded directly to ring carbon of the hetero ring

552 .....Bicyclo ring system which contains the hetero ring as one of the cyclos

553 ...The hetero ring contains plural nitrogens (e.g., 1,3-diazepines, etc.)

554 ....The hetero ring contains at least three nitrogens

555 ....Polycyclo ring system which contains the hetero ring as one of the cyclos

556 .....Two of the cyclos share at least three ring members or a ring member is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)

557 .....Tricyclo ring system which contains the hetero ring as one of the cyclos

558 ......Nitrogen of the hetero ring is shared by an additional cyclo of the tricyclo ring system

559 ....The additional cyclo has at least six ring members

560 ....Chalcogen in the tricyclo ring system

561 ....The additional cyclo consists of one nitrogen and four carbons (e.g., diazepinoindoles, etc.)

562 ....The additional cyclo consists of two nitrogens and three carbons (e.g., imidazobenzodiazepines, etc.)

563 ....s-Triazolo(4,3-a)(1,4)-benzodi-azepines (including hydrogenated)

564 ....Chalcogen, nitrogen, cyano or halogen bonded directly to ring carbon of the triazolo ring

565 ....Nitrogen attached indirectly to ring carbon of the triazolo ring by acyclic nonionic bonding

566 ....The unshared ring carbon of the triazolo ring is unsubstituted or alkyl substituted only

567 .....Bicyclo ring system which contains the hetero ring as one of the cyclos

568 ......At least three ring hetero atoms in the bicyclo ring system

569 ......1,4-benzodiazepines (including hydrogenated)

570 ....Chalcogen bonded directly to ring carbon of the hetero ring

571 ....Nitrogen bonded directly to ring carbon of the hetero ring

572 ....Chalcogen or nitrogen attached indirectly to ring carbon of the hetero ring by acyclic nonionic bonding

573 ....Chalcogen or nitrogen attached indirectly to ring carbon of the hetero ring by acyclic nonionic bonding

574 ....Formation of the 1,4-benzodiazepine ring system

575 ....The nitrogens are in the 1,4-positions of the hetero ring

576 ...Polycyclo ring system which contains the hetero ring as one of the cyclos

577 ....Plural nitrogens in the polycyclo ring system

578 .....Three or more hetero atoms in the polycyclo ring system

579 .....Nitrogen of the hetero ring is shared by an additional cyclo of the polycyclo ring system

580 .....The seven-membered hetero ring shares ring members with one other cyclo only

581 ....Two of the cyclos share at least three ring members or a ring carbon is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)

582 .....Bicyclo ring system which contains the hetero ring as one of the cyclos (e.g., 3-azabicyclo-(3.2.2)nonanes, etc.)

583 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to ring nitrogen of the bicyclo ring system

584 ......Chalcogen or nitrogen attached directly to ring nitrogen of the bicyclo ring system by nonionic bonding

585 ......Chalcogen or nitrogen attached indirectly to ring nitrogen of the bicyclo ring system by acyclic nonionic bonding

586 ....Tricyclo ring system which contains the hetero ring as one of the cyclos

587 .....The hetero ring shares ring members with each of two benzene rings in the tricyclo ring system (e.g., morphanthridines, etc.)

588 ......The nitrogen of the hetero ring is bonded directly to each of the two benzene rings (e.g., iminodibenzyl, etc.)

589 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring nitrogen of the tricyclo ring system

590 ....Nitrogen attached directly or indirectly to ring carbon of the hetero ring by acyclic nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (I.E., OXYGEN, SULFUR, SELENIUM OR TELLURIUM) OR NITROGEN AS THE ONLY RING HETERO ATOMS

..The hetero ring contains seven members including nitrogen and carbon

...Polycyclo ring system which contains the hetero ring as one of the cyclos

....Tricyclo ring system which contains the hetero ring as one of the cyclos

.....The hetero ring shares ring members with each of two benzene rings in the tricyclo ring system (e.g., morphanthridines, etc.)

......The nitrogen of the hetero ring is bonded directly to each of the two benzene rings (e.g., iminodibenzyl, etc.)

591 ....Chalcogen attached directly or indirectly to the hetero ring by acyclic nonionic bonding

592 ....Nitrogen attached indirectly to ring nitrogen of the hetero ring by acyclic nonionic bonding

593 ....Bicyclo ring system which contains the hetero ring as one of the cyclos

594 .....3-Benzazepines (including hydrogenated)

595 ......Benzene ring bonded directly to ring carbon of the hetero ring

596 ...Additional hetero ring attached directly or indirectly to the hetero ring by nonionic bonding

597 ....The additional hetero ring is six-membered and contains nitrogen

598 .....Plural hetero atoms in the additional hetero ring

599 ......Polycyclo ring system having the additional hetero ring as one of the cyclos

600 ....The additional hetero ring is 1,3-diazine (including hydrogenated)

601 ......The additional hetero ring is 1,3-diazine (including hydrogenated)

602 ....The additional hetero ring is five-membered and contains nitrogen

603 .....Plural hetero atoms in the additional hetero ring

604 ...Chalcogen attached directly to the hetero ring by nonionic bonding

605 ...Nitrogen attached directly to the hetero ring by nonionic bonding

606 ....Chalcogen, additional nitrogen, or -C(=X)-, wherein X is chalcogen, attached directly to the nitrogen by nonionic bonding

607 ...Having -C(=X)-, wherein X is chalcogen, bonded directly to nitrogen of the hetero ring

608 ....Chalcogen bonded directly to the -C(=X)- group

609 ...Chalcogen or nitrogen attached indirectly to the hetero ring by acyclic nonionic bonding

610 ....The chalcogen or nitrogen is multiple bonded to a carbon (e.g., cyano or carbonyl groups, etc.)

611 ...Benzene ring bonded directly to the hetero ring

612 ...The hetero ring is unsubstituted or alkyl substituted only

CLASS 544 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 544 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
1 ..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
2 ...Six-membered hetero ring consists of oxygen, sulfur, nitrogen and carbon (e.g., oxathiazines, etc.)
3 ...Six-membered hetero ring consists of sulfur, nitrogen and carbon (e.g., 1,2-thiazines, etc.)
4 ....Heavy metal or aluminum containing
5 ....Plural sulfurs in the six-membered hetero ring (e.g., dithiazines, etc.)
6 ....Spiro
7 ....Plural nitrogens in the six-membered hetero ring (e.g., thiatriazines, etc.)
8 .....Thiadiazines
9 ......Polycyclo ring system having the thiadiazine ring as one of the cyclos
10 ....Bicyclo ring system having the thiadiazine ring as one of the cyclos
11 ....Benzothiadiazines
12 ....1,2,4-benzothiadiazines
13 ....Sulfamyl or substituted sulfamyl containing
14 ....Polycyclo ring system having the six-membered hetero ring as one of the cyclos
31 .....Phenothiazine as three cyclos of polycyclo ring system having at least four cyclos
32 .....Tricyclo ring system having the six-membered hetero ring as one of the cyclos
33 ......1, 2- or 2, 1-Thiazine ring in the tricyclo ring system (e.g., hydrogenated 1, 2-benzothiazine in tricyclo ring system, etc.)
34 ......Plural ring nitrogens in the tricyclo ring system
35 ......Phenothiazines (including hydrogenated)
36 ....Purification or recovery
37 ....Nitrogen bonded directly to phenothiazine ring system
38 ....Carbon bonded directly to ring nitrogen of phenothiazine ring system
39 ....Divalent chalcogen double bonded directly to the carbon
40 ....Additional chalcogen bonded directly to the carbon
41 ....Nitrogen containing substituent bonded to nitrogen of phenothiazine ring system
42 ....Nitrogen containing hetero ring in the nitrogen containing substituent (e.g., oxazole, etc.)
43 ....Plural hetero rings in the nitrogen containing substituent
44 ....Piperazine ring in the nitrogen containing substituent
45 ....Chalcogen in the nitrogen containing substituent
46 ....Chalcogen in the nitrogen containing substituent
47 .....Bicyclo ring system having the six-membered hetero ring as one of the cyclos
48 ......Three or more ring hetero atoms in the bicyclo ring system
49 ......Benzothiazines (including hydrogenated)
50 ....1,3- or 3,1- benzothiazines
51 ....1,4-benzothiazines
52 ....Double bonded divalent chalcogen containing
53 ....1,3-thiazines
54 .....Double bonded divalent chalcogen containing
55 .....Additional hetero ring containing
56 ....1,4-thiazines
57 .....Phosphorus containing
58.1 .....Double bonded divalent chalcogen containing
58.2 ......Divalent chalcogen double bonded directly to the thiazine ring
58.4 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to the thiazine ring
58.5 ......Additional hetero ring containing
58.6 ....Ring nitrogen in the additional hetero ring, which is six-membered
58.7 ....Ring chalcogen in the additional hetero ring
59 .....Thiomorpholines (i.e., fully hydrogenated 1,4-thiazines)
60 ......Additional hetero ring containing
61 ....The additional hetero ring is one of the cyclos in a bicyclo ring system
62 ....Benzo is the other cyclo
63 ...Six-membered hetero ring consists of oxygen, nitrogen and carbon (e.g., 1,2-oxazines, etc)
64 ....Heavy metal or aluminum containing
65 ....Plural oxygens in the six-membered hetero ring
66 ....Plural nitrogens in the six-membered hetero ring
67 .....1,3,5-oxadiazines
68 .....Oxygen bonded directly to the six-membered hetero ring
69 ....Boron or silicon containing
70 ....Spiro
71 .....Spiro oxazine
72 ....Plural oxazine rings
73 .....Polycyclo ring system having oxazine ring as at least one of the cyclos
74 ......Plural 1,4-oxazine rings are cyclos in the polycyclo ring system
75 ....Pentacyclo ring system having the oxazine rings as cyclos
76 ....Plural nitrogens bonded directly to the pentacyclo ring system
77 ....Acyclic nitrogen is bonded directly to a -C(=X)- group, wherein X is chalcogen

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
...Six-membered hetero ring consists of oxygen, nitrogen and carbon (e.g., 1,2-oxazines, etc)
....Plural oxazine rings
78 .....Plural morpholine rings (i.e., plural fully hydrogenated 1, 4-oxazine rings)
79 ......Polycyclo ring system
80 ....Ring nitrogen in the polycyclo ring system
81 ....Four or more ring nitrogens in the polycyclo ring system
82 ......Additional nitrogen containing hetero ring (e.g., thiazole, etc.)
83 ....Triazine
84 ......Phosphorus attached directly or indirectly to a morpholine ring by nonionic bonding
85 ......Sulfur attached directly or indirectly to a morpholine ring by nonionic bonding
86 ......Nitrogen attached directly or indirectly to a morpholine ring by nonionic bonding
87 ......Oxygen attached directly or indirectly to a morpholine ring by nonionic bonding
88 ....1, 3-Oxazines
89 .....Polycyclo ring system having the oxazine ring as one of the cyclos
90 ......Bicyclo ring system having the oxazine ring as one of the cyclos
91 ....Three or more ring hetero atoms in the bicyclo ring system
92 ....Chalcogen bonded directly to the oxazine ring
93 ....Plural oxygens bonded directly to the oxazine ring
94 ....3, 1-Benzoxazine-2, 4-diones (including hydrogenated)
95 ......Three or more ring hetero atoms in the polycyclo ring system
96 .....Additional hetero ring containing
97 .....Chalcogen bonded directly to the oxazine ring
98 ....1, 4-Oxazines
99 .....Polycyclo ring system having the oxazine ring as one of the cyclos
100 ......Anthrone or anthraquinone in the polycyclo ring system
101 ......Tricyclo ring system having the oxazine ring as one of the cyclos
102 ....Phenoxazines (including hydrogenated)
103 ....Plural nitrogens bonded directly to the phenoxazine
104 ....Sulfur containing
105 ......Bicyclo ring system having the oxazine ring as one of the cyclos (e.g., benzoxazines, etc.)
106 .....Morpholines (i.e., fully hydrogenated 1, 4-oxazines)
107 ......Addition salts of morpholine which is unsubstituted or hydrocarbyl substituted only
108 ....N, N-dihydrocarbyl morpholinium
109 ....Hetero ring in ionically bonded moiety
110 ....Phosphorus or sulfur in ionically bonded moiety
111 ......Additional nitrogen containing hetero ring (e.g., thiazetidine, etc.)
112 ....Triazine ring
113 ....1, 3, 5-Triazine ring
114 ....Diazine ring
115 ....The diazine ring is one of the cyclos in a polycyclo ring system
116 ....The diazine ring is one of the cyclos in a bicyclo ring system
117 ....Three or more ring hetero atoms in the bicyclo ring system
118 ....Four or more ring nitrogens in the bicyclo ring system
119 ....Acyclic nitrogen containing
120 ....1, 4-Diazine ring
121 ....Piperazine ring
122 ....1, 3-Diazine ring
123 ....Oxygen bonded directly to the diazine ring
124 ....Six-membered ring consisting of one nitrogen and five carbons (e.g., pyridine, etc.)
125 ....The additional six-membered hetero ring is one of the cyclos in a polycyclo ring system
126 ....The additional six-membered hetero ring is one of the cyclos in a tricyclo ring system
127 ....The additional six-membered hetero ring is one of the cyclos in a bicyclo ring system
128 ....Quinoline or isoquinoline (including hydrogenated)
129 ....Piperidine ring
130 ....Double bonded divalent chalcogen containing
131 ....Double bonded divalent chalcogen containing
132 ....Five-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
133 ....The five-membered hetero ring has at least sulfur and nitrogen as ring hetero atoms
134 ....Plural sulfurs or nitrogens in the five-membered hetero ring (e.g., thiatriazole, etc.)
135 ....Benzothiazoles (including hydrogenated)
136 ....Polysulfide containing chain between morpholine ring and benzothiazole ring system
137 ....The five-membered hetero ring has at least oxygen and nitrogen as ring hetero atoms
138 ....Oxadiazole ring (including hydrogenated)
139 ....1, 3-Diazole ring (including hydrogenated)
140 ....1, 2-Diazole ring (including hydrogenated)

	ORGANIC COMPOUNDS (Class 532, subclass 1)
	.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
	..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
	...Six-membered hetero ring consists of oxygen, nitrogen and carbon (e.g., 1,2-oxazines, etc)
	....1, 4-Oxazines
	.....Morpholines (i.e., fully hydrogenated 1, 4-oxazines)
	......Additional nitrogen containing hetero ring (e.g., thiazetidine, etc.)
141	.......Five-membered hetero ring consisting of one nitrogen and four carbons
142	........The five-membered hetero ring is one of the cyclos in a polycyclo ring system
143	.........The five-membered hetero ring is one of the cyclos in a bicyclo ring system
144	..........Chalcogen bonded directly to the bicyclo ring system
145	......Sulfur containing hetero ring (e.g., thioxane, etc.)
146	.......Thiophene ring (including hydrogenated)
147	......Additional oxygen containing hetero ring
148	.......Plural ring hetero atoms in the additional hetero ring
149	.......The additional hetero ring is six-membered
150	........The additional six-membered hetero ring is one of the cyclos in a polycyclo ring system
151	.........The additional six-membered hetero ring is one of the cyclos in a bicyclo ring system
152	.......The additional hetero ring is five-membered
153	........The five-membered hetero ring is one of the cyclos in a polycyclo ring system
154	......Polycyclo-carbocyclic ring system having at least three cyclos
155	.......Tricyclo having three six-membered carbocyclic rings
156	........Anthrone or anthraquinone
157	......Phosphorus attached directly or indirectly to morpholine ring by nonionic bonding
158	......Sulfur attached directly or indirectly to morpholine ring by nonionic bonding
159	.......Nitrogen attached directly or indirectly to morpholine ring by nonionic bonding
160	........Double bonded divalent sulfur
161	.......Double bonded divalent sulfur
162	......Nitrogen attached directed or indirectly to morpholine ring by nonionic bonding
163	.......Cyano containing
164	.......Morpholine ring bonded directly to the nitrogen
165	.......Carbocyclic ring bonded directly to the nitrogen
166	........Morpholine ring bonded directly to the carbocyclic ring
167	........Nitro bonded directly to the carbocyclic ring
168	.......Oxygen double bonded and acyclic nitrogen bonded directly to the same carbon
169	........A ring bonded directly to the carbon
170	......Oxygen attched directly or indirectly to morpholine ring by nonionic bonding
171	.......The oxygen is in a -COO- group
172	........Carbonyl of -COO- group bonded directly to a ring
173	.......The oxygen is bonded directly to a ring
174	........Ether containing
175	.......The oxygen is in a carbonyl group
176	........The carbonyl is bonded directly to nitrogen of morpholine ring
177	.......Ether containing
178	......N-hydrocarbyl morpholines
179	...Tetrazines
180	...Triazines
181	....Heavy metal or aluminum containing
182	....Asymmetrical (e.g., 1, 2, 4-triazines, etc.)
183	.....Polycyclo ring system having the asymmetrical triazine ring as one of the cyclos
184	......Four or more ring hetero atoms in the polycyclo ring system
185	....Hexamethylenetetramines
186	.....Processes
187	....Anthrone or anthraquinone containing
188	.....Polycyclo ring system having the anthrone or anthraquinone and at least one hetero ring as cyclos
189	.....Sulfur containing
190	....Cyanuric chloride or dichloroisocyanuric acid salt
191	.....Processes utilizing cyanogen chloride reactant
192	....Cyanuric acid per se or salt thereof
193	....Trimerization process to form the triazine ring
193.1	....Stilbene containing
193.2	.....Plural triazine rings containing
194	....Substituent nitrogen bonded directly to carbon of the triazine ring
195	.....Phosphorus containing
196	.....Three substituent nitrogens bonded directly to the three carbons of the triazine ring
197	......Additional ring containing
198	.......Hetero ring
199	......Halogen or sulfur containing
200	......Melamine per se, or salt thereof
201	.......Processes utilizing urea or biuret reactant
202	.......Processes utilizing cyanamide or dicyanamide reactant
203	.......Purification or recovery
204	.....Two substituent nitrogens bonded directly to two carbons of the triazine ring
205	......Guanamines
206	.......Additional ring containing
207	........Hetero ring
208	......Additional ring containing
209	.......Hetero ring
210	......Sulfur containing
211	.....Additional ring containing
212	......Hetero ring
213	.....Sulfur containing
214	....Phosphorus containing

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
...Triazines
215 ....Chalcogen or halogen containing substituent
216 .....Bonded to triazine ring carbon
217 ......Halogen bonded directly to triazine ring carbon
218 ....Chalcogen bonded directly to triazine ring carbon
219 ......Chalcogen bonded directly to triazine ring carbon
220 ....Divalent chalcogen double bonded directly to triazine ring carbon
221 ....To three ring carbons
222 ....Nitrogen containing substituent
223 ....To two ring carbons
224 ...The six-membered hetero ring consists of two nitrogens and four carbons (e.g., 1,2-diazines, etc.)
225 ....Heavy metal or aluminum containing
226 .....Arsenic or zinc containing
227 .....Mercury containing
228 ......Purine containing (including hydrogenated)
229 ....Boron or silicon containing
230 ....Spiro
231 .....Spiro diazine
232 ....Phosphorus attached directly or indirectly to a 1, 2-diazine ring by nonionic bonding
233 ....Polycyclo ring system having a 1,2-diazine ring as one of the cyclos
234 .....Tricyclo ring system having the 1,2-diazine ring as one of the cyclos
235 .....Bicyclo ring system having the 1,2-diazine ring as one of the cyclos
236 ......At least three ring nitrogens in the bicyclo ring system
237 ......Phthalazines (including hydrogenated)
238 ....1,2-diazines which contain an additional hetero ring
239 ....Chalcogen bonded directly to ring carbon of a 1,2-diazine ring
240 .....Plural chalcogens bonded directly
241 .....Halogen attached directly to the 1,2-diazine ring by nonionic bonding
242 ....1,3-diazines
243 .....Phosphorus attached directly or indirectly to the diazine ring by nonionic bonding
244 ......Polycyclo ring system having the diazine ring as one of the cyclos
245 .....Polycyclo ring system having the diazine ring as one of the cyclos
246 ......Tetracyclo ring system having the diazine ring as one of the cyclos
247 ....Three or more ring hetero atoms in the tetracyclo ring system
248 ....Ring carbon is shared by three of the cyclos (e.g., anthrapyrimidine, etc.)
249 ......Tricyclo ring system having the diazine ring as one of the cyclos
250 ....Three or more ring hetero atoms in the tricyclo ring system
251 ....Four or more ring nitrogens in the tricyclo ring system
252 ....Ring nitrogen is shared by two of the cyclos
253 ......Bicyclo ring system having the diazine ring as one of the cyclos
254 ....At least five ring hetero atoms in the bicyclo ring system
255 ....Four ring hetero atoms in the bicyclo ring system
256 ....Four ring nitrogens in the bicyclo ring system
257 ....Pteridines (including hydrogenated)
258 ....Nitrogen bonded directly to the pteridine ring system
259 ....Plural nitrogens bonded directly to the pteridine ring system
260 ....At 2- and 4-positions
261 ....Pteroyl per se or having -C(=X)-, wherein X is chalcogen, bonded directly to acyclic nitrogen of otherwise unsubstituted pteroyl
262 ....The other cyclo in the bicyclo ring system is five-membered
263 ....Ring nitrogen is shared by two cyclos
264 ....Purines (including hydrogenated)
265 ....Chalcogen bonded directly to ring carbon of the purine ring system
266 ....At 2-, 6-, and 8- positions
267 ....At 2- and 6-positions (e.g., theophyllines, etc.)
268 ....Additional polycyclo ring system, which is not another purine, having a hetero ring as one of the cyclos
269 ....Additional hetero ring which is unsaturated and is not one of the cyclos of a purine ring system
270 ....Plural ring nitrogens in the additional hetero ring
271 ....Having -C(=X)-, wherein X is chalcogen attached directly or indirectly to the purine ring system by nonionic bonding or halogen bonded directly at 8-positions (e.g., theophylline acetate, 8-chlorotheophylline, etc.)
272 ....Nitrogen attached directly or indirectly to the purine ring system by nonionc bonding
273 ....Positions other than 2- and 6- are unsubstituted or hydrocarbyl substituted only (e.g., theophylline, etc.)

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
...The six-membered hetero ring consists of two nitrogens and four carbons (e.g., 1,2-diazines, etc.)
....1,3-diazines
.....Polycyclo ring system having the diazine ring as one of the cyclos
......Bicyclo ring system having the diazine ring as one of the cyclos
.......Four ring hetero atoms in the bicyclo ring system
........Four ring nitrogens in the bicyclo ring system
.........The other cyclo in the bicyclo ring system is five-membered
..........Purines (including hydrogenated)
...........Chalcogen bonded directly to ring carbon of the purine ring system
............At 2- and 6-positions (e.g., theophyllines, etc.)
.............Positions other than 2- and 6- are unsubstituted or hydrocarbyl substituted only (e.g., theophylline, etc.)

274 ....Recovery of caffeine per se, theobromine per se, or salt thereof, from natural or waste material
275 ....Caffeine per se, theobromine per se, or salt thereof
276 ....Nitrogen attached directly or indirectly to the purine ring system by nonionic bonding
277 ....Nitrogen attached directly or indirectly to the purine ring system by nonionic bonding
278 ....Three ring hetero atoms in the bicyclo ring system
279 ....Three ring nitrogens in the bicyclo ring system
280 ....The other cyclo in the bicyclo ring system is five-membered
281 ....Ring nitrogen is shared by the two cyclos
282 ....Ring nitrogen is shared by two cyclos
283 ....The other cyclo in the bicyclo ring system is a benzene ring (e.g., quinazoline, etc.)
284 ....Additional nitrogen containing unsaturated hetero ring (e.g., thiazole, etc.)
285 ....Chalcogen bonded directly at 2- and 4-positions
286 ....Chalcogen bonded directly at 2-position
287 ....Chalcogen bonded directly at 4-position
288 ....Sulfur bonded directly at 6-position
289 ....Carbocyclic ring bonded directly at 2-position
290 ....Carbocyclic ring bonded directly at 3-position
291 ....Nitrogen bonded directly at 2- and 4-positions
292 ....Nitrogen bonded directly at 2-position
293 ....Nitrogen bonded directly at 4-position
294 .....Polycyclo-carbocyclic ring system having at least three cyclos
295 .....Plural diazine rings
296 ......Plural 1,3-diazine rings
297 .....Nitrogen attached directly at 2-position by nonionic bonding and sulfur bonded directly to the nitrogen
298 .....Chalcogen bonded directly to diazine ring carbon
299 ......At 2-, 4-, and 6-positions (e.g., barbituric acid, etc.)
300 ....Additional hetero ring which is unsaturated
301 ....Nitrogen attached directly or indirectly to the diazine ring by nonionic bonding
302 ....Additional chalcogen attached directly or indirectly to the diazine ring by nonionic bonding
303 ....Halogen attached directly or indirectly to the diazine ring by nonionic bonding
304 ....Alicyclic ring attached directly or indirectly to the diazine ring by nonionic bonding
305 ....Phenyl bonded directly at 5-position
306 ....Acyclic ethylenic or acetylenic unsaturation containing
307 ....Plural alkyl groups bonded directly at 5-position
308 ....Plural diverse alkyl groups bonded directly at 5-position
309 ......At 2-position and at 4- or 6-position
310 ....Additional hetero ring which is unsaturated
311 ....Nitrogen attached directly or indirectly to the diazine ring by nonionic bonding
312 ....5-position is unsubstituted or alkyl substituted only
313 ....Halogen attached directly to the diazine ring by nonionic bonding
314 ....Additional chalcogen attached directly or indirectly to the diazine ring by nonionic bonding
315 ......At 2-position
316 ....Nitrogen attached directly or indirectly to the diazine ring by nonionic bonding
317 ....The nitrogen is bonded directly at 4- or 6-position
318 ....Additional chalcogen attached directly or indirectly to the diazine ring by nonionic bonding
319 ......At 4- or 6-position
320 ....Nitrogen attached directly at 2-position by nonionic bonding
321 ....Carbocyclic ring containing
322 .....Nitrogen attached directly to diazine ring by nonionic bonding

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
...The six-membered hetero ring consists of two nitrogens and four carbons (e.g., 1,2-diazines, etc.)
....1,3-diazines
.....Nitrogen attached directly to diazine ring by nonionic bonding
323 ......At 2-position and at 4- or 6-position
324 ....Additional hetero ring which is unsaturated
325 ....Substituent on 5-position contains carbocyclic ring
326 ......At 4- or 6-position
327 ....Sulfur attached indirectly to the diazine ring by nonionic bonding (e.g., thiamines, etc.)
328 ....Additional hetero ring which is unsaturated
329 ....Carbonyl attached directly or indirectly to the diazine ring by nonionic bonding
330 ......At 2-position
331 ....Additional hetero ring which is unsaturated
332 ....Chalcogen attached indirectly to the diazine ring by nonionic bonding
333 .....Additional hetero ring which is unsaturated
334 .....Halogen attached directly to the diazine ring by nonionic bonding
335 .....Chalcogen attached indirectly to the diazine ring by nonionic bonding
336 ....1,4-diazines
337 .....Phosphorus attached directly or indirectly to the diazine ring by nonionic bonding
338 .....Polycyclo ring system having the diazine ring as one of the cyclos
339 ......Heptacyclo ring system having the diazine ring as one of the cyclos (e.g., indanthrones, etc.)
340 ....Chalcogen attached indirectly to the heptacyclo ring system by nonionic bonding
341 ....Halogen, nitrogen, or carbon attached directly to the heptacyclo ring system by nonionic bonding
342 ......Pentacyclo ring system having the diazine ring as one of the cyclos
343 ......Tetracyclo ring system having the diazine ring as one of the cyclos (e.g., benzophenazines, etc.)
344 ......Tricyclo ring system having the diazine ring as one of the cyclos
345 ....Three or more ring hetero atoms in the tricyclo ring system
346 ....Ring nitrogen is shared by two of the cyclos (e.g., ergot, alkaloids, etc.)
347 ....Phenazines (including hydrogenated)
348 ....Nitrogen attached directly to the phenazine ring system by nonionic bonding
349 ......Bicyclo ring system having the diazine ring as one of the cyclos
350 ....Three or more ring hetero atoms in the bicyclo ring system
351 ....Triethylene diamines
352 ....Process of forming, purifying, or recovering triethylene diamine per se, or salt thereof
353 ....Quinoxalines (including hydrogenated)
354 ....Chalcogen bonded directly to diazine ring carbon
355 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to diazine ring carbon
356 ....Halogen or nitrogen attached directly to diazine ring carbon by nonionic bonding
357 .....Plural diazine rings
358 .....Piperazines (i.e., fully hydrogenated 1,4-diazines)
359 ......Additional hetero ring containing
360 ....Six-membered ring consisting of one nitrogen and five carbons (e.g., pyridine, etc.)
361 ....The additional six-membered hetero ring is one of the cyclos in a polycyclo ring system
362 ....The additional six-membered hetero ring is one of the cyclos in a bicyclo ring system
363 ....Quinoline or isoquinoline (including hydrogenated)
364 ....At least three hetero rings containing
365 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the additional six-membered hetero ring (e.g., nicotinic acid, etc.)
366 ....Five-membered hetero ring having two or more ring hetero atoms of which at least one is nitrogen
367 ....Ring chalcogen in the five-membered hetero ring
368 ....The five-membered hetero ring is one of the cyclos in a polycyclo ring system
369 ....1,3-oxazole ring or 1,3-thiazole ring (including hydrogenated)
370 ....1,3-diazole ring (including hydrogenated)
371 ....1,2-diazole ring (including hydrogenated)
372 ....Five-membered hetero ring consisting of one nitrogen and four carbons
373 ....The five-membered hetero ring is one of the cyclos in a bicyclo ring system
374 ....Ring chalcogen in the additional hetero ring
375 ....Polycyclo ring system having the additional hetero ring as one of the cyclos

ORGANIC COMPOUNDS (Class 532, subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazines, etc.)
...The six-membered hetero ring consists of two nitrogens and four carbons (e.g., 1,2-diazines, etc.)
....1,4-diazines
.....Piperazines (i.e., fully hydrogenated 1,4-diazines)
......Additional hetero ring containing
.......Ring chalcogen in the additional hetero ring
........Polycyclo ring system having the additional hetero ring as one of the cyclos
376 ....Bicyclo ring system having the additional hetero ring as one of the cyclos
377 ....Plural ring chalcogens in the bicyclo ring system
378 ....Plural ring chalcogens in the polycyclo ring system or the piperazine ring bonded directly to the polycyclo ring system
379 ....The additional hetero ring is five-membered and unsaturated (e.g., thienyl piperazines, etc.)
380 ......Polycyclo-carbocyclic ring system having at least three cyclos
381 ....Piperazine ring bonded directly to the polycyclo-carbocyclic ring system
382 ......Nitrogen attached directly to the piperazine ring by nonionic bonding
383 ......Chalcogen attached directly to piperazine ring nitrogen by nonionic bonding
384 ......Chalcogen bonded directly to piperazine ring carbon
385 ....Plural chalcogens bonded directly to piperazine ring carbons
386 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to the piperazine ring
387 ....Plural -C(=X)- groups bonded directly to the piperazine ring
388 ....Chalcogen or acyclic nitrogen bonded directly to at least one of the -C(=X)- groups
389 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
390 ....Halogen or acyclic nitrogen bonded directly to the -C(=X)- group
391 ....Carbocyclic ring containing
392 ......Phenyl or naphthyl bonded directly to ring nitrogen of the piperazine ring
393 ....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
394 ....The other ring nitrogen has a substituent which includes chalcogen single bonded to acyclic carbon
395 ....The other ring nitrogen is unsubstituted or alkyl substituted only, or salt thereof
396 ......Plural carbocyclic rings bonded directly to the same acyclic carbon
397 ....Chalcogen bonded directly to the carbon
398 ......Chalcogen attached indirectly to the piperazine ring by nonionic bonding
399 ....The chalcogen, X, is in a -C(=X)- group
400 ....Acyclic nitrogen bonded directly to the -C(=X)- group
401 ....The chalcogen is single bonded to both acyclic carbon and hydrogen
402 ......Nitrogen attached indirectly to the piperazine ring by nonionic bonding
403 ......Carbocyclic ring containing
404 ......N-hydrocarbyl piperazines
405 .....Additional hetero ring which is unsaturated
406 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the diazine ring
407 ......Nitrogen attached directly to the diazine ring by nonionic bonding
408 .....Chalcogen bonded directly to diazine ring carbon
409 .....Halogen attached directly to the diazine ring by nonionic bonding
410 .....Unsubstituted or hydrocarbyl substituted only, or salt thereof

CLASS 546 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

> IN THIS SERIES OF CLASSES, CLASS 546 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

1 ..Hetero ring is six-membered consisting of one nitrogen and five carbons

2 ...Heavy metal or aluminum containing

3 ....Arsenic containing

4 ....The metal bonded directly to carbon, which carbon is a ring carbon of the six-membered hetero ring or which carbon is attached directly or indirectly to the six-membered hetero ring by nonionic bonding

5 ....The metal is bonded directly to chalcogen of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens, which group is attached directly or indirectly to the six-membered hetero ring by nonionic bonding

6 ....The metal is bonded directly to chalcogen which chalcogen is attached directly or indirectly to the six-membered hetero ring by nonionic bonding

7 .....The chalcogen is bonded directly to ring carbon of a quinoline ring system (including hydrogenated)

8 ....The metal is in an anion and the six-membered hetero ring is in a cation

9 .....The metal is bonded directly to halogen in the anion

10 ....Polycyclo ring system having the six-membered hetero ring as one of the cyclos

11 ....Piperidine containing

12 ....Azide or acyclic nitrogen containing

13 ...Boron containing

14 ...Silicon containing

15 ...Spiro

16 ....The spiro includes the six-membered hetero ring

17 .....Polycyclo ring system having one of the two rings which form the spiro as one of the cyclos

18 ......Polycyclo ring system having the six-membered hetero ring as one of the cyclos

19 .....At least three ring hetero atoms in the two rings which form the spiro

20 ......At least three ring nitrogens in the two rings which form the spiro

21 ...Phosphorus attached directly to the six-membered hetero ring by nonionic bonding

22 ...Phosphorus attached indirectly to the six-membered hetero ring by nonionic bonding

23 ....Polycyclo ring system having the six-membered hetero ring as one of the cyclos

24 ....Chalcogen bonded directly to ring carbon of the six-membered hetero ring

25 .....The phosphorus is bonded directly to the chalcogen

26 ...Polycyclo ring system having the six-membered hetero ring as one of the cyclos

27 ....The polycyclo ring system has at least ten cyclos and at least four ring nitrogens

28 ....Nonacyclo ring system having the six-membered hetero ring as one of the cyclos

29 .....The six-membered hetero ring shares ring nitrogen with a five-membered cyclo which contains additional ring nitrogen

30 ....Octacyclo ring system having the six-membered hetero ring as one of the cyclos

31 .....Plural ring hetero atoms in the octacyclo ring system (e.g., flavanthrone, cepharanthrine, etc.)

32 ......At least four ring nitrogens in the octacyclo ring system (e.g., naphthoylene dibenzimidazole, etc.)

33 ....Heptacyclo ring system having the six-membered hetero ring as one of the cyclos

34 .....Two of the cyclos share at least three ring members (e.g., protoveratrine, etc.)

35 ......At least three ring hetero atoms in the heptacyclo ring system

36 .....Plural ring hetero atoms in the heptacyclo ring system

37 ......Ring carbon is shared by three of the cyclos (e.g., perylene tetracarboxylic acid diimide, etc.)

38 ....Hexacyclo ring system having the six-membered hetero ring as one of the cyclos

39 .....Two of the cyclos share at least three ring members (e.g., etheno morphides, etc.)

40 ......Plural ring nitrogens in the hexacyclo ring system (e.g., reserpic acid lactone, etc.)

41 .....Plural ring hetero atoms in the hexacyclo ring system

42 ....Pentacyclo ring system having the six-membered hetero ring as one of the cyclos

43 .....Two of the cyclos share at least three ring members (i.e., bridged)

44 ......One of the five cyclos is five-membered and includes ring chalcogen (e.g., codeine, morphine, etc.)

45 ....Nitrogen or divalent chalcogen double bonded directly to carbocyclic ring of the pentacyclo ring system (e.g., morphinones, etc.)

46 ....A single chalcogen is bonded directly to ring carbon of the pentacyclo ring system (e.g., desoxy morphine, etc.)

47 .....Plural ring hetero atoms in the pentacyclo ring system

48 ......Three or more ring hetero atoms in the pentacyclo ring system

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is six-membered consisting of one nitrogen and five carbons

...Polycyclo ring system having the six-membered hetero ring as one of the cyclos

....Pentacyclo ring system having the six-membered hetero ring as one of the cyclos

.....Plural ring hetero atoms in the pentacyclo ring system

49 ......Two ring nitrogens in the pentacyclo ring system (e.g., quinacridones, etc.)

50 ....Ring nitrogen is shared by two of the cyclos (e.g., yohimbanes, etc.)

51 ....Ring nitrogen is shared by five-membered cyclo and six-membered cyclo (e.g., vincamine, etc.)

52 ....Additional ring nitrogen in the five-membered cyclo

53 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the pentacyclo ring system and also bonded directly to chalcogen or nitrogen

54 ....Plural chalcogens bonded directly to the same cyclo as is the -(C=X)- group

55 ....Trialkoxybenzoyl bonded directly to at least one of the chalcogens (e.g., reserpine, etc.)

56 ....Three or more ring carbons of the pentacyclo ring system are substituted (e.g., substituted quinacridones, etc.)

57 ....Three or more chalcogens containing

58 .....The pentacyclo ring system consists of five six-membered cyclos (e.g., anthraquinonebenzacridones, etc.)

59 ......Nitrogen attached directly to the pentacyclo ring system by nonionic bonding

60 ....An additional ring is bonded directly to the nitrogen

61 ....Tetracyclo ring system having the six-membered hetero ring as one of the cyclos

62 .....Plural ring hetero atoms in the tetracyclo ring system (e.g., acronycines, etc.)

63 ......Two of the cyclos share at least three ring member (i.e., bridged)

64 ......Three or more ring hetero atoms in the tetracyclo ring system

65 ....Plural ring chalcogens in the tetracyclo ring system

66 ......Ring carbon is shared by three of the cyclos

67 ....The three cyclos consist of two carbocyclic rings and a five-membered hetero ring which includes a ring nitrogen (e.g., ergolines, etc.)

68 ....Chalcogen or nitrogen bonded directly to ring carbon of the six-membered hetero ring

69 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the six-membered hetero ring (e.g., lysergic acid, etc.)

70 ......Two ring nitrogens in the tetracyclo ring system

71 .....Ring nitrogen is shared by two of the cyclos

72 ......Two of the cyclos share at least three ring members or a ring carbon is shared by three of the cyclos (i.e., bridged or peri-fused)

73 ......The six-membered hetero ring shares ring members with one other cyclo only (e.g., pyrrocolines, etc.)

74 .....Two of the cyclos share at least three ring members (e.g., morphinans, etc.)

75 .....Ring carbon is shared by three of the cyclos

76 ......Chalcogen bonded directly to ring carbon of the six-membered hetero ring (e.g., anthrapyridones, etc.)

77 .....The six-membered hetero ring shares ring members with one other cyclo only

78 ......Plural chalcogens bonded directly to carbocyclic rings of the tetracyclo ring system (e.g., pyridoanthraquinones, etc.)

79 ....Tricyclo ring system having the six-membered hetero ring as one of the cyclos

80 .....Plural ring hetero atoms in the tricyclo ring system

81 ......Plural ring nitrogens in the tricyclo ring system

82 ....Three or more ring hetero atoms in the tricyclo ring system

83 ....At least one of the ring hetero atoms is chalcogen

84 ....One of the cyclos is five-membered

85 ....The six-membered hetero ring shares ring members with the five-membered cyclo only (e.g., pyrido-indoles, etc.)

86 ....Chalcogen bonded directly to ring carbon of the tricyclo ring system

87 ....Nitrogen attached directly or indirectly to the tricyclo ring system by nonionic bonding

88 ....Phenanthrolines (including hydrogenated)

89 ......Ring oxygen in the tricyclo ring system

90 ....Plural ring oxygens in the tricyclo ring system

91 ....Tropane and oxirane in the tricyclo ring system

92 ....Plural chalcogens bonded directly to ring carbons of the tricyclo ring system

93 .....One of the cyclos has at least seven members

94 .....Ring nitrogen is shared by two of the cyclos

95 ......Benzo(a)quinolizines (including hydrogenated)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered consisting of one nitrogen and five carbons
...Polycyclo ring system having the six-membered hetero ring as one of the cyclos
....Tricyclo ring system having the six-membered hetero ring as one of the cyclos
.....Ring nitrogen is shared by two of the cyclos
......Benzo(a)quinolizines (including hydrogenated)
96 ....Additional polycyclo ring system having ring nitrogen (e.g., emetine, etc.)
97 .....Two of the cyclos share at least three ring carbons (e.g., benzomorphans, etc.)
98 .....Ring carbon is shared by each of the three cyclos (e.g., 1,8-naphthalimides, etc.)
99 ......Nitrogen, other than as nitro or nitroso, attached directly or indirectly to the tricyclo ring system by nonionic bonding
100 ....The nitrogen is bonded directly to a carbocyclic ring of the tricyclo ring system
101 .....Each of the three cyclos is six-membered (e.g., benzoquinolines, etc.)
102 ......Acridines (including hydrogenated)
103 ....Chalcogen bonded directly to ring carbon of the six-membered hetero ring
104 ....Nitrogen, other than as nitro or nitroso, attached directly or indirectly to the acridine ring system by nonionic bonding
105 ....The nitrogen is bonded directly to ring carbon of the six-membered hetero ring
106 ....The nitrogen is part of a substituent which contains additional nonionically bonded nitrogen
107 ....Plural nitrogens, other than as nitro or nitroso, attached directly to the carbocyclic rings of the acridine ring system (e.g., 3,6-diaminoacridines, etc.)
108 ......Phenanthridines (including hydrogenated)
109 ....Unsaturated ring bonded directly to ring carbon of the six-membered hetero ring
110 ......Chalcogen or -C(=X)-, wherein X is chalcogen, attached directly to the six-membered hetero ring by nonionic bonding
111 .....The tricyclo ring system consists of a five-membered carbocyclic ring ortho fused to both a six-membered carbocyclic ring and the six-membered hetero ring (e.g., indenopyridines, etc.)
112 ....Bicyclo ring system having the six-membered hetero ring as one of the cyclos
113 .....Plural ring hetero atoms in the bicyclo ring system
114 ......Ring sulfur in the bicyclo ring system
115 ......Ring oxygen in the bicyclo ring system
116 ....Acyclic chalcogen bonded directly to ring carbon of the bicyclo ring system
117 ......At least four ring nitrogens in the bicyclo ring system
118 ......Three ring nitrogens in the bicyclo ring system
119 ....Two of the ring nitrogens are bonded directly to each other
120 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the bicyclo ring system
121 ......Ring nitrogen is shared by the two cyclos
122 ......The other cyclo in the bicyclo ring system is also six-membered (e.g., naphthyridines, etc.)
123 ....Chalcogen and -C(=X)-, wherein X is chalcogen, bonded directly to ring carbons of the bicyclo ring system (e.g., 4-oxo-naphthyridine -3-carboxylic acid, etc.)
124 .....Tropanes (including nor and dehydro forms)
125 ......Additional hetero ring containing
126 ....Additional polycyclo ring system having the additional hetero ring as one of the cyclos
127 ......Chalcogen bonded directly to ring carbon of the tropane ring system
128 ....Polycyclo-carbocyclic ring system
129 ....Additional chalcogen attached directly or indirectly to the tropane ring system by nonionic bonding
130 ....Three or more oxygens attached directly or indirectly to the tropane ring system by nonionic bonding
131 ....Hydroxy containing or containing oxy bonded directly to a Group IA or Group IIA light metal (i.e., -OH or -OM containing)
132 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to the tropane ring system
133 .....Quinuclidines (including unsaturated)
134 ......Quinoline containing (including hydrogenated)
135 ....Additional hetero ring containing
136 ....Three or more chalcogens attached indirectly to the quinuclidine ring system by nonionic bonding
137 ......Chalcogen bonded directly to ring carbon of the quinuclidine ring system
138 .....Quinolizines (including hydrogenated)
139 .....Isoquinolines (including hydrogenated)
140 ......Plural isoquinoline ring systems attached directly or indirectly to each other by nonionic bonding
141 ......Chalcogen attached directly to the six-membered hetero ring by nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is six-membered consisting of one nitrogen and five carbons

...Polycyclo ring system having the six-membered hetero ring as one of the cyclos

....Bicyclo ring system having the six-membered hetero ring as one of the cyclos

.....Isoquinolines (including hydrogenated)

......Chalcogen attached directly to the six-membered hetero ring by nonionic bonding

142 ....Plural chalcogens attached directly to the six-membered hetero ring by nonionic bonding

143 ......Nitrogen, other than as nitro or nitroso, attached directly to the isoquinoline ring system by nonionic bonding

144 ......Unsaturated ring attached directly to the six-membered hetero ring by nonionic bonding

145 ......Acyclic nitrogen double or triple bonded to carbon which is attached directly or indirectly to the isoquinoline ring system by nonionic bonding

146 ......Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the isoquinoline ring system by nonionic bonding

147 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

148 ......Unsaturated hetero ring attached indirectly to the isoquinoline ring system by nonionic bonding

149 ......Unsaturated carbocyclic ring attached indirectly to the six-membered hetero ring through an acyclic hydrocarbon chain

150 ......Single bond between 3,4-positions

151 ......N-alkyl or N-alkenyl isoquinoliniums which are otherwise unsubstituted or alkyl or alkenyl substituted only

152 .....Quinolines (including hydrogenated)

153 ......Chalcogen attached directly to the six-membered hetero ring by nonionic bonding

154 ....Polycyclo-carbocyclic ring system bonded directly to the six-membered hetero ring (e.g., quinophthalones, etc.)

155 ....Plural chalcogens attached directly to the six-membered hetero ring by nonionic bonding

156 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the six-membered hetero ring

157 ....Chalcogen attached directly at 2-position by nonionic bonding

158 ....Single bond between 3,4-positions

159 ......Nitrogen, other than as nitro or nitroso, attached directly to the six-membered hetero ring by nonionic bonding

160 ....Unsaturated carbocyclic ring bonded directly to the nitrogen

161 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the carbocyclic ring

162 ....Nitrogen attached indirectly to the six-membered hetero ring through the directly attached nitrogen by nonionic bonding

163 ....Both nitrogens bonded directly to the same acyclic hydrocarbon group

164 ......Fully saturated quinolines

165 ......Single bond between 1,2-positions and single bond between 3,4-positions

166 ....The six-membered hetero ring is unsubstituted or alkyl substituted only

167 ......Unsaturated hetero ring attached directly to the quinoline ring system by nonionic bonding

168 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to the quinoline ring system

169 ....Acyclic nitrogen bonded directly to the -C(=X)- group

170 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

171 ......Nitrogen, other than as nitro or nitroso, attached directly to the carbocyclic ring of the quinoline ring system by nonionic bonding

172 ......Acyclic sulfur bonded directly to oxygen and directly or indirectly to the quinoline ring system by nonionic bonding

173 ......Unsaturated carbocyclic ring attached directly to the quinoline ring system by nonionic bonding (e.g., quinophthalones, etc.)

174 ......Having -C(=X)-, wherein X is chalcogen, attached indirectly to the quinoline ring system by nonionic bonding

175 ....Nitrogen bonded directly to the -C(=X)- group

176 ....Nitrogen, other than as nitro or nitroso, attached indirectly to the quinoline ring system by nonionic bonding

177 ....Chalcogen attached directly to the carbocyclic ring of the quinoline ring system by nonionic bonding

178 ......Chalcogen attached directly to the carbocyclic ring of the quinoline ring system by nonionic bonding

179 ....The chalcogen is in an -OH, -SH, -OM or -SM group (M is Group IA or Group IIA light metal)

180 ......Halogen or nitro attached directly or indirectly to the quinoline ring system by nonionic bonding

181 ......Quinolines which are unsubstituted or which are alkyl or alkenyl substituted only, or salt thereof

182 ....Addition salts

183 .....Chalcogen bonded directly to ring carbon of the bicyclo ring system

184 ...Piperidines

185 ....Process of forming a piperidine ring from a pyridine ring or from a partially hydrogenated pyridine ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered consisting of one nitrogen and five carbons
...Piperidines
186 ....Plural piperidine rings
187 .....Additional hetero ring containing
188 .....Chalcogen attached directly to a ring carbon of a piperidine ring by nonionic bonding
189 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to a piperidine ring
190 .....Having -C(=X)-, wherein X is chalcogen, attached indirectly to a piperdine ring by nonionic bonding
191 .....Carbocyclic ring containing
192 ....Additional ring containing
193 .....Pyridine ring or partially hydrogenated pyridine ring
194 ......Carbocyclic ring containing
195 .....The additional ring is one of the cyclos in a polycyclo ring system
196 ......Hetero ring in the polycyclo ring system
197 ....Plural ring hetero atoms in the polycyclo ring system
198 ....Ring nitrogen in the polycyclo ring system
199 ....Plural ring nitrogens in the polycyclo ring system
200 ....Ring nitrogen in the polycyclo ring system
201 ....Bicyclo ring system which is indole (including hydrogenated)
202 ....Ring sulfur in the polycyclo ring system
203 ......The polycyclo ring system is tricyclo-carbocyclic
204 ....Chalcogen bonded directly to the tricyclo-carbocyclic ring system
205 ......The polycyclo ring system is bicyclo-carbocyclic
206 ....Chalcogen bonded directly to the bicyclo-carbocyclic ring system
207 .....The additional ring is a hetero ring
208 ......Ring nitrogen in the additional hetero ring
209 ....Ring sulfur or ring oxygen in the additional hetero ring
210 ....Plural ring nitrogens in the additional hetero ring
211 ....1,2-diazole (including hydrogenated)
212 ......The additional hetero ring consists of one sulfur and four carbons
213 ....Carbocyclic ring containing
214 ......The additional hetero ring consists of one oxygen and four carbons
215 .....Cyano bonded directly to the piperidine ring
216 .....Chalcogen bonded directly to ring carbon of the piperidine ring
217 ......Chalcogen and a carbocyclic ring bonded directly at 4-position
218 ....The chalcogen, X, is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
219 ......Plural chalcogens bonded directly to ring carbons of the piperidine ring
220 ....Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the piperidine ring by nonionic bonding
221 ......Having -C(=X)-, wherein X is chalogen, attached directly or indirectly to the piperidine ring by nonionic bonding
222 ....The -C(=X)- group and the piperidine ring are bonded directly to the same chalcogen
223 .....Nitrogen attached directly to the piperidine ring by nonionic bonding
224 ......Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
225 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the piperidine ring
226 ......At 1-position
227 ......The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
228 ....Carbocyclic ring bonded directly at 4-position
229 .....Nitrogen attached indirectly to the piperidine ring by nonionic bonding
230 ......Cyano attached indirectly to the piperidine ring by nonionic bonding
231 ......Plural acyclic nitrogens bonded directly to the same carbon or single bonded directly to each other
232 ......Chalcogen attached indirectly to the piperidine ring by nonionic bonding
233 ....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
234 ....Plural carbocyclic rings containing
235 ....The chalcogen, X, is in a -C(=X)- group
236 .....Chalcogen attached indirectly to the piperidine ring by nonionic bonding
237 ......The chalcogen, X, is in a -C(=X)- group
238 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
239 ....Plural carbocyclic rings containing
240 ......The chalcogen is in an -OH or -OM group (M is Group IA or Group IIA light metal)
241 ....The -OH or -OM is bonded to an acyclic carbon, which carbon is bonded directly to two rings
242 ....Chalcogen bonded directly to ring carbon of the piperidine ring
243 .....At 2-position
244 ....Nitrogen attached directly to the piperidine ring by nonionic bonding
245 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the piperidine ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered consisting of one nitrogen and five carbons
...Piperidines
246 ....Nitrogen attached indirectly to the piperidine ring by nonionic bonding
247 .....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
248 ....Chalcogen attached indirectly to the piperidine ring by nonionic bonding
249 ...Process of forming partially hydrogenated pyridine ring
250 ...Process of forming pyridine ring
251 ....The pyridine ring is unsubstituted or hydrocarbyl substituted only
252 .....Starting materials include a nitrogen containing hetero ring (e.g., starting materials include a piperidine ring, etc.)
253 .....Starting materials include a hydrocarbon
254 .....Starting materials include an acyclic hydrocarbyl ether or an acyclic hydrocarbyl alcohol
255 ...Plural pyridine or partially hydrogenated pyridine rings
256 ....Additional hetero ring containing
257 ....Pyridine or partially hydrogenated pyridine rings are bonded directly to each other
258 .....Halogen containing or process utilizing halogen or halogen containing compound
259 ......Metal containing catalyst utilized
260 .....Metal containing catalyst utilized
261 ....Chalcogen bonded directly to ring carbon of pyridine or partially hydrogenated pyridine ring
262 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to pyridine or partially hydrogenated pyridine ring
263 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
264 ....Acyclic nitrogen attached directly or indirectly to pyridine or partially hydrogenated pyridine ring by nonionic bonding
265 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the acyclic nitrogen
266 ....Chalcogen attached indirectly to pyridine or partially hydrogenated pyridine ring by nonionic bonding
267 .....The chalcogen, X, is in a -C(=X)- group
268 ...Additional hetero ring containing
269 ....The additional hetero ring is one of the cyclos in a polycyclo ring system
270 .....Plural ring hetero atoms in the polycyclo ring system
271 ......Plural ring nitrogens in the polycyclo ring system
272 .....Ring nitrogen in the polycyclo ring system
273 ......Bicyclo ring system which is indole (including hydrogenated)
274 .....Ring sulfur in the polycyclo ring system
275 ....Ring nitrogen in the additional hetero ring (e.g., oxazole, etc.)
276 .....Plural ring nitrogens in the additional hetero ring
277 ......Ring chalcogen in the additional hetero ring
278 ......The additional hetero ring consists of two nitrogens and three carbons
279 ....1,2-diazole (including hydrogenated)
280 .....Ring sulfur in the additional hetero ring
281 .....The additional hetero ring consists of one nitrogen and four carbons
282 ......Nicotine per se or salt thereof
283 ....The additional hetero ring is five-membered
284 .....Ring sulfur in the additional hetero ring
285 ...Polycyclo-carbocyclic ring system having at least three cyclos
286 ...Cyano bonded directly to the six-membered hetero ring
287 ....Additional cyano containing
288 ....Chalcogen bonded directly to ring carbon of the six-membered hetero ring
289 ....Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
290 ...Chalcogen bonded directly to ring carbon of the six-membered hetero ring
291 ....Chalcogen and acyclic nitrogen bonded directly to the same carbon
292 .....The chalcogen or the acyclic nitrogen is bonded directly to the six-membered hetero ring
293 ....Sulfur bonded directly to acyclic nitrogen
294 ....Chalcogen bonded directly to chalcogen
295 .....Halogen bonded directly to the six-membered hetero ring by nonionic bonding
296 ....Plural chalcogens bonded directly to ring carbons of the six-membered hetero ring
297 ....Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
298 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the six-membered hetero ring
299 .....Plural -C(=X)- groups, wherein X is chalcogen, bonded directly to the six-membered hetero ring
300 ....Nitrogen attached indirectly to the six-membered hetero ring by nonionic bonding
301 ....Chalcogen attached indirectly to the six-membered hetero ring by nonionic bonding
302 .....Halogen attached directly or indirectly to the six-membered hetero ring by nonionic bonding
303 ....Halogen attached directly or indirectly to the six-membered hetero ring by nonionic bonding
304 ...Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
305 ....Sulfur and acyclic nitrogen bonded directly to the same carbon

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is six-membered consisting of one nitrogen and five carbons
...Nitrogen attached directly to the six-membered hetero ring by nonionic bonding
306 ....Plural acyclic nitrogens bonded directly to the same carbon or single bonded directly to each other
307 ....Plural nitrogens attached directly to the six-membered hetero ring by nonionic bonding
308 .....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
309 ....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
310 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the six-membered hetero ring
311 ....The nitrogen bonded additionally only to hydrogen
312 ....Chalcogen attached indirectly to the six-membered hetero ring by nonionic bonding
313 ...Thiocarbonyl bonded directly to the six-membered hetero ring
314 ...Carbonyl bonded directly to the six-membered hetero ring
315 ....At 3-position
316 .....Acyclic nitrogen bonded directly to the carbonyl
317 ......Processes of obtaining nicotinamide per se
318 .....The carbonyl is in a -COO- group
319 ......Processes of obtaining nicotinic acid per se or a derivative of nicotinic acid wherein the only substituents are -COO- groups, or salt thereof
320 ....By oxidation
321 ......Additional -COO- group bonded directly to the six-membered hetero ring
322 ......Carbocyclic ring containing
323 ....Acyclic nitrogen bonded directly to the carbonyl
324 .....Acyclic nitrogen single bonded directly to acyclic nitrogen
325 ......Carbon double bonded directly to one of the acyclic nitrogens
326 ....The carbonyl is in a -COO- group
327 .....Processes
328 ....Acyclic nitrogen attached indirectly to the six-membered hetero ring by nonionic bonding
329 ...Nitrogen attached indirectly to the six-membered hetero ring by nonionic bonding
330 ....Cyano attached indirectly to the six-membered hetero ring by nonionic bonding
331 ....Sulfur and acyclic nitrogen bonded directly to the same carbon
332 ....Plural acyclic nitrogens bonded directly to the same carbon or single bonded directly to each other
333 ....The six-membered hetero ring and another ring bonded directly to the same carbon
334 ....Chalcogen attached indirectly to the six-membered hetero ring by nonionic bonding
335 .....The chalcogen, X, is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
336 .....Acyclic nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
337 ......Additional ring containing
338 .....Acyclic nitrogen bonded directly to chalcogen
339 ...Chalcogen attached indirectly to the six-membered hetero ring by nonionic bonding (e.g., sulfato betaines, etc.)
340 ....The chalcogen, X, is in a -C(=X)- group
341 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same of diverse chalcogens
342 ......Additional ring containing
343 ....The six-membered hetero ring and another ring bonded directly to the same carbon
344 ....The chalcogen is in an -OH or -OM group (M is Group IA or Group IIA light metal)
345 ...Halogen attached directly to the six-membered hetero ring by nonionic bonding
346 ...Halogen attached indirectly to the six-membered hetero ring by nonionic bonding
347 ...The ring nitrogen of the six-membered hetero ring is pentavalent (e.g., quaternary pyridinium salts, etc.)
348 ...Unsubstituted or hydrocarbyl substituted only, or salt thereof
349 ....Alkylation or dealkylation process
350 ....Unsaturated hydrocarbyl side chain
351 .....Stabilized alkenyl pyridines
352 .....Process of forming the unsaturated hydrocarbyl side chain
353 ....Purification or recovery

CLASS 548 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 548 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
100 ..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)
101 ...Heavy metal or aluminum containing
102 ....Arsenic containing
103 ....The metal is bonded directly to carbon, which carbon is a ring carbon of the five-membered hetero ring or which carbon is attached directly or indirectly to the five-membered hetero ring by nonionic bonding
104 ....The metal is bonded directly to chalcogen of a $-C(=X)X-$ group, wherein the X's are the same or diverse chalcogens, which group is attached directly or indirectly to the five-membered hetero ring by nonionic bonding
105 ....The metal is bonded directly to chalcogen which chalcogen is attached directly to the five-membered hetero ring by nonionic bonding
106 ....The metal is bonded directly to chalcogen which chalcogen is attached indirectly to the five-membered hetero ring by nonionic bonding
107 ....The metal is in an anion and the five-membered hetero ring is in a cation
108 ....Polycyclo ring system having the five-membered hetero ring as one of the cyclos
109 ....Azide or acyclic nitrogen containing
110 ...Boron or silicon containing
111 ...Phosphorus attached directly to the five-membered hetero ring by nonionic bonding
112 ...Phosphorus attached indirectly to the five-membered hetero ring by nonionic bonding
113 ....Polycyclo ring system having the five-membered hetero ring as one of the cyclos
114 .....The polycyclo ring system and phosphorus are both bonded directly to the same chalcogen
115 ....The five-membered hetero ring and phosphorus are both bonded directly to the same nitrogen
116 ....The five-membered hetero ring and phosphorus are both bonded directly to the same chalcogen
117 .....The five-membered hetero ring contains chalcogen as a ring hetero atom
118 .....The five-membered hetero ring contains at least three ring nitrogens
119 ....The phosphorus is part of a substituent which is attached directly to ring carbon of the five-membered hetero ring
120 ...The five-membered hetero ring contains ring selenium and is one of the cyclos in a polycyclo ring system
121 ....Bicyclo ring system having the five-membered hetero ring as one of the cyclos
122 ...The five-membered hetero ring consists of sulfur, oxygen, nitrogen, and carbon
123 ...Plural ring sulfurs in the five-membered hetero ring
124 ...Plural ring oxygens in the five-membered hetero ring
125 ...The five-membered hetero ring consists of chalcogen, plural nitrogens, and carbon
126 ....Polycyclo ring system having the five-membered hetero ring as one of the cyclos
127 ....1,2,3-thiadiazoles (including hydrogenated)
128 ....1,2,4-thiadiazoles (including hydrogenated)
129 .....Chalcogen bonded directly to ring carbon of the thiadiazole ring
130 ......Nitrogen or additional chalcogen bonded directly to ring carbon of the thiadiazole ring
131 ....1,2,4-oxadiazoles (including hydrogenated)
132 .....Chalcogen bonded directly to ring carbon of the oxadiazole ring
133 .....Nitrogen attached directly to the oxadiazole ring by nonionic bonding
134 ....1,2,5-thiadiazoles (including hydrogenated)
135 .....Chalcogen or nitrogen attached directly to ring carbon of the thiadiazole ring by nonionic bonding
136 ....1,3,4-thiadiazoles (including hydrogenated)
137 .....Diazole ring attached directly to the thiadiazole ring by nonionic bonding
138 .....Nitrogen attached directly to the thiadiazole ring by nonionic bonding
139 ......Having $-C(=X)-$, wherein X is chalcogen, attached directly to the nitrogen by nonionic bonding
140 ....Additional nitrogen attached directly to the $-C(=X)-$ group by nonionic bonding
141 ......Chalcogen or additional nitrogen attached directly to ring carbon of the thiadiazole ring by nonionic bonding
142 .....Chalcogen bonded directly to the 2- and 5- positions of the thiadiazole ring
143 ....1,3,4-oxadiazoles (including hydrogenated)
144 .....Chalcogen bonded directly to ring carbon of the oxadiazole ring
145 .....Plural carbocyclic rings bonded directly to the oxadiazole ring
146 ...1,3-thiazoles (including hydrogenated)
147 ....Spiro

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)
...1,3-thiazoles (including hydrogenated)
148 ....Polycyclo ring system having the thiazole ring as one of the cyclos
149 .....Tetracyclo ring system having the thiazole ring as one of the cyclos
150 .....Tricyclo ring system having the thiazole ring as one of the cyclos
151 ......At least three ring hetero atoms in the tricyclo ring system
152 .....Bicyclo ring system having the thiazole ring as one of the cyclos
153 ......At least three ring hetero atoms in the bicyclo ring system
154 ....Ring nitrogen is shared by the two cyclos
155 ....Tetramisole per se or salt thereof (including hydrogenated)
156 ......Plural benzothiazoles (including hydrogenated)
157 ....Chalcogen bonded directly to ring carbon of the thiazole ring
158 ....Plural benzothiazole ring systems bonded directly to chain consisting of plural sulfurs
159 ......Additional polycyclo heterocyclic ring system containing
160 ......Polycyclo-carbocyclic ring system having at least three cyclos
161 ......Nitrogen attached directly to the thiazole ring by nonionic bonding
162 ....The nitrogen is a ring hetero atom
163 ....Carbonyl or thiocarbonyl bonded directly to the nitrogen
164 ....The nitrogen bonded additionally only to hydrogen
165 ......Chalcogen bonded directly to ring carbon of the thiazole ring
166 ....Chalcogen bonded directly to the chalcogen
167 ....Nitrogen attached directly to the chalcogen by nonionic bonding
168 ....The nitrogen is bonded additionally directly to two carbons
169 ....Chalcogen attached indirectly to the thiazole ring by nonionic bonding
170 ....The chalcogen, X, is in a -C(=X)- group
171 ....Nitrogen bonded directly to the -C(=X)- group
172 ....Nitrogen attached directly to chalcogen by nonionic bonding
173 ....Halogen attached directly or indirectly to the bicyclo ring system by nonionic bonding
174 ....Sulfur double bonded or thiol bonded directly to ring carbon of the thiazole ring
175 ....Process of forming the bicyclo ring system
176 ....Aniline or alkyl derivative thereof utilized as starting material
177 ....Purification or recovery
178 ......Chalcogen or nitrogen attached directly to the other cyclo of the bicyclo ring system by nonionic bonding
179 ......Chalcogen attached indirectly to the bicyclo ring system by nonionic bonding
180 ....The chalcogen, X, is in a -C(=X)- group
181 ....Polycyclo heterocyclic ring system containing ring nitrogen
182 ....Chalcogen bonded directly to ring carbon of the thiazole ring
183 .....Plural chalcogens bonded directly to ring carbons of the thiazole ring
184 .....Nitrogen attached directly to the thiazole ring by nonionic bonding
185 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to nitrogen
186 .....Chalcogen attached indirectly to the thiazole ring by nonionic bonding
187 ......The chalcogen, X, is in a -C(=X)- group
188 ....The -C(=X)- group is bonded directly to the thiazole ring
189 .....Nitrogen attached indirectly to the thiazole ring by nonionic bonding
190 ....Nitrogen attached directly to the thiazole ring by nonionic bonding
191 .....Plural nitrogens attached directly to the thiazole ring by nonionic bonding
192 ......Nitrogen bonded directly to a -C(=X)- group, wherein X is chalcogen
193 .....Chalcogen attached indirectly to the thiazole ring by nonionic bonding
194 ......The chalcogen, X, is in a -C(=X)- group
195 ....The -C(=X)- group is bonded directly to the nitrogen
196 ....Chalcogen or additional nitrogen bonded directly to the -C(=X)- group
197 ......Nitrogen bonded directly to chalcogen
198 .....Nitrogen attached indirectly to the thiazole ring by nonionic bonding
199 .....The nitrogen is bonded additionally only to hydrogen
200 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the thiazole ring
201 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
202 ....Plural double bonds between ring members of thiazole ring
203 .....Chalcogen attached indirectly to the thiazole ring by nonionic bonding
204 ......The chalcogen, X, is in a -C(=X)- group
205 ......Nitrogen attached indirectly to the thiazole ring by nonionic bonding
206 ...1,2-thiazoles (including hydrogenated)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)
...1,2-thiazoles (including hydrogenated)
207 ....Polycyclo ring system having the thiazole ring as one of the cyclos
208 .....Ring carbon is shared by three of the cyclos of the polycyclo ring system
209 .....Acyclic chalcogen bonded directly to ring carbon of the thiazole ring
210 ......At least three chalcogens bonded directly to the thiazole ring
211 ....Saccharin per se or salt thereof
212 .....Nitrogen attached directly to the thiazole ring by nonionic bonding
213 ....Chalcogen bonded directly to ring carbon of the thiazole ring
214 ....Nitrogen or chalcogen attached indirectly to the thiazole ring by nonionic bonding
215 ...1,3-oxazoles (including hydrogenated)
216 ....Spiro
217 ....Polycyclo ring system having the oxazole ring as one of the cyclos
218 .....At least three ring hetero atoms in the polycyclo ring system
219 .....Plural polycyclo ring systems having the oxazole ring as one of the cyclos in each of the ring systems
220 ......Plural oxazole-containing polycyclo ring systems each bonded directly to the same polycyclo ring system or the same hetero ring
221 .....Chalcogen bonded directly at the 2-position of the oxazole ring
222 .....Nitrogen bonded directly at the 2-position of the oxazole ring
223 .....At least four rings in the polycyclo ring system
224 .....Carbocyclic ring bonded directly at the 2-position of the oxazole ring
225 ....Chalcogen bonded directly to ring carbon of the oxazole ring
226 .....Plural chalcogens bonded directly to ring carbons of the oxazole ring
227 ......Chalcogens bonded directly at 2- and 5-positions of the oxazole ring
228 .....Chalcogen bonded directly at 5-position of the oxazole ring
229 .....Chalcogen bonded directly at 2-position of the oxazole ring
230 ......Nitrogen, halogen, or -C(=X)-, wherein X is chalcogen, attached directly to the oxazole ring by nonionic bonding
231 ......3-position substituent contains ethylenic or acetylenic unsaturation or nitrogen
232 ......4- or 5-position substituent contains chalcogen
233 ....Nitrogen bonded directly to ring carbon of the oxazole ring
234 .....Additional ring attached directly to the nitrogen by nonionic bonding
235 ....Plural double bonds between the ring members of the oxazole ring
236 .....Cyano or -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the oxazole ring by nonionic bonding
237 ....One double bond between the ring members of the oxazole ring
238 .....2-position substituent contains nitrogen, other than as nitro or nitroso
239 .....2-position is unsubstituted or hydrocarbyl substituted only
240 ...1,2-oxazoles (including hydrogenated)
241 ....Polycyclo ring system having the oxazole ring as one of the cyclos
242 .....At least three ring hetero atoms in the polycyclo ring system
243 ....Chalcogen bonded directly to ring carbon of the oxazole ring
244 .....Nitrogen bonded directly to ring carbon of the oxazole ring
245 ....Nitrogen bonded directly to ring carbon of the oxazole ring
246 .....Nitrogen bonded directly to the 3-position of the oxazole ring
247 ....Plural double bonds between ring members of the oxazole ring
248 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the oxazole ring by nonionic bonding
249 .....4-position substituent contains plural chalcogens, attached indirectly to the oxazole ring by nonionic bonding, none of which is bonded directly to phenyl
250 ...Tetrazoles (including hydrogenated)
251 ....Chalcogen or nitrogen attached directly to the tetrazole ring by nonionic bonding
252 ....Chalcogen attached indirectly to the tetrazole ring by nonionic bonding
253 .....The chalcogen, X, is in a -C(=X)- group
254 ....Nitrogen attached indirectly to the tetrazole ring by nonionic bonding
255 ...1,2,3-triazoles (including hydrogenated)
256 ....Polycyclo heterocyclic ring system containing ring oxygen
257 ....Polycyclo ring system having the triazole ring as one of the cyclos
258 .....Ring nitrogen is shared by two of the cyclos
259 .....Chalcogen attached directly to the polycyclo ring system by nonionic bonding
260 .....Chalcogen attached indirectly to the polycyclo ring system by nonionic bonding
261 ......The chalcogen, X, is in a -C(=X)- group
262.2 ...1,2,4-triazoles (including hydrogenated)
262.4 ....Polycyclo ring system having the triazole ring as one of the cyclos
262.6 ....Having -NH-C(=X)-NHH attached directly to the triazole ring by nonionic bonding (wherein X is chalcogen or =NH, and substitution may be made for hydrogen only)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)
...1,2,4-triazoles (including hydrogenated)
262.8 ....Plural nitrogens attached to the triazole ring indirectly by acyclic nonionic bonding, two of which are bonded directly to the same acyclic carbon
263.2 ....Chalcogen bonded directly to ring carbon of the triazole ring
263.4 .....Plural chalcogen bonded directly to ring carbons of the triazole ring
263.6 ......The 1- and 2- positions of the triazole ring are unsubstituted, or are alkyl or cycloalkyl substituted only
263.8 .....Halogen or nitrogen attached directly to the triazole ring by nonionic bonding
264.2 .....Carbon bonded directly to the chalcogen
264.4 ......Nitrogen or additional chalcogen attached indirectly to the chalcogen by acyclic nonionic bonding
264.6 .....Benzene ring bonded directly to the 4-position of the triazole ring
264.8 ....Nitrogen attached directly to the triazole ring by nonionic bonding
265.2 .....Plural nitrogens attached directly to the triazole ring by nonionic bonding
265.4 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen
265.6 .....The nitrogen is further bonded to hydrogen only
265.8 ....Benzene ring bonded directly to ring nitrogen of the triazole ring, and directly to the acyclic carbon of a benzoyl or benzyl group
266.2 ....Additional unsaturated hetero ring attached directly or indirectly to the triazole ring by nonionic bonding
266.4 .....The additional unsaturated hetero ring is one of the cyclos of a polycyclo ring system (except alkylenedioxyphenyl)
266.6 .....The additional unsaturated hetero ring and the triazole ring are attached to the same acyclic atom or to the same acyclic chain
266.8 ....Cyano or -C(=X)-, wherein X is chalcogen, bonded directly to the triazole ring
267.2 ....Nitrogen attached indirectly to the triazole ring by acyclic nonionic bonding
267.4 .....The nitrogen is double or triple bonded to carbon
267.6 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen
267.8 ....Chalcogen attached indirectly to the triaole ring by acyclic nonionic bonding
268.2 .....The triazole ring and the chalcogen are bonded directly to the same acyclic carbon
268.4 .....Acyclic carbon bonded directly to triazole ring nitrogen is multiple bonded to an additional carbon
268.6 .....Plural chalcogens attached indirectly to the triazole ring by acyclic nonionic bonding
268.8 ....The triazole ring and a hetero ring whose ring members are carbon and chalcogen are bonded directly to the same acyclic carbon
269.2 ....Processes for forming the triazole ring
269.4 ....Benzene ring bonded directly to the triazole ring
300 ...1,3-diazoles (including hydrogenated)
301 ....Divalent chalcogen or acyclic nitrogen double bonded directly to diazole ring carbon, or tautomeric equivalent
302 .....Polycyclo ring system having the diazole ring as one of the cyclos
303 ......Hetero ring fused at 4,5-positions of the diazole ring
304 ....The fused hetero ring contains ring nitrogen
305 ......Benzo fused at 4, 5-positions of the diazole ring
306 ....Nitrogen double bonded directly at 2-position, or tautomeric equivalent
307 .....Divalent chalcogen or acyclic nitrogen double bonded directly at 2-, 4- and 5-positions, or tautomeric equivalent
308 .....Divalent chalcogen or acyclic nitrogen double bonded directly at 2- and 4- positions, or tautomeric equivalent
309 ......Hetero ring attached directly or indirectly to the diazole ring by nonionic bonding
310 ....Two 1,3-diazole rings each having divalent chalcogen or acyclic nitrogen double bonded directly at 2- and 4-positions, or tautomeric equivalent, attached to each other directly or indirectly by nonionic bonding
311 ......Chalcogen, halogen, or nitrogen attached directly at 1-, 3-, or 5-position by nonionic bonding
312 ......Chalcogen, halogen, or nitrogen attached indirectly to the diazole ring by acyclic nonionic bonding
313 ....At 5-position
314 ......Benzene ring attached directly to the diazole ring by nonionic bonding
315 .....Acyclic nitrogen double bonded directly at 2-position, or tautomeric equivalent
316 ......Hetero ring attached directly or indirectly to the diazole ring by nonionic bonding
317 .....Divalent chalcogen double bonded directly at 2-position, or tautomeric equivalent
318 ......Hetero ring attached directly or indirectly to the diazole ring by nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)

...1,3-diazoles (including hydrogenated)

....Divalent chalcogen or acyclic nitrogen double bonded directly to diazole ring carbon, or tautomeric equivalent

.....Divalent chalcogen double bonded directly at 2-position, or tautomeric equivalent

319 ......Chalcogen, halogen, or nitrogen attached directly at 1-, 3-, 4-, or 5-position by nonionic bonding

320 ......Chalcogen, halogen, or nitrogen attached indirectly to the diazole ring by acyclic nonionic bonding

321 ....At diazole ring carbon

322 ......Benzene ring attached directly to the diazole ring by nonionic bonding

323 ....Polycyclo ring system having the diazole ring as one of the cyclos

324 .....Ring fused at adjacent nitrogen and carbon of the diazole ring

325 .....Benzo fused at 4, 5-positions of the diazole ring

326 ......Additional ring shares two carbons of the benzo ring

327 ......Hetero ring attached directly or indirectly to the diazole ring by nonionic bonding

328 ....Two benzo fused 1,3-diazole rings attached to each other directly or indirectly by nonionic bonding

329 ......Chalcogen, halogen, or nitrogen attached directly at 1-, 2-, or 3-position of the diazole ring by nonionic bonding

330 ......Chalcogen, halogen, or nitrogen attached indirectly at 2 position of the diazole ring by acyclic nonionic bonding

331 ....Chalcogen or nitrogen double or triple bonded directly to a carbon which is attached directly at 2-position

332 ....Polyhaloalkyl attached directly at 2-position by nonionic bonding

333 ......Chalcogen, halogen, or nitrogen attached indirectly to diazole ring nitrogen by acyclic nonionic bonding

334 ......Ring attached directly at 2-position of the diazole ring by nonionic bonding

335 ....Imidazoles

336 .....Hetero ring attached directly or indirectly to the imidazole ring by nonionic bonding

337 .....Chalcogen, halogen, or nitrogen attached directly to the imidazole ring by nonionic bonding

338 ......Nitro attached directly to imidazole ring carbon by nonionic bonding

339 ....And chalcogen, halogen, or nitrogen attached indirectly to imidazole ring carbon by acyclic nonionic bonding

340 ....And ring attached directly to imidazole ring carbon by nonionic bonding

341 .....Chalcogen, halogen, or nitrogen attached indirectly to the imidazole ring by acyclic nonionic bonding

342 ......At imidazole ring carbon

343 ....Chalcogen or nitrogen double or triple bonded directly to a carbon which is bonded directly to imidazole ring carbon

344 ....Histidine or derivative

345 .....Diphenylmethyl-, dibenzomethyl- or triphenylmethyl- attached directly to imidazole ring by nonionic bonding

346 .....Ring attached directly to imidazole ring by nonionic bonding

347 ....2-imidazolines

348 .....Hetero ring attached directly or indirectly to the imidazoline ring by nonionic bonding

349 ......Two 2-imidazoline rings attached to each other directly or indirectly by nonionic bonding

350 ....Bonding or connecting group between imidazolines attached to ring carbon of a 2-imidazoline

351 .....Chalcogen, halogen, or nitrogen attached directly to 2-imidazoline ring by nonionic bonding

352 .....Chalcogen, halogen, or nitrogen attached indirectly to 2 imidazoline ring by acyclic nonionic bonding

353 ......At 2-imidazoline carbon

354 ......2-imidazolinium salts

355 .....Arylalkylene attached directly to 2-imidazoline ring at 2-position by nonionic bonding

356 ...1,2-diazoles (including hydrogenated)

357 ....Anthrone or anthraquinone containing

358 ....Divalent chalcogen or acyclic nitrogen double bonded directly to diazole ring carbon, or tautomeric equivalent

359 .....Polycyclo ring system having the diazole ring as one of the cyclos

360 .....Divalent chalcogen or acyclic nitrogen double bonded directly at 3- and 5-positions, or tautomeric equivalent

361 ......Oxygen double bonded directly at 3- and 5-positions or tautomeric equivalent

362 .....Acyclic nitrogen double bonded directly at 3- or 5-position, or tautomeric equivalent

363 .....Divalent chalcogen double bonded directly at 3- or 5-position, or tautomeric equivalent

364 ......Hetero ring attached directly or indirectly to the diazole ring by nonionic bonding

365 ......Chalcogen, halogen, or nitrogen attached directly at 1-, 2-, or 4-position or at remaining 5- or 3-position by nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is five-membered having two or more ring hetero atoms of which at least one is nitrogen (e.g., selenazoles, etc.)
...1,2-diazoles (including hydrogenated)
....Divalent chalcogen or acyclic nitrogen double bonded directly to diazole ring carbon, or tautomeric equivalent
.....Divalent chalcogen double bonded directly at 3- or 5-position, or tautomeric equivalent
......Chalcogen, halogen, or nitrogen attached directly at 1-, 2-, or 4-position or at remaining 5- or 3-position by nonionic bonding
366 ....Aminopyrine or derivative
367 ......Chalcogen, halogen, or nitrogen attached indirectly to the diazole ring by acyclic nonionic bonding
368 ......Antipyrine or derivative
369 ....Polycyclo ring system having the diazole ring as one of the cyclos
370 .....Hetero ring shares two carbons of diazole ring
371 .....Benzo shares two carbons of diazole ring
372 ......Chalcogen, halogen, or nitrogen attached at 1-, 2-, or 3-position directly by nonionic bonding or indirectly by acyclic nonionic bonding
373 ....Pyrazoles
374 .....Hetero ring attached directly or indirectly to the pyrazole ring by nonionic bonding
375 .....Chalcogen, halogen, or nitrogen attached directly to the pyrazole ring by nonionic bonding
376 ......Additional chalcogen, halogen, or nitrogen attached directly to the pyrazole ring by nonionic bonding
377 ......Chalcogen, halogen, or nitrogen bonded directly to carbon or to an acyclic carbon chain, which carbon or chain is bonded directly to pyrazole ring carbon
378 .....Chalcogen, halogen, or nitrogen attached indirectly to the pyrazole ring by acyclic nonionic bonding
379 ....2-pyrazolines
400 ..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)
401 ...With preservative or stabilizer
402 ...Heavy metal or aluminum containing
403 ....The metal is bonded directly to chalcogen, which chalcogen is attached directly or indirectly to the five-membered hetero ring by nonionic bonding
404 ....Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., cyclic imides, etc.)
405 ...Boron containing
406 ...Silicon containing
407 ...Spiro
408 ....The spiro includes the five-membered hetero ring
409 .....Both rings which form the spiro are hetero rings
410 ......Acyclic chalcogen attached directly to the five-membered nitrogen containing spiro hetero ring by nonionic bonding
411 .....Polycyclo ring system having one of the two rings which form the spiro as one of the cyclos
412 ...Phosphorus attached directly to the five-membered hetero ring by nonionic bonding
413 ...Phosphorus attached indirectly to the five-membered hetero ring by nonionic bonding
414 ....Polycyclo ring system having the five-membered hetero ring as one of the cyclos
415 .....Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring
416 ...Polycyclo ring system having the five-membered hetero ring as one of the cyclos
417 ....The polycyclo ring system has at least six cyclos, and has either a ring carbon that is shared by three of the cyclos or has a ring chalcogen
418 ....Pentacyclo ring system having the five-membered hetero ring as one of the cyclos
419 .....Two of the cyclos share at least three ring members, or a ring carbon is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)
420 ....Tetracyclo ring system having the five-membered hetero ring as one of the cyclos
421 .....Plural ring hetero atoms in the tetracyclo ring system
422 ......Three-membered nitrogen containing hetero ring is cyclo in the tetracyclo ring system (e.g., mitomycin C, etc.)
423 ......Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., cyclic imides, etc.)
424 .....Two of the cyclos share at least three ring members, or a ring carbon is shared by three of the cyclos (e.g., bridged, peri-fused, etc.)
425 ......Benzene ring is cyclo in the tetracyclo ring system
426 .....The five-membered hetero ring shares ring members with one other cyclo only
427 ....Tricyclo ring system having the five-membered hetero ring as one of the cyclos
428 .....Ring nitrogen is shared by two of the cyclos
429 .....Plural ring hetero atoms in the tricyclo ring system
430 ......Ring chalcogen in the tricyclo ring system
431 ....Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., cyclic imides, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)

...Polycyclo ring system having the five-membered hetero ring as one of the cyclos

....Tricyclo ring system having the five-membered hetero ring as one of the cyclos

.....Plural ring hetero atoms in the tricyclo ring system

......Ring chalcogen in the tricyclo ring system

432 ....Pyrano(3,4-b)indoles or thiopyrano(3,4-b) indoles (including hydrogenated)

433 ......The tricyclo ring system consists of a benzene ring which shares ring carbons with two nitrogen containing hetero rings (e.g., pyromellitic diimide, etc.)

434 .....Two of the cyclos share at least three ring members (i.e., bridged)

435 ......Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., cyclic imides, etc.)

436 .....A ring carbon is shared by three of the cyclos (e.g., peri-fused, etc.)

437 ......Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., naphthostyril, etc.)

438 ......Benzene ring, which is not a cyclo in the tricyclo ring system, bonded directly to ring carbon of the five-membered hetero ring

439 .....The five-membered hetero ring shares ring carbons with two carbocyclic rings (e.g., tetrahydrocarbazoles, etc.)

440 ......The five-membered hetero ring shares ring carbons with two benzene rings (i.e., carbazoles)

441 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the tricyclo ring system (e.g., carbazole-3-carboxylic acid, etc.)

442 ....One of the benzene rings and an additional carbocyclic ring bonded directly to the same acyclic nitrogen

443 ....Azido or sulfonyl attached directly to the tricyclo ring system by nonionic bonding (e.g., carbazole sulfonic acid, etc.)

444 ....Chalcogen or nitrogen attached indirectly to the tricyclo ring system by acyclic nonionic bonding

445 ....The tricyclo ring system is unsubstituted or is hydrocarbyl substituted only (e.g., N-vinyl carbazole, etc.)

446 ....Carbazole per se or alkyl substituted only

447 ....Processes of forming by cyclization or alkylation

448 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the tricyclo ring system (e.g., 1, 2, 3, 4-tetrahydrocarbazole -3-carboxylic acid, etc.)

449 ......Chalcogen or nitrogen attached indirectly to ring nitrogen of the five-membered hetero ring by acyclic nonionic bonding

450 .....Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., indigoid dyes, etc.)

451 ......Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., cyclic imides, naphthisatins, etc.)

452 ....Bicyclo ring system having the five-membered hetero ring as one of the cyclos (e.g., octahydroindoles, etc.)

453 .....Plural ring hetero atoms in the bicyclo ring system, or ring nitrogen is shared by the two cyclos of the bicyclo ring system

454 .....Additional polycyclo heterocyclic ring system attached directly or indirectly to the bicyclo ring system by nonionic bonding

455 ......The additional polycyclo ring system includes a five-membered nitrogen containing hetero ring

456 ....Lactone ring containing (e.g., 3,3-bisindolyl phthalides, etc.)

457 ....Ring carbon of one of the five-membered hetero rings is bonded directly to ring carbon of the other (e.g., indigo dyes, etc.)

458 ....By a single bond (e.g., leuco indigo, etc.)

459 ....Halogen attached directly or indirectly to the bicyclo ring system by nonionic bonding (e.g., dibromoindigo, etc.)

460 ....Ring carbon of each of the two five-membered hetero rings is bonded directly to chalcogen or nitrogen (e.g., both rings may be bonded to the same nitrogen atom or to different nitrogen atoms, etc.)

461 ....Plural chalcogens bonded directly to ring carbons of each of the two five-membered hetero rings (e.g., bisphthalimides, etc.)

462 ....The ring nitrogen of each of the two five-membered hetero rings is bonded directly to the same atom or chain, which chain may include a ring (e.g., N,N'-ethylene-bisphthalimide, etc.)

463 ......The additional polycyclo heterocyclic ring system has a lactone ring as one of the cyclos

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)

...Polycyclo ring system having the five-membered hetero ring as one of the cyclos

....Bicyclo ring system having the five-membered hetero ring as one of the cyclos (e.g., octahydroindoles, etc.)

.....Additional polycyclo heterocyclic ring system attached directly or indirectly to the bicyclo ring system by nonionic bonding

464 ......Ring carbon of the five-membered hetero ring is bonded directly to a ring carbon of the hetero ring which is a cyclo in the additional polycyclo heterocyclic ring system (e.g., indigoid dyes, etc.)

465 .....Additional hetero ring, attached directly or indirectly to the bicyclo ring system by nonionic bonding

466 ......The additional hetero ring is bonded directly to a ring carbon of the bicyclo ring system

467 ......Substituent on ring carbon of the bicyclo ring system contains the additional hetero ring

468 ....The additional hetero ring and the bicyclo ring system are attached directly to the same acyclic carbon or acyclic carbon chain

469 .....The bicyclo ring system consists of the five-membered hetero ring and a benzene ring (e.g., indole, etc.)

470 ......The ring nitrogen is bonded directly to two ring carbons of the same cyclo which carbons are members of one cyclo only (i.e., isoindoles or isoindolenines)

471 ....Nitrogen bonded directly to ring carbon of the five-membered hetero ring

472 ....Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., phthalimidines, etc.)

473 ....Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., phthalimides, etc.)

474 ....Polycyclo carbocyclic ring system having at least three cyclos

475 ....Chalcogen or nitrogen attached directly to the ring nitrogen of the five-membered hetero ring by nonionic bonding

476 ....Benzene ring bonded directly to the ring nitrogen of the five-membered hetero

477 ....Nitrogen attached indirectly to the ring nitrogen of the five-membered hetero ring by acyclic nonionic bonding

478 ....Chalcogen attached indirectly to the ring nitrogen of the five-membered hetero ring by acyclic nonionic bonding

479 ....The chalcogen, X, is in a -C(=X)- group (e.g., beta-phthalimidopropionaldehyde, etc.)

480 ....The ring nitrogen of the five-membered hetero ring is unsubstituted or hydrocarbyl substituted only

481 ....Chalcogen or nitrogen attached indirectly to ring carbon of the bicyclo ring system by acyclic nonionic bonding

482 ....The five-membered hetero ring contains one double bond only (i.e., isoindolines)

483 ......Nitrogen attached directly to the five-membered hetero ring by nonionic bonding (e.g., 2-amino indoles, etc.)

484 ......Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., 3-indolols, etc.)

485 ....Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., isatins, etc.)

486 ....The chalcogen is bonded directly to a ring carbon of the five-membered hetero ring which is adjacent to the ring nitrogen (e.g., 2-indolinones, etc.)

487 ....Two benzene rings bonded directly to the same ring carbon of the five-membered hetero ring

488 ....Polycyclo carbocyclic ring system bonded direcly to a ring carbon of the five-membered hetero ring (e.g., indol-alpha-naphtholindigo, etc.)

489 ....Process of forming the bicyclo ring system directly from reactant which contains acyclic nitrogen bonded directly to a benzene ring (e.g., indoxyl from phenylglycine, etc.)

490 ......The five-membered hetero ring contains one double bond only (i.e., indolines)

491 ....Chalcogen or nitrogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

492 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to ring carbon of the five-membered hetero ring (e.g., indole-2-carboxylic acids, etc.)

493 ....Hydrogen or additional carbon bonded directly to the -C(=X)- group (e.g., aldehydes,ketones, etc.)

494 ......Having -C(=X)-, wherein X is chalcogen, attached indirectly to ring carbon of the five-membered hetero ring by an acyclic carbon or acyclic carbon chain (e.g., indole-3-acetic acid, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)

...Polycyclo ring system having the five-membered hetero ring as one of the cyclos

....Bicyclo ring system having the five-membered hetero ring as one of the cyclos (e.g., octahydroindoles, etc.)

.....The bicyclo ring system consists of the five-membered hetero ring and a benzene ring (e.g., indole, etc.)

......Having -C(=X)-, wherein X is chalcogen, attached indirectly to ring carbon of the five-membered hetero ring by an acyclic carbon or acyclic carbon chain (e.g., indole-3-acetic acid, etc.)

495 ....Acyclic nitrogen bonded directly to the acyclic carbon or acyclic carbon chain

496 ....The acyclic carbon or acyclic carbon chain is further unsubstituted or alkyl substituted only (e.g., tryptophane, etc.)

497 ....Processes

498 ....Racemization or optical resolution

499 ....Preparing from hydantoins or proteins

500 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to ring nitrogen of the five-membered hetero ring (e.g., indomethacin, etc.)

501 ....Processes

502 ....Processes

503 ......Nitrogen attached indirectly to ring carbon of the bicyclo ring system by acyclic nonionic bonding

504 ....Nitrogen attached indirectly to ring carbon of the five-membered hetero ring by acyclic nonionic bonding (e.g., tryptamine, etc.)

505 ....The nitrogen is double or triple bonded directly to carbon

506 ....Benzene ring bonded directly or attached indirectly by an acyclic carbon or an acyclic carbon chain to ring carbon of the five-membered hetero ring

507 ....Chalcogen or additional nitrogen attached indirectly to ring carbon of the five-membered hetero ring by acyclic nonionic bonding

508 ......Processes of forming the bicyclo ring system by cyclization (e.g., forming indole from o-ethyl aniline, etc.)

509 ......Chalcogen attached indirectly to the bicyclo ring system by acyclic nonionic bonding

510 ....The chalcogen, X, is in a -C(=X)- group

511 ......Benzene ring bonded directly or attached indirectly by an acyclic carbon or an acyclic carbon chain to ring carbon of the five-membered hetero ring

512 .....Chalcogen bonded directly to ring carbon of the five-membered hetero ring (e.g., adrenochrome, etc.)

513 ......Plural chalcogens bonded directly to ring carbons of the five-membered hetero ring (e.g., imides, etc.)

514 ....Chalcogen or nitrogen attached directly to ring nitrogen of the five-membered hetero ring by nonionic bonding

515 .....The ring nitrogen is bonded directly to two ring carbons of the same cyclo which carbons are members of one cyclo only (e.g., cyclopenta(c)pyrroles, etc.)

516 .....Two double bonds between ring members of the five-membered hetero ring (e.g., 4,5,6,7-tetrahydroindoles, etc.)

517 ...Additional hetero ring, which is attached directly or indirectly to the five-membered hetero ring by nonionic bonding

518 ....The additional hetero ring also contains nitrogen

519 .....Ring carbon of each of the two nitrogen containing hetero rings is bonded directly to chalcogen (e.g., both rings may be bonded to the same oxygen atom or to different oxygen atoms, etc.)

520 ......Plural chalcogens bonded directly to ring carbons of each of the two nitrogen containing hetero rings (e.g., bis-succinimides, etc.)

521 ....Double bond between ring carbons in each of the two nitrogen containing hetero rings (e.g., bis-maleimides, etc.)

522 ....Processes

523 .....Ring nitrogens of the two nitrogen containing hetero rings are bonded directly to the same atom or chain, which chain may include a ring

524 ......The atom is carbon or the chain consists of carbons

525 ....Polycyclo ring system which includes ring chalcogen

526 .....Plural ring chalcogens in the polycyclo ring sytem (e.g., methylenedioxyphenyl containing, etc.)

527 ....Sulfur containing hetero ring

528 ...Polycyclo carbocyclic ring system having at least three cyclos

529 ....Attached directly to the five-membered hetero ring

530 ...Having -C(=X)-, wherein X is chalcogen, bonded directly to the five-membered hetero ring (e.g., pyrrole carbonyl halides, pyrrole carboxaldehyde, etc.)

531 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens (e.g., pyrrole-3-carboxylic acid, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)

...Having -C(=X)-, wherein X is chalcogen, bonded directly to the five-membered hetero ring (e.g., pyrrole carbonyl halides, pyrrole carboxaldehyde, etc.)

....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens (e.g., pyrrole-3-carboxylic acid, etc.)

532 .....And is bonded directly to a ring carbon which is adjacent to the ring nitrogen of the five-membered hetero ring (e.g., 4-hydroxy proline, etc.)

533 ......Additional -C(=X) bonded directly to the five-membered hetero ring (e.g., N-n-butyryl-L-proline, etc.)

534 ......Chalcogen bonded directly to the other ring carbon which is adjacent to the ring nitrogen of the five-membered hetero ring (e.g., 2-pyrrolidone-5-carboxylic acid, etc.)

535 ......The five-membered hetero ring is further unsubstituted or alkyl substituted only (e.g., proline, etc.)

536 .....Additional -C(=X)- bonded directly to the five-membered hetero ring (e.g., pyrrole-3,4-dicarboxylic acid esters, etc.)

537 ....Acyclic nitrogen bonded directly to the -C(=X)- (e.g., 4,5-dihalopyrrole -2-carboxamides, etc.)

538 .....The -C(=X)- is bonded directly to the ring nitrogen of the five-membered hetero ring (e.g., 1-pyrrolidine carboxanilides, etc.)

539 ....Carbocyclic ring bonded directly to the -C(=X)- (e.g., 3-benzoyl pyrrolidine, etc.)

540 ....Acyclic carbon bonded directly to the -C(=X)- (e.g., N-oleoylpyrrolidine, etc.)

541 ...Chalcogen attached directly to the five-membered hetero ring by nonionic bonding (e.g., 3-pyrrolidinols, etc.)

542 ....Chalcogen attached directly to ring nitrogen of the five-membered hetero ring by nonionic bonding (e.g., pyrrolidine-N-oxides, etc.)

543 ....Chalcogen bonded directly to a ring carbon of the five-membered hetero ring which is adjacent to the ring nitrogen (e.g., 2-pyrrolidones, etc.)

544 .....And chalcogen bonded directly to a ring carbon of the five membered hetero ring which is not adjacent to the ring nitrogen (e.g., 2,4-pyrrolidinediones, etc.)

545 .....And chalcogen bonded directly to the other ring carbon of the five-membered hetero ring which is adjacent to the ring nitrogen (e.g., succinimide, etc.)

546 ......Nitrogen attached directly or indirectly to the five-membered hetero ring by acyclic nonionic bonding

547 ......Chalcogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

548 ......Carbon to carbon unsaturation between ring members of the five-membered hetero ring (e.g., maleimide, etc.)

549 ....Benzene ring bonded directly to ring nitrogen of the five-membered hetero ring (e.g., N-phenylmaleimide, etc.)

550 .....Nitrogen attached directly or indirectly to the five-membered hetero ring by acyclic nonionic bonding

551 .....Chalcogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

552 .....Processes of forming 2-pyrrolidone which is unsubstituted or alkyl or alkenyl substituted only

553 ......Directly from a cyano containing compound (e.g., from succinonitrile, etc.)

554 ......Directly from a -COO- containing compound (e.g., from methyl acrylate, etc.)

555 .....Purification or recovery of 2-pyrrolidone which is unsubstituted or alkyl substituted only

556 ....Chalcogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding (e.g., 4-hydroxy -3-pyrrolidinemethanol, etc.)

557 ...Nitrogen attached directly to the five-membered hetero ring by nonionic bonding

558 ....The nitrogen is bonded directly to a ring carbon which is adjacent to the ring nitrogen of the five-membered hetero ring

559 .....Carbocyclic ring bonded directly to the nitrogen

560 ...Two double bonds between ring members of the five-membered hetero ring

561 ....Nitrogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

562 ....Chalcogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

563 ....Benzene ring bonded directly to ring nitrogen of the five -membered hetero ring

564 ....The five-membered hetero ring is unsubstituted or alkyl substituted only (e.g., pyrrole, etc.)

565 ...One double bond between ring members of the five-membered hetero ring (i.e., pyrrolines)

566 ...Nitrogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding

567 ....The nitrogen is bonded directly to -C(=X)-, wherein X is chalcogen (e.g., 2-benzamidomethyl - pyrrolidines, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Hetero ring is five-membered consisting of one nitrogen and four carbons (e.g., halopyrrolidines, etc.)
...Nitrogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding
....The nitrogen is bonded directly to -C(=X)-, wherein X is chalcogen (e.g., 2-benzamidomethyl - pyrrolidines, etc.)
568 .....Hydrogen or acyclic carbon bonded directly to the -C(=X)- (e.g., 2-pyrrolidine acrylamide, etc.)
569 ....The nitrogen is in a substituent attached to the ring nitrogen of the five-membered hetero ring
570 ...Chalcogen attached indirectly to the five-membered hetero ring by acyclic nonionic bonding
571 ....The chalcogen, X, is in a -C(=X)- group (e.g., 1-phenyl -2-pyrrolidino-hexanone-1, etc.)
572 .....The -C(=X)- is part of a -C(=X)X- group wherein the X's are the same or diverse chalcogens (e.g., 3-pyrrolidinemethanol propionates, etc.)
573 ......The -C(=X)X- group is in a substituent attached to the ring nitrogen of the five-membered hetero ring (e.g., beta-pyrrolidyl ethyl ester of benzoic acid, etc.)
574 ....The chalcogen is in a substituent attached to the ring nitrogen of the five-membered hetero ring
575 .....Carbocyclic ring bonded directly to the chalcogen
576 ......The substituent on the ring nitrogen of the five-membered hetero ring contains a bicyclo carbocyclic ring system
577 ...Benzene ring bonded directly to the five-membered hetero ring
578 ...Benzene ring in a substituent attached to the ring nitrogen of the five-membered hetero ring by nonionic bonding
579 ...The five-membered hetero ring is unsubstituted or is alkyl substituted only (e.g., pyrrolidine, etc.)
950 ..The hetero ring contains four members including nitrogen and carbon
951 ...Plural hetero atoms in the hetero ring
952 ...Chalcogen bonded directly to ring carbon of the hetero ring
953 ...Nitrogen or -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
954 ..Hetero ring is three-membered including nitrogen and carbon
955 ...Heavy metal, boron or silicon containing
956 ...Phosphorus attached directly or indirectly to the hetero ring by nonionic bonding
957 ....Plural phosphori
958 ...Spiro
959 ...Plural hetero atoms in the hetero ring
960 ....Plural nitrogens in the hetero ring
961 ...Polycyclo ring system having the hetero ring as one of the cyclos
962 ...Additional hetero ring containing
963 ....Plural three-membered nitrogen containing hetero rings bonded directly to the same ring
964 ....Having -C(=X)-, wherein X is chalcogen, in chain between the hetero rings
965 ...Chalcogen, nitrogen or halogen attached directly to the hetero ring by nonionic bonding
966 ...Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
967 ...Nitrogen, other than as nitro or nitroso, attached indirectly to the hetero ring by nonionic bonding
968 ...Chalcogen attached indirectly to the hetero ring by nonionic bonding
969 ...The three-membered hetero ring is unsubstituted or alkyl substituted only

CLASS 549 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 549 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

1 ..Sulfur containing hetero ring (e.g., thiiranes, etc.)

2 ...With preservative or stabilizer

3 ...Heavy metal or aluminum containing

4 ...Boron or silicon containing

5 ...Phosphorus attached directly or indirectly to the hetero ring by nonionic bonding

6 ....The hetero ring is five-membered

7 .....Plural ring hetero atoms in the hetero ring

8 .....Four chalcogens bonded directly to the same phosphorus

9 ...The hetero ring has at least seven members

10 ....Plural ring hetero atoms in the hetero ring

11 .....Plural ring sulfurs in the hetero ring

12 ....Polycyclo ring system having at least three cyclos and having the hetero ring as one of the cyclos

13 ...The hetero ring is six-membered

14 ....Plural ring hetero atoms in the hetero ring

15 .....Polycyclo ring system having the hetero ring as one of the cyclos

16 ......Tricyclo ring system having the hetero ring as one of the cyclos

17 ....Plural ring sulfurs in the hetero ring

18 .....Three or more ring hetero atoms in the hetero ring

19 ......Plural ring sulfurs in the hetero ring

20 .....Two ring sulfurs in the hetero ring

21 ......Chalcogen or nitrogen attached directly to the hetero ring by nonionic bonding

22 ......Chalcogen or nitrogen attached indirectly to the hetero ring by nonionic bonding

23 ....Polycyclo ring system having the hetero ring as one of the cyclos

24 .....The polycyclo ring system has at least four cyclos

25 ......Chalcogen attached directly to the hetero ring by nonionic bonding

26 .....Tricyclo ring system having the hetero ring as one of the cyclos

27 ......Chalcogen attached directly to the hetero ring by nonionic bonding

28 ....Chalcogen or nitrogen attached directly to the hetero ring by nonionic bonding

29 ...The hetero ring is five-membered

30 ....Plural ring hetero atoms in the hetero ring

31 .....Polycyclo ring system having the hetero ring as one of the cyclos

32 ......Bicyclo ring system having the hetero ring as one of the cyclos

33 ....Chalcogen attached directly to the hetero ring by nonionic bonding

34 .....Three or more ring hetero atoms in the hetero ring

35 .....Two ring sulfurs in the hetero ring

36 ......Chalcogen bonded directly to ring carbon of the hetero ring

37 ....Nitrogen or chalcogen attached indirectly to the hetero ring by nonionic bonding

38 ......Nitrogen attached directly to the hetero ring by nonionic bonding

39 ......Chalcogen attached indirectly to the hetero ring by nonionic bonding

40 .....Chalcogen attached directly to ring sulfur of the hetero ring by nonionic bonding

41 ....Polycyclo ring system having the hetero ring as one of the cyclos

42 .....Tetracyclo ring system having the hetero ring as one of the cyclos

43 .....Tricyclo ring system having the hetero ring as one of the cyclos

44 ......Chalcogen attached directly to the tricyclo ring system by nonionic bonding

45 ....Chalcogen attached directly to the hetero ring by nonionic bonding

46 ....Chalcogen attached directly to ring sulfur of the hetero ring by nonionic bonding

47 ....Halogen attached directly to the tricyclo ring system by nonionic bonding

48 ....Nitrogen attached directly or indirectly to the tricyclo ring system by nonionic bonding

49 .....Bicyclo ring system having the hetero ring as one of the cyclos

50 ......Plural ring hetero atoms in the bicyclo ring system

51 ......Chalcogen attached directly to the bicyclo ring system by nonionic bonding

52 ....Chalcogen attached directly to the hetero ring by nonionic bonding

53 ....Chalcogen attached directly to ring sulfur of the hetero ring by nonionic bonding

54 ....Plural chalcogens bonded directly to the bicyclo ring system

55 ....Nitrogen attached directly or indirectly to the bicyclo ring system by nonionic bonding

56 ....Halogen attached directly or indirectly to the bicyclo ring system by nonionic bonding

57 ......Nitrogen or a -C(=X)- group, wherein X is chalcogen, attached directly to the bicyclo ring system by nonionic bonding

58 ......Chalcogen attached indirectly to the bicyclo ring system by nonionic bonding

59 ....Additional hetero ring containing

60 .....Ring oxygen in the additional hetero ring

61 ....Cyano bonded directly to the hetero ring

62 ....Chalcogen bonded directly to ring carbon of the hetero ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Sulfur containing hetero ring (e.g., thiiranes, etc.)
...The hetero ring is five-membered
....Chalcogen bonded directly to ring carbon of the hetero ring
63 .....Nitrogen attached directly to the hetero ring by nonionic bonding
64 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
65 .....Nitrogen attached indirectly to the hetero ring by nonionic bonding
66 .....Chalcogen attached indirectly to the hetero ring by nonionic bonding
67 .....Chalcogen attached directly to ring sulfur of the hetero ring by nonionic bonding
68 ....Nitrogen attached directly to the hetero ring by nonionic bonding
69 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen
70 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
71 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
72 .....Nitrogen or chalcogen attached indirectly to the hetero ring by nonionic bonding
73 .....Halogen attached directly or indirectly to the hetero ring by nonionic bonding
74 ....Nitrogen attached indirectly to the hetero ring by nonionic bonding
75 .....Chalcogen attached indirectly to the hetero ring by nonionic bonding
76 ......The chalcogen, X, is in a -C(=X)- group
77 ....Unsaturated carbocyclic ring or acyclic carbon to carbon unsaturation containing
78 ....Chalcogen attached indirectly to the hetero ring by nonionic bonding
79 .....The chalcogen, X, is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
80 ....Unsaturated carbocyclic ring or acyclic carbon to carbon unsaturation containing
81 ....Halogen attached directly to the hetero ring by nonionic bonding
82 .....Three or more halogens attached directly to the hetero ring by nonionic bonding
83 ....The compound consists of the ring sulfur, carbon, and hydrogen
84 .....Process of forming the hetero ring from acyclic reactants only
85 ......Metal containing catalyst utilized
86 .....Process of alkylating the hetero ring
87 ....Plural chalcogens double bonded directly to ring sulfur of the hetero ring
88 ...The hetero ring is four-membered
89 ....Plural ring hetero atoms in the hetero ring
90 ...The hetero ring is three-membered and has chalcogen or nitrogen attached directly or indirectly thereto by nonionic bonding
200 ..Oxygen containing hetero ring (e.g., dioxirane, etc.)
201 ...With preservative or stabilizer
202 ....Oxirane containing compound with preservative or stabilizer
203 ....Cyclic anhydride containing compound with preservative or stabilizer
204 ....Lactone containing compound with preservative or stabilizer
205 ....Compound in which the hetero ring is five-membered with preservative or stabilizer
206 ...Heavy metal or aluminum containing
207 ....Arsenic containing
208 ....The hetero ring has three members or at least seven members
209 ....The metal is bonded directly to carbon, which carbon is a ring carbon of the hetero ring or which carbon is attached directly or indirectly to the hetero ring by nonionic bonding
210 ....The metal is bonded directly to chalcogen, which chalcogen is attached directly or indirectly to the hetero ring by nonionic bonding
211 .....The chalcogen, X, is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
212 ....Polycyclo ring system having the hetero ring as one of the cyclos
213 ...Boron containing
214 ...Silicon containing
215 ....Oxirane ring containing
216 ...Phosphorus bonded directly to the hetero ring
217 ....Oxirane ring containing
218 ...Phosphorus attached indirectly to the hetero ring by nonionic bonding
219 ....Oxirane ring containing
220 ....Polycyclo ring system having the hetero ring as one of the cyclos
221 ....Plural ring oxygens in the hetero ring
222 ....Chalcogen bonded directly to the hetero ring
223 ...Xanthene ring system having a benzene ring bonded directly thereto para to the xanthene ring oxygen, wherein the carbon of a -COO- group is bonded directly to the benzene ring ortho to its position of attachment to the xanthene ring system, and spirolactone derivatives thereof (e.g., fluoresceins, chlorofluorans, etc.)
224 ....The xanthene ring system is three cyclos of a polycyclo ring system having at least four rings (e.g., benz(c)fluorans, etc.)
225 ....Nitrogen bonded directly to the xanthene ring system (e.g., rhodols, aminofluorans, etc.)
226 .....Plural nitrogens bonded directly to the xanthene ring system (e.g., 2,6-diaminofluorans, etc.)
227 ......Rhodamines

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
228 ...The hetero ring contains -O-C(=X)-O- as part of its structure, wherein X is chalcogen (e.g., cyclic carbonates, etc.)
229 ....The hetero ring is five-membered
230 .....The five-membered hetero ring, except for the =X to the ring, is unsubstituted or hydrocarbyl substituted only
231 ...Cyclic anhydrides (i.e., -C(=X)OC(=X)-, wherein the X's are the same or diverse chalcogens, is part of the hetero ring)
232 ....The cyclic anhydride has at least six members and is a cyclo in a polycyclo ring system
233 ....The cyclic anhydride is five-membered (e.g., succinic anhydride, etc.)
234 .....Polycyclo ring system having the cyclic anhydride as one of the cyclos
235 ......Tetracyclo ring system having the cyclic anhydride as one of the cyclos
236 ......Tricyclo ring system having the cyclic anhydride as one of the cyclos
237 ....Two of the cyclos share at least three ring members (i.e., bridged)
238 ....Halogen bonded directly to the tricyclo ring system
239 ....Plural ring oxygens in the tricyclo ring system
240 ......Bicyclo ring system having the cyclic anhydride as one of the cyclos
241 ....Plural bicyclo ring systems each having the cyclic anhydride as one of the cyclos
242 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to at least one of the bicyclo ring systems
243 ....Nitrogen or additional chalcogen bonded directly to the bicyclo ring system
244 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the bicyclo ring system
245 ....The -C(=X)- is part of a -C(=X)XH group, wherein the X's are the same or diverse chalcogens, or salt thereof (e.g., trimellitic anhydride, etc.)
246 ....Halogen bonded directly to the bicyclo ring system
247 ....Phthalic anhydride per se
248 ....Preparing by oxidation
249 ....Fluidized catalyst
250 ....Purification or recovery
251 ....By chemical reaction of impurity in presence of added chemical substance
252 .....Plural hetero rings
253 .....Nitrogen or additional chalcogen attached directly or indirectly to the cyclic anhydride by nonionic bonding
254 .....Halogen attached directly or indirectly to the cyclic anhydride by nonionic bonding
255 .....Acyclic carbon chain containing carbon to carbon unsaturation bonded directly to the cyclic anhydride
256 .....Preparing by oxidation
257 ......Of benzene or hydrocarbyl substituted benzene
258 ......Of acyclic or alicyclic hydrocarbon
259 ....Vanadium and phosphorus, in compound or elemental form, utilized
260 ....Additional heavy metal, other than titanium, utilized
261 .....Double bond between ring members of the cyclic anhydride
262 ......Maleic anhydride per se
263 ...Lactones (i.e., -C(=X)O-, wherein X is chalcogen, is part of the hetero ring)
264 ....Spiro
265 .....The spiro includes the lactone ring
266 ....The lactone ring has at least seven members
267 .....Plural ring oxygens in the lactone ring
268 .....Polycyclo ring system having the lactone ring as one of the cyclos
269 ......Bicyclo ring system having the lactone ring as one of the cyclos
270 ....Additional acyclic chalcogen bonded directly to the lactone ring (e.g., zearalanone, etc.)
271 .....Additional chalcogen attached directly or indirectly to the lactone ring by nonionic bonding
272 .....Preparing from a cyclic ketone (i.e., a ketone where the carbonyl is part of a ring)
273 ....The lactone ring is six-membered
274 .....Plural ring oxygens in the lactone ring
275 .....Polycyclo ring system having the lactone ring as one of the cyclos
276 ......Tetracyclo ring system having the lactone ring as one of the cyclos
277 ....The tetracyclo ring system consists of four six-membered cyclos
278 ....At least two additional chalcogens bonded directly to the tetracyclo ring system
279 ....Ring oxygen bonded directly to ring carbon which is a member of two cyclos in the tetracyclo ring system
280 ......Tricyclo ring system having the lactone ring as one of the cyclos
281 ....Two of the cyclos share at least three ring members or ring carbon is shared by the three cyclos (e.g., bridged or peri compounds, etc.)
282 ....Plural ring oxygens in the tricyclo ring system
283 ......Bicyclo ring system having the lactone ring as one of the cyclos

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
...Lactones (i.e., -C(=X)O-, wherein X is chalcogen, is part of the hetero ring)
....The lactone ring is six-membered
.....Polycyclo ring system having the lactone ring as one of the cyclos
......Bicyclo ring system having the lactone ring as one of the cyclos
284 ....Plural bicyclo ring systems each having the lactone ring as one of the cyclos
285 ....Additional acyclic chalcogen bonded directly to the lactone ring
286 ....Benzene ring and the lactone ring bonded directly to the same acyclic carbon
287 ....Acyclic -C(=X)-, wherein X is chalcogen, bonded directly to the lactone ring
288 ....Nitrogen bonded directly to the bicyclo ring system
289 ....The other cyclo of the bicyclo ring system is a six-membered carbocyclic ring to which chalcogen is directly attached
290 ....The bicyclo lactone consists of two six-membered rings and is unsubstituted or hydrocarbyl substituted only
291 .....Acyclic -C(=X)-, wherein X is chalcogen, bonded directly to the lactone ring
292 .....Additional chalcogen bonded directly to the lactone ring
293 .....Nitrogen attached directly or indirectly to the lactone ring by nonionic bonding
294 .....Double bond between ring members of the lactone ring
295 ....The lactone ring is five-membered
296 .....Plural ring oxygens in the lactone ring
297 .....Polycyclo ring system having the lactone ring as one of the cyclos
298 ......Tetracyclo ring system having the lactone ring as one of the cyclos
299 ......Tricyclo ring system having the lactone ring as one of the cyclos
300 ....Two of the cyclos share at least three ring members or ring carbon is shared by the three cyclos (e.g., bridged or peri compounds, etc.)
301 ....The tricyclo ring system consists of the lactone ring, a five-membered carbocyclic ring, and a three-membered carbocyclic ring
302 ......Bicyclo ring system having the lactone ring as one of the cyclos
303 ....Nitrogen bonded directly to the lactone ring
304 ....Nitrogen attached indirectly to the lactone ring by acyclic nonionic bonding
305 ....Chalcogen attached indirectly to the lactone ring by acyclic nonionic bonding
306 ....Plural ring oxygens in the bicyclo ring system
307 ....The other cyclo of the bicyclo ring system is benzene (e.g., phthalides, etc.)
308 ....Two carbocyclic rings bonded directly to the same ring atom of the lactone ring
309 ....Nitrogen bonded directly to each of the carbocyclic rings
310 ....Additional chalcogen bonded directly to the bicyclo ring system
311 ....The bicyclo ring system consists of two five-membered rings
312 ....Acyclic carbon chain containing carbon to carbon unsaturation attached directly or indirectly to the lactone ring by nonionic bonding
313 .....Additional chalcogen bonded directly to the lactone ring
314 ......At least two additional chalcogens bonded directly to the lactone ring
315 ....Double bond between ring members of the lactone ring or chalcogen double bonded directly at the 3- or 4-position of the lactone ring (e.g., ascorbic acid, etc.)
316 ....Amine addition salts
317 ....Sulfur or -C(=X)-, wherein X is chalcogen, bonded directly to acyclic chalcogen
318 ......Acyclic -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the lactone ring by nonionic bonding
319 ......Plural alkyl groups bonded directly to the same ring carbon of the lactone ring (e.g., pantolactone, etc.)
320 .....Plural hetero rings
321 .....Nitrogen attached directly or indirectly to the lactone ring by acyclic nonionic bonding
322 .....Having -C(=X), wherein X is chalcogen, bonded directly to the lactone ring
323 .....Chalcogen attached indirectly to the lactone ring by nonionic bonding
324 .....Halogen attached directly or indirectly to the lactone ring by nonionic bonding
325 .....Preparing by hydrogenation of cyclic anhydrides
326 .....Preparing from compound containing -COO- group
327 ....Acyclic carbon double bonded directly to a ring carbon of a four-membered lactone ring
328 ....Four-membered lactone ring formed
329 .....From a ketene (HCH=C=O, wherein H may be substituted)
330 ...Spiro
331 ....The spiro includes a hetero ring
332 .....The spiro includes a three- or four-membered hetero ring
333 .....Plural ring oxygens in a spiro hetero ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
...Spiro
....The spiro includes a hetero ring
.....Plural ring oxygens in a spiro hetero ring
334 ......both rings which form the spiro are hetero rings
335 ....Two six-membered hetero rings, which each contain plural ring oxygens, form the spiro (e.g., spirobi-(meta-dioxane), etc.)
336 ......Polycyclo ring system having one of the two rings which form the spiro as one of the cyclos
337 ....Additional hetero ring containing
338 ....Plural five-membered hetero rings
339 ....Spiro ring is a cyclo in a tricyclo-carbocyclic ring system
340 ....Acyclic -C(=X)-, wherein X is chalcogen, containing
341 ......The spiro hetero ring is five-membered
342 ....Acyclic -C(=X)-, wherein X is chalcogen, containing
343 .....Both rings which form the spiro are hetero rings
344 ......Polycyclo ring system having one of the two hetero rings which form the spiro as one of the cyclos
345 .....Bicyclo ring system having the spiro hetero ring as one of the cyclos (e.g., griseofulvin, etc.)
346 ...The hetero ring has at least seven members
347 ....Plural ring oxygens in the hetero ring
348 .....Polycyclo ring system having the hetero ring as one of the cyclos
349 ......Tricyclo ring system having the hetero ring as one of the cyclos
350 ......Bicyclo ring system having the hetero ring as one of the cyclos
351 ....Three or more ring oxygens in the bicyclo ring system
352 .....Three or more ring oxygens in the hetero ring
353 ......Exactly four oxygens in the hetero ring
354 ....Polycyclo ring system having the hetero ring as one of the cyclos
355 .....Bicyclo ring system having the hetero ring as one of the cyclos
356 ...The hetero ring is six-membered
357 ....Plural ring oxygens in the hetero ring (e.g., 1,2-dioxin, etc.)
358 .....Polycyclo ring system having the hetero ring as one of the cyclos
359 ......Tricyclo ring system having the hetero ring as one of the cyclos
360 ....Two of the cyclos share at least three ring members (i.e., bridged)
361 ....Three or more ring oxygens in the tricyclo ring system (e.g., actinospectacin, etc.)
362 ......Bicyclo ring system having the hetero ring as one of the cyclos
363 ....The two cyclos share at least three ring members (i.e., bridged)
364 ....Three or more ring oxygens in the bicyclo ring system
365 ....The ring oxygens are in the 1,2- or 1,3-positions of the hetero ring
366 ....Nitrogen attached indirectly to the hetero ring by acyclic nonionic bonding
367 .....Three or more ring oxygens in the hetero ring
368 ......Trioxane per se
369 .....The ring oxygens are in the 1,3-positions of the hetero ring (e.g., 1,3-dioxane, etc.)
370 ......Plural hetero rings
371 ......Nitrogen bonded directly to the hetero ring
372 ......Chalcogen or -C(=X), wherein X is chalcogen, bonded directly to the hetero ring
373 ......Nitrogen attached indirectly to the hetero ring by nonionic bonding
374 ......Chalcogen attached indirectly to the hetero ring by nonionic bonding
375 ....The chalcogen, X, is in a -C(=X)- group
376 ......Preparing by reacting an aldehyde with a compound containing acyclic carbon to carbon unsaturation
377 .....The ring oxygens are in the 1,4-positions of the hetero ring (e.g., 1,4-dioxane, etc.)
378 ......Chalcogen attached directly or indirectly to the hetero ring by nonionic bonding
379 ....Plural chalcogens bonded directly to the hetero ring
380 ......Halogen attached directly or indirectly to the hetero ring by nonionic bonding
381 ....Polycyclo ring system having the hetero ring as one of the cyclos
382 .....Pentacyclo ring system having the hetero ring as one of the cyclos
383 .....Tetracyclo ring system having the hetero ring as one of the cyclos
384 ......The tetracyclo ring system consists of four six-membered cyclos
385 .....Tricyclo ring system having the hetero ring as one of the cyclos
386 ......Two of the cyclos share at least three ring members or ring carbon is shared by the three cyclos (e.g., bridged or peri compounds, etc.)
387 ......Plural ring oxygens in the tricyclo ring system
388 ......The tricyclo ring system consists of three six-membered cyclos (e.g., xanthene, etc.)
389 ....Naphtho-pyrans (including hydrogenated)
390 ....Dibenzo(b,d)pyrans (including hydrogenated)
391 ....Plural chalcogens bonded directly to the tricyclo ring system
392 ....Chalcogen bonded directly to the hetero ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
...The hetero ring is six-membered
....Polycyclo ring system having the hetero ring as one of the cyclos
.....Tricyclo ring system having the hetero ring as one of the cyclos
......The tricyclo ring system consists of three six-membered cyclos (e.g., xanthene, etc.)
.......Chalcogen bonded directly to the hetero ring
393 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the tricyclo ring system
394 ....Nitrogen bonded directly to the tricyclo ring system
395 ......Acyclic chalcogen bonded directly to the hetero ring
396 .....Bicyclo ring system having the hetero ring as one of the cyclos
397 ......The two cyclos share at least three ring members (i.e., bridged)
398 ......The bicyclo ring system consists of the hetero ring and a six-membered carbocyclic ring
399 ....Chalcogen bonded directly to the hetero ring
400 ....Plural chalcogens bonded directly to the hetero ring
401 ....Chalcogen bonded directly to the ring carbon para to the ring oxygen (e.g., chromones, etc.)
402 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
403 ....Benzene ring bonded directly to the hetero ring (e.g., flavones, etc.)
404 ....Nitrogen bonded directly to the bicyclo ring system
405 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the bicyclo ring system
406 ....Carbocyclic ring bonded directly to the hetero ring of the bicyclo ring system (e.g., flavanes, etc.)
407 ....Chalcogen or nitrogen attached indirectly to the hetero ring by acyclic nonionic bonding
408 ....Chalcogen bonded directly to the carbocyclic ring of the bicyclo ring system (e.g., tocopherols, etc.)
409 ....Chalcogen double bonded or plural chalcogens bonded directly to the carbocyclic ring (e.g., coenzyme Q, etc.)
410 ....Chalcogen of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens, bonded directly to the carbocyclic ring of the bicyclo ring system (e.g., tocopherol esters, etc.)
411 ....Preparing from 1,4-di-oxygen substituted carbocyclic ring (e.g., of p-benzoquinones, p-hydroquinones, etc.)
412 ....Processes for chemical modification of substituents on the carbocyclic ring of the bicyclo ring system (e.g., alkylation of tocopherols, etc.)
413 ....Purification or recovery
414 ....Plural hetero rings
415 .....Plural six-membered hetero rings
416 ....Chalcogen bonded directly to the hetero ring
417 .....Plural chalcogens bonded directly to the hetero ring
418 ......Hydroxy bonded directly at the 3-position and oxygen double bonded directly at the 4-position of the hetero ring (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
419 .....Nitrogen attached directly or indirectly to the hetero ring by acyclic nonionic bonding
420 .....Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the hetero ring by acyclic nonionic bonding
421 .....Alicyclic ring bonded directly to the chalcogen
422 .....Five-membered carbocyclic ring having the hetero ring as part of one substituent and -COO- as part of another substituent (e.g., prostaglandin intermediates, etc.)
423 .....Hydroxy or halogen attached directly or indirectly to the hetero ring by acyclic nonionic bonding (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
424 ....Nitrogen bonded directly to the hetero ring
425 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
426 ....Nitrogen attached indirectly to the hetero ring by nonionic bonding
427 ....Chalcogen attached indirectly to the hetero ring by nonionic bonding
428 ....Halogen attached directly or indirectly to the hetero ring by nonionic bonding
429 ...The hetero ring is five-membered
430 ....Plural ring oxygens in the hetero ring
431 .....Three or more ring oxygens in the hetero ring (e.g., ozonides, etc.)
432 .....Polycyclo ring system having the hetero ring as one of the cyclos
433 ......Tricyclo ring system having the hetero ring as one of the cyclos
434 ......Bicyclo ring system having the hetero ring as one of the cyclos
435 ....Plural hetero rings
436 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the bicyclo ring system
437 ....Acyclic chalcogen bonded directly to the bicyclo ring system
438 ....Having -C(=X)-, wherein X is chalcogen, attached indirectly to the bicyclo ring system by nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)

..Oxygen containing hetero ring (e.g., dioxirane, etc.)

...The hetero ring is five-membered

....Plural ring oxygens in the hetero ring

.....Polycyclo ring system having the hetero ring as one of the cyclos

......Bicyclo ring system having the hetero ring as one of the cyclos

439 ....Nitrogen bonded directly to the bicyclo ring system

440 ....Nitrogen attached indirectly to the bicyclo ring system by nonionic bonding

441 ....The nitrogen is bonded directly to a -C(=X)- group, wherein X is chalcogen

442 ....The nitrogen is attached directly to carbon by a double or triple bond

443 ....Chalcogen attached indirectly to the bicyclo ring system by nonionic bonding

444 ....The chalcogen, X, is in a -C(=X)- group

445 ....Chalcogen attached indirectly to the ring system by nonionic bonding

446 ....The chalcogen, X, is in a -C(=X)- group

447 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

448 .....Plural hetero rings

449 .....Nitrogen or chalcogen bonded directly to the hetero ring

450 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring

451 .....Nitrogen attached indirectly to the hetero ring by nonionic bonding

452 ......The nitrogen is bonded directly to a -C(=X)- group, wherein X is chalcogen

453 .....Chalcogen attached indirectly to the hetero ring by nonionic bonding

454 ......The chalcogen, X, is in a -C(=X)- group

455 .....Halogen attached directly or indirectly to the hetero ring by nonionic bonding

456 ....Polycyclo ring system having the hetero ring as one of the cyclos

457 .....Tetracyclo ring system having the hetero ring as one of the cyclos

458 .....Tricyclo ring system having the hetero ring as one of the cyclos

459 ......Two of the cyclos share at least three ring members (i.e., bridged)

460 ......Dibenzofurans (including hydrogenated)

461 ....Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the tricyclo ring system by nonionic bonding

462 .....Bicyclo ring system having the hetero ring as one of the cyclos

463 ......The two cyclos share at least three ring members (i.e., bridged)

464 ......Plural ring oxygens in the bicyclo ring system

465 ......The bicyclo ring system consists of two five-membered cyclos

466 ......Acyclic chalcogen bonded directly to the hetero ring

467 ......Nitrogen attached directly or indirectly to the hetero ring by acyclic nonionic bonding

468 ......Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring

469 ......Benzene ring bonded directly to the hetero ring

470 ......Chalcogen of -C(=X)X-, wherein the X's are the same or diverse chalcogens, bonded directly to the carbocyclic ring of the bicyclo ring system

471 ......Plural double bonds between ring members of the hetero ring

472 ....Plural hetero rings

473 .....Acyclic -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the hetero ring by nonionic bonding

474 ....Cyano bonded directly to the hetero ring

475 ....Chalcogen bonded directly to the hetero ring

476 .....Plural chalcogens bonded directly to the hetero ring

477 ......Chalcogen double bonded directly to the hetero ring

478 ......Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the hetero ring by nonionic bonding

479 .....Double bond between ring members of the hetero ring

480 ....Nitrogen bonded directly to the hetero ring

481 .....Nitro bonded directly to the hetero ring

482 ......The hetero ring and an additional nitrogen are bonded directly to the same carbon

483 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring

484 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

485 ......Plural -C(=X)X- groups bonded directly to the hetero ring

486 ......The carbon of the -C(=X)X- group is bonded directly at the 3-position of the hetero ring

487 .....Nitrogen bonded directly to the -C(=X)- group

488 .....Additional chalcogen attached indirectly to the hetero ring by nonionic bonding

489 .....Preparation of furfural (i.e., furan-2-aldehyde)

490 ......Purification or recovery of furfural

491 ....Nitrogen attached indirectly to the hetero ring by nonionic bonding

492 .....Nitrogen and the hetero ring are single bonded directly to the same acyclic saturated hydrocarbon group

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
...The hetero ring is five-membered
....Nitrogen attached indirectly to the hetero ring by nonionic bonding
.....Nitrogen and the hetero ring are single bonded directly to the same acyclic saturated hydrocarbon group
493 ......The nitrogen is bonded directly to a -C(=X)- group, wherein X is chalcogen
494 ......Having -C(=X)-, wherein X is chalcogen, attached indirectly to the hetero ring by nonionic bonding
495 ......Chalcogen attached indirectly to the hetero ring by acyclic nonionic bonding
496 .....Having -C(=X)-, wherein X is chalcogen, attached indirectly to the hetero ring by nonionic bonding
497 ....Chalcogen attached indirectly to the hetero ring by nonionic bonding
498 .....The chalcogen, X, is in a -C(=X)- group
499 ......The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
500 ....Plural -C(=X)X- groups attached indirectly to the hetero ring by nonionic bonding
501 ....Additional chalcogen attached indirectly to the hetero ring by nonionic bonding
502 .....Plural chalcogens attached indirectly to the hetero ring by nonionic bonding
503 .....Preparing by hydrogenation of furfural
504 ....Halogen attached directly or indirectly to the hetero ring by nonionic bonding
505 ....Plural double bonds between ring members of the hetero ring
506 .....Hydrocarbyl substituted
507 ....One double bond between ring members of the hetero ring
508 ....Preparing from compound containing -COO- group
509 ....Preparing from a hydroxy containing compound
510 ...The hetero ring is four-membered
511 ....Sulfur or halogen attached directly or indirectly to the hetero ring by nonionic bonding
512 ...The hetero ring is three-membered consisting of one oxygen and two carbons
513 ....Processes
514 .....Epihalohydrin, glycerol monohalohydrin or glycerol dihalohydrin reactant
515 ......Glycidyl ester formed by bonding the oxy of a -COO- group directly to an acyclic carbon which is bonded directly to an oxirane ring
516 ......Glycidyl ether formed by bonding oxygen directly to an acyclic carbon which is bonded directly to an oxirane ring
517 ....Phenolic ether formed
518 .....Oxirane ring formed
519 ......Carbonyl of aldehyde or ketone reacted to form oxirane ring
520 ......By dehydrohalogenation of a halohydrin or by reacting a hypohalite or hypohalous acid with an ethylenically unsaturated compound at the site of unsaturation
521 ....Oxirane ring and chalcogen, cyano, nitrogen, or halogen are bonded directly to the same carbon (e.g., glycidyl ester formed, etc.)
522 ....Oxirane ring is unsubstituted or hydrocarbyl substituted only
523 ......Epoxidation at site of ethylenic unsaturation
524 ....Liquid phase epoxidation
525 ....Organic peracid utilized
526 ....In situ formation of the organic peracid from carboxylic acid and hydrogen peroxide
527 ....Epoxidizing unsaturated fat or fatty oil, or unsaturated derivative thereof
528 ....Epoxidizing unsaturated fat or fatty oil, or unsaturated derivative thereof
529 ....Organic hydroperoxide reactant
530 ....Boron containing catalyst utilized
531 ....Hydrogen peroxide utilized
532 ....Air or molecular oxygen utilized
533 ....Heavy metal containing catalyst utilized
534 ....Silver containing catalyst utilized
535 ....Fluidized catalyst
536 ....Additional heavy metal containing material utilized (e.g., promoter which contains heavy metal utilized, etc.)
537 ....Group IIA light metal containing material utilized
538 ....Purification or recovery
539 .....Ether or -COO- group formed
540 .....Isomerization, halogenation, hydrogenation, or dehydrohalogenation to form compound
541 .....Purification or recovery
542 ......By adsorption or by chemical reaction with impurity
543 ....Polycyclo ring system having the hetero ring as one of the cyclos
544 .....Tetracyclo ring system having the hetero ring as one of the cyclos
545 .....Tricyclo ring system having the hetero ring as one of the cyclos
546 .....Bicyclo ring system having the hetero ring as one of the cyclos
547 ......Plural bicyclo ring systems each having a hetero ring as one of the cyclos
548 ....Having -C(=X)-, wherein X is chalcogen, bonded directly to the hetero ring
549 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HETEROCYCLIC CARBON COMPOUNDS CONTAINING A HETERO RING HAVING CHALCOGEN (i.e., O, S, Se, or Te) OR NITROGEN AS THE ONLY RING HETERO ATOMS (Class 260, Subclass 239R)
..Oxygen containing hetero ring (e.g., dioxirane, etc.)
...The hetero ring is three-membered consisting of one oxygen and two carbons
550 ....Cyano, nitrogen, or halogen bonded directly to the hetero ring
551 ....Nitrogen attached indirectly to the hetero ring by nonionic bonding
552 .....Cyano or nitrogen and the hetero ring bonded directly to the same carbon
553 .....The nitrogen is bonded directly to a -C(=X)- group, wherein X is chalcogen
554 ....Chalcogen attached indirectly to the hetero ring by nonionic bonding
555 .....Chalcogen and the hetero ring bonded directly to the same carbon (e.g., glycidyl ethers, etc.)
556 ......Sulfur or -C(=X)-, wherein X is chalcogen, attached indirectly to the hetero ring by nonionic bonding
557 ....The chalcogen, X, is part of a -C(=X)X- group or a -X-X- group, wherein the X's are the same or diverse chalcogens (e.g., -COO-HCH-oxirane, etc.)
558 ......Halogen attached indirectly to the hetero ring by nonionic bonding
559 ....Carbocyclic ring containing
560 ......Carbocyclic ring containing
561 .....The chalcogen, X, is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
562 ......Additional -C(=X)- or other sulfur attached indirectly to the hetero ring
563 ....Halogen attached indirectly to the hetero ring by nonionic bonding

ORGANIC COMPOUNDS
1 .Azides
2 ..With preservative or stabilizer
3 ..Phoshorus attached directly or indirectly to the azide group by nonionic bonding
4 ..Silicon, boron, aluminum or heavy metal containing
5 ..Chalcogen or nitrogen bonded directly to the azide group (e.g., sulfonyl azides, etc.)
6 ..Having -C(=X)-, wherein X is chalcogen, bonded directly to the azide group
7 ...Chalcogen bonded directly to the -C(=X)- group
8 ..Benzene ring bonded directly to the azide group
9 ..Cyclopentanohydrophenanthrene ring system containing
10 ..Acyclic carbon bonded directly to the azide group
11 ...Nitrogen attached indirectly to the azide group by acyclic nonionic bonding (e.g., diazides, etc.)
12 ....Having -C(=X)-, wherein X is chalcogen, attached indirectly to the azide group by acyclic nonionic bonding
100 .Acyclic carbon bonded directly to three benzene rings and to cyano (e.g., triphenylacetonitrile, etc.)
101 .Acyclic carbon bonded directly to three benzene rings or to two benzene rings and a cyclohexadienyl ring, which acyclic carbon may not be bonded to a fourth carbon (e.g., triphenylmethane dyestuffs, etc.)
102 ..With preservative or stabilizer
103 ..Heavy metal or alumium containing
104 ..Nitrogen, sulfur, phosphorus, or peroxy attached directly to the acyclic carbon by nonionic bonding
105 ..The acyclic carbon and an additional carbon are bonded directly to the same oxygen (ethers, esters, etc.)
106 ..One of the rings, or a polycyclo ring system containing one of the rings, is bonded directly to -N=C=O or to -C(=O)OH (wherein H may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)
107 ...Chalcogen bonded directly to the ring or ring system (e.g., salicyclic type, hydroxynaphthoic type, etc.)
108 ..One of the rings is part of a polycyclo ring system (e.g., naphthyldiphenylcarbinol, etc.)
109 ..An acyclic alkylene group is bonded directly to nitrogen and to chalcogen, cyano, carbonyl or additional nitrogen (e.g., N-hydroxyalkyl, N-cyanoalkyl, N-sulfatoalkyl, aminoalkylamino groups, etc.)
110 ..One of the rings and a benzene ring are bonded directly to the same nitrogen (e.g., triphenylrosaniline, etc.)
111 ..Nitrogen, except as cyano, attached indirectly to a ring by acyclic nonionic bonding (e.g., benzyl rosanilines, etc.)
112 ..Carbon bonded directly to -S(=O)(=O)OH (wherein H may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium; i.e., sulfonic acids and salts thereof)
113 ..Nitrogen bonded directly to one of the rings (e.g., malachite green, rosophenoline, etc.)
114 ...Nitrogen bonded directly to each of the rings (e.g., rosaniline, crystal violet, etc.)
115 ..Chalcogen bonded directly to one of the rings (e.g., fuchsone, etc.)
200 .Tetracyclo naphthacene configured ring system having at least one double bond between ring members and having oxygen bonded directly to a carbon of an interior ring which carbon is a member of one ring only
201 ..Two oxygens double bonded directly to the interior ring in para positions
202 ..At least six oxygens bonded directly to the tetracyclo ring system
203 ...Nitrogen and carbonyl or cyano bonded directly to the tetracyclo ring system (e.g., tetracycline, etc.)
204 ....Carbon double bonded directly to the tetracyclo ring system (e.g., 6-methylene tetracycline, etc.)
205 ....Plural nitrogens bonded directly to the tetracyclo ring system
206 ....Processes
207 .....Heavy metal or aluminum containing material utilized
208 .Polycyclo ring system containing anthracene configured ring system having at least one double bond between ring members and having oxygen single bonded or any atom double bonded directly at the 9- and 10-positions (e.g., anthraquinones, etc.)
209 ..Phosphorus, selenium, silicon, heavy metal or aluminum containing
210 ..Nitrogen or carbon double bonded directly at the 9- or 10-position
211 ..Sulfur bonded directly to oxygen which is single bonded directly at the 9- or 10-position
212 ..The polycyclo ring system is bonded directly to an additional polycyclo ring system having at least three cyclos (e.g., plural anthracene configured ring systems bonded directly to each other, etc.)
213 ..The polycyclo ring system and an additional polycyclo ring system having at least three cyclos are bonded directly to the same atom (e.g., plural anthracene configured ring systems bonded directly to the same sulfur, etc.)
214 ...The atom is nitrogen (e.g., anthrimides, etc.)
215 ....At least five cyclos in the polycyclo ring system
216 ....The polycyclo ring system is tetracyclic
217 ....Nitrogen, oxygen, sulfur, carbon or halogen bonded directly at beta position of the anthracene configured ring system (i.e., 2-, 3-, 6- or 7-position)

ORGANIC COMPOUNDS

.Polycyclo ring system containing anthracene configured ring system having at least one double bond between ring members and having oxygen single bonded or any atom double bonded directly at the 9- and 10-positions (e.g., anthraquinones, etc.)

218 ..The polycyclo ring system is attached indirectly by nonionic bonding to an additional polycyclo ring system having at least three cyclos (e.g., plural anthracene ring systems attached indirectly to each other by nonionic bonding, etc.)

219 ...Nitrogen, oxygen, sulfur, carbon or halogen bonded directly at beta position of the anthracene configured ring system (i.e. 2-, 3-, 6- or 7-position)

220 ..The polycyclo ring system contains at least four cyclos

221 ..Sulfur bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

222 ...Nitrogen or additional sulfur bonded directly to the sulfur

223 ...Additional carbon bonded directly to the sulfur

224 ...Carbonyl, nitrogen, oxygen or halogen bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

225 ...Nitrogen bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

226 ....Oxygen, sulfur or halogen bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

227 .....Plural nitrogens, plural oxygens, plural sulfurs, or plural halogens bonded directly at alpha positions

228 ....Additional ring containing

229 .....Containing cyano or containing nitrogen bonded directly to sulfur (e.g., sulfonamide containing, etc.)

230 .....Acyclic carbonyl or thiocarbonyl containing (e.g., thiocarboxamide containing, etc.)

231 ......Oxygen, sulfur or halogen bonded directly to the additional ring

232 .....Oxygen, sulfur, nitro or halogen bonded directly to the additional ring

233 ......Plural additional rings containing

234 ..Sulfur bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

235 ...Nitrogen or halogen bonded directly to the anthracene configured ring system

236 ..Nitrogen bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

237 ...Oxygen, nitrogen or additional carbon bonded directly to the nitrogen

238 ..Nitrogen bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

239 ...Cyano bonded directly to the anthracene configured ring system

240 ...Oxygen bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

241 ....Additional carbon bonded directly to the oxygen

242 .....The additional carbon is part of a ring

243 ...Oxygen bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

244 ....Halogen bonded directly to the anthracene configured ring system

245 ....Carbon bonded directly to the anthracene configured ring system

246 ....Oxygen bonded directly to the nitrogen (e.g., nitro bonded directly at 8-position, etc.)

247 ....Additional carbon bonded directly to the nitrogen

248 .....Cyano, carboxamide, sulfonamide or halogen containing

249 ...Halogen bonded directly to the anthracene configured ring system

250 ....Carbonyl, oxygen or sulfur bonded directly to he nitrogen

251 ...Carbon bonded directly to the anthracene configured ring system

252 ....Nitrogen or halogen bonded directly to the carbon (e.g., carboxamide bonded directly to the anthracene configured ring system, etc.)

253 ...Oxygen or sulfur bonded directly to the nitrogen (e.g., 1-nitroanthraquinone, etc.)

254 ....Plural nitrogens bonded directly at alpha positions (i.e., 1-, 4-, 5- or 8-positions, e.g., 1, 5-dinitroanthraquinones, etc.)

255 ...Additional carbon bonded directly to the nitrogen

256 ....The additional carbon is part of a carbonyl group (i.e., carboxamido bonded directly at alpha position)

257 .....Nitrogen, oxygen, sulfur or halogen bonded directly to an additional ring

258 ....The additional carbon is part of a ring or ring system

259 .....Oxygen, sulfur or halogen bonded directly to the ring or ring system

260 ....Acyclic carbonyl, sulfur or halogen containing

261 ..Oxygen bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

262 ..Oxygen bonded directly at alpha position (i.e., 1-, 4-, 5-, or 8-position)

263 ..Halogen bonded directly at beta position (i.e., 2-, 3-, 6-, or 7-position)

264 ..Halogen bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

265 ..Carbon bonded directly at beta position (i.e., 2-, 3-, 6- or 7-position)

266 ...Nitrogen, halogen or additional oxygen containing

267 ..Carbon bonded directly at alpha position (i.e., 1-, 4-, 5- or 8-position)

268 ..Processes of forming anthraquinone per se or enolic form thereof by reacting an organic acid, aldehyde, anhydride or an indane (e.g., reacting phthalic anhydride, methyl phenylindane, etc.)

ORGANIC COMPOUNDS

.Polycyclo ring system containing anthracene configured ring system having at least one double bond between ring members and having oxygen single bonded or any atom double bonded directly at the 9- and 10-positions (e.g., anthraquinones, etc.)

269 ..Processes of forming anthraquinone per se or enolic form thereof utilizing heavy metal containing material (e.g., vanadium catalyst utilized, etc.)

270 ...Light metal or nitrogen containing material utilized (e.g., ceric ammonium nitrate catalyst utilized, etc.)

271 .Polycyclo ring system containing anthracene configured ring system having at least one double bond between ring members and having oxygen single bonded or any atom double bonded direct at the 9- or 10-position (e.g., anthrones, anthranols, etc.)

272 ..Phosphorus, selenium, tellurium, or heavy metal containing

273 ..The polycyclo ring system is bonded directly to an additional polycyclo ring system having at least three cyclo (e.g., plural anthracene configured ring systems bonded directly to each other, etc.)

274 ..The polycyclo ring system is attached indirectly by nonionic bonding to an additional polycyclo ring system having a least three cyclos (e.g., plural anthracene configured ring systems bonded directly to the same nitrogen, etc.)

275 ..The polycyclo ring system has at least ten cyclos

276 ..The polycyclo ring system has nine cyclos

277 ...Cyano, nitrogen or sulfur bonded directly to the nonacyclo ring system

278 ....Halogen containing or processes wherein a halogen containing material is utilized

279 ...Oxygen single bonded directly to the nonacyclo ring system

280 ....Halogen or light metal containing or processes wherein a halogen or light metal containing is utilized

281 ...Halogen containing

282 ..The polycyclo ring system has seven or eight cyclos

283 ...Halogen containing

284 ..The polycyclo ring system has five of six cyclos

285 ...Halogen containing

286 ..The polycyclo ring system has four cyclos (e.g., benzanthrones, etc.)

287 ...Cyano, carbonyl, nitrogen or sulfur bonded directly to the tetracyclo ring system

288 ...Halogen or carbon bonded directly to the tetracyclo ring system

289 ..Nitrogen or sulfur bonded directly to the anthracene configured ring system

290 ..Carbon, halogen or plural oxygens bonded directly to the anthracene configured ring system

291 .Cyclohexadiene having atoms double bonded directly at the 1- and 2-positions (e.g., orthoquinones, etc.)

292 ..Polycyclo ring system having the cyclohexadiene as one of the cyclos

293 .Cyclohexadiene having atoms double bonded directly at the 1- and 4-positions (e.g., paraquinones, etc.)

294 ..Phosphorus, heavy metal or aluminum containing

295 ..Polycyclo ring system having the cyclohexadiene as one of the cyclos

296 ...Oxygen double bonded directly at the 1- and 4- positions

297 ....Nitrogen or halogen bonded directly to the polycyclo ring system

298 ....Chalcogen single bonded directly to the polycyclo ring system

299 ....Carbon bonded directly to the polycyclo ring system

300 ...Plural oxygens and plural nitrogens bonded directly to the polycyclo ring system

301 ..Nitrogen double bonded directly at the 1- and 4- positions

302 ..Nitrogen double bonded directly at the 1- or 4- positions

303 ..Carbon double bonded directly at the 1- and 4- positions

304 ..Carbon double bonded directly at the 1- or 4- position

305 ..Sulfur bonded directly at the 2-, 3-, 5- or 6- position

306 ..Nitrogen bonded directly at the 2-, 3-, 5- or 6- position

307 ..Oxygen bonded directly at the 2-, 3-, 5-, or 6- position

308 ..Halogen bonded directly at the 2-, 3-, 5-, or 6- position

309 ..Carbon donded directly at the 2-, 3-, 5- or 6- position

310 ...At least three carbons bonded directly to the cyclohexadiene

500 .Cyclopentanohydrophenanthrene ring system wherein two nonadjacent carbons of the ring system are bonded directly to each other (e.g., 3,5-cyclocholesterols, 3,5-cycloandrostanes, etc.)

501 ..Oxygen bonded directly at the 6-position of the cyclopentanohydrophenanthrene ring system

502 .Cyclopentanohydrophenanthrene ring system containing

503 ..With preservative or stabilizer

504 ..Heavy metal or aluminum containing

505 ..Boron, silicon, selenium or tellurium containing

506 ..Phosphorus attached directly or indirectly to the cyclopentanohydrophenanthrene ring system by nonionic bonding

507 ...The phosphorus is bonded directly at the 21-position or is bonded directly to a chalcogen which is bonded directly at the 21-positon

508 ..Spiro

509 ..Plural cyclopentanohydrophenanthrene ring systems

510 ..The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos

511 ...The additional ring shares the 1,2-positions of the cyclopentanohydrophenanthrene ring system

ORGANIC COMPOUNDS

.Cyclopentanohydrophenanthrene ring system containing

..The cyclopentanohydrophenanthrene ring system is part of a polycyclo ring system having at least five cyclos

512 ...The additional ring shares the 5,10- or 5,19-positions of the cyclopentanohydrophenanthrene ring system

513 ...The additional ring shares the 6,7-positions of the cyclopentanohydrophenanthrene ring system

514 ...The additional ring shares the 16,17-positions of the cyclopentanohydrophenanthrene ring system

515 ..Nitrogen bonded directly to the cyclopentanohydrophenanthrene ring system

516 ...The nitrogen is double bonded to the cyclopentanohydrophenanthrene ring system

517 ....The nitrogen is part of a semicarbazone or thiosemicarbazone group

518 ....Additional nitrogen bonded directly to the nitrogen (e.g., hydrazones, etc.)

519 ....Oxygen bonded directly to the nitrogen (e.g., oximes, isonitrosos, etc.)

520 .....The nitrogen is bonded directly at the 3-position

521 ...The nitrogen is bonded directly at the 3-position

522 ...The nitrogen is bonded directly at the 17-position

523 ..Sulfur bonded directly to the cyclopentanohydrophenanthrene ring system

524 ...The sulfur is bonded directly at the 1- or 3-position

525 ...The sulfur is bonded directly at the 16- or 17-position

526 ..Carbon double bonded directly to the cyclopentanohydrophenantrene ring system

527 ...The carbon is double bonded directly at the 2-position

528 ...The carbon is double bonded directly at the 16-position

529 ....And carbon bonded directly at the 17 beta-position is a member of an acyclic chain of two or more uninterrupted carbons

530 ...The carbon is double bonded directly at the 17-position (e.g., fusidic acids, etc.)

531 ....Nitrogen or sulfur containing

532 ....The carbon is a member of an acyclic chain of exactly two carbons (e.g., 3-keto-4,17(20)-pregnadienes, 17-ethylidene-estranes,etc.)

533 .....Plural oxygens bonded directly to the cyclopentanohydrophenanthrene ring system

534 ......And oxygen bonded directly at the 21-position of the compound

535 ..Halogen bonded directly at the 12-position of the cyclopentanohydrophenanthrene ring system

536 ..Halogen bonded directly at the 16-position of the cyclopentanohydrophenanthrene ring system

537 ...Plural halogens bonded directly at the 16-position

538 ...Carbon bonded directly at the 17 beta-position is a member of an acyclic chain of two or more uninterrupted carbons

539 ..Halomethyl bonded directly to the cyclopentanohydrophenanthrene ring system (e.g., 16-trifluoromethyl progesterones, etc.)

540 ..Carbon bonded directly at the 17 beta-position of the cyclopentanohydrophenanthrene ring system is a member of an acyclic chain of six or more uninterrupted carbons (e.g., sterols, etc.)

541 ...Oxygen bonded directly at the 1-, 2-, or 4-position

542 ...Oxygen bonded directly at the 6- or 7-position

543 ...Carbon or halogen bonded directly at the 6- or 7-position

544 ...Exactly one oxygen bonded directly to the cyclopentanohydrophenanthrene ring system (e.g., cholesterols, cholestanols, stigmasterols, etc.)

545 ....Processes of isolating, purifying or recovering from animal, vegetable or fungal sources (e.g., wool fat or grease, lanolin, fish oils, animal tissue, soybean oil, tall oil or pitch, wood products, sugar cane, soap stocks, yeast, molds, etc.)

546 ....Halogen or oxygen bonded directly to the acyclic carbon chain at the 17 beta-position (e.g., 25-hydroxy cholesterols, etc.)

547 ....Unsaturation between the 7- and 8-positions (e.g., ergosterols, 7-dehydrocholesterols, provitamin D, etc.)

548 ..Carbon bonded directly at the 17 beta-position of the cyclopentanohydrophenanthrene ring system is a member of an acyclic chain of five uninterrupted carbons (e.g., choladienes, cholanic acids, etc.)

549 ...Oxygen bonded directly at the 12-position (e.g., cholic acids, desoxycholic acids, dehydrocholic acids, etc.)

550 ....Halogen, nitrogen, or sulfur containing (e.g., glycocholic acids, taurocholic acids, etc.)

551 ...Oxygen bonded directly at the 6- or 7-position (e.g., chenodeoxycholic acids, ursodeoxycholic acids, etc.)

552 ...Exactly one oxygen bonded directly to the cyclopentanohydrophenanthrene ring system (e.g., 3-hydroxycholanic acids, lithocholic acids, etc.)

553 ..Carbon bonded directly at the 17 beta-position of the cyclopentanohydrophenanthrene ring system is a member of an acyclic chain of three or four uninterruped carbons, (e.g., diketobisnorcholenic acids, etc.)

554 ...Halogen or nitrogen containing (e.g., 20-cyano-pregnanes, 21-cyano-pregnenes, etc.)

ORGANIC COMPOUNDS
.Cyclopentanohydrophenanthrene ring system containing
..Carbon bonded directly at the 17 beta-position of the cyclopentanohydrophenanthrene ring system is a member of an acyclic chain of three or four uninterruped carbons, (e.g., diketobisnorcholenic acids, etc.)
555 ...Exactly one oxygen bonded directly to the cyclopentanohydrophenanthrene ring system (e.g., 3-keto-bisnorcholenic acids, 3-keto-bisnor-cholene-22-als, etc.)
556 ....And oxygen bonded directly at the 20-position of the compound
557 ..Carbon bonded directly at the 17-beta-position of the cyclopentanohydrophenanthrene ring system is a member of an acyclic chain of two uninterrupted carbons (e.g., pregnanes, etc.)
558 ...The A ring is a benzene ring
559 ...Three or more oxygens bonded directly to the cyclopentanohydrophenanthrene ring system
560 ....Oxygen bonded directly at the 1-, 2- or 4-position
561 ....Oxygen bonded directly at the 6-position
562 ....Oxygen bonded directly at the 7-, 8- or 9-position
563 ....Oxygen bonded directly at the 14- or 15-position
564 ....Oxygen bonded directly at the 16-position
565 .....Carbon or halogen bonded directly at the 6- or 7-position
566 .....Oxygen bonded directly at the 21-position (e.g., triamcinolone, etc.)
567 ....Halogen bonded directly at the 2- or 4-position (e.g., 4-bromocortisones, etc.)
568 .....The cyclopentanohydrophenanthrene ring system is fully saturated
569 ....Oxygen bonded directly at the 3-, 11-, and 17-positions
570 .....Oxygen bonded directly at the 21-position
571 ......Carbon bonded directly at the 1-, 2- or 4-position
572 ......Carbon or halogen bonded directly at the 6- or 7-position
573 ....Carbon bonded directly at the 16-position
574 ......Carbon bonded directly at the 16-position (e.g., betamethasones, dexamethasones, etc.)
575 ......Nitrogen or sulfur containing
576 ......Unsaturation between the 1- and 2-positions and the 4- and 5-positions (e.g., prednisones, prednisolones, etc.)
577 ......Unsaturation between the 4- and 5-positions (e.g., cortisones, etc.)
578 ....Additional unsaturation in the cyclopentanohydrophenanthrene ring system
579 ......The cyclopentanohydrophenanthrene ring system is fully saturated
580 .....Carbon or halogen bonded directly at the 6- or 7-position
581 .....Unsaturation between the 4- and 5-positions (e.g., 21-thiol prednisones, 21-thio cortisones, etc.)
582 ...Two oxygens bonded directly to the cyclopentanohydrophenanthrene ring system
583 ....Oxygen bonded directly at the 5-, 6- or 7-position
584 ....Oxygen bonded directly at the 12-position
585 ....Oxygen bonded directly at the 15- or 16-position
586 ....Oxygen bonded directly at the 3- and 11-position
587 .....Oxygen bonded directly at the 21-position
588 ......Unsaturation between the 4- and 5-positions (e.g., aldosterones, corticosterones, etc.)
589 .....Carbon bonded directly at the 16-position
590 .....Unsaturation between the 4- and 5-positions
591 .....The cyclopentanohydrophenanthrene ring system is fully saturated
592 ....Oxygen bonded directly at the 3- and 17-positions
593 .....Oxygen bonded directly at the 21-position
594 ......Carbon or halogen bonded directly at the 6- or 7-position
595 ......Unsaturation between the 4- and 5-positions (e.g., 17-alpha-hydroxy-progesterones , etc.)
596 .....Carbon bonded directly at the 16-position
597 .....Carbon or halogen bonded directly at the 6- or 7-position
598 .....Unsaturation between the 4- and 5-positions
599 ...Exactly one oxygen bonded directly to the cyclopentanohydrophenanthrene ring system
600 ....Oxygen bonded directly at the 21-position
601 .....Unsaturation between the 4- and 5-position (e.g., desoxycorticosterones, etc.)
602 ......Additional unsaturation in the cyclopentanohydrophenanthrene ring system
603 ....Carbon or halogen bonded directly at the 1-, 2-, 3-, 4- or 5-position
604 ....Carbon bonded directly at the 16-position (e.g., 16-cyanopregn-4-ene-3, 20-diones, etc.)
605 ....Carbon or halogen bonded directly at the 6- or 7-position
606 ....Unsaturation between the 5- and 6-positions (e.g., pregnenolones, etc.)
607 ....Unsaturation between the 4- and 5-positions (e.g., progesterones, etc.)
608 .....Additional unsaturation in the cyclopentanohydrophenanthrene ring system
609 ....The cyclopentanohydrophenanthrene ring system is fully saturated (e.g., pregnandiols, pregnanolones, etc.)

ORGANIC COMPOUNDS

.Cyclopentanohydrophenanthrene ring system containing

610 ..Acyclic carbon bonded directly at the 17 beta-position of the cyclopentanohydrophenanthrene ring system (e.g., etiocholanic acids, 17-cyanoetiocholanes, 17-aldehydrostanes, etc.)

611 ...Exactly one oxygen bonded directly to the cyclopentanohydrophenanthrene ring system (e.g., 3-keto-etiocholanic acids, etc.)

612 ..Three or more oxygens bonded directly to the cyclopentanohydrophenanthrene ring system

613 ...Oxygen bonded directly at the 1-position

614 ...Oxygen bonded directly at the 2- or 4-position

615 ...Oxygen bonded directly at the 5-, 6- or 7-position

616 ...Oxygen bonded directly at the 16-position

617 ....The A ring is a benzene ring (e.g., estriols, etc.)

618 ...The A ring is a benzene ring

619 ...Oxygen bonded directly at the 3-, 11- and 17-positions (e.g., 1-androstene-3,11,17-triones, etc.)

620 ....Carbon or halogen bonded directly at the 1, 2- or 4-position

621 ....Unsaturation between the 4- and 5-positions (e.g., adrenosterones, 11-hydroxytestosterones, etc.)

622 .....17 alpha-position substituted (e.g., 11-keto-17 alpha-alkyltestosterones, etc.)

623 ..Two oxygens bonded directly to the cyclopentanohydrophenanthrene ring system

624 ...Oxygen bonded directly at the 16-position

625 ...The A ring is a benzene ring (e.g., estrones, estradiols, etc.)

626 ....Nitrogen or sulfur containing

627 ....Carbon or halogen bonded directly at the 1-, 2- or 4-position

628 ....Carbon or halogen bonded directly at the 6- or 7-position

629 ....Carbon bonded directly at the 11-, 15- or 16-position

630 ....17 alpha-position substituted

631 .....The 17 alpha-position substituent contains acyclic carbon-to-carbon unsaturation

632 ...19-position substituted (e.g., 19-methylene-androstanes, 10-cyanoestranes, etc.)

633 ...Carbon bonded directly at the 10- and 13-positions (e.g., androstenes, etc.)

634 ....Carbon or halogen bonded directly at the 1- or 3-position

635 ....Carbon or halogen bonded directly at the 2- or 4-position

636 ....Unsaturation between the 5- and 6-positions (e.g., dehydroandrosterones, etc.)

637 .....17 alpha-position substituted (e.g., 17 alpha-ethynyl-5-androstene-3 beta, 17 beta-diols, etc.)

638 ....Unsaturation between the 4- and 5-positions (e.g., testosterones, etc.)

639 .....17 alpha-position substituted (e.g., 17 alpha-alkynylandrosta-4, 6-diene-3,17-diols, etc.)

640 .....Additional unsaturation in the cyclopentanohydrophenanthrene ring system

641 ....The cyclopentanohydrophenanthrene ring system is fully saturated (e.g., androstandiols, androsterones, dihydrotestosterones, etc.)

642 ...Carbon bonded directly at the 13-position (e.g., 19-norandrostenes, estradienes, etc.)

643 ....Carbon or halogen bonded directly at the 1-, 2-, 4- or 5-position

644 ....Unsaturation between the 5- and 10-positions

645 .....17 alpha-position substituted (e.g., 17 alpha-ethynyl-17-hydroxy-5(10) estren-3-ones, etc.)

646 ....Unsaturation between the 4- and 5-positions (e.g., 19-nortestosterones, 13 beta-alkyl-4-gonene-3,17-diones etc.)

647 .....Carbon or halogen bonded directly at the 6- or 7-position

648 .....17 alpha-position substituted (e.g., 17 alpha-ethynyl-19-nortestosterones, etc.)

649 ....The cyclopentanohydrophenanthrene ring system is fully saturated (e.g., 17 alpha-alkyl-17 beta-hydroxyestran-3-ones, etc.)

650 ..Oxygen bonded directly at the 16- or 17-position of the cyclopentanohydrophenanthrene ring system

651 ...Carbon or halogen bonded directly at the 1- or 3-position

652 ...Carbon or halogen bonded directly at the 2-, 4- or 5-position

653 .9,10-Seco-cyclopentanohydrophenanthrene ring system or 9,10-seco-cyclopentanohydrophenanthrene ring system having a bond between the 3- and 5-positions (e.g., vitamin D compounds, cholecalciferols, activated 7-dehydrocholesterols, dihydrotachysterols, 3,5-cyclovitamin D compounds, etc.)

CLASS 556 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

> IN THIS SERIES OF CLASSES, CLASS 556 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)

1 .HEAVY METAL CONTAINING (e.g., Ga, In or Tl, etc.)

2 ..With preservative or stabilizer

3 ...Compound preserved or stabilized contains lead bonded directly to carbon

4 ....Halogen containing preservative or stabilizer

5 ....Chalcogen containing preservative or stabilizer

6 ...Nitrogen containing preservative or stabilizer

7 ..Boron containing

8 ...Hydrogen bonded directly to the boron

9 ..Silicon containing

10 ...Silicon and heavy metal bonded directly to the same chalcogen

11 ...Heavy metal bonded directly to unsaturated five-membered carbocyclic ring

12 ...At least three carbons bonded directly to silicon

13 ..Phosphorus containing

14 ...Additional diverse heavy metal or aluminum containing

15 ...The heavy metal is bonded directly to the carbon of a -C(=X)- group, wherein X is chalcogen (e.g., cyclopentadienyl manganese dicarbonyl triphenyl phosphine, etc.)

16 ....Iron, cobalt, nickel, ruthenium, rhodium, palladium, osmium, iridium, or platinum containing (Fe, Co, Ni, Ru, Rh, Pd, Os, Ir or Pt)

17 ...Plural phosphori bonded directly to the same nitrogen or chalcogen (e.g., pyrophosphates, etc.)

18 ...Plural phosphori bonded directly to the same carbon or attached to each other by an acyclic chain which chain consists of carbons or of carbons and chalcogens

19 ...Carbon bonded directly to the phosphorus

20 ....Plural carbons bonded directly to the phosphorus

21 .....Exactly three carbons bonded directly to the phosphorus (e.g., triphenylphosphines, etc.)

22 ......And carbon bonded directly to the heavy metal

23 ......Hydrogen or halogen bonded directly to the heavy metal

24 ...Exactly four chalcogens bonded directly to the phosphorus (e.g., phosphates, orthophosphates, etc.)

25 ....At least two of the chalcogens are sulfur (e.g., zinc dihydrocarbyl dithiophosphates, etc.)

26 ....Nitrogen or -C(=X)- containing, wherein X is chalcogen

27 ..Aluminum containing

28 ..Plural diverse heavy metals containing

29 ...Heavy metal double bonded directly to heavy metal

30 ...Arsenic, antimony, or bismuth containing (As, Sb, or Bi)

31 ...Containing -C(=X)-, wherein X is chalcogen (e.g., carbonyl containing, etc.)

32 ..Nitrogen double bonded directly to carbon

33 ...Carbocyclic ring bonded directly to the nitrogen (e.g., azomethines, etc.)

34 ....Additonal carbon double bonded to nitrogen (e.g., bisazomethines, etc.)

35 ...Additional nitrogen bonded directly to the carbon or nitrogen

36 ....Guanidines

37 ...Chalcogen bonded directly to the carbon or nitrogen (e.g., oximes, etc.)

38 ..Nitrogen and plural sulfurs bonded directly to the same carbon (e.g., thiocarbamates, etc.)

39 ...Plural nitrogens bonded directly to the same carbon or attached to each other by a chain consisting of carbons, which carbons may be part of a ring (e.g., ethylene bis-dithiocarbamates, etc.)

40 ..Plural -C(=X)- groups, wherein X is chalcogen, bonded directly to the same non-benzenoid carbons, or the enolate thereof. (e.g., beta-diketone chelates, acetylacetonates, etc.)

41 ...Carbon or halogen bonded directly to the metal

42 ..Vanadium, niobium, or tantalum containing (V, Nb, or Ta)

43 ...Carbon bonded directly to the metal (e.g., cyclopentadienyl vanadium tetracarbonyl, etc.)

44 ...The metal is bonded directly to X of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens (e.g., vanadyl xanthate, etc.)

45 ..Manganese or rhenium containing (Mn or Re)

46 ...Carbon bonded directly to the metal (e.g., ethyl thiomanganese tricarbonyl, etc.)

47 ....The metal is bonded directly to an unsaturated 5-membered carbocyclic ring and to at least three -C(=X)- groups, wherein X is chalcogen (e.g., cyclopentadienyl manganese tricarbonyl, indenyl manganese tricarbonyl, etc.)

48 .....Chalcogen or -C(=X)-, wherein X is chalcogen, bonded directly to the unsaturated 5-membered carbocyclic ring

49 ...The metal is bonded directly to X of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens (e.g., manganese acetate, etc.)

50 ....Nitrogen containing

51 ..Titanium, zirconium, or hafnium containing (Ti, Zr, or Hf)

52 ...Carbon bonded directly to the metal

53 ....Plural unsaturated 5-membered carbocyclic rings bonded directly to the metal

54 ...Plural chalcogens bonded directly to the metal (e.g., alkyl titanates, titanic esters, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HEAVY METAL CONTAINING (e.g., Ga, In or Tl, etc.)
..Titanium, zirconium, or hafnium containing (Ti, Zr, or Hf)
...Plural chalcogens bonded directly to the metal (e.g., alkyl titanates, titanic esters, etc.)
55 ....Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens
56 ....Nitrogen or halogen containing
57 ..Chromium, molybdenum, or tungsten containing (Cr, Mo, or
58 ...Carbon bonded directly to the metal
59 ....Chalcogen double bonded directly to the carbon (e.g., molybdenum pentacarbonyls, etc.)
60 .....Carbocyclic ring bonded directly to the metal
61 ...Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens
62 ....The carbons of plural -C(X=)X- groups, are bonded directly to each other, to the same acyclic carbon, (e.g., chromium oxalates, etc.)
63 ....Nitrogen or halogen containing
64 ..Arsenic, antimony, or bismuth containing (As, Sb, or Bi)
65 ...Arsenic double bonded directly to arsenic (e.g., arsenobenzenes, etc.)
66 ....Containing two benzene rings each having nitrogen, chalcogen and one of the arsenics bonded directly thereto (e.g., arsphenamines, etc.)
67 .....Sulfur double bonded directly to chalcogen (e.g., neoarsphenamines, etc.)
68 ...Tricyclo ring system having a six-membered ring, which includes heavy metal and nitrogen or chalcogen, as one of the cyclos (e.g., phenoxarsines, phenarsazines, etc.)
69 ...Sulfur double bonded directly to chalcogen
70 ...Carbon bonded directly to the metal
71 ....Chalcogen bonded directly to the metal (e.g., arsine oxides, etc.)
72 .....Plural chalcogens bonded directly to the metal
73 ......Exactly three chalcogens bonded directly to the metal (e.g., arsonic acids, arsonates, etc.)
74 ....Nitrogen and the metal bonded directly to the same benzene ring (e.g., arsanilic acids, etc.)
75 ....Having -C(=X)-, wherein X is chalcogen, attached directly or indirectly to the nitrogen by acyclic nononic bonding
76 ...Chalcogen bonded directly to the metal
77 ....Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens
78 .....Carbocyclic ring bonded directly to the carbon of the -C(=X)X- group
79 .....The carbons of plural -C(=X)X- groups are bonded directly to each other, to the same carbon, or to a chain consisting of carbons, which carbons may be part of a ring (e.g., bismuth tartrates, etc.)
80 ....Carbocyclic ring bonded directly to the chalcogen
81 ..Germanium, tin, or lead containing (Ge, Sn, or Pb)
82 ...Tin bonded directly to tin or lead bonded directly to lead
83 ...Plural heavy metals bonded directly to the same chalcogen (e.g., two germaniums bonded directly to the same oxygen, etc.)
84 ....Exactly three carbons bonded directly to each of the metals (e.g., bis-tributyl tin oxides, etc.)
85 ...Sulfur double bonded directly to chalcogen
86 ....Exactly three carbons bonded directly to the metal
87 ...Carbon bonded directly to the metal
88 ....Chalcogen bonded directly to the metal
89 .....Plural chalcogens bonded directly to the metal
90 ......At least one of the chalcogens is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
91 ....Sulfur containing (e.g., organotinmercaptio carboxylic acid ester sulfides, etc.)
92 ....Acyclic carbon to carbon unsaturation containing (e.g., diorganotin maleates, etc.)
93 ......Having -C(=X)X-, are the same or diverse chalcogens, attached indirectly to the metal by nonionic bonding (e.g., dialkyl tin thioglycollic acid esters, etc.)
94 .....The chalcogen is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
95 ....The compound consists of the metal, carbon and hydrogen or the metal, carbon, hydrogen and halogen (e.g., tetraalkylleads, etc.)
96 .....Preparing by utilizing a magnesium containing material (e.g., Grignard reagent, etc.)
97 .....Preparing by interchange of radicals between heavy metal atoms (e.g., redistribution, disproportionation, etc.)
98 .....Preparing by reacting free heavy metal or heavy metal containing alloy with hydrocarbyl halide (e.g., reacting Pb-Na alloy with hydrocarbyl chloride, etc.)
99 ......Additional heavy metal containing material or aluminum containing material utilized
100 ......Phosphorus containing material or organic nitrogen containing compound utilized
101 ......Organic chalcogen containing compound or additional organic halogen containing utilized
102 .....Preparing by utilizing boron, aluminum, gallium, indium, or thallium
103 .....Purification or recovery
104 .....Halogen bonded directly to the metal
105 ...Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens
106 ....Carbocyclic ring bonded directly to the carbon of the -C(=X)X- group (e.g., lead phthalates, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.HEAVY METAL CONTAINING (e.g., Ga, In or Tl, etc.)

..Germanium, tin, or lead containing (Ge, Sn, or Pb)

...Containing -C(=X)X-, wherein the X's are the same or diverse chalcogens

107 ....Nitrogen containing

108 ...Carbocyclic ring and the metal are bonded directly to the same chalcogen (e.g., stannous catecholates, etc.)

109 ....Plural chalcogens and plural nitro groups bonded directly to the same benzene ring (e.g., lead styphnates, lead salts of di-nitroresorcinol, etc.)

110 ..Copper, silver, or gold containing (Cu, Ag, or Au)

111 ...Sulfur double bonded directly to chalcogen

112 ...Carbon bonded directly to the metal

113 ...Chalcogen bonded directly to the metal

114 ....The chalcogen is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

115 .....Carbocyclic ring bonded directly to the carbon of the -C(=X)X- group

116 .....Nitrogen containing

117 ....Containing -C(=X)-, wherein X is chalcogen

118 ..Zinc, cadmium, or mercury containing (Zn, Cd, or Hg)

119 ...Sulfur double bonded directly to chalcogen

120 ....Containing -C(=X)-, wherein X is chalcogen (e.g., zinc formaldehyde sulphoxylates, etc.)

121 ...Carbon bonded directly to the metal

122 ....Chalcogen bonded directly to the metal

123 .....The carbon is part of a carbocyclic ring (e.g., phenyl mercury nitrate, phenyl mercury phenolates, etc.)

124 ......Hydrogen or -C(=X)-, wherein X is chalcogen, bonded directly to the chalcogen (e.g., H-X-Metal-Ring-H, -C(=X)X-Metal-Ring-H, phenyl mercury hydroxides, phenyl mercury acetates, etc.)

125 ....The carbon of the -C(=X)X- group is bonded directly to the carbocyclic ring or to a different carbocyclic ring (e.g., phenyl mercury salicylates, oxymercuric benzoic acid anhydrides, etc.)

126 ....Additional chalcogen bonded directly to the carbocyclic ring (e.g., acetoxymercury nitrocresols, etc.)

127 .....Hydrogen or -C(=X)-, wherein X is chalcogen, bonded directly to the chalcogen (e.g., H-X-Metal-HCH-, -C(=X)X-Metal-HCH-, etc.)

128 ....Cyano, nitrogen or halogen bonded directly to the metal

129 ....The compound consists of the metal, carbon and hydrogen (e.g., dialkyl zinc, etc.)

130 ...Chalcogen bonded directly to the metal

131 ....The chalcogen is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

132 .....Carbocyclic ring bonded directly to the carbon of the -C(=X)X- group

133 .....The carbons of plural -C(=X)X- groups are bonded directly to each other, to the same carbon, or to a chain consisting of carbons, which carbons, which carbons may be part of a ring (e.g., zinc glutamates, etc.)

134 .....Nitrogen containing (e.g., zinc ethionates, etc.)

135 ....Carbocyclic ring bonded directly to the chalcogen (e.g., zinc phenolates, zinc thiophenates, etc.)

136 ..Ruthenium, rhodium, palladium, osmium, iridium, or platinum containing (Ru, Rh, Pd, Os, Ir, or Pt)

137 ...Nitrogen bonded directly to the metal

138 ..Iron, cobalt, or nickel containing (Fe, Co, or Ni)

139 ...Sulfur double bonded directly to chalcogen

140 ...Carbon bonded directly to the metal

141 ....Chalcogen double bonded directly to the carbon (e.g., butadiene iron tricarbonyls, etc.)

142 .....Carbocyclic ring bonded directly to the metal

143 ....Plural unsaturated five-membered carbocyclic rings bonded directly to the metal (e.g., ferrorcenes, bis indenyl iron, etc.)

144 .....Chalcogen, nitrogen or halogen containing

145 ......Chalcogen, nitrogen, halogen or -C(=X)-, wherein X is chalcogen, bonded directly to at least one of the carbocyclic rings

146 ...Chalcogen bonded directly to the metal

147 ....The chalcogen is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

148 .....Nitrogen containing (e.g., ferric chelates of ethylenediaminetetracetic acid, etc.)

149 .....Salts of acyclic monocarboxylic acids (e.g., nickel formate, cobalt acetate, etc.)

150 ....Carbocyclic ring bonded directly to the chalcogen

170 .ALUMINUM CONTAINING

171 ..With preservative or stabilizer

172 ..Boron containing

173 ..Silicon containing

174 ..Phosphorus containing

175 ..Ring aluminum containing

176 ..Nitrogen bonded directly to the aluminum

177 ..Oxygen double bonded directly to sulfur

178 ..Plural aluminums containing

179 ...Chalcogen bonded directly to aluminum

180 ...Halogen bonded directly to aluminum (e.g., sesquihalides, etc.)

181 ..Chalcogen bonded directly to aluminum

182 ...Plural chalcogens bonded directly to the same aluminum

183 ....At least one of the chalcogens is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.ALUMINUM CONTAINING
..Chalcogen bonded directly to aluminum
...Plural chalcogens bonded directly to the same aluminum
....At least one of the chalcogens is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
184 .....Ring bonded directly to the carbon of the -C(=X)X- group
185 ....Preparing by oxidation
186 ..Halogen bonded directly to the aluminum
187 ..Processes of preparing, purifying or recovering compounds having plural carbons bonded directly to the same aluminum
188 ...Aluminum containing alloy or elemental aluminum utilized
189 ....And utilizing a material which contains a metal other than aluminum
190 ...Reactants include unsaturated hydrocarbon and compound having carbon bonded directly to aluminum
400 .SILICON CONTAINING
401 ..With preservative or stabilizer
402 ..Boron containing
403 ...Boron is ring member
404 ..Phosphorus attached directly or indirectly to silicon by nonionic bonding
405 ...Chalcogen bonded directly to silicon
406 ..Ring consisting of carbon and silicon
407 ..Nitrogen is ring member
408 ...Chalcogen is member of the ring
409 ...Plural silicons in the ring
410 ..Nitrogen attached directly to silicon by nonionic bonding
411 ...Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen
412 ...Plural silicons bonded directly to the nitrogen
413 ..Nitrogen attached indirectly to silicon by nonionic bonding
414 ...The nitrogen is in an isocyanato or isothiocyanato group (i.e., -NCO or -NCS)
415 ...The nitrogen is in a cyano group (i.e., -CN)
416 ....Chalcogen bonded directly to plural carbons or double-bonded directly to carbon
417 ....Chalcogen bonded directly to silicon
418 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly to silicon by nonionic bonding
419 ....Nitrogen is bonded directly to the -C(=X)- group
420 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens
421 .....Additional nitrogen bonded directly to the -C(=X)- group
422 ...Chalcogen attached directly to the nitrogen by nonionic bonding
423 ...Plural carbons bonded directly to the same chalcogen
424 ...Plural nitrogens bonded directly to the same carbon or attached by a chain consisting of carbons, which carbons may be part of a ring
425 ...Two silicons bonded directly to the same oxygen
426 ..Sulfur bonded directly to silicon
427 ..Sulfur attached indirectly to silicon by nonionic bonding
428 ...Chalcogen bonded directly to sulfur
429 ...The sulfur is part of a -SH or -SC(=X)- group, wherein X is chalcogen (H of -SH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
430 ..Plural silicons bonded directly to each other
431 ..Plural silicons bonded directly to the same carbon or attached by a chain consisting of carbons, which carbons may be part of a ring
432 ...Plural silicons bonded directly to the same or different benzene rings that form all or part of the chain
433 ....Two silicons bonded directly to the same oxygen
434 ...Two silicons bonded directly to the same oxygen
435 ...Two silicons bonded directly to the same acyclic saturated hydrocarbon
436 ..Carbonyl attached directly or indirectly to silicon by nonionic bonding
437 ...The carbonyl is part of a -COO- group
438 ....Silicon and the carbon of the -COO- group are bonded directly to the same hydrocarbon group
439 .....Two silicons bonded directly to the same oxygen
440 ....Silicon and the oxy of the -COO- group are bonded directly to the same hydrocarbon group
441 ....Carbocyclic ring having silicon as part of one substituent and the -COO- as part of another substituent
442 ....Silicon is bonded directly to the oxy of the -COO- group
443 ..Plural silicons attached by a chain consisting of oxygen and carbon, which chain may be part of a ring
444 ...Two carbons bonded directly to the same oxygen
445 ..Two carbons bonded directly to the same oxygen
446 ...Additional oxygen bonded directly to the silicon and to a group containing the oxygen and two carbons
447 ...Two carbocyclic rings bonded directly to the oxygen
448 ...One of the two carbons is part of a substituent on the oxygen, which substituent contains halogen and does not contain silicon or a benzene ring
449 ..Hydroxy bonded directly to carbon or peroxy bonded directly to two carbons or to hydrogen and carbon (H of the hydroxy or the H bonded to the peroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
450 ..Two silicons bonded directly to the same oxygen
451 ...Hydrogen bonded directly to silicon
452 ...Halogen bonded directly to silicon
453 ...Three carbons bonded directly to the same silicon
454 ....Halogen attached indirectly to silicon by nonionic bonding
455 ....Three oxygens bonded directly to the same silicon

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.SILICON CONTAINING
..Two silicons bonded directly to the same oxygen
...Three carbons bonded directly to the same silicon
456 ....Three identical hydrocarbon groups bonded directly to the same silicon
457 ...Silicon and carbon bonded directly to the same oxygen
458 ....Three oxygens each bonded directly to the same silicon and to carbon
459 ...Hydroxy bonded directly to silicon (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
460 ...Ring consisting of silicon and oxygen
461 ....Benzene ring containing
462 ...Preparing by utilizing a siloxane reactant
463 ..Hydroxy or peroxy bonded directly to the silicon (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
464 ..Ring consisting of silicon, oxygen, and carbon
465 ..Carbon attached directly or indirectly to the silicon by nonionic bonding (e.g., silanes, etc.)
466 ...Processes
467 ....Plural silicons in a reactant
468 .....Bonded directly to each other
469 ....Interchange of radicals between silicon atoms (e.g., redistribution, disproportionation, transesterification, etc.)
470 ....Forming group containing silicon and carbon bonded directly to the same oxygen (e.g., esters, etc.)
471 .....A silicon halide reacted with a hydroxy or oxirane-containing compound (H of hydroxy may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
472 ....Elemental silicon, silicon-containing alloy or metal silicide reactant
473 .....Halogen, hydrogen halide, or a silicon halide utilized
474 ....Silicon to hydrogen bond formed
475 ....Dehydrohalogenation to produce carbon to carbon unsaturation
476 ....Halogenation of silicon-containing compound
477 .....Silicon to halogen bond formed
478 ....Silicon to carbon bond formed
479 .....Carbon to carbon unsaturation reduced by addition of a silicon hydride
480 .....Magnesium-containing reactant
481 .....By substitution of silicon bonded hydrogen
482 ...Silicon and carbon bonded directly to the same oxygen
483 ....Four oxygens bonded directly to the silicon
484 ....Halogen bonded directly to the silicon
485 ....Halogen bonded directly to acyclic carbon
486 ....Silicon and benzene ring bonded directly to the same oxygen
487 ...Hydrogen bonded directly to the silicon
488 ...Halogen bonded directly to acyclic carbon
489 ...Unsaturated carbocyclic ring containing

ORGANIC COMPOUNDS (Class 532, Subclass 1)

1 .Thioimidate esters (i.e., compounds having the thioimidate group, HN=CH-S-, wherein substitution may be made for hydrogen only, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

2 ..Chalcogen bonded directly to the carbon of the thioimidate group (e.g., HN=C(OH)-S-, wherein substitution may be made for hydrogen only)

3 ..Oxygen attached directly to the nitrogen of the thioimidate group by nonionic bonding (i.e., HO-N=CH-S-, wherein substitution may be hydrogen only)

4 ..Nitrogen bonded directly to the carbon of the thioimidate group (i.e., pseudothioureas, HN=C(HNH)-S-, wherein substitution may be made for hydrogen only)

5 ...Chalcogen attached indirectly to the thioimidate group by acyclic nonionic bonding

6 .Imidate esters (i.e., compounds having the imidate group, HN=CH-O-, wherein substitution may be made for hydrogen only, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

7 ..Oxygen attached directly to the nitrogen of the imidate group by nonionic bonding (i.e., HO-N=CH-O-, wherein substitution may be made for hydrogen only)

8 ..Nitrogen bonded directly to the carbon of the imidate group (i.e., pseudoureas, HN=C(HNH)-O-, wherein substitution may be made for hydrogen only)

9 ..Carbon bonded directly to the nitrogen of the imidate group (e.g., N-cyanoimidates, etc.)

10 .Thiocyanate esters (i.e., compounds having the thiocyano group, -SCN, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

11 ..Plural thiocyano groups attached to each other indirectly by nonionic bonding

12 ..Thiocyano and the carbonyl carbon of a -COO- group are attached to the same carbon or to a chain consisting of carbons, which chain may include ring members (e.g., terpene thiocyanoacyl compounds, etc.)

13 ..Thiocyano bonded directly to a benzene ring

14 ..Nitrogen or carbonyl attached indirectly to the thiocyano group by acyclic nonionic bonding

15 ..Sulfur or halogen attached indirectly to the thiocyano group by acyclic nonionic bonding

16 ..Oxygen attached indirectly to the thiocyano group by acyclic nonionic bonding

17 .Isothiocyanate esters (i.e., compounds containing the isothiocyanate group, -N=C=S, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

18 ..Processes for forming the isothiocyanate group

19 ...Thiocyano, isocyanate, or isocyanide dihalide group containing compound utilized (i.e., -SCN, -N=C=O, or -N=CXX containing compound utilized wherein X is halogen)

20 .Sulfate esters (i.e., compounds having the sulfate group, -O-S(=O)(=O)O-, bonded directly to at least one carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

21 ..With preservative or stabilizer

22 ..Phosphorus attached directly or indirectly to the sulfate group by nonionic bonding

23 ..Chalcogen bonded directly to the sulfate group

24 ..Plural sulfate groups attached indirectly to each other by nonionic bonding

25 ...Nitrogen attached indirectly to a sulfate group by acyclic nonionic bonding

26 ...Additional chalcogen attached indirectly to a sulfate group by acyclic nonionic bonding

27 ..Quaternary nitrogen containing

28 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly to the quaternary nitrogen

29 ..Nitrogen attached indirectly to the sulfate group by acyclic nonionic bonding

30 ...Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen

31 ..Chalcogen attached indirectly to the sulfate group by acyclic nonionic bonding

32 ...The chalcogen, X, is part of a -C(=X)- group

33 ...The chalcogen is bonded directly to a ring

34 ...Plural chalcogens attached indirectly to the sulfate group by acyclic nonionic bonding

35 ..Halogen attached indirectly to the sulfate group by acyclic nonionic bonding

36 ..Acyclic carbon chain containing carbon to carbon unsaturation attached directly to the sulfate group by nonionic bonding

37 ..Benzene ring attached directly or indirectly to the sulfate group by nonionic bonding

38 ..Plural alkyl groups, or hydrogen and an alkyl group, bonded directly to the sulfate group, wherein the hydrogen may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal (e.g., ethyl hydrogen sulfate, methyl ammonium sulfate, diethyl sulfate, etc.)

39 ...Processes

40 ....Heavy metal containing material utilized (e.g., as catalyst, promoter, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Sulfate esters (i.e., compounds having the sulfate group, -O-S(=O)(=O)O-, bonded directly to at least one carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
..Plural alkyl groups, or hydrogen and an alkyl group, bonded directly to the sulfate group, wherein the hydrogen may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal (e.g., ethyl hydrogen sulfate, methyl ammonium sulfate, diethyl sulfate, etc.)
...Processes
41 ....Reactant contains alcoholic -OH group (wherein H of -OH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)
42 ....Reactant contains acyclic or alicyclic carbon to carbon double bond
43 ....Purification or recovery
44 .Sulfonate esters (i.e., compounds having the sulfonate group, -O-S(=O)(=O)-, wherein the single bonded oxygen is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
45 ..Phosphorus attached directly or indirectly to the sulfonate group by nonionic bonding
46 ..Plural sulfonate groups attached indirectly to each other by nonionic bonding
47 ...Nitrogen attached directly or indirectly to a sulfonate group by nonionic bonding
48 ..Nitrogen attached directly or indirectly to the sulfonate group by acyclic nonionic bonding
49 ...The nitrogen is bonded directly to -C(=X)-, wherein X is chalcogen
50 ....Additional nitrogen attached directly or indirectly to the -C(=X)- group by acyclic nonionic bonding
51 ..Chalcogen attached indirectly to the sulfonate group by acyclic nonionic bonding
52 ...The chalcogen, X, is in a -C(=X)- group
53 ..Halogen attached directly or indirectly to the sulfonate group by acyclic nonionic bonding
54 ...Plural halogens attached indirectly to the sulfonate group by acyclic bonding
55 ..Acyclic carbon chain containing carbon to carbon unsaturation attached directly to the sulfonate group by nonionic bonding
56 ..Benzene ring bonded directly to the sulfonate group
57 ...Alicyclic ring attached directly or indirectly to the sulfonate group by nonionic bonding
58 ...Additional benzene ring containing
59 .Sulfite esters (i.e., compounds having the sulfite group, -O-S(=O)O-, bonded directly to at least one carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
60 ..Chalcogen attached indirectly to the sulfite group by acyclic nonionic bonding
61 .Sulfinate esters (i.e., compounds having the sulfinate group, -O-S(=O)-, wherein the single bonded oxygen is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
62 .Sulfenate esters (i.e., compounds having the sulfenate group, -S-O-, wherein the oxygen is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
70 .Phosphorus esters (i.e., compounds having the phosphorus ester group, wherein trivalent or pentavalent phosphorus and carbon are bonded directly to the same divalent chalcogen, and wherein the carbon may be single bonded to any atom but may be multiple bonded only to carbon)
71 ..With preservative or stabilizer
72 ..Boron containing
73 ..The phosphorus is in a ring
74 ...Ring phosphorus is shared by two rings
75 ....Phosphorus and nitrogen in the same ring
76 ...Additional phosphorus containing ring
77 ....Phosphorus, and two chalcogens bonded directly thereto, in the same ring (e.g., cyclic phosphonates, etc.)
78 .....Acyclic divalent chalcogen single bonded directly to the ring phosphorus (e.g., cyclic phosphites, etc.)
79 ......And divalent chalogen double bonded directly to the ring phosphorus (e.g., cyclic phosphates, etc.)
80 ...And nitrogen in the ring
81 ....And chalcogen or carbon in the ring
82 ...And carbon and chalcogen in the ring
83 ....Plural chalcogens in the ring
84 .....The ring phosphorus is attached directly to halogen or an acyclic nitrogen by nonionic bonding
85 .....Acyclic divalent chalcogen single bonded directly to the ring phosphorus (e.g., cyclic phosphites, etc.)
86 ......And divalent chalcogen double bonded directly to the ring phosphorus (e.g., cyclic phosphates, etc.)
87 ..Processes
88 ...Isomerization
89 ...Forming the phosphorus ester group
90 ....Reactant having halogen attached directly to phosphorus by nonionic bonding
91 .....And reactant having chalcogen-containing hetero ring

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Phosphorus esters (i.e., compounds having the phosphorus ester group, wherein trivalent or pentavalent phosphorus and carbon are bonded directly to the same divalent chalcogen, and wherein the carbon may be single bonded to any atom but may be multiple bonded only to carbon)

..Processes

...Forming the phosphorus ester group

....Reactant having halogen attached directly to phosphorus by nonionic bonding

92 .....And reactant having alcoholic or phenolic -XH group, wherein X is chalcogen (and wherein H of -XH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

93 ......And nitrogen bonded directly to the phosphorus in the phosphorus containing reactant

94 ......Four or five halogens attached directly to the phosphorus in the phosphorus containing reactant by nonionic bonding

95 ......The phosphorus in the reactant is trivalent

96 ....Nitrogen containing compound utilized (e.g., pyridine, carbamates, urea, etc., utilized as catalysts, proton acceptors, etc.)

97 ....Trivalent phosphorus converted into pentavalent phosphorus

98 ......And carbon bonded directly to the phosphorus in the phosphorus containing reactant (e.g., methyl phosphonodichloride, etc.)

99 ......And divalent chalcogen single bonded directly to the phosphorus in the phosphorus containing reactant (e.g., diethyl phosphorochloridate, etc.)

100 ....Nitrogen containing compound utilized (e.g., pyridine, carbamates, urea, etc., utilized as catalysts, proton acceptors, etc.)

101 ......Nitrogen containing compound utilized (e.g., pyridine, carbamates, urea, etc., utilized as catalysts, proton acceptors, etc.)

102 ......Metal containing material utilized (e.g., as catalysts, etc.)

103 .....And reactant having -C(=X)-, wherein X is chalcogen

104 ....Reactant has -XH, wherein X is chalcogen, bonded directly to phosphorus (wherein H of -XH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

105 .....And reactant having three-membered hetero ring

106 .....And reactant having halogen bonded directly to carbon, which carbon may be single bonded to any element but may be multiple bonded only to carbon

107 ......Having -C(=X)-, wherein X is chalcogen, or cyano attached indirectly to the halogen by acyclic nonionic bonding

108 .....And -C(=X)- containing reactant, wherein X is chalcogen

109 .....And unsaturated hydrocarbon reactant (e.g., pinene, allylene, etc.)

110 .....And reactant having alcoholic or phenolic -XH group, wherein X is chalcogen (and wherein H of -XH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

111 .....Additional diverse phosphorus containing reactant

112 ....Reactant consists of phosphorus and sulfur (e.g., phosphorus pentasulfide, etc.)

113 ....Reactant consists of phosphorus and oxygen (e.g., phosphorus pentoxide, etc.)

114 .....And reactant having alcoholic or phenolic -XH group, wherein X is chalcogen (and wherein H of -XH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

115 ....Trivalent phosphorus converted into pentavalent phosphorus

116 .....Reactant having halogen and -C(=X)-, wherein X is chalcogen, bonded directly to the same carbon (e.g., alpha halo carbonyl compounds, etc.)

117 ....Reactant is a phosphorus ester (e.g., transesterification, etc.)

118 .....And reactant having alcoholic or phenolic -XH group, wherein X is chalcogen (and wherein X of -XH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

119 ......The -XH is bonded directly to alkyl

120 .....The phosphorus ester reactant has hydrogen or metal bonded directly to phosphorus

121 ....Elemental phosphorus reactant

122 ...Trivalent phosphorus converted into pentavalent phosphorus

123 ....Molecular oxygen or elemental sulfur reactant (e.g., air, etc.)

124 ....Reactant having halogen bonded directly to carbon (e.g., Arbuzov rearrangement, etc.)

125 .....The reactant contains carbon to carbon unsaturation

126 ....Reactant having -C(=X)-, wherein X is chalcogen

127 ...Forming a linkage wherein divalent chalcogen is bonded directly to two phosphori (e.g., forming the pyrophosphate linkage, etc.)

128 ....Reactant having halogen attached directly to phosphorus by nonionic bonding

129 ...Forming or utilizing an -O-O- or -S-S- group

130 ...Forming P-X-C(=X)- group, wherein the X's may be the same or different chalcogens and the phosphorus may be trivalent or pentavalent

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Phosphorus esters (i.e., compounds having the phosphorus ester group, wherein trivalent or pentavalent phosphorus and carbon are bonded directly to the same divalent chalcogen, and wherein the carbon may be single bonded to any atom but may be multiple bonded only to carbon)

..Processes

131 ...Converting a phosphorus ester group to a P-XH group, wherein H of -XH may be replaced by substituted or unsubstituted ammonium or by a Group IA or IIA light metal, and wherein X is chalogen and P may be trivalent or pentavalent

132 ...Forming phosphorus to chalcogen bond

133 ...Replacing H of P-XH with substituted or unsubstituted ammonium, or with a Group IA or IIA light metal, and wherein X is chalcogen and P is trivalent or pentavalent

134 ...Substituting carbon for halogen, hydrogen, or metal bonded directly to the phosphorus

135 ....Aldehyde or ketone reactant

136 ....Reactant having halogen bonded directly to carbon (e.g., ethyl bromide, benzoyl chloride, etc.)

137 ....Reactant heving acyclic or alicyclic carbon to carbon unsaturation

138 ...Forming phosphorus to nitrogen bond

139 ...Forming a -C(=X)NHH or -N=C=O group, wherein X is chalcogen and substitution may be made for hydrogen only

140 ...Forming nonionic phosphorus to halogen bond

141 ...Halogenation of carbon

142 ...Forming carbon to carbon multiple bond

143 ...Utilizing oxirane ring containing compound

144 ...Reactant having halogen or nitrogen attached directly to phosphorus by nonionic bonding

145 ...Reactant having nitrogen attached indirectly to phosphorus by nonionic bonding

146 ...Purification or recovery

147 ....Of compounds having plural phosphori

148 ....Of compounds having halogen attached directly to phosphorus by nonionic bonding

149 ....Oxidation employed to purify or recover

150 ....Metal containing material utilized or separated

151 ..Oxygen single bonded to oxygen, or sulfur single bonded to sulfur (e.g., peroxy compounds, etc.)

152 ..Plural phosphori bonded to the same chalcogen (e.g., pyrophosphate esters, etc.)

153 ..Phosphorus and a -C(=X)- group, wherein X is chalcogen, bonded directly to the same chalcogen

154 ..Hydrazine, or substituted hydrazine, group attached directly or indirectly to the phosphorus by nonionic bonding (i.e., HHN-NH- group, wherein substitution may be made for hydrogen only)

155 ..Plural phosphori attached directly or indirectly to each other by nonionic bonding

156 ...Plural phosphorus ester groups

157 ....Nitrogen bonded directly to phosphorus

158 ....Nitrogen attached indirectly to phosphorus by acyclic nonionic bonding

159 .....Having -C(=X)-, wherein X is chalcogen, bonded directly to the nitrogen

160 ....Having -C(=X)-, wherein X is chalcogen, attached indirectly to phosphorus by acyclic nonionic bonding

161 ....Divalent chalcogen double bonded directly to pentavalent phosphorus

162 .....Plural phosphori attached indirectly to each other by a benzene ring or by a chain which includes a benzene ring

163 .....Plural phosphori attached indirectly to each other by an acyclic chalcogen containing chain

164 ......Plural chalcogens in the acyclic chain

165 ....Divalent chalcogen, bonded directly to two carbons or to carbon and hydrogen, attached indirectly to phosphorus by acyclic nonionic bonding (wherein the hydrogen may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

166 ..Nitrogen attached indirectly to the phosphorus by acyclic nonionic bonding

167 ...The nitrogen is part of a cyano or isocyano group

168 ....Chalcogen attached indirectly to the phosphorus by acyclic nonionic bonding

169 ...Chalcogen attached indirectly to the phosphorus by acyclic nonionic bonding

170 ....The chalcogen, X, is in a -C(=X)- group, which group is bonded directly to the nitrogen

171 .....Nitrogen bonded directly to the phosphorus

172 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's may be the same or diverse chalcogens

173 .....Chalcogen, or additional -C(=X), bonded directly to the nitrogen

174 .....Two carbons bonded directly to the same chalcogen (e.g., sulfones, carboxylic acid esters, ethers, etc.)

175 ....Chalcogen bonded directly to the nitrogen by nonionic bonding

176 ...Containing carbon double bonded to nitrogen

177 ..Chalcogen attached indirectly to the phosphorus by acyclic nonionic bonding

178 ...The chalcogen, X, is in a -C(=X)- group

179 ....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

180 .....Plural -C(=X)X- groups attached indirectly to the phosphorus by acyclic nonionic bonding

181 .....The carbon of the -C(=X)X- group is bonded directly to the phosphorus or to nitrogen which is bonded directly to the phosphorus

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Phosphorus esters (i.e., compounds having the phosphorus ester group, wherein trivalent or pentavalent phosphorus and carbon are bonded directly to the same divalent chalcogen, and wherein the carbon may be single bonded to any atom but may be multiple bonded only to carbon)

..Chalcogen attached indirectly to the phosphorus by acyclic nonionic bonding

...The chalcogen, X, is in a -C(=X)- group

....The -C(=X)- is part of a -C(=X)X- group, wherein the X's are the same or diverse chalcogens

182 .....Acyclic carbon chain containing carbon to carbon unsaturation attached directly or indirectly to the phosphorus by acyclic nonionic bonding

183 ...Plural carbons bonded directly to the same chalcogen which is attached indirectly to the phosphorus by acyclic nonionic bonding (e.g., ethers, etc.)

184 ....The chalcogen is part of a -S(=O)- or a -S(=O)(=O)- group (e.g., sulfones, etc.)

185 ....Nitrogen bonded directly to the phosphorus

186 ....Plural ether oxygens or thioether sulfurs attached indirectly to the phosphorus by acyclic nonionic bonding

187 ....The chalcogen is bonded directly to a benzene ring and to acyclic carbon

188 ....Halogen attached directly or indirectly to the phosphorus by acyclic nonionic bonding

189 ....Carbon bonded directly to the phosphorus

190 ..Nitrogen attached indirectly to the phosphorus by nonionic bonding

191 ...Nitrogen or halogen attached directly to the phosphorus by nonionic bonding

192 ...Cyano or isocyano attached indirectly to the phosphorus by nonionic bonding

193 ...Nitro bonded directly to a benzene ring

194 ..Chalcogen attached indirectly to the phosphorus by nonionic bonding

195 ...Nitrogen or halogen attached directly to the phosphorus by nonionic bonding

196 ...The chalcogen is part of a -S(=O)- or a -S(=O)(=O)- group (e.g., sulfoxides, sulfonic acids, etc.)

197 ...Ether oxygen or thioether sulfur bonded directly to a benzene ring

198 ...The chalcogen, X, is in a -C(=X)- group

199 ..Nitrogen bonded directly to the phosphorus

200 ...Benzene ring and the phosphorus bonded directly to the same chalcogen (i.e., the carbon of the phosphorus ester group is part of a benzene ring)

201 ...Acyclic carbon chain containing carbon to carbon unsaturation attached indirectly to the phosphorus by acyclic nonionic bonding

202 ..Halogen attached directly to the phosphorus by nonionic bonding

203 ..Halogen attached indirectly to the phosphorus by acyclic nonionic bonding

204 ...Plural fluorines bonded to an acyclic carbon or to an acyclic carbon chain

205 ...Carbon to carbon unsaturation containing

206 ....The unsaturation is in a benzene ring

207 ..Divalent chalcogen double bonded directly to the phosphorus

208 ...And three divalent chalcogens single bonded directly to the phosphorus (e.g., trialkyl phosphates, etc.)

209 ....Alicyclic ring bonded directly to one of the chalcogens

210 ....Benzene ring bonded directly to one of the chalcogens

211 .....Benzene ring bonded directly to each of the three chalcogens

212 .....Three or more halogens bonded directly to the benzene ring

213 ....Multiple bond between two acyclic carbons

214 ...And two divalent chalcogens single bonded directly to the phosphorus

215 ....Benzene ring bonded directly to one of the chalcogens

216 ....Benzene ring bonded directly to the phosphorus

217 ....Multiple bond between two acyclic carbons

218 ..Three divalent chalcogens single bonded directly to trivalent phosphorus (e.g., trialkyl phosphites, etc.)

230 .Esters having the thiocarboxylate group, -C(=X)X-, wherein the X's are the same or diverse chalcogens, with at least one X being sulfur, and wherein the single bonded X is bonded directly to an additional carbon, which carbon may be single bonded to any atom, but may be multiple bonded only to carbon

231 ..Phosphorus attached directly or indirectly to the thiocarboxylate group by nonionic bonding

232 ..Nitrogen bonded directly to the carbon of the -C(=X)X- group (e.g., thiocarbamates, etc.)

233 ...Chalcogen, nitrogen, or additional -C(=X)- attached directly to the nitrogen by nonionic bonding (X is chalcogen)

234 ...The -C(=X)X- is -C(=S)O-

235 ...The -C(=X)X- is -C(=S)S-

236 ....Nitrogen or additional chalcogen attached indirectly to the nitrogen by acyclic nonionic bonding

237 .....Plural HHN-C(=S)S- groups, wherein substitution may be made for hydrogen only

238 .....Cyano or -C(=X)-, wherein X is chalcogen, attached indirectly to the nitrogen by acyclic nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Esters having the thiocarboxylate group, -C(=X)X-, wherein the X's are the same or diverse chalcogens, with at least one X being sulfur, and wherein the single bonded X is bonded directly to an additional carbon, which carbon may be single bonded to any atom, but may be multiple bonded only to carbon
..Nitrogen bonded directly to the carbon of the -C(=X)X- group (e.g., thiocarbamates, etc.)
239 ...Nitrogen or additional chalcogen attached indirectly to the nitrogen by acyclic nonionic bonding
240 ....The chalcogen, X, is in a -C(=X)- group
241 ...Benzene ring bonded directly to the nitrogen or to the sulfur of a -C(=O)S- group
242 ...Benzene ring attached indirectly to the nitrogen by nonionic bonding
243 ..Esters having the -X-C(=X)X- group, wherein the X's are the same or diverse chalcogens and at least one X is sulfur, and wherein one of the single bonded X's is bonded directly to carbon, which carbon may be single bonded to any atom, but may be multiple bonded only to carbon (e.g., thiocarbonates, etc.)
244 ...Two -C(=X)- groups, wherein the X's are the same or diverse chalcogens, bonded directly to the same chalcogen or to a chain consisting of chalcogens (e.g., xanthic disulfides, etc.)
245 ...The -X-C(=X)X- is -S-C(=S)O- (e.g., xanthates, etc.)
246 ....Nitrogen or chalcogen attached indirectly to the -S-C(=S)O- group by acyclic nonionic bonding
247 ....Alkyl and hydrogen bonded directly to the -S-C(=S)O- group, wherein the hydrogen may be replaced by substituted or unsubstituted ammonium or by a Group IA or IIA light metal (e.g., sodium ethyl xanthate, etc.)
248 ...The -X-C(=X)X- is -S-C(=O)O- (e.g., thiolcarbonates, etc.)
249 ..Halothiocarbonate esters (i.e., compounds wherein halogen is bonded directly to the carbon of the -C(=X)X- group)
250 ..The -C(=X)X- is -C(=O)S-
251 ...Plural -C(=O)S- groups containing
252 ...Chalcogen attached indirectly to the -C(=O)S- group by acyclic nonionic bonding
253 ....The chalcogen, X, is in a -C(=X)- group
254 .....Nitrogen bonded directly to the -C(=X)- group
255 .....The -C(=X)- group is part of a -COO- group
256 ...Nitrogen attached indirectly to the -C(=O)S- group by acyclic nonionic bonding
257 ...Benzene ring attached directly or indirectly to the -C(=O)S- group by nonionic bonding
260 .Carbonate esters (i.e, compounds having the -O-C(=O)O- group bonded directly to at least one carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
261 ..With preservative or stabilizer
262 ..Nitrogen attached directly to the -O-C(=O)O- group by nonionic bonding (e.g., oxime carbonates, urea carbonates, etc.)
263 ..Oxygen bonded directly to the -O-C(=O)O- group by nonionic bonding (e.g., monoperoxycarbonates, etc.)
264 ...Carbonyl bonded directly to the oxygen (i.e., compounds having the -O-C(=O)-O-O-C(=O)- group; e.g., peroxydicarbonates, acyl peroxycarbonates, etc.)
265 ..Plural -O-C(=O)O- groups attached indirectly to each other by nonionic bonding
266 ...Additional chalcogen attached indirectly to one of the -O-C(=O)O- groups by acyclic nonionic bonding
267 ....The additional chalcogen, X, is in a -C(=X)- group
268 ...Benzene ring attached directly or indirectly to one of the -O-C(=O)O- groups by nonionic bonding
269 ....Nitrogen attached directly or indirectly to the benzene ring by nonionic bonding
270 ..Benzene ring bonded directly to the -O-C(=O)O- group
271 ...Additional chalcogen bonded directly to the benzene ring
272 ...Nitrogen bonded directly to the benzene ring
273 ...Nitrogen or additional chalcogen attached indirectly to the benzene ring by acyclic nonionic bonding
274 ...Two benzene rings bonded directly to the -O-C(=O)O- group (i.e., diaryl carbonates)
275 ..Benzene ring attached indirectly to the -O-C(=O)O- group by nonionic bonding
276 ..Nitrogen or chalcogen attached indirectly to the -O-C(=O)O- group by acyclic nonionic bonding
277 ..Two identical or diverse alkyl groups bonded directly to the -O-C(=O)O- group (e.g., dimethyl carbonate, methyl ethyl carbonate, etc.)
280 .Halocarbonate esters (i.e., compounds having the halo-C(=O)O- group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
281 ..Plural halo-C(=O)O- groups attached indirectly to each other by nonionic bonding
282 ..Benzene ring attached directly or indirectly to the halo-C(=O)O- group by nonionic bonding
283 ..Halogen attached indirectly to the halo-C(=O)O- group by nonionic bonding
285 .Thioborate esters (i.e., compounds having boron and carbon each single bonded to the same divalent sulfur, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

286 .Borate esters (i.e., compounds having boron and carbon each single bonded to the same oxygen, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

287 ..Boron and oxygen in the same ring

288 ...Carbon in the ring

289 ....Nitrogen in the ring

290 ....Plural rings each having boron, carbon and oxygen as ring members

291 ....Three oxygens attached directly to the same boron by nonionic bonding

292 ..Plural acyclic borons attached directly or indirectly to each other by nonionic bonding

293 ..Three oxygens attached directly to the same boron by nonionic bonding

294 ...Benzene ring attached indirectly to boron by nonionic bonding

295 ...Nitrogen or chalcogen attached indirectly to boron by acyclic nonionic bonding

296 ...Trialkyl borates (i.e., compounds having the structure (RO)B(OR)(OR), wherein the R's represent the same or diverse alkyl groups

297 ....Processes utilizing boric oxide or an inorganic boric acid

298 ..Carbon bonded directly to the boron

299 .Nitrile oxides or nitrile imines (i.e., compounds having cyano bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon, and wherein the nitrogen of the cyano group is bonded directly to oxygen or to nitrogen)

300 .Cyano single bonded and nitrogen or phosphorus double bonded to the same carbon atom (e.g., alpha-imino nitriles, etc.)

301 ..Oxygen bonded directly to the double bonded nitrogen (e.g., alpha-oximino nitriles, etc.)

302 .Isonitriles (i.e., compounds having an isonitrile group, usually represented as $-N\equiv C$, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

303 .Nitriles (i.e., compounds having cyano bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

304 ..With preservative or stabilizer

305 ...Acyclic or alicyclic carbon to carbon unsaturation in the preserved or stabilized nitrile

306 ....Organic compound, which contains nitrogen, utilized as preservative or stabilizer

307 ....Sulfur or phosphorus containing preservative or stabilizer

308 ..Processes for forming the cyano group

309 ...Hetero ring containing reactant

310 ....Nitrogen, or oxygen, and carbonyl carbon are adjacent ring members of the hetero ring (e.g., lactams, lactones, etc.)

311 ...Reactant is a carboxylic acid, or an amide, anhydride, ester, halide, or salt thereof

312 ....Utilizing a formamide, heavy metal salt, aluminum halide, organosilicon compound, organophosphorus compound, or a compound containing nitrogen and sulfur

313 ....Liquid phase reaction

314 ...Utilizing nitryl halide, nitrosyl halide, HCH=NO- or HHNO- (wherein substitution may be made for hydrogen only; e.g., oximes, oxime esters, hydroxylamine salts, olefin-nitrosyl chloride adducts, etc.)

315 ...Reactant is an aldehyde or ketone, or a compound having carbon double bonded to nitrogen (e.g., ammoxidation of acrolein, etc.)

316 ...Reactant contains -OH bonded directly to acyclic or alicyclic carbon (wherein H of -OH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

317 ...Utilizing a nitrogen oxide or an azide

318 ...Ammonia utilized

319 ....And molecular oxygen or a molecular oxygen containing gas

320 .....Acting on a compound containing acyclic or alicyclic carbon to carbon unsaturation

321 ......Niobium, tantalum, silver, sulfur, ruthenium, rhodium, palladium, osmium, iridium, or platinum containing material utilized

322 ......Tellurium containing material utilized

323 ......Molybdenum containing material utilized

324 ....Bismuth containing material utilized

325 ......Antimony containing material utilized

326 ....Uranium or arsenic containing material utilized

327 .....Acting on a benzene ring-containing compound

328 ......Alkali metal containing material utilized

329 ....Product contains cyano bonded directly to a benzene ring

330 ....Reactant contains acyclic or alicyclic carbon to carbon double bond

331 ..Homopolymerization of HCN (e.g., tetramerization of HCN to diaminomaleonitrile)

332 ..Processes of attaching cyano to carbon by reaction of an inorganic cyanide with an organic compound (e.g., using HCN, cyanogen, metal cyanide, ammonium cyanide, cyanogen chloride, etc.)

333 ...The organic compound contains a carbon to carbon triple bond (e.g., acrylonitrile from acetylene and HCN, etc.)

334 ....Liquid phase reaction (e.g., using aqueous CuCl catalyst, etc.)

335 ...The organic compound contains an acyclic or alicyclic carbon to carbon double bond

336 ....Cyanogen or cyanogen halide utilized

337 ....The organic compound contains halogen bonded directly to carbon

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Nitriles (i.e., compounds having cyano bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

..Processes of attaching cyano to carbon by reaction of an inorganic cyanide with an organic compound (e.g., using HCN, cyanogen, metal cyanide, ammonium cyanide, cyanogen chloride, etc.)

...The organic compound contains an acyclic or alicyclic carbon to carbon double bond

338 ....Organic material which contains phosphorus, arsenic, or antimony, in addition to nickel, utilized (e.g., zero-valent nickel complexes, etc.)

339 ....Cobalt, copper, silver, or gold containing material utilized

340 ....Ruthenium, rhodium, palladium, osmium, iridium, or platinum containing material utilized

341 ....The organic compound contains a carbonyl (e.g., ketene, etc.)

342 ...Replacing halogen with cyano

343 ....On benzene ring

344 ....Organic compound of nitrogen, phosphorus, arsenic, antimony, or bismuth utilized other than as reactant (e.g., utilizing phase transfer agents, etc.)

345 ...Aldehyde, and carboxylic acid halide or carboxylic acid anhydride, reacted with the inorganic cyanide

346 ...Aldehyde or ketone, and ammonia or substituted ammonia, reacted with the inorganic cyanide

347 ...Hetero ring containing compound reacted with the inorganic cyanide (e.g., reaction of epoxy compounds, etc.)

348 ...Replacing hydrogen with cyano (e.g., malononitrile from acetonitrile, etc.)

349 ....On benzene ring (e.g., benzonitrile from benzene, etc.)

350 ...Replacing oxygen or nitrogen, single bonded to carbon, by cyano

351 ...Attaching cyano to the carbonyl carbon of an aldehyde or ketone (e.g., cyanohydrin formation, etc.)

352 ...Carboxylic acid, carboxylic acid halide, carboxylic acid anhydride, or compound containing carbon double bonded to nitrogen reacted with the inorganic cyanide

353 ..Processes utilizing carbon monoxide as a reactant

354 ..Racemization, resolution, or inversion of configuration processes for optically active compounds

355 ..Isomerization processes (e.g., double bond shift, cis-trans isomerism, etc.)

356 ...Isomerization of reactants containing plural cyano groups

357 ..Processes of forming carbon to carbon bond between carbons of two organic reactants

358 ...Reactions utilizing epoxy compounds, or free radical reactions (e.g., utilizing peroxy or azo promotors, etc.)

359 ...The carbons that form the bond each lose halogen in the process

360 ...The carbon to carbon bond forms between plural molecules of identical nitrile reactants (e.g., dimerization, etc.)

361 ....The reactant is an acyclic nitrile containing carbon to carbon unsaturation (e.g., dimerization or oligomerization of acrylonitrile, etc.)

362 .....Amalgam utilized

363 .....Organic phosphorus compound utilized

364 .....Heavy metal or aluminum containing material utilized

365 ...Formation of a carbocyclic ring

366 ....Three- or four-membered monocyclic ring formed

367 ...Cyanoalkylation of an acyclic or alicyclic carbon, which is adjacent to a benzene ring or an atom double or triple bonded to a non-carbon atom, by means of acrylonitrile or hydrocarbyl-substituted acrylonitrile (e.g., cyanoethylation, etc.)

368 ....The cyanoalkylated carbon is adjacent to a carbonyl carbon

369 ...Alkylation of an acyclic or alicyclic carbon, which is adjacent to a benzene ring or an atom double or triple bonded to a non-carbon atom, by means of an alkyl halide, alkyl sulfate, substituted alkyl halide or substituted alkyl sulfate

370 ...Reactant contains two cyano groups bonded directly to the same unsaturated carbon

371 ...Aldehyde or ketone reactant

372 ....Formaldehyde reactant

373 ....Carbonyl carbon of the aldehyde or ketone reacts to form a carbon to carbon double bond with carbon of a second reactant

374 .....The carbon of the second reactant is bonded directly to two atoms which are each double or triple bonded to noncarbon atoms

375 ...Carbon to carbon double bond is formed between a nitrile reactant having no acyclic or alicyclic carbon to carbon double bond and a second reactant

376 ...Hydrogen bonded to a benzene ring is replaced by carbon

377 ...A nitrile reactant and a second reactant each contain an acyclic or alicyclic carbon to carbon double bond

378 ...A nitrile reactant contains no acyclic or alicyclic carbon to carbon unsaturation

379 ..Processes of forming an acyclic or alicyclic carbon to carbon double bond from an existing acyclic or alicyclic carbon to carbon single bond (e.g., by dehydroacylation, etc.)

380 ...By dehydrohalogenation

381 ...By dehalogenation, dehydrocyanation, ring cleavage, or depolymerization

382 ...By dehydration (i.e., removal of water)

383 ...By dehydrogenation

384 ..Boron or spiro containing

385 ..Phosphorus attached indirectly to the cyano group by nonionic bonding

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Nitriles (i.e., compounds having cyano bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
..Phosphorus attached indirectly to the cyano group by nonionic bonding
386 ...Chalcogen, nitrogen, or halogen bonded directly to the phosphorus by nonionic bonding
387 ..Oxygen single bonded to oxygen, or sulfur single bonded to sulfur (e.g., peroxy compounds, etc.)
388 ..Benzene ring attached indirectly to the cyano group by acyclic nonionic bonding
389 ...Non-carbon atom in acyclic chain between the benzene ring and the cyano group
390 ....Nitrogen in the acyclic chain
391 .....Carbon, also in the chain, double bonded to the nitrogen
392 .....Having -C(=X)-, also in the chain, bonded directly to the nitrogen (wherein X is chalcogen)
393 ......Carbon to carbon unsaturation, chalcogen, or additional nitrogen in the chain
394 .....The chain nitrogen bonded directly to the benzene ring
395 ......Cyano or carbonyl bonded directly to an acyclic carbon which is double bonded to another carbon
396 ....Sulfur in the chain
397 .....Oxygen double bonded to the sulfur
398 ....Having -COO- in the chain
399 .....The carbon of the -COO- group is bonded directly to the benzene ring
400 .....Cyano or carbonyl bonded directly to an acyclic carbon which is double bonded to another carbon
401 ...Benzene ring and cyano connected by a chain consisting of two carbons multiple bonded to each other
402 ....Additional benzene ring bonded directly to the chain
403 ....Nitrogen, except as nitro or nitroso, bonded directly to the benzene ring
404 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly to the cyano group by nonionic bonding
405 ....Two carbons bonded directly to the carbon of the -C(=X)- group (e.g., ketones, etc.)
406 ....Oxygen bonded directly to carbonyl (e.g., carboxylic acid esters, etc.)
407 .....Three-membered carbocyclic ring containing
408 ...Nitrogen, except as nitro or nitroso, attached indirectly to the cyano group by nonionic bonding
409 ....Plural cyano groups containing
410 ...Oxygen attached indirectly to the cyano group by nonionic bonding (e.g., nitro group, etc.)
411 ..Benzene ring bonded directly to the cyano group
412 ...Sulfur and hydroxy bonded directly to the same benzene ring, or containing a monocyclic unsaturated alicyclic ring or thiocarbonyl
413 ...Sulfur, double bonded to oxygen, attached indirectly to the cyano group by nonionic bonding
414 ...Carbonyl attached indirectly to the cyano group by nonionic bonding
415 ....Benzene ring bonded directly to the carbonyl
416 .....Oxygen bonded directly to the carbonyl (e.g., benzoic acid esters, etc.)
417 ....The carbonyl is bonded directly to two non-carbon atoms, or to a non-carbon atom and an additional carbonyl (e.g., carbamates, oxamides, etc.)
418 ...Nitrogen, except as nitro or nitroso, attached indirectly to the cyano group by nonionic bonding
419 ....Plural cyano groups containing
420 .....Plural benzene rings bonded directly to cyano groups
421 .....Plural cyano groups bonded directly to a benzene ring, which is further unsubstituted or hydrocarbyl substituted only
422 ....The nitrogen is attached indirectly to a benzene ring by acyclic nonionic bonding
423 ...Oxygen attached indirectly to the cyano group by nonionic bonding
424 ....Two benzene rings bonded directly to the same oxygen, or nitrogen bonded directly to oxygen (e.g., nitro compounds, phenoxyphenyl compounds, etc.)
425 ...Halogen attached indirectly to the cyano group by nonionic bonding
426 ..Benzene ring attached indirectly to the cyano group by nonionic bonding (i.e., alicyclic ring between the benzene ring and the cyano group)
427 ...Polycyclo ring system having at least three cyclos, at least one of which is a benzene ring
428 ..Polycyclo alicyclic ring system containing
429 ...The ring system contains at least three cyclos
430 ..Six-membered alicyclic ring containing
431 ...Cyano bonded directly to the ring
432 ..Five-membered alicyclic ring containing
433 ..Four-membered alicyclic ring containing
434 ..Three-membered alicyclic ring containing
435 ..Acyclic (e.g., purification of saturated nitriles, etc.)
436 ...Sulfur attached indirectly to the cyano group by nonionic bonding
437 ....The sulfur is double bonded to oxygen
438 ....Two carbons bonded directly to the same divalent sulfur
439 .....Additional cyano group
440 ...Carbonyl attached indirectly to the cyano group by nonionic bonding (e.g., aldehydes, ketones, etc.)
441 ....Oxygen bonded directly to the carbonyl group (e.g., carboxylic acid esters, etc.)
442 .....Additional carbonyl attached indirectly to the cyano group by nonionic bonding
443 .....The cyano group is bonded directly to the carbon adjacent to the carbonyl carbon (e.g., alpha cyano acrylates, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Nitriles (i.e., compounds having cyano bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

..Acyclic (e.g., purification of saturated nitriles, etc.)

...Carbonyl attached indirectly to the cyano group by nonionic bonding (e.g., aldehydes, ketones, etc.)

....Oxygen bonded directly to the carbonyl group (e.g., carboxylic acid esters, etc.)

444 .....The oxygen is between the carbonyl and the cyano group (e.g., cyano is in the alcohol portion of a carboxylic acid ester, etc.)

445 ....Nitrogen bonded directly to the carbonyl (e.g., ureas, etc.)

446 ...Nitrogen, double bonded to carbon, attached indirectly to the cyano group by nonionic bonding (e.g., imines, oximes, etc.)

447 ...Plural carbons bonded directly to the same oxygen

448 ....Plurals oxygens bonded directly to the same carbon (e.g., acetals, etc.)

449 ....Cyano is attached directly or indirectly by nonionic bonding to carbon that is multiple bonded to another carbon

450 ....Processes for formation of an ether group (e.g., cyanoethylation of alcohols, etc.)

451 ...Having -OH bonded directly to carbon (wherein H of -OH may be replaced by substituted or unsubstituted ammonium, or by a Group IA or IIA light metal)

452 ...Nitrogen attached indirectly to the cyano group by nonionic bonding

453 ....Plural cyano groups bonded directly to the same carbon (e.g., malononitrile, tetracyanoethylene, etc.)

454 ....Plural cyano groups bonded directly to the same chain (e.g., adiponitrile, etc.)

455 .....The chain contains nitrogen (e.g., iminodiacetonitrile, nitrilotriacetonitrile, etc.)

456 .....Purification or recovery of saturated hydrocarbon dinitriles (e.g., from mixtures with cyanocyclopentanonimine, 2-cyanocyclopenten-1-ylamine, etc.)

457 .....A carbon in the chain is multiple bonded to carbon (e.g., 1,4-dicyanobutene, etc.)

458 ....The nitrogen is attached directly to halogen by nonionic bonding, or is part of a nitro, nitroso, nitrate, or N-oxide group

459 ....Hydrogenation of dinitriles, or displacement of halo, hydroxy, or alkoxy by ammonia or substituted ammonia

460 ...Halogen attached indirectly to the cyano group by nonionic bonding

461 ....Plural halogens attached indirectly to the cyano group by nonionic bonding

462 ...Carbon to carbon unsaturation containing

463 ....Purification or recovery

464 .....Utilizing ion exchange resin, or a silicon, aluminum, or heavy metal containing material

465 .....Of nitriles prepared by hydrocyanation (e.g., by reaction of acetylene with hydrogen cyanide, etc.)

466 .....Of nitriles prepared by reaction of an organic compound, ammonia, and molecular oxygen or a molecular oxygen-containing gas (i.e., of nitriles prepared by ammoxidation)

467 ...Processes for preparation of saturated nitriles

480 .Nitrate esters or chalcogen analogues thereof (i.e., compounds having (X=)N(=X)-X- bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon; the X's may be the same or diverse chalcogens)

481 ..With preservative or stabilizer

482 ..Benzene ring containing

483 ..Additional nitrogen or chalcogen containing

484 ...Plural (X=)N(=X)-X- groups containing

485 ....Four or more (X=)N(=X)-X- groups containing

486 ....Glyceryl trinitrate per se (i.e., trinitroglycerin)

487 ....Containing nitrogen bonded directly to carbon

488 .Nitrite esters or chalcogen analogues thereof (i.e., compounds having (X=)N-X- bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon; the X's may be the same or diverse chalcogens)

CLASS 560 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

IN THIS SERIES OF CLASSES, CLASS 560 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
1 .Carboxylic acid esters
2 ..With preservative
3 ...Aromatic polycarboxylic acid esters
4 ...Acyclic unsaturated monocarboxylic acid esters
5 ..Hydrophenanthrene in acid moiety
6 ...Polycyclo ring system having the hydrophenanthrene and at least one additional ring as cyclos
7 ...1,4a-Dimethylhydrophenanthrene -1- carboxylic acid
8 ..Aromatic acid moiety
9 ...Sulfur in acid moiety
10 ....Ortho fused rings in acid moiety
11 ....Sulfoxy in acid moiety
12 .....Nitrogen in acid moiety
13 ......Plural nitrogens in acid moiety
14 .....Sulfonic acids, salts or acid halides
15 ....Sulfur, not bonded directly to a ring, in same side chain as ester function
16 .....Nitrogen in acid moiety
17 ....Sulfur, bonded directly to a ring, in same side chain as ester function
18 ....Ester function attached directly to a ring
19 ...Nitrogen in acid moiety other than as nitroso or isocyanate (e.g., amino acid esters, etc.)
20 ....Nitro bonded to carbon in acid moiety
21 .....Plural rings in acid moiety
22 .....Additional nitrogen in acid moiety
23 .....Oxy, aldehyde or ketone group in acid moiety
24 ....Carbamic acid
25 .....Polycarbamic
26 ......Polyoxy alcohol moiety
27 .....Plural rings in acid moiety
28 ......Ortho fused
29 .....Oxy in acid moiety
30 .....Halogen in acid moiety
31 ......Ring in alcohol moiety
32 .....Ring in alcohol moiety
33 .....Sulfur, nitrogen, halogen or additional oxy in alcohol moiety
34 ....Ureido, guanido or hydrazino in acid moiety
35 ....Amidine, azomethine, ketimine or oxime in acid moiety
36 ....Plural rings bonded directly to the same cyclic carbon in acid moiety
37 ....The nitrogen is not bonded directly to a ring
38 .....The nitrogen is in same side chain as ester function
39 ......Oxy in acid moiety
40 ....Phenylalanines
41 ......Amide in acid moiety
42 .....Oxy in acid moiety
43 ....The nitrogen is bonded directly to a ring and is in same side chain as ester function
44 .....Polycarboxylic acid
45 ....Oxy in acid moiety
46 .....Benzoic acid substituted on ring with oxy and nitrogen
47 ....Halogen in acid moiety
48 ....Plural rings in acid moiety with nitrogen bonded directly to at least one of the rings
49 ....Nitrogen in alcohol moiety
50 ....Polyoxy alcohol moiety
51 ...Aldehyde or ketone group in acid moiety
52 ....Plural rings bonded directly to the same carbonyl in acid moiety
53 ....Oxy in acid moiety
54 ....Polycarboxylic acid
55 ...Oxy in acid moiety
56 ....Ortho fused rings in acid moiety
57 ....Plural rings bonded directly to the same acyclic carbon in acid moiety
58 .....Nitrogen in alcohol moiety
59 ....Rings bonded directly to each other in acid moiety
60 ....Oxy, not bonded directly to a ring, in same side chain as ester function
61 ....Oxy, bonded directly to a ring, in same side chain as ester function
62 .....Halogen in acid moiety
63 ......Polyoxy alcohol moiety
64 ....Ester function attached directly to a ring
65 .....Halogen in acid moiety
66 .....Acylated
67 .....Phenolic hydroxy or metallate
68 ......Tannins and reaction products thereof
69 ....Extraction from bark or vegetable material
70 ......Polyphenolic hydroxy or metallate
71 ......Salicylic acid
72 ......Ring in alcohol moiety
73 .....Ring in alcohol moiety
74 .....Nitrogen in alcohol moiety
75 ....Phenolic hydroxy or metallate
76 ...Polycarboxylic acid
77 ....Producing carboxyl group by oxidation
78 ....Purification or recovery
79 .....Of ester of polyoxy alcohols
80 ....Ortho fused rings in acid moiety
81 ....Esterified carboxy not bonded directly to a ring
82 .....Malonates
83 ....Halogen in acid moiety
84 ....Ring in alcohol moiety
85 .....Aromatic alcohol moiety
86 ......Esterified phenolic hydroxy
87 ....Sulfur or halogen in alcohol moiety
88 ....Nitrogen in alcohol moiety
89 ....Polyoxy alcohol moiety
90 .....Additional esterifying acid
91 .....Polyoxyalkylene alcohol moiety
92 .....Preparing esters by ester interchange
93 .....Preparing esters from alkylene oxides
94 .....Preparing esters from acid or from nitrile and diol
95 ....Unsaturation in alcohol moiety
96 ....Processes
97 .....Carbonylation
98 .....Esterification of acid, salt, acid halide or anhydride with alcohol
99 ......Metal containing catalyst utilized
100 ...Naphthyl in acid moiety
101 ...Plural rings bonded directly to the same carbon in acid moiety

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Carboxylic acid esters
..Aromatic acid moiety
102 ...Rings bonded directly to each other in acid moiety
103 ...Monocyclic acid moiety
104 ....Additional unsaturation in acid moiety
105 ....Carboxyl, not bonded directly to a ring, in acid moiety
106 ....Ring in alcohol moiety
107 .....Plural rings in alcohol moiety
108 ......Esterified phenolic hydroxy
109 .....Esterified phenolic hydroxy
110 ....Nitrogen in alcohol moiety
111 ....Halogen in alcohol moiety
112 ....Polyoxy alcohol moiety
113 ....Unsaturation in alcohol moiety
114 ..Preparing alicyclic acid esters by carbonylation
115 ..Alicyclic carbamates
116 ..Plural alicyclic rings in acid moiety
117 ...Tricyclo ring system in acid moiety
118 ...Two rings only in acid moiety
119 ....Ortho fused
120 ....2,2,1-bycyclo
121 ..Cyclopentyl in acid moiety (e.g., prostaglandins, etc.)
122 ...Cyclopentyl-COOR, -C-COOR or -C-C-COOR
123 ..Cyclobutyl in acid moiety
124 ..Cyclopropyl in acid moiety
125 ..Alicyclic acid moiety containing N, S, P, B or halogen
126 ..Alicyclic acid moiety containing oxy, aldehyde or ketone group
127 ..Alicyclic polycarboxylic acid moiety
128 ..Alicyclic acid moiety containing unsaturation
129 ..Acyclic acid moiety
130 ...Esterified phenolic hydroxy
131 ....Preparing esters by oxidation
132 ....Carbamic acid
133 .....Plural rings in phenolic moiety
134 ......Ortho fused
135 .....Sulfur in phenolic moiety
136 .....Nitrogen in phenolic moiety
137 .....Sulfur, halogen or additional nitrogen or oxygen in carbamic acid moiety
138 ....Plural rings in phenolic moiety
139 .....Ortho fused
140 .....Plural rings bonded directly to the same carbon in phenolic moiety
141 .....Rings bonded directly to each other in phenolic moiety
142 ....Nitrogen or sulfur in phenolic moiety
143 ....Salicylic acid or functional derivative
144 ....Polyoxy phenolic moiety
145 ....Sulfur, nitrogen, halogen, oxy, or aldehyde or ketone group in acid moiety
146 ....Polycarboxylic acid
147 ...Sulfur in acid moiety
148 ....Carbamic acid
149 ....Sulfoxy in acid moiety
150 .....Sulfonyl or sulfinyl in acid moiety
151 .....Polycarboxylic acid
152 ....Thio ether in acid moiety
153 .....Nitrogen or halogen in acid moiety
154 .....Polycarboxylic acid
155 ...Nitrogen in acid moiety other than as nitroso or isocyanate (e.g., amino acid esters, etc.)
156 ....Nitro bonded to carbon in acid moiety
157 ....Carbamic acid
158 .....Polycarbamic
159 .....Additional nitrogen in acid moiety
160 .....Oxy in acid moiety
161 .....Halogen in acid moiety
162 .....Cyclic alcohol moiety
163 ......Aromatic alcohol moiety
164 ....Polyoxy alcohol moiety
165 .....Sulfur or nitrogen in alcohol moiety
166 .....Polyoxy alcohol moiety
167 .....Halogen in alcohol moiety
168 ....Amidine, azomethine, ketimine or oxime in acid moiety
169 ....Additional nitrogen in acid moiety
170 ....Oxy, aldehyde or ketone group in acid moiety
171 ....Polycarboxylic acid
172 ....Halogen or unsaturation in acid moiety
173 ....Cyclic alcohol moiety
174 ...Aldehyde or ketone group in acid moiety
175 ....Preparing esters by carbonylation
176 ....Polycarboxylic acid
177 ....Aldehyde group in acid moiety
178 ....Acetoacetic acid
179 ...Oxy in acid moiety
180 ....Polycarboxylic acid
181 .....Unsaturation in acid moiety
182 .....Polyoxy alcohol moiety
183 ....Unsaturation in acid moiety
184 ....Halogen in acid moiety
185 ....Acylated oxy in acid moiety
186 ....Polyoxy acid moiety
187 ....Alkoxy in acid moiety
188 ....Cyclic alcohol moiety
189 ....Polyoxy alcohol moiety
190 ...Polycarboxylic acid
191 ....Purification or recovery
192 ....Halogen in acid moiety
193 ....Cyclic alcohol moiety
194 .....Plural rings in alcohol moiety
195 ....Phosphorus or sulfur in alcohol moiety
196 ....Nitrogen in alcohol moiety
197 ....Halogen in alcohol moiety
198 ....Polyoxy alcohol moiety
199 .....Additional monooxy alcohol or monocarboxylic acid (e.g., complex esters, etc.)
200 .....Preparing esters from alkylene oxides
201 ....Unsaturation in alcohol moiety
202 ....Preparing esters by oligomerization
203 ....Preparing esters by alkylation or isomerization
204 ....Preparing esters by esterification or carbonylation
205 ...Unsaturation in acid moiety
206 ....Preparing esters by carbonylation
207 .....Group VIII noble metal catalyst utilized
208 ....Formation of carboxyl group by oxidation
209 ....Preparing esters from alkylene oxides
210 ....Preparing esters from aldehydes
211 ....Formation of ethylenic unsaturation
212 .....By dehydration or dealcoholization
213 .....By dehalogenation or dehydrohalogenation
214 .....By dehydrogenation
215 ....Preparing esters from nitriles or amides
216 ....Preparing esters by depolymerization

	ORGANIC COMPOUNDS (Class 532, Subclass 1)
	.Carboxylic acid esters
	..Acyclic acid moiety
	...Unsaturation in acid moiety
217	....Preparing esters by ester interchange
218	....Purification or recovery
219	....Halogen in acid moiety
220	....Cyclic alcohol moiety
221	.....Aromatic alcohol moiety
222	....Phosphorus, sulfur or nitrogen in alcohol moiety
223	....Halogen in alcohol moiety
224	....Polyoxy alcohol moiety
225	....Unsaturation in alcohol moiety
226	...Halogen in acid moiety
227	....Fluorine in acid moiety
228	....Cyclic alcohol moiety
229	....Halogen in alcohol moiety
230	....Polyoxy alcohol moiety
231	...Unsubstituted acids of the acetic series
232	....Preparing esters by carbonylation
233	.....Of olefins
234	....Preparing esters by ester interchange
235	.....From alkyl sulfates
236	....Preparing esters from halogenated hydrocarbons
237	.....From alkenyl halides
238	....Preparing esters from aldehydes
239	....Preparing esters by dehydrogenation of alcohols
240	....Preparing esters from ethers
241	....Preparing esters from hydrocarbons
241.1	.....By oxidation of hydrocarbon mixtures
242	.....From acetylenic hydrocarbons
243	.....From olefins utilizing Group VIII noble metal catalyst
244	......From polyolefins
245	......Gas phase
246	.....Preparing polyoxy alcohol esters from olefins
247	.....Preparing alkyl esters from olefins
248	....Purification or recovery
249	....Terpene alcohol moiety
250	....Nitrogen in alcohol moiety other than as nitro, nitroso or isocyanate
251	.....Plural nitrogens in alcohol moiety
252	.....Polyoxy alcohol moiety
253	.....Acyclic alcohol moiety
254	....Aromatic alcohol moiety
255	.....Plural rings in alcohol moiety
256	....Polycyclo-alicyclic ring system in alcohol moiety
257	.....Nor- or homo-cyclopentanohydrophenanthrenes
258	......Nor-A ring
259	....2,6,6-trialkyl cyclohexenyl in alcohol moiety
260	.....Vitamin A alcohol moiety
261	....Acyclic alcohol moiety having unsaturation
262	.....Substituted
263	....Acyclic polyoxy alcohol moiety
264	.....Substituted
265	....Acyclic monohydric alcohol moiety
266	.....Substituted
300	.Hypohalite or perhypohalite esters (i.e., compounds having the -O-halo group or the -O-O-halo group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
301	.Cyanate esters (i.e., compounds having the -OCN group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
302	.Compounds having the group -C(=X)-X-nX-, wherein the X's may be the same or diverse chalcogens, nX is a divalent chalcogen or a chain of divalent chalcogens single bonded to each other, and the terminal X is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon (e.g., percarboxylate esters, etc.)
303	.Sulfohydroxamate esters or chalcogen analogues thereof (i.e., compounds having the -S(=O)(=O)-NH-X- group, wherein X is chalcogen and substitution may be made for hydrogen only, and wherein the X is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
304	.Peroxynitrate esters (i.e., compounds having the -O-O-N(=O)(=O) group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
305	.Perborate esters or chalcogen analogues thereof (i.e., compounds having the -X-X- group, wherein the X's are the same or diverse chalcogens, bonded directly to boron and to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
306	.Perhalate esters (i.e., compounds having the -O-halo(=O)(=O)(=O) group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)
307	.Esters having the -S(=O)(=O)-S- group, wherein the divalent sulfur is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon (e.g., thiolsulfonate esters, etc.)
308	..Oxygen bonded directly to the hexavalent sulfur of the -S(=O)(=O)-S- group (i.e., thiosulfate esters)
309	...Nitrogen attached indirectly to the -S(=O)(=O)-S- group by acyclic nonionic bonding
310	.Esters having the -S(=O)-S- group, wherein the divalent sulfur is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon (e.g., thiolsulfinate esters, dithiosulfurous acid esters, etc.)
311	.Perhydroxamate esters or chalcogen analogues thereof (i.e., compounds having the -C(=X)-NH-X-X- group, wherein the X's are the same or diverse chalcogens and substitution may be made for hydrogen only, and wherein the terminal X is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

ORGANIC COMPOUNDS (Class 532, Subclass 1)

312 .Hydroxamate esters or chalcogen analogues thereof (i.e., compounds having the -C(=X)-NH-X- group, wherein the X's may be the same or diverse chalcogens and substitution may be made for hydrogen only, and wherein the single bonded X is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

313 ..Nitrogen bonded directly to the carbon of the -C(=X)-NH-X- group

314 ...The single bonded X is sulfur, or the substituent nitrogen is bonded directly to acyclic or alicyclic carbon

315 ..Carbocyclic ring bonded directly to the carbon of the -C(=X)-NH-X- group

316 .Hyponitrite esters (i.e., compounds having the -O-N=N-O- group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

317 .Esters having the -N=S=O group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon (i.e., sulfinylamines)

318 .Persulfonate esters (i.e., compounds having the -S(=O)(=O)-O-O- group, wherein the terminal oxygen is bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

319 .Perthioimidate esters (i.e., compounds having the perthioimidate group, HN=CH-S-S-, wherein substitution may be made for hydrogen only, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

330 .Isocyanate esters (i.e., compounds containing the isocyanate group, -N=C=O, bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon)

331 ..With preservative or stabilizer

332 ...Nitrogen containing preservative or stabilizer

333 ...Phosphorus, silicon, or phenolic hydroxy containing preservative or stabilizer

334 ..Carbodiimide containing (i.e., -N=C=N- containing)

335 ..Biuret containing (i.e., -NH-C(=O)-NH-C(=O)-NH- containing, wherein substitution may be made for hydrogen only)

336 ..Processes

337 ...Isocyanic acid, or salt thereof, as reactant

338 ...Processes for forming the isocyanate group

339 ....Cyanate reactant (i.e., reactant contains -OCN group)

340 ....Hetero ring containing reactant

341 ....Carbon monoxide utilized

342 .....Reactant contains nitro group bonded directly to carbon

343 ....Azide reactant (i.e., reactant contains the azide group)

344 ....Reactant containing -NH-C(=O)-NH- group (wherein substitution may be made for hydrogen only)

345 ....Carbamate reactant (i.e., reactant contains -O-C(=O)-NH- group (wherein substitution may be made for hydrogen only)

346 ....Reactant containing nitrogen double or triple bonded to carbon (e.g., nitriles, isonitriles, cyanogen halides, etc.)

347 ....Carbonyl dihalide reactant (e.g., phosgene, etc.)

348 ....Carbamyl halide reactant (i.e., reactant contains halo-C(=O)-NH- group, wherein substitutuion may be made for hydrogen only)

349 ...Halogenation of isocyanate esters

350 ...Isocyanate exchange reactions (i.e., A-NCO + B-X = B-NCO + A-X)

351 ...Processes of reacting isocyanate esters of known structure to yield products of indeterminate structure

352 ...Purification or recovery

353 ...Epoxy compound, or metal, utilized

354 ..Containing polycyclo ring system having alicyclic ring as one of the cyclos

355 ..Acyclic carbon bonded directly to the isocyanate group

356 ...Halogen attached indirectly to the isocyanate group by acyclic nonionic bonding

357 ...Chalcogen, single bonded directly to carbon, attached indirectly to the isocyanate group by acyclic nonionic bonding (e.g., ether group containing, etc.)

358 ..Benzene ring bonded directly to the isocyanate group

359 ...Plural benzene rings bonded directly to isocyanate groups (e.g., diisocyanatodiphenylmethane, etc.)

360 ...Plural isocyanate groups bonded directly to the same benzene ring

IN THIS SERIES OF CLASSES, CLASS 562 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)

1 .Persulphonic acids or salts thereof (i.e., compounds having the -S(=O)(=O)-O-OH group, wherein the hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)

2 .Percarboxylic acids or salts thereof (i.e., compounds having the -C(=O)-O-OH group, wherein the hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)

3 ..With preservative or stabilizer

4 ..Formation of the -C(=O)-O-OH group, or of a salt thereof (e.g., from acid halides or anhydrides, neutralization; etc)

5 ...Aldehyde or percarboxylic acid ester reactant

6 ...Carboxylic acid or carboxylic acid salt reactant

7 .Boron acids or salts thereof (i.e., compounds having -XH, wherein X is chalcogen, attached directly to boron by nonionic bonding and wherein the hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)

8 .Phosphorus acids or salts thereof (i.e., compounds having -XH, wherein X is chalcogen, attached directly to phosphorus by nonionic bonding and wherein the hydrogen may be replaced by a substituted or unsubstituted ammonium or by a group IA or IIA light metal)

9 ..Sulfur attached directly to the phosphorus by nonionic bonding

10 ..Nitrogen attached directly to the phosphorus by nonionic bonding

11 ..Nitrogen attached indirectly to the phosphorus by nonionic bonding

12 ...Plural phosphori attached indirectly to each other by nonionic bonding

13 ....Plural phosphori bonded directly to the same carbon

14 ....Additional nitrogen attached indirectly to the phosphorus by nonionic bonding

15 ...The nitrogen is bonded directly to -C(=X)-, wherein X is chalcogen

16 ...The nitrogen and the phosphorus are bonded directly to the same carbon

17 ....The nitrogen is bonded to an additional acyclic carbon or acyclic carbon chain, to which a -C(=X)X- group is bonded directly, wherein the X's are the same or diverse chalcogen

18 .....Preparing from a compound having a nitrogen containing hetero ring

19 ..The phosphorus is in a ring

20 ..Plural phosphori attached indirectly to each other by nonionic bonding

21 ...Plural phosphori bonded directly to the same carbon

22 ....Processes

23 ..Chalcogen attached indirectly to the phosphorus by nonionic bonding

24 ...The chalcogen is in a -C(=X)- group

25 ..Halogen attached indirectly to the phosphorus by nonionic bonding

26 .Thiocarboxylic acids or salts thereof (i.e., compounds having the group -C(=X)XH, wherein the X's are the same or diverse chalcogens and at least one X is sulfur, and hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)

27 ..Nitrogen bonded directly to the carbon of the -C(=X)XH group or of its salt (e.g., dithiocarbamic acids, etc.)

28 ...Processes utilizing carbon disulfide

29 .Thiosulfonic acids or salts thereof (i.e., compounds containing the thiosulfonate group, -S(=O)(=O)-S-, wherein the divalent sulfur is bonded directly to hydrogen, or to a group IA or IIA light metal or to substituted or unsubstituted ammonium)

30 .Sulfonic acids or salts thereof (i.e., compounds containing the sulfonate group, -S(=O)(=O)-O- wherein the single bonded oxygen is bonded directly to hydrogen, or to a group IA or IIA light metal or to substituted or unsubstituted ammonium)

31 ..Hydrophenanthrene ring system containing

32 ..Processes of sulfonating lignites, leonardites, coal, humic acids, bark or pitch, and the reaction products thereof

33 ..Petroleum sulfonic acids

34 ...Addition salts having organic nitrogen containing cation

35 ..Boron or phosphorus attached indirectly to the sulfonate group by nonionic bonding (e.g., phosphonium salts, etc.)

36 ..Chalcogen or -C(=X)-, wherein X is chalcogen, attached directly to the sulfonate sulfur by nonionic bonding

37 ..Nitrogen attached directly to the sulfonate sulfur by nonionic bonding (e.g., sulfamic acids, etc.)

38 ...Processes utilizing an inorganic sulfamic acid, or a salt thereof

39 ...Processes of forming the -NH-S(=O)(O=)-O- group, wherein substitution may be made for hydrogen only

40 ...Additional salts having organic nitrogen containing cation

41 ..Benzene ring attached indirectly to the sulfonate group by acyclic nonionic bonding

42 ...Noncarbon atom in acyclic chain between the benzene ring and the sulfonate sulfur

43 ....Nitrogen in the acyclic chain

44 .....Chalcogen or -C(=X)-, wherein X is chalcogen, in the chain

45 ..Benzene ring bonded directly to the sulfonate sulfur (e.g., purification and neutralization of benzene sulfonic acids, etc.)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Sulfonic acids or salts thereof (i.e., compounds containing the sulfonate group, -S(=O)(=O)-O- wherein the single bonded oxygen is bonded directly to hydrogen, or to a group IA or IIA light metal or to substituted or unsubstituted ammonium)
..Benzene ring bonded directly to the sulfonate sulfur (e.g., purification and neutralization of benzene sulfonic acids, etc.)
46 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly to the sulfonate group by nonionic bonding (e.g., aldehydes, etc.)
47 ....Chalcogen or nitrogen bonded directly to the -C(=X)- group
48 .....Benzene ring bonded directly to each nitrogen of a -NH-C(=X)-NH-group, wherein X is chalcogen and substitution may be made for hydrogen only
49 ......At least one of the benzene rings is part of a naphthalene ring system
50 ......Plural naphthalene ring systems attached indirectly to the -NHC(=X)NH- group by nonionic bonding
51 .....Stilbene containing
52 .....Plural -C(=X)- groups attached indirectly to the sulfonate group by nonionic bonding
53 ......Plural carbons bonded directly to -C(=X)-
54 ......Plural -C(=X)- groups bonded directly to the same benzene ring
55 .....Acyclic carbon bonded directly to the -C(=X)- group
56 .....The -C(=X)- is part of a -C(=X)X- group, wherein the X's may be the same or diverse chalcogens
57 ......Nitrogen attached indirectly to the sulfonate group by nonionic bonding
58 ...Nitrogen attached indirectly to the sulfonate group by nonionic bonding
59 ....Plural benzene rings bonded directly to each other or to the same acyclic carbon
60 ....Stilbene containing
61 ....Plural benzene rings bonded directly to the same nitrogen
62 .....Plural nitrogens each bonded to two benzene rings (e.g., phenylaminophenylaminophenyl compounds, etc.)
63 .....At least one of the benene rings is part of a naphthalene ring system
64 .....Oxygen bonded directly to a benzene ring
65 ....Sulfonyl bonded directly to the nitrogen
66 ....The nitrogen is attached indirectly to a benzene ring by acyclic nonionic bonding
67 .....Additional nitrogen attached indirectly to the sulfonate group by nonionic bonding
68 ....Polycyclo ring system consisting of benzene rings bonded directly to the sulfonate group
69 .....Nitro or nitroso bonded directly to the polycyclo ring system
70 .....Oxygen bonded directly to the polycyclo ring system (e.g., aminonaphthol sulfonic acid, etc.)
71 ......Additional sulfonate group bonded directly to the polycyclo ring system (e.g., H acid, etc.)
72 .....Halogen, plural nitrogens, or additional sulfonate group bonded directly to the polycyclo ring system
73 ....Nitro or halogen bonded directly to a benzene ring
74 ...Nonsulfonate chalcogen attached indirectly to the sulfonate group by nonionic bonding
75 ....Two benzene rings bonded to the nonsulfonate chalcogen (e.g., phenoxyphenyl compounds, etc.)
76 ....Plural carbons bonded directly to the nonsulfonate chalcogen (e.g., ethers, sulfones, etc.)
77 .....Hydroxy group or nonsulfonate sulfur attached indirectly to a benzene ring by acyclic nonionic bonding
78 ....Halogen attached indirectly to the sulfonate group by nonionic bonding
79 ....The sulfonate group and oxygen are bonded directly to the same polycyclo ring system which consists of benzene rings
80 .....Additional sulfonate group bonded directly to the polycyclo ring system
81 ....Plural oxygens bonded directly to the same benzene ring
82 ....The sulfonate group, oxygen, and alkyl of at least 4 carbons are bonded directly to the same benzene ring
83 ...Halogen attached indirectly to the sulfonate group by nonionic bonding
84 ...Addition salts having organic nitrogen containing cation
85 ....Having -C(=X)-, wherein X is chalcogen, in the cation
86 ....Nitrogen double bonded to carbon in the cation (e.g., guanidinium salts, etc.)
87 ...Acyclic carbon to carbon unsaturation containing
88 ...Plural benzene rings bonded directly to each other, or to the same acyclic carbon or acyclic carbon chain
89 ...Polycyclo ring system consisting of benzene rings bonded directly to the sulfonate group
90 ....Processes of sulfonating naphthalene per se or alkyl substituted naphthalene
91 ...Sulfonate group and alkyl group of at least four carbons bonded directly to the same benzene ring
92 ....With preservative, stabilizer, or color or odor affecting additive
93 ....Processes including alkylation of a benzene ring, and the products thereof
94 .....The alkylating agent is an olefin
95 ....Sulfonation processes
96 ....Purification or recovery
97 ....Neutralization or acidification

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.Sulfonic acids or salts thereof (i.e., compounds containing the sulfonate group, -S(=O)(=O)-O- wherein the single bonded oxygen is bonded directly to hydrogen, or to a group IA or IIA light metal or to substituted or unsubstituted ammonium)

..Benzene ring bonded directly to the sulfonate sulfur (e.g., purification and neutralization of benzene sulfonic acids, etc.)

98 ...Sulfonation utilizing sulfur trioxide or oleum (e.g., sulfonation of benzene or toluene with oleum, etc.)

99 ...Sulfonation utilizing sulfuric acid (e.g., sulfonation of benzene or toluene with sulfuric acid, etc.)

100 ..Polycyclo alicyclic ring system attached directly or indirectly to the sulfonate group by nonionic bonding

101 ..Plural sulfonate groups attached indirectly to each other by acyclic nonionic bonding

102 ...Nitrogen or -C(=X)-, wherein X is chalcogen, attached indirectly to the sulfonate groups by nonionic bonding

103 ...Plural nonsulfonate chalcogens attached indirectly to the sulfonate groups by nonionic bonding

104 ..Nitrogen attached indirectly to the sulfonate group by acyclic nonionic bonding

105 ...Having -C(=X)-, wherein X is chalcogen, attached indirectly to the sulfonate group by acyclic nonionic bonding

106 ....Plural nitrogens or plural -C(=X)- groups, wherein X is chalcogen, attached indirectly to the sulfonate group by acyclic nonionic bonding

107 ...Chalcogen attached indirectly to the sulfonate group by acyclic nonionic bonding

108 ..Chalcogen attached indirectly to the sulfonate group by acyclic nonionic bonding

109 ...The chalcogen, X, is in a -C(=X)- group

110 ...Plural chalcogens attached indirectly to the sulfonate group by acyclic nonionic bonding

111 ...Plural carbons bonded directly to the chalcogen (e.g., ethers, etc.)

112 ...Addition salts having organic nitrogen containing cation

113 ..Halogen attached indirectly to the sulfonate group by acyclic nonionic bonding

114 ..Addition salts having organic nitrogen containing cation

115 ..Processes (e.g., neutralization, stabilization, etc.)

116 ...Decarboxylation, hydrogenation or formation of carbon-to-carbon unsaturation

117 ...Conversion of sulfur containing hetero ring compounds to sulfonic acids

118 ...Oxidation of organic sulfur compounds to sulfonic acids

119 ...Hydrolysis of sulfonyl halides

120 ...Formation of sulfonic acids or sulfonic acid salts utilizing inorganic sulfonating agents (e.g., reaction of alcohols or alkyl halides with sulfurous acid, etc.)

121 ....Utilizing sulfur dioxide and oxygen (i.e., sulfoxidation)

122 ....Sulfurous acid or salt thereof reacted with unsaturated hydrocarbon

123 ....Utilizing sulfur trioxide, oleum, sulfuric acid or halosulfonic acid

124 ...Purification or recovery

125 .Sulfinic or sulfenic acids or salts thereof (i.e., compounds containing the sulfinate group, -S(=O)O-, or the sulfenate group, -S-O-, wherein the single bonded oxygen is bonded directly to hydrogen, or to a group IA or group IIA light metal or to substituted or unsubstituted ammonium)

126 ..Nitrogen attached indirectly to a sulfinate group by acyclic nonionic bonding

400 .Carboxylic acids and salts thereof

401 ..Racemization or separation of optical isomers

402 ...Physical resolution

403 ..Hydrophenanthrene nucleus

404 ...1,4a-dimethyl hydrophenanthrene-1 carboxylic acids or salts thereof

405 ..Aromatic

406 ...Preparation by carbonylation

407 ...Formation of carboxyl group by oxidation

408 ....Of aromatic compound

409 .....Alkyl side chain oxidized

410 ......Nitrogen containing oxidant

411 ......Sulfur containing oxidant

412 ......Air, oxygen, or ozone oxidant

413 ....Multistage

414 ....With recycle or recovery of reaction component

415 ....Gas phase

416 ....Halogen containing catalyst, initiator, or promoter utilized

417 ....Initiator or promoter used with catalyst

418 .....Of oxy or carbonyl containing compound

419 ......Hypohalite as oxidant

420 ......Nitrogen containing oxidant

421 ......Air, oxygen, or ozone oxidant

422 .....Of halo alkyl containing compound

423 ...Preparation by carbonation

424 ....Of alkali metal phenolates

425 .....Having plural rings

426 ...Sulfur

427 ....Polycyclo ring system

428 .....Indenyl or hydrindenyl

429 ....Sulfoxy

430 .....Nitrogen

431 ....Carboxyl, or salt thereof, in side chain having sulfur bonded directly to a ring

432 ....Carboxyl, or salt thereof, bonded directly to a ring

433 ...Nitrogen bonded directly to carbon of organic radical (e.g., amino acids, etc.)

434 ....Nitro or nitroso

435 .....Plural rings

436 ......Plural rings bonded directly to the same carbonyl

437 .....Plural nitrogens

438 .....Halogen

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Carboxylic acids and salts thereof
..Aromatic
...Nitrogen bonded directly to carbon of organic radical (e.g., amino acids, etc.)
439 ....Ureido, guanido, or hydrazine
440 ....Nitrogen double bonded directly to carbon (e.g., amidine, ketimine, etc.)
441 ....Plural rings bonded directly to the same carbon
442 ....Nitrogen not bonded directly to a ring
443 .....In same chain as carboxyl, or salt thereof
444 ......Oxy
445 ....Phenyl alanines
446 ....Di-oxy phenyl alanines
447 ....Phenoxphenyl alanines
448 ....Plural nitrogens
449 ......Halogen
450 ......Amide
451 .....Oxy
452 ....Oxy
453 .....Carboxyl, or salt thereof, nitrogen and oxygen all bonded directly to the same benzene ring
454 .....Aryl-N-Aryl
455 .....Amide
456 ....Halogen
457 ....Plural rings with nitrogen bonded directly to at least one ring
458 ....Carboxyl, or salt thereof, bonded directly to a ring
459 ...Aldehyde or ketone
460 ....Two rings bonded directly to the same carbonyl
461 ....Polycyclo ring system
462 .....Bicyclo ring system
463 ....Oxy
464 .....Phenoxy alkanoic acids
465 ...Oxy
466 ....Polycyclo ring system
467 .....Carboxyl bonded directly to naphthylene ring system
468 ....Plural rings bonded directly to the same carbon
469 ....Rings bonded directly to each other
470 ....Oxy, not bonded directly to a ring, in same side chain as carboxyl, or salt thereof
471 ....Oxy, bonded directly to a ring, in same side chain as carboxyl, or salt thereof
472 .....Halogen
473 ....Carboxyl, or salt thereof, bonded directly to a ring
474 .....Halogen
475 .....Phenolic hydroxy or metallate
476 ......Poly phenolic hydroxy or metallate
477 ......Salicyclic acid per se or salt thereof
478 ....Phenolic hydroxy or metallate
479 ...Decarboxylation of polycarboxylic acid or salt
480 ...Polycarboxylic acids or salts thereof
481 ....Prepared by disproportionation
482 ....Preparation by isomerization
483 ....Preparation by hydrolysis of amide, anhydride, or ester
484 ....Preparation by hydrolysis of nitrile
485 ....Purification or recovery per se
486 .....By crystallization
487 .....By reaction of undesired component
488 ....Plural rings
489 ....Carboxyl not directly attached to a ring
490 ...Naphthyl group
491 ...Plural rings bonded directly to the same carbon
492 ...Rings bonded directly to each other
493 ...Monocyclic
494 ....Purification or recovery per se
495 ....Additional unsaturation
496 ....Carboxyl, or salt thereof, not bonded directly to ring
497 ..Preparing alicyclic acids by carbonylation
498 ..Plural alicyclic rings
499 ...Tricyclo ring system
500 ...Two rings only
501 ....Orthofused
502 ....2,2,1-bicyclo
503 ..Cyclopentyl (e.g., prostoglandins, etc.)
504 ...Cyclopentyl bonded to -COOR, -CCOOR, or -CCCOOR
505 ..Cyclobutyl
506 ..Cyclopropyl
507 ..Alicyclic acids having an element other than oxygen, carbon, or hydrogen
508 ..Alicyclic acids having an oxy, aldehyde, or ketone group
509 ..Alicyclic polycarboxylic acids
510 ..Alicyclic acids having unsaturation
511 ..Naphthenic acids or salts thereof
512 ..Acyclic
512.2 ...Preparing by oxidation of hydrocarbon mixtures
512.4 ....Plural -COO- groups in compound formed
513 ...Preparation from source of undetermined composition (e.g., industrial waste, etc.)
514 ....Nitrogen containing acid produced
515 ...Preparation by degradation of carbohydrates
516 ...Preparation by hydrolysis of proteins
517 ...Preparation by carbonylation
518 ....Of aldehyde or ketone
519 ....Of alcohol or alcoholate
520 ....Of halogenated hydrocarbon
521 ....Of hydrocarbon
522 .....Group VIII metal containing catalyst utilized
523 ...Formation of carboxyl group by oxidation
524 ....Of carboxylic acid or ester
525 .....Of oxy acid or ester
526 ....Of nitrogen containing compound
527 ....Of ketone
528 .....Cyclic ketone or mixture thereof with cyclic alcohol
529 ......Two stage oxidation from hydrocarbon
530 ......With recycle or recovery of reaction component
531 ....Of aldehyde
532 .....Producing unsaturated acid
533 ......Liquid phase oxidation
534 ......Group VIII metal containing catalyst utilized
535 ......Group V metal containing catalyst utilized
536 .....Producing acetic acid
537 ....Of ether
538 ....Of alcohol
539 .....Caustic oxidant
540 .....Nitrogen containing oxidant
541 ....Of halogenated hydrocarbon
542 ....Of hydrocarbon
543 .....Alicyclic

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.Carboxylic acids and salts thereof
..Acyclic
...Formation of carboxyl group by oxidation
....Of hydrocarbon
544 .....Olefin
545 ......Producing unsaturated acid
546 ....Group VIII metal containing catalyst utilized
547 ....Group V metal containing catalyst utilized
548 ......Producing acetic acid
549 .....Alkane
550 ...Formation of carboxyl group by carbonation
551 ....Of C-metallated compound
552 ....Of alkali metal salt of carboxylic acid
553 ...Nitrogen bonded to carbon of organic radical (e.g., amino acids, etc.)
554 ....Purification or recovery per se
555 ....Carbamic acids or salts thereof
556 ....Sulfur or selenium
557 .....Alpha N, beta S - acids or salts thereof
558 ......Penicillamine per se or salt thereof
559 .....Methionine per se or salt thereof
560 ....Ureido, hydrazino, or nitrogen double bonded directly to carbon
561 ....Plural nitrogens
562 .....Lysine per se or salt thereof
563 .....Glutamine per se or salt thereof
564 .....Oxy containing
565 .....Polycarboxylic
566 ......Ethylene diamine tetraacetic acid per se or salt thereof
567 ....Oxy, aldehyde, or ketone
568 .....Polycarboxylic
569 .....Pantothenic acid per se or salt thereof
570 .....Threonine per se or salt thereof
571 ....Polycarboxylic
572 .....Nitrilotriacetic acid per se or salt thereof
573 .....Glutamic acid per se or salt thereof
574 ....Halogen or unsaturation
575 ....Alpha nitrogen
576 .....Beta alanine per se or salt thereof
577 ...Aldehyde or ketone
578 ....Polycarboxylic
579 ...Oxy
580 ....Purification or recovery per se
581 ....Sulfur
582 ....Polycarboxylic
583 .....Ether
584 .....Citric acid per se or salt thereof
585 .....Tartaric acid per se or salt thereof
586 ....Halogen
587 ....Polyoxy
588 ....Alkoxy
589 ....Lactic acid per se or salt thereof
590 ...Polycarboxylic
591 ....Preparation by isomerization
592 ....Preparation by hydrogenation
593 ....Purification or recovery per se
594 ....Element other than C,H,O,N, or halogen
595 ....Unsaturated
596 ....Halogen
597 ....Oxalic acid per se or salt thereof
598 ...Unsaturated
599 ....Formation of ethylenic unsaturation
600 ....Purification or recovery per se
601 ....Sorbic acid per se or salt thereof
602 ...Halogen
603 ....Preparation by halogenating acid or anhydride
604 ....Preparation by dehalogenation
605 ....Fluorine containing
606 ...Saturated lower fatty acids
607 ....Acetic acid per se or salt thereof
608 .....Purification or recovery per se
609 ....Formic acid per se or salt thereof
620 .Nitrolic acids or salts thereof (i.e., compounds having the group -C(=NOH)-N(=O) (=O), wherein the hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)
621 .Hydroxamic acids, chalcogen analogs or salts thereof (i.e., compounds having the -C(=X)-N(R)-XH group or the -C(XH)=NXR group, wherein R may be hydrogen or substitution for hydrogen, the X's in each group may be the same or diverse chalcogens, and H of -XH in each group may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)
622 ..Carbocyclic ring bonded directly to the carbon of the acid group
623 ..Nitrogen attached to the acid group directly or indirectly by acyclic nonionic bonding (e.g., N-hydroxy ureas, dihydroxamic acids, etc.)
624 .Imidic acids, chalcogen analogs or salts thereof (i.e., compounds having the group -N-C(XH)-, wherein X is chalcogen and the hydrogen may be replaced by a group IA or IIA light metal, or by substituted or unsubstituted ammonium)
625 .Sulfohydroxamic acids, chalcogen analogs or salts thereof (i.e., compounds having the -S(=O)(=O)-N(R)-XH group, wherein R may be hydrogen or substitution for hydrogen, X is chalcogen, and H of -XH may be replaced by a group IA or IIA light metal,or by substituted or unsubstituted ammonium)
800 .Hydroxamic acid halides or chalcogen analogs therof (i.e., compounds having the -C(=X)NH-halo group, wherein X is chalcogen and substitution may be made for hydrogen only)
801 ..Additional nitrogen bonded directly to the -C(=X)- group (e.g., urea halides, etc.)
802 .Imidic acid halides (i.e., compounds having the -N=CH-halo group, wherein substitution may be made for hydrogen only)
803 ..Additional halogen bonded directly to the carbon of the imidic halide group (i.e., -N=(halo)C(halo)
804 ..Chalcogen attached directly to the nitrogen of the imidic halide group by nonionic bonding (i.e., -X-N=CH-halo, wherein X is chalcogen)
805 ..Nitrogen attached directly to the nitrogen of the imidic halide group by nonionic bonding (i.e., HNH-N=CH-halo, wherein subsitution may be made for hydrogen only)

ORGANIC COMPOUNDS (Class 532, Subclass 1)
806 .Boron halides (i.e., compounds having halogen attached directly to boron by nonionic bonding
807 ..Phosphorus attached directly or indirectly to the boron by nonionic bonding
808 .Phosphorus halides (i.e., compounds having halogen attached directly to phosphorus by nonionic bonding)
809 ..Nitrogen bonded directly to the phosphorus
810 ...The phosphorus and the nitrogen are in the same ring
811 ..Additional phosphorus attached directly or indirectly to the phosphorus by nonionic bonding
812 ..The phosphorus is in a ring
813 ..Sulfur bonded directly to the phosphorus
814 ...Preparing utilizing an inorganic compound containing phosphorus and sulfur
815 ...Forming phosphorus to carbon bond
816 ..Oxygen bonded directly to the phosphorus
817 ...Halogen attached indirectly to the phosphorus by acyclic nonionic bonding
818 ...Forming phosphorus to halogen bond
819 ...Forming phosphorus to carbon bond
820 ..Forming phosphorus to carbon bond
821 .Sulfur halides (i.e., compounds having halogen attached directly to sulfur by nonionic bonding)
822 ..Nitrogen bonded directly to the sulfur
823 ...Phosphorus, -C(=X)-, wherein X is chalcogen, additional chalcogen attached directly to the nitrogen by nonionic bonding
824 ..The halogen is fluorine
825 ...Chalcogen double bonded directly to the sulfur (e.g., sulfonyl fluorides, etc.)
826 ....Benzene attached directly or indirectly to the sulfur by nonionic bonding
827 ..Chalcogen double bonded directly to the sulfur (e.g., sulfinyl halides, etc.)
828 ...Plural chalcogens double bonded directly to the sulfur (e.g., sulfonyl halides, etc.)
829 ....Processes for forming the sulfonyl halide group utilizing elemental halogen
830 ....Preparing utilizing thionyl halide or carbonyl dihalide (e.g., phosgene, etc.)
831 ....Plural sulfonyl halide groups attached indirectly to each other by nonionic bonding
832 ....Nitrogen, other than as nitro or nitroso, attached indirectly to the sulfur by nonionic bonding
833 ....Chalcogen attached indirectly to the sulfur by nonionic bonding
834 ....Halogen attached indirectly to the sulfur by nonionic bonding
835 ..Chalcogen or nitrogen attached indirectly to the sulfur by nonionic bonding
836 ..Perchloro methyl mercaptan per se (i.e., trichloromethane sulfenyl chloride)
837 .Compounds having the -(O=)S(=O)-NH-halo group (i.e., N-halo sulfonamides, wherein substitution may be made for hydrogen only)
838 .Thiocarboxylic halides (i.e., compounds having the -C(=S)-halo group)
839 ..Additional halogen bonded directly to the -C(=S)- group (e.g., thiophosgene, etc.)
840 .Carboxylic halides (i.e., compounds having the -C(=O)-halo group)
841 ..With preservative or stabilizer
842 ..Boron or phosphorus attached directly or indirectly to the carbonyl group by nonionic bonding
843 ..Carbonyl bonded directly to the carbonyl group (e.g., oxalyl chlorides, etc.)
844 ..Nitrogen bonded directly to the carbonyl group (e.g., carbamyl chlorides, etc.)
845 ...Chalcogen or additional carbonyl bonded directly to the nitrogen
846 ...Processes utilizing phosgene as a reactant
847 ..Phosgene, per se
848 ..Processes utilizing carbon monoxide as a reactant
849 ..Fluorine is the halogen (i.e., carboxylic fluorides)
850 ...Plural -C(=O)-F groups attached indirectly to each other by nonionic bonding
851 ...Processes for forming the carbonyl group
852 ...Processes for forming the carbonyl to fluoride bond
853 ..Plural -C(=O)-halo groups attached indirectly to each other by nonionic bonding
854 ...Preparing utilizing phosgene
855 ...Plural -C(=O)-halo groups bonded directly to the same benzene ring
856 ..Processes
857 ...Phosgene reactant
858 ...Ketene reactant
859 ...Forming the carbonyl group
860 ....By oxidizing a halogenated olefin
861 ...Forming the carbonyl to halide bond
862 ....Reactant having halogen bonded directly to sulfur by nonionic bonding
863 ....Elemental halogen or hydrogen halide utilized
864 ...Halogenation
865 ...Dehalogenation or dehydrohalogenation
866 ...Purification or recovery
867 ..Alicyclic ring containing
868 ..Nitrogen attached indirectly to the carbonyl group by nonionic bonding
869 .Containing -C(=X)-CN, wherein X is chalcogen (e.g., carbonyl cyanides, etc.)
870 .Sulfonyl isocyanates or sulfonyl isothiocyanates, (i.e., compounds having the -S(=O)(=O)-N=C=X group, wherein X is oxygen or sulfur)
871 .Containing -C(=X)-N=C=X or -C(=X)-X-N=N-X-, wherein the X's may be the same or diverse chalcogens
872 .Sulfonic anhydrides (i.e., compounds having the -S(=O)(=O)-O-S(=O)(O=)-group
873 .Containing -S(=O)(=O)-CN or -S(=O)(=O)-N=S=O

ORGANIC COMPOUNDS (Class 532, Subclass 1)

874 .Containing -C(=X)-NH-X-C(=X)- or -C(=X)-NH-X-S(=O)(=O)-, wherein substitution may be made for hydrogen only, and the X's may be the same or diverse chalcogens
875 .Containing -C(=NH)-X-C(=X)-, wherein substitution may be made for hydrogen only, and the X's may be the same or diverse chalcogens
876 .Phosphorus bonded directly to the single bonded X of a -C(=X)-X-group, wherein the X's may be the same or diverse chalcogens
877 .Phosphorus bonded directly to cyano or to -N=C=X, wherein X is chalcogen
878 .Two phosphori bonded directly to the same divalent chalcogen atom (e.g., pyrophosphorus compounds, etc.)
879 .Containing -C(=X)-X-N(=O) or -C(=X)-X-S(=O)(=O)-, wherein the X's may be the same or diverse chalcogens
880 .Containing -C(=X)-NH-X-NH-C(=X)- or -C(=X)-X-NH-S(=O)(=O)-, wherein substitution may be made for hydrogen only, and the X's may be the same or diverse chalcogens
881 .Containing -C(=X)-NH-X-halo, wherein substitution may be made for hydrogen only, and the X's may be the same or diverse chalcogens
882 .Boron bonded directly to the single bonded X of a -C(=X)-X- group, wherein the X's may be the same or diverse chalcogens
883 .Two borons bonded directly to the same divalent chalcogen atom (e.g., boroxoles, etc.)
884 .Boron bonded directly to the single bonded oxygen of a -S(=O)(=O)-O- group
885 .Compounds having the -S-SCN group bonded directly to carbon, which carbon may be single bonded to any atom but may be multiple bonded only to carbon
886 .Thiocarboxylic acid anhydrides (i.e., compounds having the -C(=X)-X-C(=X)- group, wherein the X's may be the same or diverse chalcogens and at least one X is sulfur)
887 .Carboxylic acid anhydrides (i.e., compounds having the -C(=O)-O-C(=O)- group)
888 ..Processes of forming the -C(=O)-O-C(=O)- group
889 ...Aldehyde reactant
890 ...Carbon monoxide or metal carbonyl reactant
891 ....Ether or carboxylic acid ester reactant
892 ...Ketone or ketene reactant
893 ...Ether or carboxylic acid ester reactant
894 ...Carboxylic acid salt reactant
895 ...Dehydration of two like or different molecules of carboxylic acid
896 ....Vapor phase
897 ...Carboxylic acid halide reactant
898 ..Purification or recovery
899 .Selenium or tellurium containing

CLASS 564 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 564 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
1 .AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
1.5 ..Adducts or inclusion compounds of urea per se or of of thiourea per se with organic compounds (e.g., urea-alkane inclusion compounds, etc.)
2 ..With preservative or stabilizer
3 ...Ureas or thioureas with preservative or stabilizer
4 ...Carboxamides with preservative or stabilizer
5 ...Benzene ring containing compound with preservative or stabilizer
6 ....Inorganic preservative or stabilizer
7 ....Sulfur or phenol containing preservative or stabilizer
8 ..Boron containing (e.g., boron containing complexes, salts, etc.)
9 ...Boron attached directly to amino nitrogen by nonionic bonding
10 ....The boron and amino nitrogen are members of the same ring
11 .....Polycyclo ring system having the nitrogen and boron containing ring as one of the cyclos
12 ..Phosphorus attached directly to amino nitrogen by nonionic bonding
13 ...The phosphorus and nitrogen are members of the same ring
14 ...Chalcogen and plural nitrogens bonded directly to the same phosphorus
15 ..Phosphorus attached indirectly to amino nitrogen by nonionic bonding
16 ...The phosphorus is a ring member
17 ..Thioureas (i.e., HNH-C(=S)-HNH, wherein substitution may be made for hydrogen only)
18 ...Thiocarbazides or thiosemicarbazides (i.e. HNH-NH-C(=S)-HNH, wherein the N bonded directly to the thiourea N is an amino N and substitution may be made for hydrogen only)
19 ....Thiocarbazones or thiosemicarbazones (i.e., HCH=N-NH-C(=S)-HNH, wherein substitution may be made for hydrogen only)
20 .....Benzene ring containing
21 ......Additional nitrogen attached indirectly to the thiocarbonyl by nonionic bonding
22 ...Thiobiurets (i.e., HNH-C(=S)-NH-C(=X)-HNH, wherein X is S or O and substitution may be made for hydrogen only)
23 ...Carbonyl, sulfur, or cyano attached directly to thiourea nitrogen by nonionic bonding
24 ...Processes utilizing carbon disulfide
25 ...Processes utilizing cyano containing compound
26 ...Benzene ring containing
27 ....Nitrogen attached indirectly to the thiocarbonyl by nonionic bonding
28 ....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
29 ....Halogen attached indirectly to the thiocarbonyl by nonionic bonding
30 ...Acyclic
31 ....Thiourea per se or salt thereof
32 ..Ureas (i.e., HNH-CO-HNH, wherein substitution may be made for hydrogen only)
33 ...Nitro or nitroso bonded directly to nitrogen
34 ...Carbazides or semicarbazides (i.e., HNH-NH-CO-HNH, wherein substitution may be made for hydrogen only)
35 ....Carbonyl or sulfur attached directly to carbazide or semicarbazide nitrogen by nonionic bonding
36 ....Carbazones or semicarbazones (i.e., HCH=N-NH-CO-HNH, wherein substitution may be made for hydrogen only)
37 ....Acyclic
38 ...Biurets (i.e., HNH-CO-NH-CO-HNH, wherein substitution may be made for hydrogen only)
39 ...Sulfur attached directly to urea nitrogen by nonionic bonding
40 ....The sulfur is part of a substituent which contains nitrogen
41 .....The substituent nitrogen is the nitrogen of a benzamido group (e.g., Cl-benzene-CO-NH-HCH-(O=)S(=O) -, bonded directly to urea nitrogen, etc.)
42 ....The sulfur is part of a monocyclic benzene ring containing substituent
43 .....Alicyclic ring bonded directly to urea nitrogen
44 ...Additional carbonyl bonded directly to urea nitrogen
45 ....The additional carbonyl is in a substituent which is acyclic
46 .....Carbon to carbon unsaturation in the substituent
47 ...Benzene ring containing
48 ....Benzene ring bonded directly to urea nitrogen (i.e., anilides)
49 .....The benzene ring is part of a substituent which contains sulfur
50 .....The benzene ring is part of a substituent which contains nitrogen
51 ......The substituent nitrogen is attached indirectly to the benzene ring by acyclic nonionic bonding
52 .....The benzene ring is part of a substituent which contains oxygen
53 .....The benzene ring is part of a substituent which contains halogen bonded directly to carbon
54 ......The halogen is fluorine
55 .....Plural benzene rings bonded directly to urea nitrogen
56 ....Aralkyl bonded directly to urea nitrogen
57 ...Alicyclic ring containing
58 ...Additional carbon bonded directly to urea nitrogen
59 ....The additional carbon is part of a substituent which contains nitrogen
60 ....The additional carbon is part of a substituent which contains oxygen
61 ....Processes

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Ureas (i.e., HNH-CO-HNH, wherein substitution may be made for hydrogen only)
...Additional carbon bonded directly to urea nitrogen
....Processes
62 .....Preparing directly from compound having carbon to carbon unsaturation
63 ...Urea per se or salt thereof
64 ....Preparing directly from cyano containing compound
65 ....Preparing directly from ammonia and carbonmonoxide or carbon oxysulfide (e.g., from ammonia and COS, etc.)
66 ....Preparing directly from ammonium carbamate (i.e., from HNH-COO-HHNHH)
67 ....Preparing directly from ammonia and carbon dioxide
68 .....With corrosion inhibiting of reactor
69 .....With ammonia synthesis
70 .....With decomposition of by-product ammonium carbamate (i.e., decomposition of HNH-COO-HHNHH)
71 ......Utilizing indirect heat exchange
72 ......In plural stages
73 ....Purification or recovery
74 ..Thiocarboxamides (i.e., compounds containing -C(=S)-HNH, wherein substitution may be made for hydrogen only)
75 ...Sulfur bonded directly to the thiocarbonyl
76 ....Thiuram sulfides (e.g., HNH-C(=S)-S-S-C(=S)-HN-alkyl, etc.)
77 ...Thiooxamides (i.e., HNH-C(=S)-C(=X)-HNH, wherein X is S or O and substitution may be made for hydrogen only)
78 ...Acyclic
79 ..Sulfamides (i.e., HNH-(O=)S(=O)-HNH, wherein substitution may be made for hydrogen only)
80 ..Sulfonamides (i.e., Q-(O=)S(=O)-HNH, wherein Q is a substituent and wherein any substituent replacing one or both hydrogens shown will be referred to as E)
81 ...Hydrazine containing
82 ...Plural sulfonamide groups containing or containing plural sulfonyls bonded directly to the same nitrogen
83 ....Two sulfonamido sulfonyls having no sulfonamido nitrogen between the sulfonyls
84 ...Substituent Q contains benzene ring
85 ....Sulfur in substituent Q
86 ....Nitrogen in substituent Q
87 .....Nitro or nitroso in substituent Q
88 ....Carbonyl in substituent Q
89 ....Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
90 ....Substituent Q is monocyclic
91 .....Carbonyl, cyano, nitro, nitroso, halogen, or sulfur attached directly to the sulfonamide nitrogen or to an amino nitrogen in a substituent E by nonionic bonding
92 .....Benzene ring in a substituent E
93 .....Hydroxy, bonded directly to carbon, or ether in a substituent E (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
94 .....Nitrogen in an acyclic substituent E
95 ...Substituent Q is acyclic
96 ....Halogen in substituent Q attached indirectly to the sulfonamide sulfur by nonionic bonding
97 .....Benzene ring in a substituent E
98 ....Substituent Q is alkyl
99 .....Benzene ring in a substituent E
100 ..Sulfur and amino nitrogen attached directly to the same sulfur by nonionic bonding
101 ..Plural amino nitrogens attached directly to the same sulfur, or oxygen double bonded and amino nitrogen attached directly to the same sulfur, all by nonionic bonding (e.g., sulfinamides, etc.)
102 ..Sulfur attached directly to amino nitrogen by nonionic bonding (e.g., sulfenamides, etc.)
103 ..Cyanamides (i.e., compounds containing cyano bonded directly to amino nitrogen)
104 ...Cyanoguanidines (i.e., HNH-C(=NH)-HNH, wherein -CN is substituted for one of the hydrogens and substitution may be made for the remaining hydrogens only)
105 ...Benzene ring containing
106 ...Acyclic
107 ..Nitramines (i.e., compounds containing nitro bonded directly to amino nitrogen)
108 ...Containing nitrogen double bonded directly to carbon (e.g., nitroguanidines, etc.)
109 ...Acyclic
110 ....Containing nitro bonded directly to carbon (i.e., plural nitro groups containing)
111 .....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
112 ..Nitrosamines (i.e., compounds containing nitroso bonded directly to amino nitrogen)
113 ...Acyclic
114 ..Haloamines (i.e., compounds containing halogen attached directly to amino nitrogen by nonionic bonding)
115 ...Containing nitrogen double bonded directly to carbon
116 ....Amidine containing (i.e., containing -C(=N)-HNH, wherein substitution may be made for hydrogen only)
117 ...Alicyclic ring containing
118 ...Acyclic

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Haloamines (i.e., compounds containing halogen attached directly to amino nitrogen by nonionic bonding)
...Acyclic
119 ....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
120 ....Carbon to carbon unsaturation containing
121 ....Plural difluoramine groups containing
122 .....Plural difluoramine groups bonded directly to the same carbon
123 ..Carboxamides (i.e., Q-CO-HNH, wherein Q is a substituent having carbon bonded directly to the carbonyl or is hydrogen and wherein any substituent replacing one or both hydrogens shown will be referred to as E)
124 ...Preparing directly from cyano containing compound
125 ....From HCN or cyanogen
126 ....Catalytic hydration only of nitrile
127 .....Copper containing catalyst utilized
128 .....Of acrylonitriles
129 ....Acid hydrolysis only of nitrile
130 ....From acyclic nitrile
131 .....Which contains carbon to carbon unsaturation
132 ...Preparing directly from carbon monoxide or carbon dioxide
133 ...Preparing directly by amidation of -C(=O)X group, where X is O- or halogen
134 ....Of carboxylic acid ester
135 .....Having acyclic acid moiety
136 ......Additional oxygen in the acid moiety
137 ......Lower fatty acid
138 ....Of carboxylic acid
139 .....Benzene ring containing
140 ......Hydroxy naphthoic
141 .....Lower fatty acid
142 ....Of carboxylic acid halide
143 .....Acyclic
144 ....Of acyclic carboxylic acid anhydride
145 ...Preparing directly by reacting sulfur or sulfur containing compound with ammonia; or directly from ammonium polysulfide
146 ...Preparing directly by nitration
147 ...Aminimine containing
148 ...Hydrazine containing
149 ....Substituent Q contains benzene ring
150 .....Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
151 ....Substituent Q is acyclic
152 ...Plural carboxamide groups containing or containing plural carbonyls bonded directly to the same nitrogen
153 ....Three or more carboxamide groups
154 ....Sulfur containing
155 ....Benzene ring containing
156 .....Two carboxamido carbonyls having benzene ring between the carbonyls and no carboxamido nitrogen between the carbonyls
157 .....Amino nitrogen, not bonded directly to carbonyl, containing
158 .....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
159 ....Acyclic
160 .....Two carboxamido carbonyls having no carboxamido nitrogen between the carbonyls
161 ...Substituent Q contains benzene ring
162 ....Sulfur in substituent Q
163 ....Nitrogen in substituent Q
164 .....The substituent nitrogen is an amino nitrogen attached indirectly to a ring by acyclic nonionic bonding
165 ......Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
166 .....Nitro in substituent Q
167 .....Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
168 .....Ring in a substituent E
169 ....Carbonyl in substituent Q
170 ....Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
171 .....Plural rings in substituent Q
172 ......Polycyclo ring system in substituent Q
173 ....Q contains an ortho-hydroxy naphthyl bicyclo ring system, or its partially hydrogenated form, bonded directly to the carbonyl (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
174 ......Ring in a substituent E
175 .....Oxygen, bonded directly to the benzene ring, is part of an acyclic chain between the benzene ring and the carbonyl
176 .....Benzene ring bonded directly to the carbonyl
177 ......Hydroxy bonded directly to the benzene ring (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
178 ....Preparing directly by halogenation
179 ....Benzene ring in a substituent E
180 ....Polycyclo ring system in substituent Q
181 ....Two rings bonded directly to the same carbon in substituent Q
182 ....Substituent Q is monocyclic
183 .....The ring is bonded directly to the carbonyl
184 ......Benzene ring in a substituent E

ORGANIC COMPOUNDS (Class 532, Subclass 1)

.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)

..Carboxamides (i.e., Q-CO-HNH, wherein Q is a substituent having carbon bonded directly to the carbonyl or is hydrogen and wherein any substituent replacing one or both hydrogens shown will be referred to as E)

...Substituent Q contains benzene ring

....Substituent Q is monocyclic

.....The ring is bonded directly to the carbonyl

......Benzene ring in a substituent E

185 ....Ring or polycyclo ring system in substituent E is attached indirectly to the carboxamide nitrogen or to an amino nitrogen in substituent E by acyclic nonionic bonding

186 ......Oxygen in a substituent E

187 ......Acyclic carbon to carbon unsaturation in a substituent E

188 ...Plural alicyclic rings in substituent Q

189 ...Five-membered ring in substituent Q

190 ...Three-membered ring in substituent Q

191 ...Alicyclic ring and an atom other than oxygen, carbon, or hydrogen in substituent Q

192 ...Substituent Q is acyclic

193 ....Nitrogen in substituent Q

194 .....Benzene ring in a substituent E

195 ......Two rings bonded directly to the same carbon in a substituent E

196 ......A ring or polycyclo ring system in a substituent E is attached indirectly to the carboxamide nitrogen or to an amino nitrogen in substituent E by acyclic nonionic bonding

197 .....The compound is acyclic

198 ......The carboxamide nitrogen is unsubstituted

199 ....Carbonyl in substituent Q

200 .....Benzene ring in a substituent E

201 ....Hydroxy, bonded directly to carbon, or ether in substituent Q (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

202 .....Benzene ring in a substituent E

203 .....Hydroxy, bonded directly to carbon, or ether in an acyclic substituent E (Hof -OH may be replaced by a substituted or unsubstututed ammonium ion or a Group IA or IIA light metal)

204 ....Carbon to carbon unsaturation in substituent Q

205 .....Process which includes forming the unsaturation

206 .....Purification or recovery

207 .....Benzene ring in a substituent E

208 .....Hydroxy, bonded directly to carbon, or ether in an acyclic substituent E (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

209 ....Halogen, bonded directly to carbon, in substituent Q

210 .....Ring in a substituent E

211 ......Benzene ring in a substituent E

212 ....A ring or polycyclo ring system in a substituent E is attached indirectly to the carboxamide nitrogen or to an amino nitrogen in substituent E by acyclic nonionic bonding

213 ....Nitro and hydroxy, bonded directly to carbon, or ether in the substituent E (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

214 ....The compound is monocyclic

215 ....Q is hydrogen or a lower saturated alkyl substituent

216 .....Purification or recovery

217 .....Ring in a substituent E

218 ......Benzene ring in a substituent E

219 ....A ring or polycyclo ring system in a substituent E is attached indirectly to the carboxamide nitrogen or to an amino nitrogen in substituent E by acyclic nonionic bonding

220 ....Amino nitrogen in the substituent E (i.e.,plural amino nitrogens containing)

221 ....Plural rings in a substituent E

222 ....Polycyclo ring system in a substituent E

223 ....Hydroxy, bonded directly to carbon, or ether in a substituent E (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

224 .....Hydroxy, bonded directly to carbon, ether or nitrogen in a substituent E (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)

225 ..Amidines (i.e., HN=CH-HNH, wherein substition may be made for hydrogen only)

226 ...Amidino hydrazines or hydrazones (i.e., HNH-N=CH-HNH or HN=CH-NH-HNH, wherein substitution may be made for hydrogen only)

227 ....Guanyl hydrazines or hydrozones (i.e., HNH-N=C(-HNH)-HNH or HN=C(-HNH)-NH-HNH, wherein substitution may be made for hydrogen only)

228 .....Benzene ring containing

229 ...Amidoximes (i.e., HON=CH-HNH, wherein substitution may be made for hydrogen only)

230 ...Guanidines (i.e., HN=C(-HNH)-HNH, wherein substitution may be made for hydrogen only)

231 ....Preparing from thioureas

232 ....Preparing by reacting cyanogen halide with amino nitrogen containing compound

233 ....Biguanides (i.e., HN=C(-HNH)-NH-(HNH-)C=NH, wherein substitution may be made for hydrogen only)

234 .....Benzene ring containing

235 ......Plural rings containing

236 ....Polyguanidines

237 ....Benzene ring containing

238 .....Benzene ring bonded directly to guanidine nitrogen

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Amidines (i.e., HN=CH-HNH, wherein substition may be made for hydrogen only)
...Guanidines (i.e., HN=C(-HNH)-HNH, wherein substitution may be made for hydrogen only)
....Benzene ring containing
.....Benzene ring bonded directly to guanidine nitrogen
239 ......Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
240 ....Acyclic
241 .....Guanidine per se or salt thereof
242 ......Guanidine nitrate
243 ...Polyamidines
244 ...Benzene ring containing
245 ....N(prime)-aryl formimidines (i.e., benzene-N=CH-HNH, wherein substitution may be made for hydrogen, including those bonded directly to the benzene ring only)
246 ....Additional nitrogen attached indirectly to amidine nitrogen by nonionic bonding
247 ....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
248 ..Containing nitrogen double bonded directly to carbon
249 ...Azines (i.e., HCH=N-N=HCH, wherein substitution may be made for hydrogen)
250 ...Hydrazones (i.e., HCH=N-HNH, wherein substitution may be made for hydrogen only)
251 ....Benzene ring containing
252 ...Carbodiimides (i.e., HN=C=NH, wherein substitution may be made for hydrogen only)
253 ...Oximes (HCH=N-OH, i.e., wherein substitution may be made for hydrogen only)
254 ....O-esters (i.e., H of oxime -OH replaced by ester forming group)
255 .....O-carbamoyl
256 ....O-ethers (i.e., H of oxime -OH replaced by ether forming group)
257 .....Polycyclo ring system
258 ....Oxygen double bonded, or hydroxy or ether oxygen bonded directly to an alpha carbon (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group Ia or IIA light metal)
259 ....Preparing directly by reacting carbonyl with hydroxylamine or salt thereof
260 ....Preparing directly by reducing nitronic acid salt
261 ....Preparing directly by reducing nitro group
262 ....Preparing directly by oxidizing a hydroxyl amine
263 ....Preparing directly by nitrosation of olefin
264 ....Purification or recovery
265 ....Benzene ring containing
266 .....The oxime carbon is acyclic and has two rings bonded directly thereto
267 ....Six-membered alicyclic ring double bonded directly to the oxime nitrogen
268 ....Acyclic
269 ...Nitrogen double bonded and two rings bonded directly to the same acyclic carbon (e.g., auramines, etc.)
270 ...Polycyclo ring system
271 ...Aldimines or ketimines which contain benzene ring (i.e., HCH=NH, wherein substitution may be made for hydrogen only but a hydrogen or carbon must be bonded directly to the carbon)
272 ....Benzylidene imines (i.e., Q-benzene-CH=NH, wherein Q is a substituent or hydrogen and substitution may be made for hydrogen only)
273 .....Substituent Q contains nitrogen bonded directly to carbon
274 .....Substituent Q contains hydroxy, bonded directly to carbon, or ether (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
275 .....Q is hydrogen only
276 ....Hydroxy, bonded diretly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
277 ....Unsubstituted phenyl bonded directly to the aldimine or ketimine nitrogen
278 ...Aldimines or ketimines which are acyclic
279 ....Carbon to carbon unsaturation containing
280 ..Phenol or thiophenol addition salts
281 ..Quaternary ammonium containing
282 ...Benzene ring containing
283 ....Two rings bonded directly to the same carbon
284 ....Nitro or nitroso, bonded directly to carbon containing
285 ....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
286 .....Polyquaternary ammonium
287 .....The hydroxy or ether oxygen is bonded directly to a ring
288 ....Acyclic carbon to carbon unsaturation containing
289 ....Halogen attached indirectly to the ammonium nitrogen by nonionic bonding
290 ....Polyquaternary ammonium
291 ...Acyclic
292 ....Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
293 .....Choline, beta-alkylcholines, ethers thereof, and salts thereof
294 .....Polyoxyalkylene
295 ....Polyquaternary ammonium
296 ....Processes
297 ..Amine oxides
298 ...Processes
299 ...Benzene ring containing

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
300 ..Nitroxides, oxyamines or hydroxylamines (i.e., HNH-O or HNH-OH, wherein substitution may be made for hydrogen only, including O-ether and O-ester derivatives)
301 ...Acyclic
302 ..Racemization per se or with resolution of optical isomers
303 ..Resolution per se of optical isomers
304 ...Of benzene ring containing compounds
305 ..Benzene ring containing
306 ...Alicyclic ring or ring system, having plural amino nitrogens attached directly or indirectly thereto by acyclic nonionic bonding, attached indirectly to an aryl ring or ring system by acyclic nonionic bonding
307 ...Amino nitrogen and a ring bonded directly to the same ring, and any other amino nitrogen in the compound is bonded directly to one of the rings
308 ....Polycyclo ring system
309 ....Benzidines
310 ...Hydrazines
311 ....Symmetrical diaryl hydrazines
312 .....Preparing directly by reducing nitrogen containing group with metal and metallic hydroxide
313 ....Aralkyl hydrazines
314 ....Processes
315 ...Two aryl rings or ring systems bonded directly to the same carbon
316 ....Amino nitrogen attached to the carbon by an acyclic carbon or chain
317 .....Oxygen or sulfur is bonded directly to the carbon and is part of the chain
318 ......Processes
319 .....Oxygen, carbonyl or carbon to carbon unsaturation in the chain; or ether, carbonyl, carbon to carbon unsaturation or hydroxy, bonded directly to carbon, is part of a substituent bonded directly to the acyclic carbon or chain (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
320 .....Hydroxy or ether oxygen bonded directly to the carbon (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
321 ....Amino nitrogen bonded directly to the carbon
322 ....The carbon is a ring member of an alicyclic ring or ring system
323 ....Amino nitrogen attached to aryl ring or ring system by an acyclic carbon or chain
324 .....Oxygen or sulfur is bonded directly to the aryl ring or ring system and is part of the chain
325 ......Additional similar chain
326 .....Amino nitrogen is bonded directly to the aryl ring or ring system and is part of the chain
327 ....Benzhydrols or benzthiols (i.e., -OH or -SH bonded directly to the carbon)
328 ....Benzophenones or benzothiophenones (i.e., the carbon is part of a carbonyl or thiocarbonyl)
329 .....Processes
330 ....Diamino diphenyl methanes (i.e., two phenyls, each having amino nitrogen bonded directly thereto, bonded directly to the carbon)
331 .....Preparing by reacting carbonyl containing compound with amino nitrogen containing compound
332 ......Solid catalyst utilized
333 ......Hydrochloric acid utilized
334 .....Purification or recovery
335 .....Halogen or sulfur attached directly or indirectly to the carbon by nonionic bonding
336 ...Amino nitrogen attached to aryl ring or ring system by an acyclic carbon or chain
337 ....The aryl ring or ring system is bonded directly to another ring
338 .....The other ring is alicyclic
339 ......Double bonded oxygen, ether or hydroxy, bonded directly to carbon, is attached directly or indirectly to the alicyclic ring by acyclic nonionic bonding (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
340 ....Sulfur is part of the chain or is attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding with no amino nitrogen between the sulfur and the aryl ring or ring system
341 .....The sulfur is bonded directly to the aryl ring or ring system
342 ....Carbonyl is part of the chain or is attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding with no amino nitrogen between the sulfur and the aryl ring or ring system
343 .....Processes
344 .....Hydroxy or ether oxygen bonded directly to the aryl ring or ring system
345 .....Halogen bonded directly to the aryl ring or ring system
346 ....Ether oxygen is part of the chain
347 .....The ether oxygen is bonded directly to the aryl ring or ring system
348 ......Hydroxy, bonded directly to carbon, or ether oxygen is attached directly or indirectly to the chain by acyclic nonionic bonding with no amino nitrogen between the hydroxy or attached ether oxygen and the aryl ring or ring system (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
349 ....Alkanol group only between the amino nitrogen and the ether oxygen which is bonded directly to the aryl ring or ring system (i.e., aryloxy alkanol amines)
350 ....Nitrogen bonded directly to the aryl ring or ring system
351 ....Halogen bonded directly to the aryl ring oring system
352 ......The aryl ring or ring system is polycyclo

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Benzene ring containing
...Amino nitrogen attached to aryl ring or ring system by an acyclic carbon or chain
....Ether oxygen is part of the chain
.....The ether oxygen is bonded directly to the aryl ring or ring system
353 ......Hydrogen or acyclic hydrocarbyl substituents only bonded directly to the part of the chain between the ether oxygen and amino nitrogen
354 ....The part of the chain between the ether oxygen and amino nitrogen consists of two unsubstituted saturated carbons
355 ....Hydroxy, bonded directly to carbon, or ether oxygen attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding with no amino nitrogen between the hydroxy or ether oxygen and the aryl ring or ring system (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
356 .....Preparing directly by reduction, other than by reductive amination
357 ......By direct hydrogenation
358 ....Group VIII noble metal containing catalyst utilized
359 .....Preparing directly by hydrolysis
360 .....Additional hydroxy, bonded directly to carbon, or ether oxygen attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding with no amino nitrogen between the additional droxy or ether oxygen and the aryl ring or ring system (H Of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
361 .....Plural hydroxy groups bonded directly to the aryl ring or ring system (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
362 ......Four or more substituents on the aryl ring or ring system
363 .....Beta hydroxy phenethylamines (i.e., hydroxy and the benzene ring are bonded directly to the same carbon of the chain which consists of two carbons; H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
364 ......Acyclic hydrocarbyl alpha substituent
365 ......Hydroxy or ether oxygen bonded directly to the aryl ring or ring system (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
366 ....Halogen attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding with no amino nitrogen between the halogen and the aryl ring or ring system
367 ....The chain contains nitrogen between the aryl ring or ring system and amino nitrogen
368 .....Ethylene diamines
369 ......Mono ethylene diamines
370 ....Plural aryl rings, which are not part of the same polycyclo ring system, or ring systems containing
371 .....Methylene diamines
372 ....Additional amino nitrogen attached directly or indirectly to the acyclic carbon or chain by acyclic nonionic bonding
373 ....Alpha aralkyl benzyl amines
374 ....The chain consists of two or more carbons which are unsubstituted or have acyclic hydrocarbyl substituents only
375 .....Forming amine group directly by reduction, other than by reductive amination
376 .....Forming directly by amination which replaces halogen
377 .....Preparing directly by hydrolysis
378 .....The aryl ring or ring system is polycyclo
379 ......Tricyclo ring system
380 ....The chain contains carbon to carbon unsaturation
381 .....Phenethylamines having alpha alkyl substituent
382 .....Phenethylamines having beta alkyl substituent
383 .....The chain contains carbon to carbon unsaturation
384 ....The aryl ring or ring system and amino nitrogen are bonded directly to the same acyclic carbon, which carbon additionally has only hydrogen or acyclic hydrocarbyl substituents bonded directly thereto
385 .....Forming amine group directly by reduction, other than by reductive amination
386 .....Forming directly by amination which replaces halogen or forming amine group directly by hydrolysis
387 .....The aryl ring or ring system is polycyclo
388 .....Plural amino methylene groups bonded directly to the same benzene ring
389 .....Benzyl amines having hydroxy or ether oxygen bonded directly to the benzene ring (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
390 ......Ortho hydroxy benzyl amines
391 .....Benzyl amines wherein the benzene ring has no other substituents
392 ......Acyclic hydrocarbyl group bonded directly to the methylene carbon
393 ...Preparing directly from ester other than by reduction of nitrile
394 ...Preparing directly from organic acid, acid halide or salt
395 ...Preparing directly by amination
396 ....Of carbonyl containing compound
397 .....By reductive amination

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Benzene ring containing
...Preparing directly by amination
....Of carbonyl containing compound
.....By reductive amination
398 ......Group VIII noble metal containing catalyst utilized
399 ....Of ether or alkylene oxide
400 ....Of halohydrin
401 ....Of acyclic hydroxy containing compound
402 ....By replacing hydroxy
403 .....In compound having plural hydroxys bonded directly to benzene ring
404 ....Of halogen containing compound
405 .....Which also contains benzene ring
406 ......And nitro
407 ......Preparing primary amines
408 ....Of hydrocarbon
409 ...Preparing directly by ring alkylation or dealkylaton
410 ...Preparing directly by nitrosation
411 ...Preparing directly by nitration
412 ...Preparing of halogen containing compound directly by halogenation or dehalogenation
413 ...Preparing directly from hetero ring containing compound
414 ...Preparing directly from an amide (e.g., preparing directly from a sulfenamide, nitrosamine, carboxamide, thiourea, etc.)
415 ...Forming amine group directly by reduction
416 ....Of nitro or nitroso
417 .....Preparing compound which contains halogen bonded directly to carbon
418 .....Preparing compound which contains hydroxy, bonded directly to carbon, or ether
419 .....With initial nitration step
420 .....By direct hydrogenation
421 ......Group VI metal containing catalyst utilized
422 ......Group VIII metal containing catalyst utilized
423 ....Group VIII noble metal containing catalyst utilized
424 ...Separating isomers
425 ....By salt formation
426 ...Polycyclo ring system
427 ....Tricyclo ring system
428 ....Bicyclo ring system
429 .....Naphthyl ring system and benzene ring bonded directly to the same nitrogen
430 ...Two benzene rings bonded directly to the same oxygen, sulfur, or polysulfide chain
431 ...Two carbocyclic rings, at least one of which is benzene, bonded directly to the same nitrogen
432 ....Condensation products and processes of acyclic ketone and compound which contains two benzene rings bonded directly to the same nitrogen
433 ....Two benzene rings bonded directly to the same nitrogen
434 .....Additional amino nitrogen containing
435 .....Preparing directly by condensing a primary amine
437 ...Purification or recovery
438 ....By salt formation
439 ....Of compound having amino nitrogen and hydroxy bonded directly to the benzene ring (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
440 ...Sulfur attached indirectly to the amino nitrogen by nonionic bonding
441 ...Nitro or nitroso, bonded directly to carbon, containing
442 ...Halogen, bonded directly to carbon, containing
443 ...Hydroxy, bonded directly to carbon, or ether containing (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
444 ..Preparing alicyclic ring containing compound directly by isomerization
445 ..Preparing alicyclic ring containing compound directly by amination
446 ...Of aldehyde or ketone containing compound
447 ...Of hydroxy containing compound
448 ..Forming amine group of alicyclic ring containing compound directly by reduction
449 ...Including hydrogenating benzene ring
450 ..Preparing alicyclic ring containing compound directly by hydrogenating benzene ring
451 ...Plural amino nitrogens containing
452 ..Plural alicyclic rings, which are not part of the same polycyclo ring system, or ring systems bonded directly to the same carbon
453 ..Alicyclic ring or ring system and amino nitrogen are attached indirectly by an acyclic carbon or chain
454 ...The chain consists of two or more carbons which are unsubstituted or have acyclic hydrocarbyl substituents only
455 ...The alicyclic ring and amino nitrogen are bonded directly to the same acyclic carbon, which carbon additionally has only hydrogen or acyclic hydrocarbyl substituents bonded directly thereto
456 ....Polycyclo ring system
457 ..Plural alicyclic rings
458 ...Polycyclo ring system
459 ....Tricyclo ring system
460 ....Bicyclo ring system
461 ..Alicyclic ring and plural amino nitrogens containing
462 ..Cyclohexyl ring containing
463 ..Acyclic
464 ...Aminimine or hydrazine containing
465 ....Preparing directly by reducing a nitrosamine
466 ....Preparing directly by condensing a haloamine
467 ...Preparing directly utilizing carbon monoxide
468 ...Preparing directly from ester, organic acid or salt, other than by reduction of nitrile
469 ...Preparing directly by amination
470 ....By transamination
471 ....Of aldehyde or ketone containing compound
472 .....By reductive amination
473 ......Of aldehyde containing compound
474 ....Of ether containing compound
475 .....Of an alkylene oxide

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.AMINO NITROGEN CONTAINING (E.G., UREA, SULFONAMIDES, NITROSAMINES, OXYAMINES, ETC., AND SALTS THEREOF)
..Acyclic
...Preparing directly by amination
....Of ether containing compound
.....Of an alkylene oxide
476 ......Of an epihalohydrin
477 ......Producing monohydroxy alkyl amines
478 ....Of hydroxy containing compound
479 .....Catalyst utilized
480 ......Group VI or VIII metal containing catalyst utilized
481 ....Of halogen containing compound
482 .....Of an alkylene dihalide
483 .....Of compound which contains an atom other than carbon, hydrogen, and halogen
484 .....Of compound which contains carbon to carbon unsaturation
485 ....Of compound which contains carbon to carbon unsaturation
486 ...Preparing directly by dealkylation
487 ...Preparing directly from hetero ring containing compound
488 ...Preparing directly from an amide (e.g., preparing directly from a carboxamide, etc.)
489 ...Forming amine group directly by reduction
490 ....Of cyano
491 .....Of plural cyanos
492 ......Preparing hexamethylene diamine
493 .....Preparing a primary monoamine
494 ....Of nitro or nitroso
495 .....The nitro or nitroso is in a compound which contains hydroxy, bonded directly to carbon, or ether
496 ...Preparing directly by halogenation
497 ...Purification or recovery
498 ....Of an alkylene polyamine
499 ....Separating primary, secondary, or tertiary amines from each other
500 ...Sulfur attached indirectly to the amino nitrogen by nonionic bonding
501 ....Thioether containing
502 ...Aldehyde or ketone containing
503 ...Hydroxy, bonded directly to carbon, or ether containing (H of -Oh may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
504 ....Polyether
505 .....Polyoxyalkylene
506 ....Polyhydroxy (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
507 .....Plural hydroxys in the same substituent on the amino nitrogen (H of -OH may be replaced by a substituted or unsubstituted ammonium ion or a Group IA or IIA light metal)
508 ....Monoether
509 ...Carbon to carbon unsaturation containing
510 ...Halogen, bonded directly to carbon, containing
511 ...Plural amino nitrogens containing
512 ....Three or more amino nitrogens containing

CLASS 568 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 568 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
1 .BORON CONTAINING
2 ..Phosphorus containing
3 ..Plural borons containing
4 ...Ten or more borons containing (e.g., decaborane, etc.)
5 ....Sulfur, oxygen, halogen or Group IA or IIA light metal containing
6 ..Sulfur, oxygen, halogen or Group IA or IIA light metal containing
7 ..Tri-acyclic-hydrocarbyl boron
8 .PHOSPHORUS CONTAINING
9 ..Phosphonium derivative
10 ...Plural phosphori containing
11 ...Sulfur or oxygen containing
12 ..Ring phosphorus containing
13 ..Sulfur or oxygen containing
14 ...Sulfur or oxygen bonded directly to phosphorus
15 ....And sulfur or oxygen bonded indirectly to phosphorus
16 ..Halogen containing
17 ..Benzene ring containing
18 .SULFUR CONTAINING
19 ..With preservative or stabilizer
20 ..Thiocarbonyl containing (e.g., thioketone containing, etc.)
21 ..Sulfur bonded directly to sulfur (e.g., disulfides, etc.)
22 ...Oxygen containing
23 ....Sulfur or oxygen bonded directly to a ring
24 ...Halogen containing
25 ...Benzene ring containing
26 ...Preparing by reacting a thiol or mercaptide (i.e., reactant contains -SH or -SM where M is a Group IA or IIA light metal)
27 ..Oxygen bonded directly to sulfur (e.g., sulfoxides, etc.)
28 ...Plural oxygens bonded directly to the same sulfur (e.g., sulfones, etc.)
29 ....Thiol or thioether containing
30 ....Nitrogen containing
31 ....Carbonyl containing (e.g., ketone containing, etc.)
32 ....Oxy containing
33 .....Oxy bonded directly to a ring
34 ....Plural rings containing
35 ....Plural halogens containing
36 ...Nitrogen or plural sulfurs containing
37 ...Carbonyl or oxy containing (e.g., ketone containing, etc.)
38 ..Thioethers
39 ...Oxygen containing
40 ....Group IA or IIA light metal containing
41 ....Carbonyl containing (e.g., aldehyde containing, etc.)
42 .....Ketone containing
43 ......Oxy or halogen containing
44 ....Nitrogen containing
45 ....Plural oxygens containing
46 .....Polyhydroxy
47 ......Plural rings containing
48 ....Plural rings bonded directly to the same sulfur
49 .....Plural rings containing
50 .....Thiol or plural thioethers containing
51 ....Oxygen bonded directly to a ring
52 .....Plural rings containing
53 ......Plural rings bonded directly to the same sulfur
54 .....Sulfur bonded directly to a ring
55 ....Hydroxy containing
56 ...Halogen containing
57 ...Thiol or plural thioethers containing
58 ...Plural rings containing
59 ...Acyclic
60 ....Symmetrical (e.g., dimethyl sulfide, etc.)
61 ..Thiol or mercaptide containing (i.e., -SH or -SM containing where M is a Group IA or IIA light metal)
62 ...Oxygen containing
63 ....Carbonyl containing (e.g., ketone containing, etc.)
64 .....Oxygen bonded directly to a ring
65 ...Halogen containing
66 ...Polythiol
67 ...Benzene ring containing
68 ....Preparing by utilizing halogen, heavy metal, or aluminum containing material
69 ...Acyclic
70 ....Preparing by reacting hydrogen sulfide or a metal hydrosulfide
71 .....And an organic hydroxy containing reactant (H of -OH may be replaced by a Group IA or IIA light metal)
72 .....And a reactant having carbon to carbon unsaturation
73 ......Boron, phosphorus, or silicon containing material utilized
74 ..Halogen containing
75 ..Oxygen containing
76 ...Nitro or nitroso containing
77 ..Ring containing
300 .OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
301 ..Ketenes (e.g., halogenated ketenes, etc.)
302 ...Ketene per se (i.e., HCH=C=O)
303 ..Ketones
304 ...With preservative or stabilizer
305 ...Nitrogen containing
306 ...Benzene ring containing
307 ....Acyclic
308 ...Benzene ring containing
309 ....Processes
310 .....Isomerization
311 .....Carbon monoxide or peroxy containing reactant
312 .....Aldehyde or ketone reactant
313 ......Aldehyde reacted with ketone
314 ......Reactant contains -COO- group
315 ......Oxy containing reactant
316 ......Halogen containing reactant
317 ......Alicyclic unsaturated or acyclic unsaturated hydrocarbon reactant
318 ......Gaseous hydrogen reactant or Group IA or IIA light metal containing material utilized
319 .....Reactant contains -COO- group
320 .....Oxidation of organic compound utilizing gaseous oxygen
321 ......Plural rings in ketone prepared
322 .....Oxy containing reactant
323 .....Halogen containing reactant (e.g., dehydrohalogenation, etc.)
324 .....Purification or recovery
325 ....Plural rings containing
326 .....Polycyclo ring system

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Ketones
...Benzene ring containing
....Plural rings containing
.....Polycyclo ring system
327 ......Bicyclo ring system
328 ....Naphthyl ring system
329 .....Alicyclic ring containing
330 ......Five-membered alicyclic ring
331 .....Carbonyl bonded directly to benzene ring
332 ......Two benzene rings bonded directly to the same carbonyl (i.e., benzophenones)
333 ....Oxy containing
334 ......Chalcones
335 ....Carbonyl bonded directly to benzene ring (i.e., acetophenones)
336 .....Oxy containing
337 ......Oxy bonded directly to benzene ring
338 ...Processes of preparing, purifying, or recovering alicyclic ring containing ketones
339 ....Camphor per se or salt thereof
340 .....Purification or recovery
341 ....Isomerization
342 ....Carbon monoxide or peroxy containing reactant
343 ....Aldehyde or ketone reactant
344 .....Oxidation utilizing gaseous oxygen
345 .....Aldehyde reacted with ketone
346 .....Reactant contains -COO- group
347 .....Oxy containing reactant
348 .....Halogen containing reactant
349 .....Acyclic unsaturated hydrocarbon reactant
350 .....Gaseous hydrogen reactant or Group IA or IIA light metal containing material utilized
351 .....Nitrogen containing material utilized
352 .....Boron, phosphorus, or sulfur containing material utilized
353 .....Ketone reacted with ketone
354 ....Reactant contains -COO- group
355 .....Plural -COO- groups in the reactant
356 .....Carbon to carbon unsaturation in the reactant
357 ....Oxidation of organic compound utilizing gaseous oxygen
358 .....Plural stages each having oxidation
359 .....Boron containing material utilized
360 .....Heavy metal containing material utilized
361 ....Oxy containing reactant
362 .....Phenol containing reactant
363 .....Inorganic oxygen containing reactant
364 ....Halogen containing reactant
365 ....Unsaturated hydrocarbon reactant
366 ....Purification or recovery
367 ...Plural alicyclic rings containing
368 ....Polycyclo ring system
369 .....Tetracyclo ring system (e.g., homo steroids, etc.)
370 ......The tetracyclo ring system consists of two five-membered and two six-membered cyclos (e.g., B-nor-testosterone, etc.)
371 ....The six-membered rings are fused to each other (e.g., A-nor-progesterone, etc.)
372 ......The tetracyclo ring system consists of four six-membered cyclos (e.g., D-homo-androstane, etc.)
373 .....Tricyclo ring system
374 .....Bicyclo ring system
375 ...Containing alicyclic ring having at least seven members
376 ...Six-membered alicyclic ring containing
377 ....Unsaturation in the ring
378 .....2,6,6-Trialkylcyclohexenyl (e.g., vitamin A derivatives, etc.)
379 ...Five-membered alicyclic ring containing
380 ....Halogen containing
381 ...Four-membered alicyclic ring containing
382 ...Acyclic
383 ....Processes
384 .....Isomerization
385 .....Peroxy containing reactant
386 .....Ring containing reactant
387 .....Carbon monoxide reactant
388 .....Aldehyde or ketone reactant
389 ......Oxidation of organic compound utilizing gaseous oxygen
390 ......Aldehyde reacted with ketone
391 ......Oxy containing reactant
392 ....The oxy and the aldehyde or ketone are in the same reactant
393 ......Halogen containing reactant
394 ....The halogen and the aldehyde or ketone are in the same reactant
395 ......Acyclic unsaturated hydrocarbon reactant
396 ......Gaseous hydrogen reactant or Group IA or IIA light metal containing material utilized
397 .....Reactant contains -COO- group
398 ......Carbon to carbon unsaturation in the reactant
398.8 .....Oxidation of hydrocarbon mixtures
399 .....Oxidation of organic compound utilizing gaseous oxygen
400 ......Unsaturated acyclic hydrocarbon reactant
401 ....Ag, Au, Pd, Pt, Rh, Ir, Ru, or Os containing catalyst utilized
402 ......Hydroxy containing reactant
403 .....Oxy containing reactant
404 ......Phosphorus, sulfur, or halogen containing material utilized
405 ......Ether or polyhydroxy containing compound utilized
406 ......Aluminum or silicon containing material utilized
407 .....Halogen containing reactant
408 .....Carbon to carbon unsaturation in reactant
409 ......Acetylenic unsaturation in the reactant
410 .....Purification or recovery
411 ......Acetone or haloacetone purified or recovered
412 ....Plural carbonyls containing
413 .....Oxy containing
414 ....Oxy or peroxy containing
415 .....Carbon to carbon unsaturation containing
416 .....Halogen containing
417 ....Carbon to carbon unsaturation containing
418 .....Halogen containing
419 ....Halogen containing
420 ..Aldehydes
421 ...With preservative or stabilizer

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Aldehydes
...With preservative or stabilizer
422 ....Formaldehyde with preservative or stabilizer
423 ...Nitrogen containing
424 ....Benzene ring containing
425 ...Benzene ring containing
426 ....Processes
427 .....Isomerization
428 .....Carbon monoxide reactant (e.g., carbonylation, etc.)
429 ......Hydroformylation by reacting ethylenically unsaturated compound, carbon monoxide and gaseous hydrogen
430 .....Ozone reactant or peroxy containing reactant
431 .....Oxidation of organic compound utilizing gaseous oxygen
432 ......Oxy containing aldehyde formed
433 .....Aldehyde reactant
434 ......Gaseous hydrogen reactant
435 .....Reactant contains -COO- group
436 .....Nitrogen containing material utilized
437 .....Halogen containing reactant
438 .....Purification or recovery
439 ....Polycyclo ring system
440 .....Bicyclo ring system
441 ......Oxy containing
442 ....Oxy containing
443 ...Preparing alicyclic ring containing aldehyde by isomerization
444 ...Preparing alicyclic ring containing aldehyde by hydroformylation by reacting ethylenically unsaturated compound, carbon monoxide, and gaseous hydrogen only
445 ...Polycyclo-alicyclic ring system
446 ...Unsaturated alicyclic ring containing
447 ....2,6,6-Trialkylcyclohexenyl (e.g., vitamin A derivatives, etc.)
448 ...Acyclic
449 ....Processes
450 .....Isomerization
451 .....Hydroformylation by reacting ethylenically unsaturated compound, carbon monoxide, and gaseous hydrogen
452 ......Dimer produced
453 ......Plural stages each having hydroformylation
454 ......Group VA element (N, P, As, Sb, or Bi) containing material utilized (e.g., arsenic containing ligand utilized, etc.)
455 ....Nitrogen containing material utilized
456 ......Metal or metal containing compound filtered, precipitated, or deposited
457 .....Formaldehyde polymer reactant
458 .....Aldehyde reactant
459 ......Carbon to carbon unsaturation in the aldehyde prepared
460 ....Oxy or -COO- containing reactant
461 ....Aldehyde reacted with aldehyde
462 ......Gaseous hydrogen reactant
463 ......Aldehyde reacted with aldehyde (e.g., aldol condensation, etc.)
464 ....Aldehyde reacted with diverse aldehyde
465 ......Oxy or -COO- containing reactant
466 ......Hydrogen halide or elemental halogen reactant
467 .....Acetylene reactant
468 ......Mercury containing catalyst utilized
469 .....Ozone reactant
469.9 .....Oxidation of hydrocarbon mixtures
470 .....Oxidation of organic compound utilizing gaseous oxygen
471 ......Organic hydroxy containing reactant
472 ....Methanol reactant
473 ....Silver containing catalyst utilized
474 ....Molybdenum containing catalyst utilized
475 ......Acyclic hydrocarbon reactant
476 ....Carbon to carbon unsaturation in the reactant and in the aldehyde prepared
477 ....Antimony or tin containing catalyst utilized
478 ....Ag, Au, Pd, Pt, Rh, Ir, Ru, or Os containing catalyst utilized
479 ....Molybdenum containing catalyst utilized
480 ....Catalyst contains phosphorus
481 ....Selenium or tellurium containing material utilized
482 ....Methane reactant
483 .....Hetero ring containing reactant
484 .....Reactant contains -COO- group
485 .....Oxy or peroxy containing reactant
486 ......Polyoxy containing reactant
487 ......Methanol or ethanol reactant
488 ......Halogen containing reactant
489 ......Ag, Au, Pd, Pt, Rh, Ir, Ru, or Os containing material utilized
490 .....Halogen containing reactant
491 .....Water utilized as reactant
492 .....Purification or recovery
493 ......Of formaldehyde per se
494 ....Plural carbonyls containing
495 ....Halogen containing
496 ....Oxy containing
497 .....Polyoxy
557 ..Oxonium (e.g., beryllium hydride etherate, etc.)
558 ..Peroxy bonded directly to carbon
559 ...With preservative or stabilizer
560 ...Halogen containing
561 ...Plural peroxy groups
562 ....Purification or recovery
563 ....Additional oxygen containing
564 ....Hydroperoxy containing
565 .....Preparing by oxidation utilizing gaseous oxygen
566 ...Plural carbonyl groups bonded directly to the peroxy group (e.g., acetyl peroxide, etc.)
567 ...Oxy containing
568 ...Hydroperoxy containing
569 ....Preparing by oxidation utilizing gaseous oxygen
570 .....Alicyclic hydroperoxide produced
571 .....Acyclic hydroperoxide produced
572 .....Pretreatment of material oxidized
573 .....Initiator, accelerator, or catalyst utilized
574 ......Metal containing
575 ....Heavy metal
576 ....Purification or recovery
577 ...Preparing by oxidation utilizing gaseous oxygen

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Peroxy bonded directly to carbon
578 ...Preparing by reacting an organic hydroperoxide and an organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
579 ..Ethers
580 ...With preservative or stabilizer
581 ....Acyclic ether preserved or stabilized
582 .....Nitrogen containing preservative or stabilizer
583 ...Nitrogen containing
584 ....Ether oxygen bonded directly to benzene ring
585 .....Plural rings containing
586 ......Polyoxy
587 .....Polyoxy
588 .....Halogen containing
589 ....Acyclic
590 .....Plural oxygens bonded directly to the same carbon (e.g., acetals, ketals, orthoesters, orthocarbonates, etc.)
591 ...Plural oxygens bonded directly to the same carbon (e.g., acetals, ketals, orthoesters, orthocarbonates, etc.)
592 ....Benzene ring containing
593 .....Plural oxyalkylene groups bonded directly to each other
594 ....Acyclic
595 .....At least three oxygens bonded directly to the same carbon (e.g., orthoesters, etc.)
596 .....Carbon to carbon unsaturation containing
597 ......Acetylenic unsaturation
598 ......At least three oxygens containing
599 .....One of the plural oxygens is in a hydroxy group (i.e., hemiacetals and hemiketals, wherein H of -OH may be replaced by a Group IA or IIA light metal)
600 .....At least three oxygens containing
601 ......Plural oxyalkylene groups bonded directly to each other
602 ....Hydroxy bonded directly to each end of a chain which is polyoxymethylene only (e.g., paraformaldehyde, etc., wherein H of -OH may be replaced by a Group IA or IIA light metal)
603 ......Plural acetal or ketal groups (e.g., tetraacetals, etc.)
604 .....Halogen containing
605 .....Ion exchange resin or sulfuric acid utilized
606 ...Plural oxyalkylene groups bonded directly to each other
607 ....Benzene ring containing
608 .....Ether oxygen bonded directly to a benzene ring
609 ......Plural rings containing
610 ......Halogen containing
611 .....Plural rings containing
612 ....Polycyclo alicyclic ring system
613 ....Acyclic
614 .....Halogen containing
615 ......Fluorine
616 .....Carbon to carbon unsaturation containing
617 .....Polytetramethylene glycols
618 .....Preparing from organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
619 ......From polyhydroxy containing compound
620 ....And cyclic ether
621 .....Purification or recovery
622 .....Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
623 ......Polyhydroxy containing
624 ....Plural diverse oxyalkylene groups containing
625 ......Plural diverse oxyalkylene groups containing
626 ...Benzene ring containing
627 ....Preparing by isomerization
628 ....Preparing by alkylation of benzene ring
629 ....Preparing by hydroxylation of benzene ring
630 ....Ether oxygen bonded directly to benzene ring
631 .....Plural rings containing
632 ......Polycyclo ring system
633 ....Polyoxy
634 ....Halogen containing
635 ......Plural benzene rings bonded directly to the same oxygen
636 ....Polyoxy
637 ....Halogen containing
638 ....Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
639 ....Halogen containing
640 ......Plural benzene rings bonded directly to the same carbon
641 ....Polyoxy and halogen containing
642 ......Plural benzene rings bonded directly to each other
643 ....Polyoxy
644 ......Polyoxy
645 ....Halogen containing
646 ....Acyclic carbon to carbon unsaturation containing
647 ......Halogen containing
648 .....Polyoxy
649 ......Halogen containing
650 ......Hydroxy bonded directly to the benzene ring (H of -OH may be replaced by a Group IA or IIA light metal)
651 ....Plural ether oxygens bonded directly to the benzene ring
652 ....Ether oxygen is ortho to the hydroxy
653 ....Guaiacol per se or salt thereof
654 ......Acyclic carbon to carbon unsaturation containing
655 .....Halogen containing
656 ......Halogen bonded directly to the benzene ring
657 .....Aryl-oxy-alkenyl or aryl-oxy-alkynyl
658 .....Acyclic hydrocarbyl group bonded directly to the benzene ring
659 ....Plural rings containing
660 .....Polyoxy
661 .....Halogen containing
662 ....Polyoxy
663 ....Halogen containing
664 ...Plural alicyclic rings containing
665 ....Polycyclo ring system
666 ...Alicyclic terpenic wherein the number of carbons is a multiple of five
667 ...Unsaturated alicyclic ring containing

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Ethers
...Unsaturated alicyclic ring containing
668 ....2,6,6-trialkylcyclohexenyl (e.g., vitamin A derivatives, etc.)
669 ...Alicyclic ring and halogen containing
670 ...Alicyclic ring and polyoxy containing
671 ...Acyclic
672 ....Polyoxy
673 .....Carbon to carbon unsaturation containing
674 ......Halogen containing
675 ......Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
676 .....Halogen containing
677 ......Fluorine
678 .....Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
679 ......Polyether
680 ......Polyhydroxy
681 ....Halogen containing
682 .....Purification or recovery
683 .....Fluorine
684 ......Additional diverse halogen containing
685 ......Carbon to carbon unsaturation containing
686 .....Carbon to carbon unsaturation containing
687 ....Carbon to carbon unsaturation containing
688 .....Preparing by reacting an acyclic acetylenically unsaturated compound and an organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
689 .....Preparing by reacting an acyclic ethylenically unsaturated compound and an organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
690 ......Noble metal containing catalyst utilized
691 .....Preparing from an acetal or ketal
692 .....Preparing by dehydrohalogenation
693 .....Purification or recovery
694 ....Preparing by hydration of an olefin
695 .....Metal containing catalyst utilized
696 .....Sulfuric acid utilized
697 ....Preparing by reacting an olefin and an organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
698 ....Preparing by dehydration of an organic hydroxy containing compound (H of -OH may be replaced by a Group IA or IIA light metal)
699 ....Purification or recovery
700 ..Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
701 ...With preservative or stabilizer
702 ....Benzene ring containing compound preserved
703 .....Acyclic polycarbon hydrocarbyl group bonded directly to the benzene ring
704 ...Nitrogen containing
705 ....Benzene ring containing
706 .....Phenols (H of -OH may be replaced by a Group IA or IIA light metal)
707 ......Plural rings containing
708 ......Purification or recovery
709 ......Halogen containing
710 ......Polynitro
711 ....Dinitro
712 ....Polyhydroxy nitro containing
713 ....Halogen containing
714 ...Hydrophenanthrene containing
715 ...Benzene ring containing
716 ....Phenols (H of -OH may be replaced by a Group IA or IIA light metal)
717 .....Polyphenols
718 ......Three or more rings containing
719 ....Polycyclo ring system
720 ....Three or more phenols containing
721 ....Alicyclic ring containing
722 ......Two phenols bonded directly to the same carbon
723 ....Identical phenols
724 ....Purification or recovery
725 ....Halogen containing
726 ....Halogen containing
727 ....Preparing from a phenol and an aldehyde or ketone
728 ....Isopropylidene diphenol produced
729 ......Two phenols bonded directly to two different carbons of an acyclic chain
730 ......Two phenols bonded directly to each other
731 .....Additional ring containing
732 ......Polycyclo ring system
733 ....Tricyclo ring system
734 ....Bicyclo ring system
735 ....Naphthols
736 ....Acyclic hydrocarbyl group bonded directly to the bicyclo ring system
737 ....Halogen or polyhydroxy containing
738 ....Preparing from aryl sulfonate
739 ....Preparing from compound which includes halogen bonded directly to a benzene ring
740 ....Preparing by dehydrogenation
741 ....Preparing from peroxide or preparing by oxidation
742 ....Purification or recovery
743 ......The additional ring is six-membered
744 ....The additional ring is benzene
745 ....Halogen containing
746 ....Rings bonded directly to each other
747 ....Rings bonded directly to each other
748 ....Purification or recovery
749 .....Purification or recovery
750 ......From mixture of phenols
751 ....Plural phenols recovered separately
752 ....Three or more phenols recovered
753 ......Of polyhydroxy phenol
754 ......Of phenol prepared by cleavage of hydroperoxide or other peroxide
755 ......Of halogen containing phenol
756 ......Of phenol having acyclic polycarbon hydrocarbyl group bonded directly to the benzene ring
757 ......Nitrogen or phosphorus containing compound utilized
758 ......Sorbent material utilized
759 ......From substance which includes sulfur or a sulfur containing compound
760 ......From ammoniacal liquor

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
...Benzene ring containing
....Phenols (H of -OH may be replaced by a Group IA or IIA light metal)
.....Purification or recovery
761 ......From oil or tar derived from fossil fuel or wood
762 ....Alkali metal hydroxide utilized
763 .....Polyhydroxy (H of -OH may be replaced by a Group IA or IIA light metal)
764 ......Hydroxymethyl group containing
765 ......Halogen containing
766 ......Acyclic polycarbon hydrocarbyl group bonded directly to the benzene group
767 ......Preparing from nitrogen containing compound
768 ......Preparing by cleavage of hydroperoxide or other peroxide
769 ......Preparing from aryl sulfonate
770 ......Preparing from compound which includes halogen bonded directly to a benzene ring
771 ......Preparing by oxidation
772 ......Preparing by reduction or dehydrogenation (e.g., by hydrogenation, etc.)
773 ......Preparing hydroquinones from an acetylene and carbon monoxide
774 .....Halogen containing
775 ......Fluorine or iodine
776 ......Three or more halogens bonded directly to the ring
777 ....Preparing by hydrolysis
778 ......Preparing by hydrolysis
779 ......Preparing by halogenation
780 .....Acyclic polycarbon hydrocarbyl group bonded directly to the benzene ring
781 ......Isopropyl or isopropenyl group
782 ....Preparing by reduction (e.g., by hydrogenation, etc.)
783 ......Preparing by isomerization
784 ......Tertiary butyl group
785 ....Preparing by catalytic alkylation
786 ....Silicon containing catalyst
787 ....Boron containing catalyst
788 ....Sulfur containing catalyst
789 ....Heavy metal or aluminum containing catalyst
790 ......Preparing by catalytic alkylation
791 ....Silicon containing catalyst
792 ....Boron containing catalyst
793 ....Sulfur containing catalyst
794 ....Heavy metal or aluminum containing catalyst
795 .....Preparing from aryl sulfonate
796 .....Preparing from compound which includes halogen bonded directly to a benzene ring
797 ......Catalyst utilized
798 .....Preparing by cleavage of hydroperoxide or other peroxide
799 .....Preparing by reduction or dehydrogenation (e.g., by hydrogenation, etc.)
800 .....Preparing by oxidation
801 ......Of compound which contains a benzene ring and a -COO- group
802 ......Molecular oxygen utilized
803 ......Peroxide or peracid utilized
804 .....Preparing by methylation
805 .....Preparing by dealkylation
806 .....Preparing by pyrolysis (e.g., by cracking, etc.)
807 ....Additional ring containing
808 .....Polycyclo ring system
809 .....Plural benzene rings bonded directly to the same carbon
810 ....Purification or recovery
811 ....Polyhydroxy (H of -OH may be replaced by a Group IA or IIA light metal)
812 ....Halogen containing
813 ....Acyclic carbon to carbon unsaturation containing
814 ....Preparing by reduction (e.g., by hydrogenation, etc.)
815 ....Preparing from a peroxide or preparing by oxidation
816 ...Plural alicyclic rings containing
817 ....Polycyclo ring system
818 .....Adamantane ring system
819 .....Bicyclo ring system
820 ......The two cyclos share at least three ring carbons (i.e., bridged ring)
821 ...Containing alicyclic ring having at least seven members
822 ...Six-membered alicyclic ring containing
823 ....Unsaturation in the ring
824 .....2,6,6-trialkylcyclohexenyls (e.g., vitamin A, etc.)
825 .....Single hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
826 ......The hydroxy is attached indirectly to the ring
827 ....Terpineol
828 ....Carbon to carbon unsaturation in substituent
829 ....Menthols (H of -OH may be replaced by a Group IA or IIA light metal)
830 .....Preparing by reduction (e.g., by hydrogenation, etc.)
831 ....Methylol cyclohexane (H of -OH may be replaced by a Group IA or IIA light metal)
832 ....Hydroxy bonded directly to the ring (e.g., terpin hydrate, etc.) (H of -OH may be replaced by a Group IA or IIA light metal)
833 .....Cyclohexane polyol (e.g., inositol, etc.)
834 .....Polycarbon alkyl group containing
835 .....Cyclohexanol per se
836 ......Preparing by oxidation
837 ....Boron containing material utilized
838 ...Five-membered alicyclic ring containing
839 ...Four-membered alicyclic ring containing
840 ...Acyclic
841 ....Halogen containing
842 .....Fluorine containing
843 ......Carbon to carbon unsaturation containing
844 .....Polyhydroxy or polyhalogen (H of -OH may be replaced by a Group IA or IIA light metal)
845 ......Carbon to carbon unsaturation containing
846 ......Preparing from aldehyde or ketone
847 ......Preparing from alkenyl halide
848 ......Preparing from alkenol
849 .....Carbon to carbon unsaturation containing

	ORGANIC COMPOUNDS (Class 532, Subclass 1)
	.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
	..Hydroxy containing (H of -OH may be replaced by a Group IA or IIA light metal)
	...Acyclic
	....Halogen containing
850	.....Preparing from ethylenically unsaturated compound
851	....Oxy bonded directly to a Group IA or IIA light metal)
852	....Polyhydroxy
853	.....Polyalkylol substituted alkane (e.g., pentaerythritol, trimethylolethane, ect.)
854	......Purification or recovery
855	.....Acetylenically unsaturated
856	......Purification or recovery
857	.....Ethylenically unsaturated
858	.....Preparing by alcoholysis, hydrolysis or saponification of an ester
859	.....Preparing by hydrolysis or saponification of alkyl polyhalide or halohydrin
860	.....Preparing by hydroxylation at point of ethylenic unsaturation
861	.....Preparing by reduction (e.g., by hydrogenation, etc.)
862	......Of aldehyde or ketone
863	.......Of polyhydroxy aldehyde or polyhydroxy ketone (e.g., of carbohydrate, glyceraldehyde, etc.)
864	......Of compound containing a -COO- group
865	......Of ether
866	.....Preparing from ether
867	......From alkylene oxide
868	.....Purification or recovery
869	......Of glycerol
870	.......Ion exchange or sorbent material utilized
871	......Of spent ethylene glycol from polyester production
872	......Ion exchange or sorbent material utilized
873	....Acetylenically unsaturated
874	.....Preparing from carbonyl containing compound
875	....Terpenic, wherein the number of carbons is a multiple of five (e.g., linalool, farnesol, etc.)
876	....Preparing from carbonyl containing compound
877	.....By alcoholysis, hydrolysis, or saponification of an ester
878	.....From aldehyde or ketone
879	......By reaction of aldehyde with olefin (i.e.,by Prins reaction)
880	......By reduction (e.g., by hydrogenation, etc.)
881	.......Catalyst utilized
882	........Including hydroformylation
883	.........Supported hydrogenation catalyst utilized
884	.....By reduction (e.g., by hydrogenation, etc.)
885	......Catalyst utilized
886	....Preparing by alcoholysis, hydrolysis, or saponification of ester of polybasic inorganic acid
887	.....Boric acid
888	.....Hydroxy compound produced has from one to six carbons
889	......Isopropanol
890	......Ethanol
891	....Preparing by hydrolysis of organic halide
892	.....Ethylenically unsaturated hydroxy compound produced
893	.....Including producing the organic halide reactant
894	.....Additional organic compound in reaction mixture
895	....Preparing by hydration of olefin
896	.....Supported catalyst utilized
897	.....Aluminum containing catalyst utilized
898	.....Phosphorus containing catalyst utilized
899	.....Sulfur containing catalyst utilized
900	.....Heavy metal containing catalyst
901	......Chromium, molybdenum, or tungsten
902	....Preparing from organic hydroxy containing reactant
902.2	.....By homologation (e.g., forming ethanol from methanol, etc.)
903	.....By reduction, dehydration, or cleavage
904	.....Olefin reacted with the hydroxy containing reactant (e.g., preparing by telomerization, etc.)
905	.....By condensation (e.g., by Guerbet reaction, etc.)
906	.....By isomerization
907	....Preparing from ether
908	.....Ethylenically unsaturated hydroxy compound produced
909	....Preparing by carbonylation (e.g., by hydroformylation, etc.)
909.5	....Ethylenic unsaturation containing
909.8	....Preparing from organic peroxide or organic ozonide
910	....Preparing by oxidation
910.5	.....Of hydrocarbon mixtures
911	.....Of metal containing compound
912	.....Boron containing catalyst utilized
913	....Purification or recovery
914	.....By reduction (e.g., by hydrogenation, etc.)
915	.....By oxidation
916	.....By dehydration
917	.....By sorption
918	.....By plural liquid phase separation
919	......Alkali metal containing compound in one phase
920	.....Alkali or alkaline earth metal containing compound utilized
921	......Alkali metal hydroxide
922	.....Heavy metal or aluminum containing compound utilized
923	.....By crystallization of hydroxy compound or by forming hydroxy containing addition compound
924	..Nitro containing (including aci forms)
925	...With preservative or stabilizer
926	...Nitronic acid or Group IA or IIA light metal containing (e.g., aci forms, etc.)
927	...Benzene ring containing
928	....Plural rings containing
929	.....Polycyclo ring system
930	......Polynitro
931	.....Polynitro
932	....Polynitro
933	.....Halogen containing
934	.....Single methyl and plural nitros only bonded directly to benzene ring (e.g., dinitrotoluene, etc.)
935	......Trinitrotoluene
936	....Halogen containing

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.OXYGEN CONTAINING (E.G., PERCHLORYLBENZENE, ETC.)
..Nitro containing (including aci forms)
...Benzene ring containing
....Halogen containing
937 .....Halogen bonded directly to benzene ring
938 ......Plural halogens bonded directly to benzene ring
939 ....Nitro bonded directly to benzene ring
940 .....Methyl bonded directly to benzene ring (e.g., nitroxylene, etc.)
941 ...Polycyclo-alicyclic ring system
942 ...Six-membered alicyclic ring containing
943 ...Acyclic
944 ....Polynitro
945 .....Halogen containing
946 ....Halogen containing
947 ....Nitroalkanes
948 .....Nitromethane
949 ..Nitroso containing
950 ..Processes of oxidizing nonaromatic hydrocarbons; or purification or recovery of the products of such processes
951 ...Peroxy containing material utilized
952 ...Nitrogen or silicon containing compound utilized
953 ...Plural stages each having oxidation
954 ...Liquid phase oxidation
955 ...Catalyst utilized
956 ....Heavy metal containing catalyst
957 .....Manganese containing catalyst
958 ...Purification or recovery
959 ..Oxidized hydrocarbons of undetermined structure

CLASS 570 PART OF THE CLASS 532-570 SERIES -- ORGANIC COMPOUNDS

DECEMBER 1990

IN THIS SERIES OF CLASSES, CLASS 570 IS TO BE CONSIDERED AS AN INTEGRAL PART OF CLASS 260 AND FOLLOWS THE SCHEDULE HIERARCHY, RETAINING ALL PERTINENT DEFINITIONS AND CLASS LINES OF CLASS 260.

ORGANIC COMPOUNDS (Class 532, Subclass 1)
101 .HALOGEN CONTAINING
102 ..With preservative or stabilizer
103 ...To prevent or reduce polymerization
104 ....Nitrogen bonded directly to oxygen in preservative or stabilizer
105 ....Oxygen single bonded directly to benzene ring in preservative or stabilizer
106 ....Sulfur containing preservative or stabilizer
107 ...Acetylenic unsaturation containing preservative or stabilizer
108 ....Hydroxy, bonded directly to carbon, or ether containing
109 ...Nitrogen containing hetero ring in preservative or stabilizer
110 ...Acyclic nitro containing preservative or stabilizer
111 ...Nitrogen other than as ammonia or the ammonium ion in preservative or stabilizer
112 ....Nitrile
113 ....Imine (e.g., hydrazone, oxime, etc.)
114 ...Oxygen containing hetero ring in preservative or stabilizer
115 ....Hetero ring containing plural ring oxygens
116 ....Oxirane ring
117 ...Carbonyl containing preservative or stabilizer
118 ...Hydroxy, bonded to carbon, or ether containing preservative or stabilizer
119 ....Phenolic
120 ...Sulfur containing preservative or stabilizer
121 ...Hydrocarbon, halocarbon or halohydrocarbon preservative or stabilizer
122 ....Acyclic carbon to carbon unsaturation containing
123 ..Fluorine containing
124 ...Product
125 ....Polymer of unsaturated compound
126 .....Fluorine is sole halogen
127 ....Benzene ring containing
128 .....Acyclic unsaturation containing
129 .....Plural carbocyclic rings containing
130 ....Plural carbocyclic rings containing
131 ....Carbocyclic ring contains six carbon atoms
132 ....Carbocyclic ring contains four carbon atoms
133 ....Carbocyclic ring contains three carbon atoms
134 ....Acyclic
135 .....Unsaturated
136 ......Fluorine is sole halogen
137 .....Bromine or iodine containing
138 ...Polymerization of unsaturated compound
139 ....With chain terminating agent (e.g., telogen, etc.)
140 ...From organic compound containing an element other than carbon, hydrogen, or halogen
141 ....Nitrogen containing
142 ....Oxygen containing
143 ...Preparing benzene ring containing compound
144 ....Haloalkyl containing compound
145 .....By substituting halogen for a different halogen in haloalkyl group
146 ....Forming the benzene ring
147 ....Substituting halogen for different halogen or hydrogen
148 ...Forming alicyclic ring from benzene ring
149 ...Forming alicyclic ring from acyclic compound
150 ...Preparing from elemental carbon, carbon oxide, or carbon disulfide
151 ...Isomerization
152 ...Decreasing molecular weight of polymer of indeterminate structure
153 ...Preparing unsaturated compound
154 ....From acetylenically unsaturated compound
155 ....By dehalogenation or dehydrohalogenation of adjacent carbon atoms in a compound
156 .....Catalyst utilized
157 ......Alkali or alkaline earth metal containing catalyst
158 ......Zinc containing catalyst
159 ....From methane or halomethane
160 ....Substituting fluorine for a different halogen
161 ...Utilizing halogen fluoride or a mixture of elemental fluorine and another elemental halogen
162 ...Utilizing a compound containing silicon and fluorine
163 ...Transhalogenation or disproportionation
164 ...By reacting with hydrogen fluoride
165 ....Catalyst utilized
166 .....Metal halide containing catalyst
167 ......Antimony halide containing catalyst
168 ......Transition metal halide containing catalyst
169 .....Metal oxide containing catalyst
170 ...Substituting halogen for a different halogen
171 ...Increasing the number of carbon atoms in the compound
172 ....Utilizing unsaturated compound
173 ...Decreasing the number of carbons in the compound (e.g., cracking, etc.)
174 ...Introducing bromine or iodine
175 ...Utilizing unsaturated compound
176 ...Replacing halogen with hydrogen
177 ...Purification or recovery
178 ....Including distillation
179 ....Solid sorbent utilized
180 ....Including extraction with organic liquid
181 ..Product
182 ...Benzene ring containing
183 ....Polycyclo ring system
184 ....Plural benzene rings bonded directly to the same acyclic carbon or attached by an acyclic carbon chain
185 ....Benzene ring and halogen bonded directly to the same acyclic carbon or attached by an acyclic carbon chain
186 ...Alicyclic ring containing
187 ....Polycyclo ring system
188 ....Plural rings containing

ORGANIC COMPOUNDS (Class 532, Subclass 1)
.HALOGEN CONTAINING
..Product
189 ...Acyclic carbon to carbon unsaturation containing
190 ..Processes of preparing, purifying, or recovering benzene ring containing compound
191 ...Preparing acyclic haloalkyl group containing compound
192 ....Halo, 1,1-diphenylethane or ring substituted derivative thereof prepared (e.g., DDT, etc.)
193 ....Having acyclic carbon to carbon unsaturation
194 ....Bonding haloalkyl group directly to benzene ring
195 .....Oxygen containing organic compound reactant
196 ....Halogenation of acyclic carbon
197 .....Catalyst utilized
198 ......Halogen containing catalyst
199 ...Bonding benzene rings to the same acyclic carbon or to an acyclic carbon chain
200 ...Preparing acyclic carbon to carbon unsaturation containing compound
201 ...Oxygen containing organic compound reactant
202 ...Isomerization
203 ...Oxyhalogenation
204 ...Dehalogenation or dehydrohalogenation
205 ....Of alicyclic ring to prepare benzene ring
206 ...Bonding halogen directly to benzene ring
207 ....Chlorination
208 .....Catalyst utilized
209 ......Sulfur containing catalyst
210 ......Metal halide containing catalyst
211 ...Purification or recovery
212 ..Forming alicyclic ring from benzene ring
213 ..Purification or recovery of 1,2,3,4,5,6 - hexachlorocyclohexane (i.e., benzene hexachloride)
214 ..Ring formation, ring expansion or contraction or bonding one alicyclic ring directly or indirectly to another alicyclic ring
215 ...Diels-Alder reaction
216 ..Processes of preparing, purifying, or recovering unsaturated compound
217 ...From carbon source other than hydrocarbon, halocarbon, or halohydrocarbon
218 ...Decreasing the number of carbon atoms in the compound
219 ...Plural diverse reactions in separate zones
220 ....Dehalogenation or dehydrohalogenation with halogenation in separate zones
221 .....Acetylene reactant
222 .....Including oxyhalogenation or oxidation with elemental oxygen
223 ....Including oxhalogenation or oxidation with elemental oxygen
224 ...Oxyhalogenation
225 ....Liquid medium or inorganic melt utilized
226 ...Dehydrohalogenation
227 ....Catalyst utilized
228 .....Catalyst in liquid phase
229 ....Including chemical reaction with by-product hydrogen halide
230 ...Dehalogenation or dehydrogenation
231 ...Addition reaction of free halogen or hydrogen halide to carbon to carbon unsaturation
232 ....To triple bond
233 .....To acetylene
234 ...Elemental halogen reactant
235 ...Metal halide reactant
236 ...Isomerization
237 ...Increasing the number of carbon atoms in the compound
238 ...Purification or recovery
239 ....Including contact with solid agent
240 ..Preparing from elemental carbon, inorganic carbide, carbon disulfide, or carbon oxide
241 ..Preparing utilizing plural diverse reactions in separate zones
242 ...Addition reaction of hydrogen chloride to carbon to carbon unsaturation with chlorination in separate zone
243 ..Preparing by oxyhalogenation
244 ...Liquid medium or inorganic melt utilized
245 ...Fixed bed catalyst utilized
246 ..Preparing by addition of elemental halogen, interhalogen compound, or hydrogen halide to carbon to carbon unsaturation
247 ...Catalyst or reaction directing agent utilized
248 ....Hydrogen halide reactant
249 .....Nonmetallic catalyst or reaction directing agent utilized
250 .....Catalyst or reaction directing agent containing or group VIII metal utilized
251 ...All reactants in vapor phase
252 ..Elemental halogen reactant
253 ...Catalyst or reacton directing agent utilized
254 ....Inorganic metal containing catalyst or reaction directing agent utilized
255 ...All reactants in vapor phase
256 ..Isomerization
257 ..Preparing by increasing the number of carbons in the compound
258 ..Preparing by reacting hydrogen halide with a compound which contains hydroxy bonding directly to carbon
259 ..Preparing by reacting ether with hydrogen halide
260 ..Preparing by halogen exchange
261 ..Halogen source is a compound other than hydrogen halide
262 ..Purification or recovery
263 ...Liquid-liquid extraction
264 ..Preservation or stabilization treatment

CLASS 585 CHEMISTRY, HYDROCARBONS

DECEMBER 1990

1 PRODUCT BLEND, E.G., COMPOSITION, ETC., OR BLENDING PROCESS PER SE
2 .With nonhydrocarbon additive
3 ..O containing
4 ...And N containing
5 ....Additive(s) aromatic
6 .Gaseous blend
6.3 .Fluent dielectric
6.6 ..Mineral oil-containing
7 .Component of indefinite molecular weight greater than 150
8 ..Reaction product of halogenated hydrocarbon
9 ..Wax
10 ..Polymer
11 ...Containing aromatic ring
12 ...Plural polymers or copolymer of specified olefins
13 ..Mineral oil (petroleum) fraction
14 .For fuel use only
15 HYDRATE OR PRODUCTION THEREOF
16 COMPOUND OR REACTION PRODUCT MIXTURE
17 .Polymer of indefinite molecular weight
18 ..Acyclic
19 ..Containing aromatic ring
20 .Alicyclic
21 ..Polycyclo, i.e., fused
22 ...Of differing carbon content, more than three or with bridge
23 ..Unsaturated ring
24 .Aromatic
25 ..Plural rings
26 ...Polycyclo, i.e., fused
27 ....Of differing carbon content or with bridge
240 PRODUCTION OF HYDROCARBON MIXTURE FROM REFUSE OR VEGETATION
241 .From synthetic resin or rubber
242 .From wood
250 ADDING HYDROGEN TO UNSATURATED BOND OF HYDROCARBON, I.E., HYDROGENATION
251 .With subsequent diverse conversion
252 ..Dehydrogenation
253 ..Isomerization
254 .With preliminary diverse conversion
255 ..Polymerization of olefins only
256 ..Molecular weight reduction
257 .By hydrogen transfer from other hydrocarbon
258 .Hydrocarbon is contaminant in desired hydrocarbon
259 ..Hydrogenation of diolefin or triple bond
260 ...Using catalyst or support of defined structure, surface area, or pore size
261 ...Using catalyst and additional nonmetal material
262 ...Using S or Group I or II transition metal-containing catalyst
263 .With temperature or concentration gradient in reactor or specified provision for heating, cooling, or reactor control
264 .With preliminary treatment of feed or plural separation procedures
265 .Plural hydrogenation stages
266 .Hydrocarbon is aromatic
267 ..Using alkaline metal material
268 ..To produce polycyclic
269 ..Using Group VIII metal-containing catalyst with additional nonhydrocarbon agent
270 ...Co, Fe, or Ni
271 .Partial
272 ..Hydrogen supplied by water or alcohol
273 ..Using Group VIII metal-containing catalyst
274 ...Co, Fe, or Ni
275 .Using transition metal-containing catalyst
276 ..Elemental Co, Fe, or Ni
277 ..Group VIII metal with additional nonhydrocarbon agent or complexed with hydrocarbon
300 PLURAL PARALLEL SYNTHESES
301 .Using same catalyst, solvent, inert heat carrier, or component thereof
302 .With blending of products from two parallel reactions
303 ..And passage to further reaction
304 .Diverse parallel syntheses
310 PLURAL SERIAL DIVERSE SYNTHESES
311 .One synthesis rehabilitates catalyst for other, e.g., by alkylation with ester, etc.
312 .Same catalyst, solvent, or component thereof used in both syntheses
313 ..Entire catalyst composition
314 .With hydrocarbon effluent stream splitting for recycle to different syntheses
315 .With hydrocarbon recycle from later to earlier synthesis
316 ..Earlier synthesis is condensation or alkyl transfer
317 .To produce alicyclic
318 ..Having unsaturated ring
319 .To produce aromatic
320 ..Polycyclic
321 ..Having plural side-chains
322 ..Including an aromatization step
323 ..Including an alkylation step
324 .To produce unsaturate
325 ..Having triple bond
326 ..Polyolefin
327 ...From O compound feed or intermediate
328 ..Including displacement from nonhydrocarbon by entire hydrocarbon molecule, e.g., growth reaction, etc.
329 ..Including polymerization of olefin
330 ...And a preliminary unsaturation step, e.g., cracking, dehydrogenation, etc.
331 .Including alkylation to produce branched-chain paraffin
332 ..And preliminary isomerization or polymerization
350 ALICYCLIC COMPOUND SYNTHESIS
351 .Carotene or derivative
352 .Adamantane or derivative
353 .By shift, opening, or removal of shared-carbon ring
354 ..Cyclopentadiene from its polymer
355 ..Camphene or ten-C monocyclic from polycyclic, e.g., terpene isomerization, etc.
356 ...Camphene from pinene or derivative
357 .From nonhydrocarbon
358 ..Nonring moiety becomes ring
359 ..Halogen containing
360 .Polycyclic product
361 ..By condensation, e.g., Diels-Alder reaction, etc.
362 ...Dimerizing a cycloolefin
363 ..By double-bond shift in side-chain
364 .By condensive ring expansion, e.g., "olefin dismutation", etc.
365 .From nonring hydrocarbon
366 ..Alkadiene
367 ...Using refractory-group metal-containing catalyst
368 ....With nonmetal element or compound
369 ...Using Co-, Fe-, or Ni-containing catalyst

ALICYCLIC COMPOUND SYNTHESIS
.From nonring hydrocarbon
..Alkadiene
...Using Co-, Fe-, or Ni-containing catalyst
370 ....With nonmetal organic compound
371 .By ring expansion or contraction
372 ..Using Al group metal halide catalyst
373 ...With added hydrocarbon complex or nonhydrocarbon organic agent
374 ..Using metal-containing catalyst
375 .By alkylation or alkyl transfer
376 ..Feed has side-chain
377 .By double-bond shift
378 ..Using organometallic compound, P- or S-containing catalyst
379 .By dehydrogenation
380 ..Using H acceptor
400 AROMATIC COMPOUND SYNTHESIS
401 .With measuring, sensing, testing, or synthesis operation control responsive to diverse condition
402 .Exploiting or conserving heat of quenching, reaction, or regeneration
403 .Using apparatus of recited composition
404 .By ring expansion or contraction
405 ..Using transition metal-containing catalyst
406 .By dimerization of vinyl aromatic
407 .By ring formation from nonring moiety, e.g., aromatization, etc.
408 ..Nonhydrocarbon feed
409 ...Aromatic or carbonyl-containing reactant
410 ..Aromatic feed
411 ...Using metal-containing catalyst
412 ..Plural stage, with moving catalyst or with specified flow rate or procedure
413 ..With preliminary treatment of feed or plural separation procedures
414 ..Using metal-free H acceptor
415 ..Product compound has more C atoms than feed compound, e.g., cyclic polymerization, etc.
416 ...Triple bond-containing feed
417 ...Using transition metal-containing catalyst
418 ..Using transition metal-containing catalyst
419 ...Group VIII noble metal
420 ...Group VI metal
421 ....With alkaline metal compound
422 .By condensation of entire cyclic molecules or entire hydrocarbyl moieties thereof, e.g., polymerization, etc.
423 ..With plural separation procedures
424 ..Plural stage or with preliminary treatment of feed
425 ..Ring carbon of one molecule joined to ring carbon of other
426 ...Through residue of nonring molecule, e.g., acetylene, etc.
427 ...Arylene bond formed using metal-containing agent
428 ..Nonring moiety of one molecule bonded to nonring moiety of other, e.g., polystyrene, etc.
429 ...Through residue of nonring molecule, e.g., butadience, etc.
430 .From alicyclic
431 ..Polycyclic product or with olefinic unsaturation in feed
432 ...Cymene product
433 ..Using H acceptor or Cr-, Mo-, or W-containing catalyst
434 ..Using noble metal catalyst
435 .Having alkenyl moiety, e.g., styrene, etc.
436 ..Polycyclic product or from nonhydrocarbon feed
437 ...O-containing feed
438 ..By condensation using metal-containing catalyst
439 ..By C removal, e.g., cracking, etc.
440 ..By dehydrogenation
441 ...Plural stage or with plural separation procedures
442 ...Using halogen or S
443 ...Using elemental O
444 ...Using metal oxide, sulfide, or salt
445 ....Cr-, Mo-, or W-containing
446 .By condensation of entire molecules or entire hydrocarbyl moieties thereof, e.g., alkylation, etc.
447 ..With specified flow rate through reactor or flow procedure within or at entrance to reactor
448 ..With preliminary treatment of feed
449 ..Plural alkylation stages
450 ..With plural separation procedures
451 ...Including dissolving or solids formation or separation
452 ..Attachment to side-chain, e.g., telomerization, etc.
453 ...Resulting side-chain has less than four C atoms
454 ..Feed other than hydrocarbon, hydroxy, monohalide, or ether
455 ..Resulting side-chain restricted to more than five C atoms, e.g., "detergent alkylate", etc.
456 ...Using halogen-containing catalyst
457 ..Using organometallic compound catalyst
458 ..Using S-containing catalyst
459 ..Using Al halide catalyst
460 ...And additional metal-containing or nonhalide inorganic agent
461 ...Complexed, e.g., sludge, etc., or with additional extraneous organic agent
462 ..Using halogen-containing catalyst
463 ...Alumina containing
464 ...HF
465 ...B trifluoride in a complex or with additional nonhydrocarbon agent
466 ..Using P-containing catalyst
467 ..Using metal, metal oxide, or hydroxide catalyst
468 ...Noncrystalline, and containing Al and Si
469 .From nonhydrocarbon feed
470 .By alkyl or aryl transfer between molecules, e.g., disproportionation, etc.
471 ..Product is polycyclic, of increased side-chain length, or a specific position polyalkyl benzene isomer
472 ...Using Al or B halide catalyst
473 ....Meta- or 1,3,5-alkyl benzene
474 ..Plural compounds of different weight become midweight compound, i.e., averaging
475 ..Using crystalline aluminosilicate catalyst
476 .By ring opening, removal, degradation, or shift on chain or other ring
477 .By isomerization
478 ..With plural separation steps
479 ...Including a crystallization step
480 ..Using metal oxide- or sulfide-containing catalyst
481 ...Crystalline aluminosilicate
482 ...Pt-group metal containing
483 .By dealkylation

AROMATIC COMPOUND SYNTHESIS
.By dealkylation
484 ..Polycyclic
485 ...Using catalyst and H
486 ..Using extraneous agent in reaction zone, e.g., catalyst, etc.
487 ...And steam.
488 ...And H
489 ....Transition metal-containing catalyst
500 UNSATURATED COMPOUND SYNTHESIS
501 .With measuring, sensing, testing, or synthesis operation control responsive to diverse condition
502 .By addition of entire unsaturated molecules, e.g., polymerization, etc.
503 ..With heat conservation or using apparatus of recited composition
504 ..With specified procedure for recycle of nonhydrocarbon
505 ..Triple-bond product
506 ..Poly-double-bond product
507 ...More than two double bonds, e.g., diene polymerization, etc.
508 ....Of definite molecular weight, e.g., dimer, etc.
509 ...Using P-containing catalyst
510 ..Definite molecular weight product, e.g., dimer, etc.
511 ...Using catalyst containing metal bonded to or complexed with C, C-containing compound, or H
512 ....Al-and transition metal-containing
513 .....And N-, P-, or S-containing
514 ...Using P-containing catalyst
515 ...Using S-containing catalyst
516 ...Using alkali metal-containing catalyst
517 ..Plural serial polymerization stages
518 ..With preliminary treatment of feed
519 ...Removal of hydrocarbon fraction
520 ..Using extraneous nonhydrocarbon agent, e.g., catalyst, etc.
521 ...Hydride or organic compound or complex containing alkaline-, B-, or Zn-group material
522 ....Al trialkyl
523 ....Transition metal-containing
524 .....Ti
525 ...B-containing catalyst
526 ...S-containing catalyst
527 ...N- or P-containing catalyst
528 ....Metal phosphate
529 ....P compound on solid carrier, e.g., "solid phosphoric acid", etc.
530 ...Catalyst containing inorganic metal
531 ....Group VIII metal
532 ....Al
533 .....Al oxide, e.g., aluminosilicate, etc.
534 .Triple-bond product
535 ..With heat conservation or using solid inert heat carrier, e.g., regenerative furnace, etc.
536 ...With carrier movement through reaction zone
537 ..Using apparatus of recited composition
538 ..From organic nontriple-bond feed
539 ...By thermal conversion of hydrocarbon, i.e., thermolysis
540 ...By partial combustion of hydrocarbon
541 ....Using extraneous nonreactant, e.g., diluent, catalyst, etc.
600 .Product having more than two double bonds
601 .Diolefin product
602 ..With heat conservation or using solid inert heat carrier, e.g., regenerative furnace, etc.
603 ..From nonhydrocarbon feed
604 ...Heterocyclic
605 ....Using P-containing catalyst
606 ...O-containing
607 ....Plural O-containing organic compounds
608 ....With unsaturated hydrocarbon in feed
609 ....Alcohol
610 .....Diol
611 ......Using P-containing catalyst
612 ...Halogen-containing feed using extraneous nonhydrocarbon agent
613 ..By C content reduction, e.g., cracking, etc.
614 ...Isoprene product per se
615 ...Butadiene product per se
616 ..By dehydrogenation
617 ...Using nonhydrocarbon acceptor
618 ....Halogen-containing acceptor with elemental O
619 .....Halogen is I only
620 .....Halogen is Cl only
621 ....Elemental O acceptor
622 .....With P containing extraneous agent
623 ......Sn-containing
624 .....With metal oxide or hydroxide extraneous agent
625 ......Ferrite
626 ......Oxide of As, Bi, or Sb
627 ...Using extraneous nonhydrocarbon agent, e.g., catalyst, etc.
628 ....Moving catalyst or plural stage
629 ....Transition metal oxide or sulfide agent
630 .....Cr, Mo, or W
631 ......With other transition metal
632 ....Metal salt agent
633 ...Plural stage or with specified quench or separation procedure
634 .With heat conservation or using solid or molten inert heat carrier, e.g., regenerative furnace, etc.
635 ..With carrier movement through reaction zone or use in quenching
636 .Using apparatus of recited composition
637 .By displacement of hydrocarbon radical by hydrocarbon molecule
638 .From nonhydrocarbon feed
639 ..Alcohol, ester, or ether
640 ...Using metal oxide catalyst
641 ..Halogen-containing
642 ...Using acid, metal oxide, or salt catalyst
643 .By alkyl transfer, e.g., disproportionation, etc.
644 ..Plural stage or averaging
645 ..Using organic extraneous agent
646 ..Using catalyst containing Mo, Re, or W and another transition metal
647 ..Using Re-containing catalyst
648 .By C content reduction, e.g., cracking, etc.
649 ..Isobutylene product per se
650 ..Ethylene product per se
651 ...Using catalyst
652 ...Using O (partial combustion) or steam
653 ..Using catalyst
654 .By dehydrogenation
655 ..With plural separation procedures applied to effluent or effluent component
656 ..Using acceptor, e.g., hydrogen-exchange disproportionation, etc.
657 ...Halogen-containing acceptor
658 ...Elemental O or S acceptor with extraneous nonhydrocarbon agent, e.g., catalyst, etc.

UNSATURATED COMPOUND SYNTHESIS
.By dehydrogenation
659 ..Plural stages or with catalyst movement
660 ..Using extraneous agent containing Pt-group metal and non-Pt-group metal
661 ..Using transition metal oxide, sulfide, or salt
662 ...Cr, Mo, or W
663 ....With other transition metal
664 .By double-bond-shift isomerization
665 ..Using organometallic catalyst
666 ..Using aluminosilicate catalyst
667 ..Using P-containing catalyst
668 ..Using S-containing catalyst
669 ..Using halogen-containing catalyst
670 ..Using transition metal-containing catalyst
671 .By skeletal isomerization
700 SATURATED COMPOUND SYNTHESIS
701 .With measuring, sensing, testing, or synthesis operation control responsive to diverse condition
702 .Synthesis catalyst, solvent, or component thereof used as agent in hydrocarbon purification or separation
703 ..By interaction with nonhydrocarbon
704 .With control of water content of recycled catalyst
705 .With removal of catalyst component from metal-hydrocarbon complex
706 .With addition of reactor effluent component to catalyst as agent for rehabilitation or recycle
707 .With specified procedure for adding fresh makeup catalyst component to complex (sludge), support, or inert contact material
708 .By alkyl transfer, e.g., disproportionation, etc.
709 .By condensation of a paraffin molecule with an olefin-acting molecule, e.g., alkylation, etc.
710 ..With catalyst rehabilitation by reversion from different compound or HF complex
711 ..Including nonhydrocarbon reactant
712 ..With removal of organic halogen contaminant
713 ...Using solid catalyst or sorbent
714 ..With introduction of same material at more than two serially spaced points of reaction zone system
715 ..With autorefrigeration
716 ..Plural alkylation stages
717 ..With preliminary treatment of feed
718 ..With coalescing or sorption of, or addition of specific agent to, effluent or effluent component
719 ..With plural separation procedures applied to effluent or effluent component
720 ..With specified flow procedure within or at entrance to reactor, e.g., by use of named mixing device, etc.
721 ..Using extraneous nonhydrocarbon agent
722 ...Aluminosilicate or organometallic
723 ...HF
724 ....With additional nonhydrocarbon agent
725 .....B-, N-, or P-containing
726 ...B-containing
727 ...Al halide
728 ....With additional nonhydrocarbon agent
729 .....H halide
730 ...S-containing
731 ....Sulfuric acid with additional nonhydrocarbon agent
732 ...O-containing
733 .From nonhydrocarbon feed
734 .By isomerization
735 ..Using temperature gradient or material concentration gradient or introduction of same material at more than two serially spaced points of reaction zone system
736 ..Plural isomerization stages
737 ..With preliminary treatment of paraffin feed
738 ..With specified isomerizate purification or separation procedure
739 ..Using aluminosilicate catalyst
740 ..Using B- or P-containing catalyst
741 ..Using Al halide catalyst
742 ...With additional metal halide
743 ...With S-containing or free or organic halogen agent
744 ...With metal oxide or elemental carbon, e.g., supported, etc.
745 ...With added organic agent or in complex with organic material
746 ...With inorganic material other than halogen-containing
747 ..Using halogen-containing catalyst
748 ...With alumina
749 ....F
750 ..Using metal oxide or hydroxide catalyst
751 ...Including free metal
752 .By C content reduction, e.g., hydrocracking, etc.
800 PURIFICATION, SEPARATION, OR RECOVERY
801 .By conversion of solid to gas, e.g., sublimation, etc., or by melting or squeezing out liquid from solid natural source
802 .By plural serial diverse separations
803 ..To recover alicyclic
804 ..To recover aromatic
805 ...Xylene or ethylbenzene
806 ...Having unsaturated or one-C side-chain
807 ...Including steps of distillation and agent addition
808 ....Agent contains N, carbonyl, or dihydroxy moiety
809 ..To recover unsaturate
810 ...Diolefin
811 ...Including treatment with S-containing agent
812 .By cooling of liquid to obtain solid, e.g., crystallization, etc.
813 ..Using specified holding time or specified cooling rate
814 ..With treatment of mother liquor after crystal separation
815 ..With dissolving or plural serial crystallizations
816 ..With addition of extraneous material
817 ...Before crystal formation
818 .By membrane, selective septum, or coalescer
819 ..Aromatic permeate
820 .By contact with solid sorbent
821 ..With measuring, sensing, testing, or recycle of sorbate to same sorption zone
822 ..Plural serial sorptions
823 ..Sorbate is nonhydrocarbon or chemically undetermined component, e.g., "color-former", etc.
824 ...O-containing sorbate
825 ..With fractional or linear desorption, e.g., chromatography, etc.

PURIFICATION, SEPARATION, OR RECOVERY
.By contact with solid sorbent
826 ..With specified sorbent rehabilitation procedure or agent, e.g., desorbent, etc.
827 ...Cyclic sorbate
828 ....Aromatic separated from other aromatic
829 ...Unsaturated sorbate
830 ..Sorbent is or contains organic
831 ..Cyclic sorbate
832 .Polymerization and depolymerization
833 .By addition of extraneous agent, e.g., solvent, etc.
834 ..With contact procedure involving particular apparatus or more than two moving streams
835 ..With fractional disengagement from agent by use of other agent
836 ..Different, sequentially used agents
837 ...One agent is a diluent, i.e., nonselective solvent or heat exchange material
838 ...Resolution of feed into more than two different components
839 ...Later agent disengages earlier, e.g., decomplexing agent, etc.
840 ....Later agent is hydrocarbon
841 ..H
842 ..HF and another fluoride
843 ..Ag
844 ...By interaction with monoolefin
845 ..Cu
846 ...Ammoniacal, e.g., Cu ammonium acetate (CAA), etc.
847 ....Triple-bond compound separated
848 ...Plural metal or nonhalide Cu compound-containing
849 ...Cu halide with added material other than water
850 ..Group VII or VIII transition metal-containing, e.g., Werner complex formation, etc.
851 ..Group III nontransition element-containing
852 ...Al
853 ..Alkaline metal-containing
854 ...Elemental metal, oxide, or hydroxide
855 ..Metal-containing
856 ..S containing
857 ...S dioxide, sulfolane, or sulfolene
858 ...Sulfuric acid
859 ....Interaction with tertiary olefin
860 ..N-containing
861 ...Ammonia
862 ...Carbonyl moiety-containing
863 ...Interaction with aromatic
864 ..Organic agent
865 ...Heterocyclic or polymeric
866 ...Acid, anhydride, ester or ether
867 ...Hydrocarbon
868 ..Inorganic O-containing agent
899 MISCELLANEOUS PROCESS, E.G., INDETERMINATE MODIFICATION OF A PROPERTY, STORAGE, TRANSPORTATION, ETC.

CATALYST AND RECYCLE CONSIDERATIONS
900 .Rehabilitation of H acceptor
901 .With recycle, rehabilitation, or preservation of solvent, diluent, or mass-action agent
902 ..Recycle of solvent and catalyst
903 .With hydrocarbon recycle to control synthesis reaction, e.g., by cooling, quenching, etc.
904 .Catalyst rehabilitation by reversion from different compound
905 .By-product conversion to feed
906 .Catalyst preservation or manufacture (e.g., activation, etc.) before use
HEAT CONSIDERATIONS
910 .Exploiting or conserving heat of quenching, reaction, or regeneration
911 .Introducing, maintaining, or removing heat by atypical procedure
912 ..Molten material
913 ..Electric
914 ..Phase change, e.g., evaporation, etc.
APPARATUS CONSIDERATIONS
920 .Using apparatus of recited composition
921 .Using recited apparatus structure
922 ..Reactor fluid manipulating device
923 ...At reactor inlet
924 ..Reactor shape or disposition
925 ...Dimension or proportion
926 ...Plurality or verticality
SPECIAL CHEMICAL CONSIDERATIONS
930 .Process including synthesis of nonhydrocarbon intermediate
931 ..Metal-, Si-, B-, or P-containing, e.g., Grignard, etc.
932 ..Carboxyl-containing, e.g., acid, etc.
933 ..N-containing
934 ..Chalcogen-containing
935 ..Halogen-containing
940 .Opening of hydrocarbon ring
941 .Isotope exchange process
942 .Production of carbonium ion or hydrocarbon free-radical
943 .Synthesis from methane or inorganic carbon source, e.g., coal, etc.
944 .Radiation-resistant composition
945 .Product is drying oil
946 .Product is waxy polymer
947 .Terpene manufacture or recovery
MISCELLANEOUS CONSIDERATIONS
950 .Prevention or removal of corrosion or solid deposits
951 .Reaction start-up procedure
952 .Reaction stopping or retarding
953 .Pulsed, sonic, or plasma process
954 .Exploiting mass-action phenomenon
955 .Specified mixing procedure
956 .Condition-responsive control and related procedures in alicyclic synthesis and purification

This Class is the second of a series, newly established as part of a system for the total reclassification of Class 128, Surgery, into several related Classes. Within the new series, the subclasses are related as though each is a part of the same Class.

The portion of Class 128 reclassed into this Class was obtained from Class 128, Surgery, subclass 1, Miscellaneous; subclasses 1.1+, Radioactive Active Substances Applied to the Body for Therapy and subclasses 1.3+, Magnetic Field Applied to the Body for Therapy. In addition, subclasses 127 to 154 of Class 128, Surgery which includes pessaries and shields have been reclassified and follow subclass 126.1 in Class 128.

Class 600 contains radioactive substances and magnetic fields applied to the body for therapy, Cardiac Augmentation devices, antigravational systems (suits), isolation treatment chambers, speech connection therapy, sleep and relaxation inducing devices, body inserted urinary or colonic incontinent devices and treatment, reproduction and fertilization techniques, blood vessel or graft preparation and internal organ supports or slings.

Class 600, Surgery, is to be considered an integral part of Class 128, Surgery, with the subclass of Class 600, Surgery, following the hierarchy of Class 128, and Class Definition of Class 128, Surgery.

1	RADIOACTIVE SUBSTANCE APPLIED TO BODY FOR THERAPY
2	.Combined with other radiant or wave energy source (e.g., electromagnetic, thermal, microwave etc.)
3	.Radioactive substance placed within body (e.g., inhaled, implanted, injected etc.)
4	..By fluid injection of radioactive or enhancing agent through body piercing conduit
5	...Fluid reservoir shielding (e.g., syringe)
6	..Utero-vaginal or pelvic application
7	..Injectors/holders for seeds or implants (e.g., capsules)
8	...Seeds
9	MAGNETIC FIELD APPLIED TO BODY FOR THERAPY
10	.Radio frequency wave induced magnetic field for subcutaneous hyperthermia
11	.Probes
12	.Magnetic element placed within body (e.g., injected, inserted, implanted, etc.)
13	.Electromagnetic coil
14	..Pulsating field
15	.Externally supported or worn (e.g., garment, belt etc.)
16	CARDIAC AUGMENTATION (pulsators etc.)
17	.With condition responsive means
18	.Aortic balloon pumping
19	ANTIGRAVATIONAL SYSTEMS
20	.Body suits
21	ISOLATION TREATMENT CHAMBERS
22	.Incubators
23	SPEECH CORRECTION/THERAPY (e.g., antistammering)
24	.Oral cavity devices
25	SURGICALLY IMPLANTED VIBRATORY HEARING AID
26	SLEEP OR RELAXATION INDUCING THERAPY (e.g., direct nerve stimulation, hypnosis, analgesia)
27	.Sensory (e.g., visual, audio, tactile, etc.)
28	..Audio (e.g., heartbeat, "white noise", etc.)
29	BODY INSERTED URINARY OR COLONIC INCONTINENT DEVICE OR TREATMENT (e.g., artificial sphincters, etc.)
30	.Implanted
31	..With fluid actuated occluding means (e.g., inflatable cuff)
32	.Stoma closures (e.g., colostomy plugs)
33	REPRODUCTION AND FERTILIZATION TECHNIQUES
34	.Embryo transplantation
35	.Artificial insemination
36	BLOOD VESSEL OR GRAFT PREPARATION
37	INTERNAL ORGAN SUPPORT OR SLING

This Class is the first of a series, newly established, as part of a system for reclassifying Class 128, Surgery, into several related classes. Within the series, the subclasses are to be related as though each is part of the same class.

The portion of Class 128, Surgery. reclassified into this Class was obtained from the subclasses 207.19 to 274 (MEDICATOR) and subclasses 275 to 302 (RECEPTORS). The "MEDICATOR" subclasses contained dosing devices, including hypodermic injectors, syringes, depositors and applicators, containers, pump, and valves. The "RECEPTOR" subclasses contained aspirators, lacteal devices, catamenials, diapers, absorbent pads, and materials. All of these are now included in the new series Class 604, Surgery. In general, Class 604, Surgery, contains body treating and medicating methods and apparatus which includes the application, storing, collecting, introduction, or removal of materials from the body.

Class 604, Surgery, is to be considered an integral part of Class 128, Surgery, with the subclass of Class 604, Surgery, following the hierarchy of Class 128, and the Class Definition of Class 128, Surgery.

890.1 CONTROLLED RELEASE THERAPEUTIC DEVICE OR SYSTEM
891.1 .Implanted dynamic device or system
892.1 .Osmotic or diffusion pumped device or system
1 SWAB INCLUDING HANDLE (E.G., STICK, ETC.) WITH ABSORBENT MATERIAL AT END THEREOF
2 .Body treating material fed to absorbent material
3 ..Means broken, cut, pierced, or torn to permit flow of material
4 BLOOD DRAWN AND REPLACED OR TREATED AND RETURNED TO BODY
5 .Constituent removed from blood and remainder returned to body
6 ..Component of blood removed (i.e., pheresis)
7 BLOOD TRANSFERRED BETWEEN DIFFERENT BODIES ALONG CONTINUOUS FLOW PATH (E.G., TRANSFUSION, ETC.)
8 DEVICES TRANSFERRING FLUIDS FROM WITHIN ONE AREA OF BODY TO ANOTHER (E.G., SHUNTS, ETC.)
9 .With flow control means (e.g., check valves, hydrocephalus pumps, etc.)
10 ..With antisiphon means
11 MEANS FOR INSERTING FIBROUS OR FORAMINOUS RESIDENT PACKING, RECEPTOR, OR MEDICAMENT CARRIER INTO BODY ORIFICE
12 .With lubricating means
13 .With means for ejecting continuous length insert (e.g., gauze packing)
14 .Distal portion of inserting means deformed, expanded, or ruptured to permit passage of insert therefrom
15 .With slidable ejector (e.g., plunger or ram, etc.) inside tubular inserting means
16 ..Ejector moved into operating position from stored location inside or alongside inserting means
17 ...Ejector pivoted or swung into operating position
18 ..Tubular inserting means releasably interlocked with ejector
19 MEANS FOR INTRODUCING OR REMOVING MATERIAL FROM BODY FOR THERAPEUTIC PURPOSES (E.G., MEDICATING, IRRIGATING, ASPIRATING, ETC.)
20 .Infrared, visible light, ultraviolet, X-ray or electrical energy applied to body (e.g., iontophoresis, etc.)
21 ..With tubular injection means inserted into body
22 .With means for cutting, scarifying, or vibrating (e.g., ultrasonic, etc.) tissue
23 .Gas application
24 ..Gas mixed with other material
25 ..Ozone
26 ..Gas injected into body canal or cavity
27 .Material introduced into and removed from body through passage in body inserted means
28 ..Method
29 ..Peritoneal dialysis
30 ..Flow control
31 ...By self-acting means or condition responsive sensor
32 ...Rotary valve
33 ...Slide or reciprocating valve
34 ...Deformable occluding tube valve
35 ..With aspirating or vacuum removing means
36 ..Means moved by person to introduce and remove material
37 ...Hand-supported squeeze bulb
38 ...Piston
39 ..Structure of douche nozzle having separate ingress and egress passages therein
40 ...With telescoping movement between ingress and egress passages
41 ...With body orifice occluding means
42 ....Axially adjustable
43 ..Body inserted conduit with separate ingress and egress passages
44 ...Having body piercing means
45 ...Having air or gas venting passage
46 .Treating material introduced into body by contact with wound formed therein by solid scarifier, cutter, or the like (e.g., scratching skin with vaccine coated needle, etc.)
47 ..With separate applicator for material or separate holder for material placed on applicator or in wound
48 .Treating material introduced into or removed from body orifice, or inserted or removed subcutaneously other than by diffusing through skin
49 ..Methods
50 ...Material introduction or removal responsive to sensed body condition
51 ...Material introduced into body or removed therefrom through piercing conduit (e.g., needle) inserted into body
52 ....Material introduced into or removed from blood vessel
53 .....By catheter

MEANS FOR INTRODUCING OR REMOVING MATERIAL FROM BODY FOR THERAPEUTIC PURPOSES (E.G., MEDICATING, IRRIGATING, ASPIRATING, ETC.)
.Treating material introduced into or removed from body orifice, or inserted or removed subcutaneously other than by diffusing through skin
..Methods
54 ...Material introduced into or removed from body orifice
55 ....Female reproductory tract
56 ...Liquid mixed with solid or different liquid
57 ..Means for placing solid treating material in body
58 ...Powder dispenser
59 ...Means for ejecting solid from holder
60 ....Solid ejected from body inserted conduit
61 .....Eject means moved by force applied to trigger associated with pistol grip
62 .....Solid units successively fed to conduit from supply means (e.g., magazine, etc.)
63 .....Eject means driven by spring
64 .....Solid loaded into injector through opening in side wall of plunger housing
65 ..Material flow varying means controlled by condition responsive sensor
66 ...Sensor responsive to body condition
67 ...Sensor controls pump, motor, or pressure driven means
68 ..Needless hypodermic injector
69 ...Material expelled from injector by explosive charge
70 ...Material expelled from injector by pressurized fluid
71 ...Multidose type
72 ...Structure of material reservoir replaceably held in injector
73 ..Means forceably introducing or removing material from body orifice or wound
74 ...Lacteal extractors (e.g., breast pump, etc.)
75 ....With collapsible bulb means
76 ....With suction generated orally by person or user
77 ..Structure of means contacting portion of head (e.g., tongue, etc.) during placement of treating material in mouth or throat
78 ...Drinking cup
79 ...Means for engaging head to hold feed device in mouth
80 ..Gravity feed to body from plural material reservoirs
81 ...With self-acting sequential flow from reservoirs
82 ..Means for intermixing liquid with solid or different liquid
83 ...Treating material introduced directly into liquid stream path
84 ....Solid treating material
85 ....Liquid stream passes through reservoir containing treating material
86 ....Septum pierced by conduit
87 ...Means broken, cut, pierced or torn to permit mixing
88 ....Septum
89 ...Closure or barrier between compartments moved to permit mixing
90 ....Closure moved, expanded, or flexed by force transmitted by liquid
91 ....Closure moved by relative movement between closure and separate protruding member
92 ...Solid dissolved in liquid
93 ..Material introduced or removed through conduit, holder, or implantable reservoir inserted in body
94 ...Dual nozzles for insertions into paired body orifices (e.g., nasal passages, etc.)
95 ...Conduit with self-propelled or remote control means
96 ...Having means inflated in body (e.g., inflatable nozzle, dilator, balloon catheter, occluder, etc.)
97 ....Including means forcing inflation fluid into inflatable means
98 .....Pressurized inflation means
99 ....With inflation or deflation control means
100 ....With indicator means
101 ....With plural balloons on conduit
102 ....With aperture in conduit proximal of inflated means
103 ....With means bonding or mechanically securing balloon sleeve or connector member (e.g., coupling funnel, etc.) to conduit
104 ...Having means expanding body orifice or canal (e.g., dilator, retaining means, etc.)
105 ....Expanding bow
106 ....Expanding arm or finger
107 .....Expansion actuated by axially movable member
108 ......Rotatable means actuates axially movable member
109 .....Expansion actuated by rotatable means (e.g, threaded or cammed member, etc.)
110 ...Having means for preventing reuse of device
111 ...Having means for indicating device is defective , used, or tampered with
112 ...Having means for desensitizing skin
113 ...Having means for cooling or heating body, treating or collected material or device
114 ....Electric means
115 ...Having means for protruding skin to facilitate piercing it
116 ...Having means for locating or identifying point where body is to be pierced (e.g., apertured body fitting template, etc.)
117 ...Having structure for controlling depth of insertion of body piercer
118 ...Having means for varying, regulating, indicating, or limiting injection pressure or aspirating suction
119 ....Means varying or regulating suction
120 .....With cyclic or timed regulation
121 ....On piston type injector or aspirator
122 ...Having means for eliminating and/or preventing injection of air into body
123 ....From pump injection device
124 ....From injection means moved by person to impel material into body
125 .....From hand supported injection means
126 ....By hydrophilic or hydrophobic filters
127 ....By low level float cutoff
128 ...Having siphon means for removing material from external source or body
129 ....With vacuum breaking means (e.g., vent, etc.)

MEANS FOR INTRODUCING OR REMOVING MATERIAL FROM BODY FOR THERAPEUTIC PURPOSES (E.G., MEDICATING, IRRIGATING, ASPIRATING, ETC.)
.Treating material introduced into or removed from body orifice, or inserted or removed subcutaneously other than by diffusing through skin
..Material introduced or removed through conduit, holder, or implantable reservoir inserted in body
130 ...Having projectile injector operated upon impact with body
131 ...Treating material forced into or out of body by self-acting fluid pressure, motor-driven, or mechanical energy storing means (e.g., pressure infusion or aspiration, etc.)
132 ....Material impelled into body by contraction of expanded elastic material reservoir
133 ....Material exhausted from body by expansion of contracted elastic receptacle or resilient means therein
134 ....Material impelled by spring
135 .....Spring drives piston
136 .....Material conduit forced into body by spring
137 ......Spring triggered by skin contacting means
138 ......Portion of conduit stored in material supply means
139 ......Material supply means pierced by conduit
140 ....Material impelled by pressurized charge of gas or vacuum
141 .....Material impelled by means (e.g., diaphragm, piston) moved by gas or vacuum pressure
142 ......Reservoir prepressurized or exhausted by squeeze bulb
143 ......Piston impelled by gas or vacuum pressure
144 ....And impelling material conduit into body
145 .....Pressurizing gas generated by chemical reaction
146 .....Pressurizing gas or vacuum charge produced by mechanical actuator (e.g., air pump, etc.) associated with injector
147 .....Pressurizing gas or vacuum charge supplied by external storage source
148 .....Means broken, cut, pierced, or torn to permit material flow
149 ....Material impelled by negative pressure created by current of fluid (e.g., air entrainment, etc.)
150 ....Material impelled by hydraulic or water hydrant pressure
151 ....Material impelled by pump
152 .....Reciprocating piston type
153 .....Deformable resilient chamber type
154 ....Material impelled by nonreciprocating piston driven by motor
155 .....With threaded drive means
156 ...Conduit forced into body by self-acting fluid pressure, motor-driven, or mechanical energy storing means
157 ....Conduit impelled by spring
158 ...Body entering conduit axially movable within body piercing conduit while former is disposed in the body
159 ....Having mechanical means for feeding conduit through piercing conduit
160 ....Having longitudinal groove or slot in piercing conduit to permit removal from body entering conduit
161 ....Piercing conduit longitudinally separable for removal from body entering conduit
162 ....Having guard on piercing conduit for protecting body entering conduit
163 ....Having bag or sheath enclosing body entering conduit
164 ...Body piercer, obturator rod, or stylet axially movable within body entering conduit while latter is disposed in body
165 ....Having means preventing relative movement between elements during their insertion into body
166 ....Having groove or reduced portion on piercer, rod, or stylet for receiving distal end of conduit
167 ....Having resealable closure means for conduit
168 ....Having telltale for showing entry of blood into conduit
169 ....Flow control means in conduit operable after removal of piercer, obturator, or stylet from conduit
170 ....Having blunt tip on obturator rod or stylet
171 ...Body entering conduit axially movable within flexible protective sheath facilitating sterile insertion into body duct
172 ....Having lubricating means
173 ...Injection or aspiration device having plural body entering conduits
174 ...Means for securing conduit to body
175 ....Implanted connecting means
176 ....Vacuum
177 ....And used as conduit manipulator (e.g., foldable gripper wings, etc.)
178 ....Axially movable clamp means
179 ....Belt, strap, or band securing means
180 ....Adhesive securing means
181 ...Means moved by person to inject or remove fluent material to or from body inserted conduit, holder, or reservoir
182 ....Means moved by weight of body placed thereon
183 ....Material expelled from reservoir having separate external feed means and discharge outlet
184 .....Material fed to reservoir through hollow piston
185 .....Reservoir squeezed to expel material therefrom
186 .....Means for metering material flow to or from body
187 ....Injector or aspirator syringe supported only by person during use (e.g., hand held hypodermic syringe, douche tube with forced injection, etc.)
188 .....Having body piercing conduit mounted on syringe for rotation about its longitudinal axis
189 .....Having medical information (e.g., name of patient or medicament, etc.) means
190 .....Having fluid filter
191 .....Having plural material reservoirs

MEANS FOR INTRODUCING OR REMOVING MATERIAL FROM BODY FOR THERAPEUTIC PURPOSES (E.G., MEDICATING, IRRIGATING, ASPIRATING, ETC.)
.Treating material introduced into or removed from body orifice, or inserted or removed subcutaneously other than by diffusing through skin
..Material introduced or removed through conduit, holder, or implantable reservoir inserted in body
...Means moved by person to inject or remove fluent material to or from body inserted conduit, holder, or reservoir
....Injector or aspirator syringe supported only by person during use (e.g., hand held hypodermic syringe, douche tube with forced injection, etc.)
192 .....Having cover or protector for body entering conduit
193 ......Used as piston actuator after removal from conduit covering or protecting position on syringe
194 ......Entire body entering conduit stored in cavity in piston or piston actuator inside syringe prior to use
195 ......Portion of body entering conduit stored in material receiving syringe reservoir
196 ....And extended therefrom by piston when syringe is used
197 ......Common cover or protector for body entering conduit and material syringe reservoir
198 ......Cover or protector for body entering conduit movable axially relative to one another
199 .....Having structure for facilitating sterilization of syringe or preventing contamination of material therein
200 .....Means broken, cut, pierced, or torn to permit material flow to or from body
201 ......Septum pierced by conduit to permit flow
202 ....Septum flexed toward conduit to force conduit therethrough
203 ....Septum pierced is piston head
204 ....Septum within collapsible material reservoir
205 ....Septum piercing conduit separate from body entering conduit
206 ....Septum piercing conduit attached to injector by turning one component relative to another (e.g., thread, bayonet type connector, etc.)
207 .....Having means for metering material flow to or from body
208 ......Including means for controlling piston stroke length
209 ....By rachet and pawl
210 ....By detent
211 ....By rotatable means (e.g., micrometer, etc.)
212 .....Having collapsible material reservoir (e.g., squeeze bulb, etc.)
213 ......Having means to prevent fluid return to reservoir
214 ......Mechanical means (e.g., piston, clamp, etc.) moved to collapse reservoir
215 ......Having orifice occluding means
216 ......Bellows-type reservoir
217 .....Reservoir pressurized or exhausted by squeeze bulb
218 .....With piston or plunger for expelling material from body or injector reservoir
219 ......Diameter of piston selectively adjustable
220 ......Means for preventing accidental displacement of piston
221 ......Piston or piston actuator slidable in or against seal ring mounted on reservoir
222 ......Seal ring mounted on piston
223 ......Injector components pivoted relative to each other to move piston
224 ......Piston moved by screw or rack
225 ......Means for preventing destructive piston impact on end of material reservoir
226 ......Closable storage cavity included in piston or piston actuator
227 ......Specific structure of finger grip for moving piston
228 ......Specific structure of means coupling piston to piston actuator
229 ......Piston actuator contacting resilient retractable portion on piston
230 ......Means for reducing piston sliding friction (e.g., oil applicator, use of low friction material, etc.)
231 ......Material passed to or from body through aperture in piston
232 ......Material reservoir (e.g., cartridge, etc.) removably mounted in syringe
233 ....Piston actuator mounted in means (e.g., yoke, etc.) pivoted to syringe
234 ....Material reservoir centered or clamped in syringe by slidable component
235 ....Means for ejecting, or facilitating ejection of material reservoir from syringe
236 ......Material flow controlled by valve or movable closure (e.g., plug in orifice, etc.)
237 ....Diaphragm valve
238 ....Removable plug
239 .....Specific structure of body entering or piercing conduit
240 .....Specific structure of means connecting body entering conduit to syringe
241 ......Conduit holder attached to another syringe component by thread means
242 ......Conduit holder attached to another injector component by cam
243 ......Conduit or holder therefor removably attached to another injector component by friction
244 ...Means broken, cut, pierced, or torn to permit material flow to body
245 ...Material flow to or from body terminated by self-acting means
246 ...Means for controlling material flow to or from body, or metering a predetermined dose or amount
247 ....Having fluid responsive means (e.g., check valve, etc.)
248 ....Rotatable type valve
249 ....Slide or reciprocating valve

MEANS FOR INTRODUCING OR REMOVING MATERIAL FROM BODY FOR THERAPEUTIC PURPOSES (E.G., MEDICATING, IRRIGATING, ASPIRATING, ETC.)
.Treating material introduced into or removed from body orifice, or inserted or removed subcutaneously other than by diffusing through skin
..Material introduced or removed through conduit, holder, or implantable reservoir inserted in body
...Means for controlling material flow to or from body, or metering a predetermined dose or amount
250 ....Conduit deforming clamp
251 ....Drip meter
252 .....Having fluid filter
253 .....Having drip sensor
254 .....Having float controlling or indicating material flow from chamber
255 .....Mounted in material reservoir
256 ....Having flow closing or opening means (e.g., plug, cap, seal, etc.)
257 ...Liquid reservoir with body inserted nozzle or feed conduit connected therewith
258 ....Having plural feed conduits
259 ....With storage means (e.g., cabinet, etc.) for reservoir and material feed conduit
260 ....Having liquid level indicator
261 ....Having means for supporting body inserted nozzle tip or free end of feed conduit after use
262 ....Bag type
263 ...Removable cover or protector for body inserted conduit
264 ...Body inserted tubular conduit structure (e.g., needles, cannulas, nozzles, trocars, catheters, etc.)
265 ....With body soluble, antibactericidal or lubricating materials on conduit
266 ....With anticlogging means on conduit (e.g., anticlotting, decalcification, tissue occulsion, etc.)
267 .....Mechanical cleaning means
268 .....With barrier, shield, or suction relief means adjacent tissue contacting orifice
269 .....With anticoagulant supply means
270 ....Having weighted tip means on conduit promoting advance thereof through alimentary tract
271 ....Having evaginating or invaginating capability
272 ....Body piercing condit (e.g., needle, etc.)
273 .....Specific structure for preventing or minimizing inconvenience casued by breakage during insertion of conduit into body
274 .....Specific structure for preventing coring of body tissue
275 ....Nozzle insertable into body orifice
276 .....Having external means for receiving material discharged from body orifice
277 ......Colostomy apparatus
278 .....Having orifice sealing means
279 .....Vaginal or douche type
280 ....Flexible catheter/cannula or means (e.g., coupling, etc.) used therewith
281 .....Having shape retaining memory
282 .....Having rigidifying or anticollapsing means (e.g., reinforcing coils, etc.)
283 .....With coupling or connector structure
284 .....Having branched shapes (e.g., T or Y drains, etc.)
285 ...Treating material insert retained in body orifice
286 ....Including foraminous material (e.g., sponge, etc.) or fibrous element other than withdrawal cord
287 .....With soluble cover means
288 ....Soluble in body (e.g., suppository, etc.)
289 .Treating material applied to or removed from external surface of body, or cutaneous layer of skin (e.g., eye treatment, removal of skin impurities, etc.)
290 ..Method of applying or removing material to or from body
291 ..Means for cooling or heating material
292 ..Glove for applying or removing material to or from wearer's hand
293 ..Specific structure for applying or removing material to or from foot or leg
294 ..Means for treating eye or surface of ocular cavity
295 ...Dropper, douche, or eyecup for applying liquid to eye
296 ....Having means for aerating liquid
297 ....Having means for scavenging liquid after contact with eye
298 ....Having means for metering liquid flow to eye
299 ....Having means for preventing contact of liquid with syringe bulb
300 ....Having means for positioning liquid dispenser relative to eye
301 .....Eye cup
302 .....Guard or guide
303 ..Mask for applying or removing material to or from wearer's face
304 ..Bandage, pad, or shield placed on body for sustained treatment thereof
305 ...Treating material supplied to bandage, pad, or shield through conduit connected to remote supply
306 ...Treating material reservoir broken, cut, pierced, or torn to apply treating material to body
307 ...Adhesively attachable to body
308 ...Bandage, pad, shield, or attaching means extendable around body portion
309 ..Solid treating material (e.g., styptic pencil, etc.) application
310 ..Fluent treating material held in reservoir in hand-supported applicator
311 ...With piston or plunger for expelling material therefrom
312 ..Sudatory devices (e.g., removing sweat, etc.)
313 ..Means for removing material from surface by suction
314 ...Venom extractor
315 ...Suction generated by self-acting fluid pressure, motor-driven or mechanical energy storing means (e.g., spring, etc.)
316 ...Means moved by person to produce suction (e.g., squeeze bulb, piston, etc.)

317 MEANS AND METHODS FOR COLLECTING BODY FLUIDS OR WASTE MATERIAL (E.G., RECEPTACLES, ETC.)
318 .Material collector with condition indicator
319 .Aspiration collection container or trap (e.g., canister, etc.)
320 ..Having vacuum shutoff means (e.g., float valve, etc.)
321 ..Having liquid seal means
322 .Material collector or receptacle having attaching means to static support independent of body
323 ..With flow control means (e.g., antibackflow valve, etc.)
324 ..With vent or overflow opening
325 ..With drip meter
326 ..Conduit or connector for material collector/receptor
327 .Receptacle attached to or inserted within body to receive discharge therefrom
328 ..Receptacle or portion thereof inserted within body cavity
329 ...Receptacle structured for collecting urine from human female
330 ...Intravaginal
331 ....With external collector or support means
332 ..Receptacle engaging around permanent surgically constructed body opening (e.g., colostomy, etc.)
333 ...Having deodorant means (e.g., filter)
334 ...Having additional irrigation port or means
335 ...With flow control means (e.g., valve, etc.)
336 ...With hydrocolloid type seal (e.g., gel, starch, karaya gum, etc.)
337 ...Means for covering stoma or body opening
338 ...Mounting ring or annulus around body opening
339 ....Bag attached to seal ring
340 .....With bag anticollapse feature
341 .....Body engaging surface of seal ring covered by bag wall or portion thereof
342 .....Means attaching bag to seal ring
343 .....Including body support means
344 ......Adhesive
345 ...With body support means (e.g., belt, garment, etc.)
346 ..Receptacles receiving protruding body member (e.g., ears, genitalia, breast, etc.)
347 ...Genital receptacle
348 ....With separate fecal receiving compartment
349 ....Receptacle structured for collecting urine or discharge from male member (e.g., external catheter, etc.)
350 .....With antibackflow means
351 .....With separate body securing means
352 ......Adherent or inflatable type
353 ......Body or body member encircling belt, strap, or harness
354 ....Catamenial receptacle
355 ..Receptacle externally sealing around body opening to receive natural or surgical discharge
356 ..Receptacle placed under or against body to collect discharge during surgical or obstetrical operations
357 ...Flexible apron type
358 .Absorbent pad for external or internal application and supports therefor (e.g., catamenial devices, diapers, etc.)
359 ..Deodorant containing
360 ..Containing inhibitor to ammonia or bacteria formation
361 ..With wetness indicator or alarm
362 ..With radio-opaque material or signaling means for residual material
363 ..With lubricating means to facilitate insertion
364 ..Containing hydrosoluble, hydrodegradable or body heat soluble material
365 ..Containing fiber or material bonding substance
366 ...Thermoplastic
367 ..Containing particular materials, fibers, or particles
368 ...Collagen or gelling material
369 ...Foam or cellular structure material
370 ...Thermoplastic
371 ....Nylon
372 ...Synthetic resin
373 ...Natural or synthetic rubber
374 ...Cellulose or cellulosic materials
375 ....With additional chemical modifications (e.g., paper, chemical pulp, rayon, etc.)
376 .....Carboxy-radical containing
377 ....Cotton or derivative thereof
378 ..Containing layers having differing absorption characteristics (e.g., flow control, wicking, etc.)
379 ...Compressed layer
380 ....Having discontinuous areas of compression
381 ...Layer coated or treated to decrease absorbency
382 ....Discontinuous coating or treatment of layer
383 ...Needled or punched layer
384 ..Having specific fiber orientation or weave
385.1 ..Having specific design, shape, or structural feature
385.2 ...Elastic type edge
386 ..Pad having means for securing pad during use
387 ...By securing to garment or person
388 ....Shoulder supported garment
389 ...Adhesive tab fastener element
390 ....With release means associated with tab fastner
391 ...By fabric strip fastener element (e.g., VELCRO, etc.)
392 ...By strap, belt, tying, or endless band means
393 ..Specific garment, holder, or support for absorbent pad
394 ...Abdominal enclosing type
395 ....With openable or removable crotch portion
396 ....With endless waist encircling band (e.g., panty type)
397 ...Pad support having means to restrain absorbent pad
398 ....Pad restrained by means transverse to width of the pad or fastener element (e.g., strap, end flap, or tuck)
399 .....Button or snap fastener element
400 ...Pad support or holder adjustable relative to body crotch area
401 ...With body attaching means for pad support

MEANS AND METHODS FOR COLLECTING BODY FLUIDS OR WASTE MATERIAL (E.G., RECEPTACLES, ETC.)
.Absorbent pad for external or internal application and supports therefor (e.g., catamenial devices, diapers, etc.)
..Specific garment, holder, or support for absorbent pad
402 ...Pad holding or suspending device
403 CONTAINER FOR BLOOD OR BODY TREATING MATERIAL, OR MEANS USED THEREWITH (E.G., NEEDLE FOR PIERCING CONTAINER CLOSURE, ETC.)
404 .Means for indicating condition of container content
405 .Filter for purifying or washing air entering container
406 .Filter or series thereof for liquid entering or leaving container
407 .Means for metering amount of content drawn from container
408 .Bag type
409 ..With means for holding sample of content
410 ..Plural compartments or bags
411 .Having hollow needle or spike for piercing container or container closure
412 ..Conduit with hollow needle or spike at each end thereof
413 ..Pointed at both ends
414 ..Mounted on one container and used to pierce another container or closure
415 .Container with piercable closure
416 .Materials mixed within container

906 ARTIFICIAL INSEMINATION

This class is the third of a series, newly established as part of a system for the total reclassification of Class 128, Surgery, into several related Classes. Within the new series, the subclasses are related as though each is a part of the same class.

The portion of Class 128, Surgery reclassed into this Class was obtained from Class 128, Surgery, subclass 92R, bone (orthopedic instrumentation) and subclasses 303R to 361, instruments.

Class 606 contains the application of light, cryogenics and electrical application of light, cryogenics and electrical applicator to the body, orthopedic instrumentation including internal and external fixation devices, orthopedic cutting devices and surgical instrumentation.

Class 606, Surgery is to be considered an integral part of Class 128, Surgery, with the subclass of Class 606, Surgery, following the hierarchy of Class 128, and the Class Definition of Class 128, Surgery.

1 INSTRUMENTS
2 .Light application
3 ..With particular wavelength
4 ..Ophthalmic
5 ...Recurving or reshaping of the eye
6 ...Cataracts or glaucoma
7 ..Angioplasty
8 ..Anastomosis
9 ..Dermatological
10 ..Systems
11 ...Beam energy control or monitoring
12 ....Condition responsive
13 ..Applicators
14 ...Placed in body
15 ....With optical fiber
16 ...With optical fiber
17 ...With beam shaping or redirecting (e.g., lens)
18 ....Mirror
19 .....Articulated arm
20 .Cyrogenic application
21 ..Internal application
22 ..With coolant supply
23 ...Tip or other cooling concentration means
24 ....With heating means (e.g., defroster)
25 ....Self-contained coolant supply
26 ....With hand manipulable coolant control
27 .Heat application
28 ..Tip or other heat concentration means
29 ...Tip in electrical circuit
30 ....Self-contained powersupply
31 ....With thermal control means
32 .Electrical application
33 ..Electromagnetic wave irradiation
34 ..Systems
35 ...Ground electrode monitoring
36 ...Depilation
37 ...Combined cutting-coagulation
38 ....With feed back control
39 ...Cutting
40 ...Coagulation
41 ..Applicators
42 ...With switching or power control
43 ...Depilation
44 ....By needle
45 ...Cutting
46 ....Endoscopic
47 .....With formable electrode
48 ....Bipolar electrodes
49 ...coagulation
50 ....Bipolar electrodes
51 .....With forceps or tweezers
52 ....With forceps or tweezers
53 .Orthopedic instrumentation
54 ..External fixation means
55 ...Movable by patient
56 ...Ring frame
57 ...Compression or distraction mechanism
58 ....Cyclable or incrementable
59 ...Pin connector
60 ..Internal fixation means
61 ...Spinal positioner or stabilizer
62 ...Intramedullary fixator
63 ....Expanding in diameter or length
64 ....Cross-fastened
65 ...Femoral screw
66 ....Anti-rotation or keeper means
67 ...Femoral nail
68 ....Expanding
69 ...Cortical plate
70 ....Multi-element or coated plate
71 .....Having separable and distinct plate elements
72 ...Orthopedic fastener
73 ....Threaded fastener element
74 ....Bone cerclage device
75 ....Staple or similar driven fastener
76 ..Specialized coating or material
77 ...Absorbable
78 ...Shape memory material
79 ..Orthopedic cutting instrument
80 ...Reamer or drill
81 ....Acetabular
82 ...Saw type tool
83 ...Rongeur, resector, or nipper
84 ...Osteotome or scraper
85 ....Rasp or file
86 ..Means for use in bone reperation
87 ...Osteotomy jig or fixture
88 ....Knee or knee joint
89 ....Femoral head
90 ...Joint distractor
91 ...Acetabular cup positioner
92 ...Device for the application of bone cement
93 ....Applicator
94 .....Pressurized cement placement
95 ....Intramedullary plug or centering means
96 ...Drill or pin guide
97 ....X-ray positioned
98 ....Cross-pinning drill guide
99 ...Prosthesis insertor or extractor
100 ....Restrained movable mass (e.g., slide hammer)
101 ...Nail or plate bender
102 ...Gauging or measuring device
103 ...Wiring aid
104 ...Screw or pin placement or removal means
105 ...Bone compression or distraction
106 .Means for removing foreign objects from the throat or connected passageways (e.g., probing)

INSTRUMENTS
107 .Means for removing, inserting or aiding in the removal or insertion of eye lens material
108 .Means for inserting or removing conduit within body
109 ..Ear vent or drain
110 .Means for removing tonsils, adenoids or polyps
111 ..With hemostasis
112 ...By pressure application
113 ..By wire loop or snare
114 ..With collecting means for removed material
115 ...By vacuum application
116 .Means for marking animals
117 .Means for applying animal identification device
118 .Means for circumcision
119 .Obstetric or gynecological instruments
120 ..Umbilical clamp
121 ..Partuition assistance device
122 ...Fetus extractor
123 ....With vacuum or suction application
124 ....With mechanical means for applying tension (e.g., gearing, reels, etc.)
125 ..Means for rupturing the amniotic membrane
126 ..Embryotome
127 .Means for concretion removal
128 ..With fragmenting means
129 .Electrode guide means
130 .Stereotaxic device
131 .Means for removal of skin or material therefrom
132 ..By means for skin graft preparation (e.g., dermatome)
133 ..Physical removal of hair or hair plugs from skin
134 ...By application of wax or adhesive
135 .Means for, or to assist in mammalian sterilization
136 ..By crushing
137 ..By severing
138 .Means for removing suture, clip, staple or ligature
139 .Suture, ligature, elastic band or clip applier
140 ..Elastic band applier
141 ...Band applied to reproductive organ
142 ..Clip applier
143 ...Clip fed from supply
144 ..Mechanical suture or ligature applier
145 ...Shuttle action by suture passing device
146 ...Spool feeds suture to needle
147 ...Means for clamping needle to handle
148 ..Suturing or ligating aid or guide
149 ...Eversion device
150 ...Alignment device (e.g., approximators)
151 .Surgical mesh, connector, clip, clamp or band
152 ..Connector for nerve endings
153 ..Connector for hollow body organs
154 ...Bioabsorbable
155 ...Connector is single element
156 ....Removable
157 ..Occluding clip, clamp, or band
158 ...Artery or vein
159 .Blood vessel, duct or teat cutter, scrapper or abrader
160 .Curette
161 .Optic, otic or oral scrapper or abrader
162 .Means for cleaning eye, ear or nose
163 .Means for debeaking or dehorning animals
164 ..By electrical or thermal application
165 .Means for removal of animal tails
166 .Corneal cutter or guide for corneal cutter
167 .Cutting, puncturing or piercing
168 ..Cutter drive reversed to clean material therefrom
169 ..Cutter having vibratory drive means
170 ..Cutter carried on elongated probe-like member
171 ...Reciprocating or oscillating cutter
172 ..Means to limit cutter penetration depth (e.g., dura guard)
173 ...By disconnecting cutter drive
174 ..Shear type (e.g., scissors, etc.)
175 ...Snout cutter
176 ..Saw type
177 ...Reciprocating
178 ...Oscillating
179 ...Cylindrical
180 ..Rotary cutter
181 ..Lancet
182 ...Spring driven or biased into cutting position
183 ....Plural cutting blades
184 ..Punch
185 ..Puncturing or piercing
186 ...Multiple puncturing elements (e.g., tatoo, scarifiers, etc.)
187 ...Hair or artificial hair injector or anchor
188 ...Earlobe piercing means
189 ...Acupuncture means
190 .Blunt dissectors
191 .Internal pressure applicator (e.g., dilator)
192 ..Inflatable or expandible by fluid
193 ...Inserted in female reproductive system
194 ...Inserted in vascular system
195 ....Detachable from inflation means
196 ...Nose or throat
197 ..Rectal or anal
198 ..Expanding dilator (e.g., expanding arm, etc.)
199 ..Nasal dilator
200 ..With emboli trap or filter
201 .External pressure applicator
202 ..Pneumatic cuff
203 ..Tourniquet
204 ..Acupressure device
205 .Forceps
206 ..Jaws biased to open or closed position
207 ..Jaw structure
208 ..Hinge or latch structure
209 ..Tubular member stripper
210 .Tweezers
211 ..Combined with another device
212 .Hoof crack repair
213 .Sutureless closure
214 ..Chemical bonding material applied to wound edges
215 ..Material placed on opposed sides of incision or wound
216 ...Means to draw opposed sides of incision into apposition
217 ....Sliding fastener
218 ....Screw, rack and pinion or pawl and racket
219 ...Staple fastener
220 ....With retaining means
221 ...Approximating clip or serrefine
222 .Suturing needle
223 ..Needle tip or body structure
224 ..Filament attachment
225 ...Tied, hooked, wedged or grasped
226 ...Deformed
227 ...Pull out or frangible

INSTRUMENTS

228 .Suture or ligature
229 ..Collagen containing
230 ..Absorbable in body
231 ..Organic material containing
232 .Suture retaining means (e.g., buttons)
233 .Suture supported from engagement with incision (e.g., suture bridge)
234 .Oral pacifier
235 ..Teething device
236 ..Nipple attachment or structure

CLASS 623 PROSTHESIS (I.E., ARTIFICIAL BODY MEMBERS), PARTS THEREOF OR AIDS AND ACCESSORIES THEREFOR

1 ARTERIAL PROSTHESIS (E.G., BLOOD VESSEL, ETC.)
2 HEART VALVE
3 CORPOREAL ARTIFICIAL HEART, HEART ASSIST (E.G., IMPLANTABLE BLOOD PUMP, ETC.) CONTROL REGULATOR, OR POWER SUPPLY THEREFOR, OR METHOD OF OPERATION THEREFOR
4 EYE PROSTHESIS (E.G., LENS OR CORNEAL IMPLANT, OR ARTIFICIAL EYE, ETC.)
5 .Corneal implant
6 .Intraocular lens
7 BREAST PROSTHESIS
8 .Implantable
9 LARYNX, TRACHEA, TRACHEOBRONCHIAL PROSTHESIS OR COMBINATION THEREOF
10 EAR OR NOSE PROSTHESIS
11 IMPLANTABLE PROSTHESIS
12 .Hollow or tubular part or organ (e.g., bladder, urether, bronchi, bile duct, etc.)
13 .Ligament or tendon
14 .Muscle (e.g., sphincter, etc.)
15 .Hair or skin
16 .Bone prosthesis
17 ..Spinal column (e.g., vertebra, spinal disc, etc.)
18 ..Joint
19 ...Shoulder
20 ...Elbow or knee
21 ...Wrist, hand (e.g., finger, etc.), ankle or foot (e.g., toe, etc.)
22 ...Hip
23 ....Femoral head
24 HAVING ELECTRICAL ACTUATOR
25 .Bioelectrical (e.g., myoelectric, etc.)
26 HAVING FLUID ACTUATOR
27 LEG
28 .Extension
29 ..Foot covering or support
30 .Torso actuated or controlled
31 .Torso attachment
32 .Suspender or attachment from natural leg
33 .Socket holder
34 ..Suction type
35 ..Yieldably mounted
36 ..Cushioning means (e.g., pad or liner, etc.)
37 ...Fluid
38 .Adjustable shank or thigh
39 .Knee
40 ..Combined knee and foot actuator
41 ...Latch
42 ...Spring
43 ..Brake or latch
44 ...Weight or position responsive
45 ...Adjustable friction joint
46 ..Spring
47 .Ankle
48 ..Universal joint
49 ...Resilient
50 ..Resiliently actuated or controlled
51 ...Elastic cord
52 ...Spring
53 .Foot
54 ..Toe
55 ..Resilient
56 ...Fluid cushion
57 ARM OR COMPONENT (E.G., ELBOW, WRIST, HAND, FINGER, ETC.) AND ACTUATOR OR CONNECTOR THEREFOR
58 .Torso supported and actuated
59 .Elbow
60 ..With forearm actuation
61 .Wrist
62 ..With wrist actuation
63 .Arm or torso initiated finger actuation
64 .Finger actuator embodied in simulated hand
65 .With article or article holder

900 STENT FOR HEART VALVE
901 METHOD OF MANUFACTURING PROSTHETIC DEVICE

CLASS 800 MULTICELLULAR LIVING ORGANISMS AND UNMODIFIED PARTS THEREOF

2	NONHUMAN ANIMAL
200	PLANT, SEEDLING OR PLANT PART
205	.Recombinant plant
220	.Somatic cell fusion product or somatic cell fusion-derived plant
230	.Mutant plant or plant derived from mutagenesis
235	..Monocotyledon (e.g., corn, rice, wheat, etc.)
240	.Plant having grafted product (i.e., grafted plant)
250	.Genetically modified seed
255	..Dicotyledon
	******************************
	DIGESTS
	******************************
DIG 1	Animal, genetically modified, transgenic
DIG 2	Animal, genetically modified, gene therapy or replacement
DIG 3	Animal, genetically modified, spontaneous or induced mutant
DIG 4	Animal, produced by culturing or breeding techniques, may be genetically modified
DIG 5	Animal, nongenetically modified
DIG 6	Embryo (animal origin)
DIG 7	Multicellular alga
DIG 8	Multicellular fungus
DIG 9	Plant, dicotyledon
DIG 10	.Caryophyllaceae (e.g., carnation, "pink" family, etc.)
DIG 11	.Compositae
DIG 12	..Chrysanthemum
DIG 13	..Lettuce
DIG 14	..Sunflower
DIG 15	.Cruciferae
DIG 16	..Cabbage
DIG 17	..Rapeseed
DIG 18	.Cucurbitaceae (e.g., cucumber, etc.)
DIG 19	..Melon
DIG 20	..Pumpkin
DIG 21	..Squash
DIG 22	.Geraniaceae (e.g., geranium, etc.)
DIG 23	.Leguminosae (e.g., peanut, mimosa, pea, Genista monosperma, etc.)
DIG 24	..Alfalfa
DIG 25	..Snap bean
DIG 26	..Soybean
DIG 27	.Malvaceae (e.g., cotton, etc.)
DIG 28	.Oleaceae (e.g., lilac, Lingustrum, etc.)
DIG 29	.Ranunculaceae (e.g., buttercup, Anemone, liverwort, Clematis, etc.)
DIG 30	.Rosaceae
DIG 31	..Apple
DIG 32	..Cherry
DIG 33	..Nectarine
DIG 34	..Peach
DIG 35	..Pear
DIG 36	..Rose
DIG 37	..Strawberry
DIG 38	.Rutaceae (e.g., citrus fruit, clementine, etc.)
DIG 39	..Orange
DIG 40	.Solanaceae
DIG 41	..Bell pepper
DIG 42	..Potato
DIG 43	..Tobacco
DIG 44	..Tomato
DIG 45	.Umbelliferae (e.g., parsley, celery, Bupleurum sp., etc.)
DIG 46	..Carrot
DIG 47	.Woody ornamental or forest
DIG 48	..Poplar
DIG 49	Plant, gymnosperm (e.g., spruce, etc.)
DIG 50	.Fir
DIG 51	.Pine
DIG 52	Plant, monocotyledon
DIG 53	.Amaryllidaceae (e.g., narcissus, alstroemeria, etc.)
DIG 54	.Bromeliaceae (e.g., pineapple, Aechmea sp., etc.)
DIG 55	.Gramineae (or Poaceae; e.g., lawn grass, etc.)
DIG 56	..Corn or maize
DIG 57	..Rice
DIG 58	..Wheat
DIG 59	.Liliaceae (e.g., onion, etc.)
DIG 60	..Asparagus
DIG 61	..Lily
DIG 62	.Orchidaceae (e.g., orchid, etc.)
DIG 63	Fiber plant (e.g., cotton, flax, Cannabis sp., etc.)
DIG 64	Fruit plant, herbaceous (e.g., melon, strawberry, pineapple, etc.)
DIG 65	Fruit plant, woody (e.g., blackberry, fruit tree, kiwi fruit, etc.)
DIG 66	Nut-bearing plant (e.g., almond, peanut, pecan, etc.)
DIG 67	Ornamental flowering plant, herbaceous (e.g., petunia, iris, tulip, mimosa, Linum sp., poinsettia, chrysanthemum, etc.)
DIG 68	Ornamental flowering plant, woody (e.g., rose, rhododendron, poinsettia, lilac, Clematis, etc.)
DIG 69	Seed oil quality
DIG 70	Seed protein quality
DIG 71	Vegetable plant

CLASS 902 ELECTRONIC FUNDS TRANSFER

1 WITH ELECTRONIC MEANS PROVIDING SECURITY
2 .Protects transmitted data (e.g., encryption or decryption)
3 .Evaluates biometrics
4 .Means to read data stored on identifier*
5 ..And to verify identity of user*
6 .Image processor (e.g., video camera)
7 .Means to identify counterfeit money
8 TERMINAL* WITH MEANS PERMITTING DEPOSIT OR WITHDRAWAL (E.G., ATM)
9 .With secure receptacle (e.g., safe, depository)
10 ..Remote from terminal
11 ..And value discriminator
12 ..Serving as both depository and source for (e.g., note dispencing recycling)
13 ..Dispensing (e.g., money cassette)
14 .With cash dispenser
15 ..Including currency feeder
16 ...Sensitive to erroneous passage of plural bills
17 .With particular feeder or counter feature
18 .With printer
19 ..And page turner
20 .With specific data input means (e.g., keyboard)
21 .With specific data output means or indicator
22 TERMINAL* REGISTERS TRANSACTION* (E.G., POINT OF SALE TERMINAL*)
23 FOR ENTERTAINMENT, AMUSEMENT, OR GAMBLING
24 FOR USE WITH GENERAL PURPOSE TERMINAL* (E.G., HOME BANKING)
25 SPECIFIC IDENTIFIER* (E.G., BANK CARD)
26 .Including semiconductor chip (e.g., smart card)
27 .Magnetically encoded
28 ..Designed to resist counterfeiting
29 .Specific process of manufacture
30 SUPPORT OR ENCLOSURE (E.G., KIOSK)
31 .Selectively prevents access to terminal*
32 .For plurality of terminals*
33 .For drive-in installation
34 .Collapsible
35 .Accommodates user (i.e., walk-in enclosure)
36 PAPER SUPPLY (E.G., RECEIPT)
37 SYSTEM*
38 .Error or fault recovery
39 .Particular communication feature
40 .Transaction* processing
41 MISCELLANEOUS

Class 930 is intended to be used as a searching area for patents which disclose an identifiable peptide or protein sequence derived from at least four specified named amino acids. The class consists of two wholly separable parts, cross-reference art collections 10-320 and digests 500-822. Rules of placement into these areas vary. Please read the rules pertaining to placement and search. Any search in this class is clearly OPTIONAL. It is hoped, however, that Class 930 will be useful and will be searched.

Class 930, cross-reference art collections 10-320, provide for patents which disclose a peptide or protein sequence of at least four amino acids covalently bound through at least one normal peptide link. It should be noted that the patents in these art collections must contain an actual amino acid sequence. A patent containing a reference, in name only, to a peptide or protein compound with a known structure is not included. For example, though the amino acid sequence of insulin is well-known, unless a sequence of at least four amino acids from the insulin structure is shown in the patent, it is not included in these art collections.

The following special notes are included in the Manual of Classification for convenience. They are not to be used in lieu of the class definitions for those art collections (10-320).

Note 1. Compounds containing a modified or unusual amino acid (art collections 20-25 are placed in all appropriate art collections of the class (20-320).

Note 2. The sole presence of a nonpeptide or abnormal peptide link in a linear peptide is not considered an indication of a modified or unusual amino acid. (See art collection 30).

Note 3. See only art collection 22 for halogen containing compounds which are radioactive.

Note 4. The sulfur contained in the compounds of art collection 24 must be other than or must be in addition to, that naturally occurring in one or more of the natural amino acids, cysteine, cystine, or methionine.

Note 5. Art collection 30 does not include those peptides which contain as the sole nonpeptide or abnormal peptide link, an interchain disulfide bridge.

Note 6. Compounds included in art collections 200 (bacterial), 210 (parasitic), and 220-224 (viral), are only those homologous to the microorganism.

Note 7. Compounds containing a cys-cys disulfide bridge between nonadjacent cysteine residues are placed in art collection 260 with the exception of those compounds such as atrial natriuretic peptide, vasopressin or others containing disulfide bridges which are appropriate for art collections 40-170.

Note 8. Art collection 270 does not include peptides or proteins which are cyclic solely due to intrachain disulfide bridges, nor does it include peptides or proteins which are appropriate for art collections 40-170.

Note 9. Art collection 320 is incomplete. It is intended as a repository for compounds which have been specifically modified to prevent enzymatic degradation, but which are not more appropriately placed in any of the other nonmainline art collections.

****

CROSS-REFERENCE ART COLLECTIONS

****

10 PEPTIDE OR PROTEIN SEQUENCE
20 .Containing modified or unusual amino acid (See note 1 and note 2)
21 ..Containing D-amino acid
22 ..Containing radioactive atom (See note 3)
23 ..Containing halogen (See note 3)
24 ..Containing sulfur (See note 4)
25 ..Containing heavy metal or salt thereof
30 .Linear peptide or protein containing a nonpeptide or abnormal peptide link (See note 5)
31 ..Retro-inverted
40 .Angiotensin; related peptides
50 .Atrial or brain natriuretic peptide; related peptides
60 .Calcitonin; related peptides
70 .Corticotropin; related peptides
80 .Endorphin or Enkephalin; related peptides
90 .Erythropoietin; related peptides
100 .Factor VIII, AHF; related peptides
110 .Gonadotropin; related peptides
120 .Growth hormone, growth factor other than T-cell or B-cell growth factor, and growth hormone releasing factor; related peptides

PEPTIDE OR PROTEIN SEQUENCE

130 .Luteinizing hormone-releasing hormone (LH-RH); related peptides
140 .Lymphokine; related peptides
141 ..Interleukin
142 ..Interferon
143 ..Lymphotoxin
144 ..Tumor necrosis factor
145 ..Colony stimulating factor
150 .Oxytocin or vasopressin; related peptides
160 .Somatostatin; related peptides
170 .Vasoactive intestinal peptides; related peptides
180 .Thymus derived hormone or factor; related peptides
190 .Antibiotic
200 .Bacterial peptide or bacterial protein (See note 6)
210 .Parasitic peptide or parasitic protein (See note 6)
220 .Viral peptide or viral protein (See note 6)
221 ..Retrovirus related, or human immunodeficiency virus related, or simian immunodeficiency virus related
222 ..Foot and mouth disease related
223 ..Hepatitis related
224 ..Herpes related
230 .Multicellular plant peptide or multicellular plant protein
240 .Enzyme or isoenzyme
250 .Enzyme inhibitor
260 .Containing Cys-Cys disulfide bridge between nonadjacent cysteine residues (See note 7)
270 .Cyclic peptide or cyclic protein (See note 8)
280 .Bound to a nonpeptide drug, nonpeptide label, nonpeptide carrier, or a nonpeptide resin
290 .Polyamino acid or polypeptide with an uninterrupted series of peptide repeating units
300 .Signal or leader sequence
310 .Linker sequence
320 .Modification to prevent enzymatic degradation (See note 9)

****

DIGESTS

****

Digests 500-822 are equivalent to the European Patent Office's C07K 5/00 - C07K 5/12B; C07K 7/02 - C07K 7/10B; C07K 7/50 - C07K 9/00F4; C07K 13/00; and C07K 99/00B - C07K 99/84 classifications. See section B under the main class definition of Class 930 for information relating to these digests.

DIG 500 PEPTIDES CONTAINING SACCHARIDE RADICALS AND HAVING A FULLY DEFINED SEQUENCE OF AMINO ACIDS AND WHEREIN THE PEPTIDE SEQUENCE IS NOT PART OF A RING STRUCTURE, E.G., BLEOMYCIN, PHLEOMYCIN, MURAMYLPEPTIDES, ETC., (C07K-9/00D, 9/00D2, 9/00D4, 9/00D9)
DIG 510 PEPTIDES CONTAINING SACCHRIDE RADICALS AND HAVING A FULLY DEFINED SEQUENCE OF AMINO ACIDS WHEREIN THE PEPTIDE SEQUENCE IS PART OF A RING STRUCTURE AND IS DIRECTLY ATTACHED TO A HETERO ATOM OF THE SACCHARIDE ATOM, E.G., ACTAPLANIN, AVOPARCIN, RISTOMYCIN, VANCOMYCIN, ETC., (C07K-9/00F2)
DIG 520 PEPTIDES CONTAINING SACCHARIDE RADICALS AND HAVING A FULLY DEFINED SEQUENCE OF AMINO ACIDS WHEREIN THE PEPTIDE SEQUENCE IS PART OF A RING STRUCTURE AND IS NOT DIRECTLY ATTACHED TO A HETERO ATOM OF THE SACCHARIDE ATOM (C07K-9/00F4)
DIG 530 PROTEINS HAVING A FULLY DEFINED SEQUENCE OF AMINO ACIDS OR DERIVATIVES THEREOF, I.E., MORE THAN 100 AMINO ACIDS (C07K-13/00)
DIG 532 CYCLIC PEPTIDES DERIVED FROM AT LEAST FIVE AMINO ACIDS AND CONTAINING AT LEAST ONE ABNORMAL PEPTIDE LINK (C07K-7/50)
DIG 533 .With only normal peptide links in the ring (C07K-7/52)
DIG 534 ..With all amino acids in L-form (C07K-7/52A)
DIG 535 ..With at least one amino acid in D-form (C07K-7/52B)
DIG 536 .With at least one abnormal peptide link in the ring (C07K-7/54)
DIG 537 ..The cyclisation not occurring through the 2,4-diamino-butanoic acid (C07K-7/56)
DIG 538 ...Bacitracins; related peptides (C07K-7/58)
DIG 539 ....With all amino acids in L-form (C07K-7/58A)
DIG 541 ....With at least one amino acid in D-form (C07K-7/58B)
DIG 542 ..The cyclisation occurring through the 4-amino group of the 2,4-diamino-butanoic acid (C07K-7/60)
DIG 543 ...Polymyxins; related peptides (C07K-7/62)
DIG 544 ....With all amino acids in L-form (C07K-7/62A)
DIG 545 ....With at least one amino acid in D-form (C07K-7/62B)
DIG 546 CYCLIC PEPTIDES DERIVED FROM AT LEAST FIVE AMINO ACIDS AND CONTAINING ONLY NORMAL PEPTIDE LINKS (C07K-7/64)
DIG 547 .Gramicidins S, C; Tyrocidins A, B, C; related peptides (C07K-7/66)
DIG 548 ..With all amino acids in L-form (C07K-7/66A)
DIG 549 ..With at least one amino acid in D-form (C07K-7/66B)

In digests 550-772 and 790-822, sequences modified by removal or addition of amino acids, by substitution of amino acids by others, or by a combination of these modifications, are classified as the parent peptide when the combined number of modifications totals less than 50% of the parent fragment. Fragments of these peptides containing at least 5 amino acids, modified or not as mentioned above, are classified as the parent peptide. NOTE: In digests 590, 630 and 680 the brackets have been used to indicate the presence of a specified amino acid. If the specified amino acid is absent then the molecule contains a covalent bond directly between the amino acids noted before and after the.

DIG 550 PEPTIDES CONTAINING THE SEQUENCE (A-Leu-Glu-Ile-Lys-Orn-Ile-Phe-His-Asp-Asp-NH2), A BEING H OR Ile-Cys, E.G., BACITRACINS A OR F OR RELATED PEPTIDES (C07K-99/00B)

PEPTIDES CONTAINING THE SEQUENCE (A-Leu-Glu-Ile-Lys-Orn-Ile-Phe-His-Asp-Asp-NH2), A BEING H OR Ile-Cys, E.G., BACITRACINS A OR F OR RELATED PEPTIDES (C07K-99/00B)

DIG 551 .With all amino acids in L-form (C07K-99/00B1)

DIG 552 .With at least one amino acid in D-form (C07K-99/00B2)

DIG 553 PEPTIDES CONTAINING THE C-TERMINAL SEQUENCE (X-Cys-Phe-Gly-Phe-Gly-Gly-Arg-A-Asp-Arg-Ile-Gly-Ala-Gln-Ser-Gly-Leu-Gly-Cys-Y) WITH X BEING NH, Y BEING -OH, NH, OR PART OF THE SEQUENCE -Asn-Ser-Phe-Arg-Tyr-Arg-Arg- AND A BEING Met OR Ile, E.G., ATRIOPEPTINE; ATRIAL NATRIURETIC PEPTIDES AND PROTEINS (ANP) (C07K-99/00C)

DIG 554 .With all amino acids in L-form (C07K-99/00C1)

DIG 555 .With at least one amino acid in D-form (C07K-99/00C2)

DIG 556 PEPTIDES CONTAINING THE SEQUENCE (Asp-Pro-A-Tyr-B-C-Val-Ser-Asn-Ala-Asp-Leu-Met-Asp-Phe-Lys-Asn-Leu-Leu-Y), WITH A, B, C BEING AMINO ACIDS, AND Y BEING A PEPTIDE SEQUENCE, E.G., CARDIODILATIN (SEE SUBCLASS 553 FOR PATENTS THAT CONTAIN THE AERIAL NATRIURETIC PEPTIDE SEQUENCE) (C07K-99/00D)

DIG 557 .With all amino acids in L-form (C07K-99/00D1)

DIG 558 .With at least one amino acid in D-form (C07K-99/00D2)

DIG 559 PEPTIDES CONTAINING THE SEQUENCE (Tyr-Ala-Asp-Ala-Ile-Phe-Tyr-Asn-Ser-Tyr-Arg-Lys-Val-Leu-Gly-Gln-Leu-Ser-Ala-Arg-Lys-Leu-Leu-Gln-Asp-Ile-Met-A-Arg-Gln-Gln-Gly-Glu-B-Asn- Gln-Glu-C-Gly-Ala-D-E-Arg-Leu-NH) WITH A BEING Ser OR Asn, B BEING Ser OR Arg, C BEING Arg OR Gln, D BEING Arg OR Lys, AND E BEING Ala, Val, OR Phe, E.G., SOMATOLIBERIN (GONADOTROPIN RELEASING FACTOR) (C07K-99/00F)

DIG 560 PEPTIDES CONTAINING THE SEQUENCE (Tyr-D-Ala-Phe-Gly-Tyr -Pro-Ser), E.G., DERMORPHIN (C07K-99/00H)

DIG 565 PEPTIDES CONTAINING THE SEQUENCE (Cys-Tyr-A-Gln-Asn-Cys-Pro-B-Gly-NH2), WITH A BEING Ile OR Phe, B BEING Leu OR Arg OR Lys OR S-S BRIDGE 1-6, E.G., OXYTOCIN, VASOPRESSIN, OR A RELATED PEPTIDE (C07K-99/02)

DIG 566 .With all amino acids in L-form (C07K-99/02A)

DIG 567 .With at least one amino acid in D-form (C07K-99/04)

DIG 570 PEPTIDES CONTAINING THE SEQUENCE (Ser-Tyr-Ser-Met-Glu-His-Phe-Arg-Trp-Gly-Lys-Pro-Val-Gly-Lys-Lys-Arg-Arg-Pro-Val-Lys-Val-Tyr-Pro-Asp-Gly-A-B-C-D-E-Ala-Glu-Ala-Phe-Pro-Leu-Glu-Phe-OH), A-B-C-D-E BEING Glu-Ala-Glu-Asp-Ser- OR Ala-Glu-Asp-Glu-Leu OR Ala-Glu-Asp-Glu-Ser, E.G., CORTICOTROPIN (ACTH) OR RELATED PEPTIDES (C07K-99/06)

DIG 571 .With all amino acids in L-form (C07K-99/06A)

DIG 572 .With at least one amino acid in D-form (C07K-99/08)

DIG 580 PEPTIDES CONTAINING THE SEQUENCE (CH3CO-Ser-Tyr-Ser-Met-Glu-His-Phe-Arg-Trp-Gly-Lys-Pro-Val-NH2), E.G., A-MSH, OR RELATED PEPTIDES (FRAGMENTS WHICH ARE COMMON WITH DIGEST 570 ARE ALSO IN THAT CLASSIFICATION) (C07K-99/10)

DIG 581 .With all amino acids in L-form (C07K-99/10A)

DIG 582 .With at least one amino acid in D-form (C07K-99/12)

DIG 590 PEPTIDES CONTAINING THE SEQUENCE (A-Arg-Val-Tyr-Val- Ile-His-Pro-Phe-B), A BEING Asp OR Asn, AND B BEING -OH OR His-Leu-OH, E.G., ANGIOTENSIN I, PEPSITENSIN, OR RELATED PEPTIDES (C07K-99/14)

DIG 591 .With all amino acids in L-form (C07K-99/14A)

DIG 592 .With at least one amino acid in D-form (C07K-99/16)

DIG 600 PEPTIDES CONTAINING THE SEQUENCE (A-Arg-Pro-Pro-Gly-Phe-Ser-Pro-Phe-Arg-OH), A BEING H OR Lys, E.G., KALLIDIN, BRADYKININ, ETC. OR RELATED PEPTIDES (C07K-99/18)

DIG 601 .With all amino acids in L-form (C07K-99/18A)

DIG 602 .With at least one amino acid in D-form (C07K-99/20)

DIG 610 PEPTIDES CONTAINING THE SEQUENCE (Pgl-Pro-Ser-Lys-Asp-Ala-Phe-Ile-Gly-Leu-Met-NH2), E.G., ELEDOISIN, OR RELATED PEPTIDES (C07K-99/22)

DIG 611 .With all amino acids in L-form (C07K-99/22A)

DIG 612 .With at least one amino acid in D-form (C07K-99/24)

DIG 620 PEPTIDES CONTAINING THE SEQUENCE (Gly-Ile-Val-Glu-Gln-Cys-Cys-A-B-C-Cys-Ser-Leu-Tyr-Gln-Leu-Glu-Asn-Tyr-Cys -Asn-PH) and (Phe-Val-Asn- Gln-His-Leu-Cys-Gly-Ser-His-Leu-Val-Glu-Ala-Leu-Tyr-Leu-Val-Cys-Gly-Glu- Arg-Gly-Phe-Phe-Tyr-Tyr-Pro-Lys-D), A-B-C BEING -Ala-Ser-Val-, OR -Ala-Gly-Val-, OR -Thr-Ser-Ile-, OR -Ala-Ser-Val-, D BEING Ala-OH OR Thr-OH, E.G., HUMAN INSULIN OR RELATED PEPTIDES (C07K-99/26)

DIG 621 .With all amino acids in L-form (C07K-99/26A)

DIG 622 .With at least one amino acid in D-form (C07K-99/28)

DIG 630 PEPTIDES CONTAINING THE SEQUENCE (Pgl-Gly-Pro-Trp-A-Glu-Glu-B-Glu-B-Ala-Tyr- Gly-Trp-Met- Leu-Asp-Phe- Tyr- NH2, A BEING Met, Leu or Val, B BEING Glu OR Ala, E.G., GASTRIN OR RELATED PEPTIDES, ETC. (C07K-99/30)

DIG 631 .With all amino acids in L-form (C07K-99/30A)

DIG 632 .With at least one amino acid in D-form (C07K-99/32)

DIG 640 PEPTIDES CONTAINING THE SEQUENCE (His-Ser-Gln-Gly-Thr-Phe-Thr-Ser-Asp-Tyr-Lys-Ser-Tyr-Leu-Asp-Ser-Arg-Arg-Ala-Gln-Asp-Phe-Val-Gln-Trp-Leu-Met-Asn-Thr-OH), E.G., GLUCAGON OR RELATED PEPTIDES, ETC. (C07K-99/34)

DIG 641 .With all amino acids in L-form (C07K-99/34A)

DIG 642 .With at least one amino acid in D-form (C07K-99/36)

DIG 650 PEPTIDES CONTAINING THE SEQUENCE (His-Ser-Asp-Gly-Thr-Phe-Thr-Ser-Glu-Leu-Ser-Arg-Leu-Arg-Asp-Ser-Ala-Arg-Leu-Gln-Arg-Leu-Leu-Gln-Gly-Leu-Val-NH2), E.G., SECRETIN OR RELATED PEPTIDES, ETC. (FRAGMENTS CONTAINING THE UNCHANGED SEQUENCE 4-8, I.E., Gly-Thr-Phe-Thr-Ser ARE ALSO CLASSIFIED IN DIGEST 640) (C07K-99/38)

DIG 651 .With all amino acids in L-form (C07K-99/38A)

DIG 652 .With at least one amino acid in D-form (C07K-99/40)

DIG 660 PEPTIDES CONTAINING THE SQUENCE (Cys-Ser-Asn-Leu-Ser-Thr-Cys-Val-Leu-Ser-Ala-Tyr-Trp-Arg-Asn-Leu-Asn-Asn-Phe-His-Arg-Phe-Ser-Gly-Met-Gly-Phe-Gly-Pro-Glu-Thr-Pro-OH), E.G., A-THYROCALCITONIN, ETC., I.E., PORCINE OR RELATED PEPTIDES (C07K-99/42)

DIG 661 .With all amino acids in L-form (C07K-99/42A)

DIG 662 .With at least one amino acid in D-form (C07K-99/44)

DIG 670 PEPTIDES CONTAINING THE SEQUENCE (Cys-Gly-Asn-Leu-Ser-Thr-Cys-Met-Leu-Gly-Thr-Tyr-Thr-Glu-Asp-Phe-Asn-Lys-Phe-His-Thr-Phe-Pro-Gln-Thr-Ala-Ile-Gly-Val-Gly-Ala-Pro-OH), E.G., CALCITONIN h (HUMAN) OR RELATED PEPTIDES (FRAGMENTS WHICH ARE COMMON WITH DIGEST 660 ARE ALSO IN THAT CLASSIFICATION) (C07K-99/46)

DIG 671 .With all amino acids in L-form (C07K-99/46A)

DIG 672 .With at least one amino acid in D-form (C07K-99/48)

DIG 680 PEPTIDES CONTAINING THE SEQUENCE (HCO-Val- Ile-Gly-Ala-Leu-Ala-Val-Val-Val-Trp-Leu-Trp- Phe-Leu-Trp-Leu-Trp-NHCH2CH2OH), E.G., GRAMICIDINS A OR B OR RELATED PEPTIDES (C07K-99/50)

DIG 681 .With all amino acids in L-form (C07K-99/50A)

DIG 682 .With at least one amino acid in D-form (C07K-99/52)

DIG 690 PEPTIDES CONTAINING THE SEQUENCE (Pgl-His-Trp-Ser-Tyr-Gly-Leu-Arg-Pro-Gly-NH2), E.G., LH-RH, LRF, OR RELATED PEPTIDES (C07K-99/54)

DIG 691 .With all amino acids in L-form (C07K-99/54A)

DIG 692 ..1-Pgl, 10-Gly derivatives (C07K-99/54A1)

DIG 693 ..Des-1-Pgl derivatives (C07K-99/54A2)

DIG 694 ..Des-10-Gly derivatives (C07K-99/54A3)

DIG 695 .With at least one amino acid in D-form (C07K-99/56)

DIG 696 ..1-Pgl, 10-Gly derivatives (C07K-99/56A1)

DIG 697 ..Des-1-Pgl derivatives (C07K-99/56A2)

DIG 698 ..Des-10-Gly derivatives (C07K-99/56A3)

DIG 700 PEPTIDES CONTAINING THE SEQUENCE (Ala-Gly-Cys-Lys-Asn-Phe-Phe-Trp-Lys-Thr-Phe-Thr -Ser-Cys-OH), E.G., SOMATOSTATIN, SRIF, OR RELATED PEPTIDES (C07K-99/58)

DIG 701 .All amino acids in L-form (C07K-99/58A)

DIG 702 ..S-S bridge 3,14 being modified (for the reduced form Cys-3 or Cys-14 being modified) (C07K-99/58A1A)

DIG 703 ...Modification at Cys-3 (C07K-99/58A1B)

DIG 704 ...Modification at Cys-14 (C07K-99/58A1C)

DIG 705 ...Modification at both Cys-3 and Cys-14 (C07K-99/58A1D)

DIG 706 .At least one amino acid in D-form (C07K-99/60)

DIG 707 ..S-S bridge 3,14 being modified (for the reduced form Cys-3 or Cys-14 being modified) (C07K-99/A1)

DIG 708 ...Modification at Cys-3 (C07K-99/60A1B)

DIG 709 ...Modification at Cys-14 (C07K-99/60A1C)

DIG 710 ...Modifications at both Cys-3 and Cys-14 (C07K-99/60A1D)

DIG 720 PEPTIDES CONTAINING THE SEQUENCE (Tyr-Gly-Gly-Phe-Met-Thr-Ser-Glu-Lys-Ser-Gln-Thr-Pro-Leu-Val-Thr-Leu-Phe-Lys-Asn-Ala-Ile-Ile-Lys-Asn-Ala-His-Lys-Lys-Gly-Glu-OH), E.G., B-ENDORPHIN OR RELATED PEPTIDES (C07K-99/62)

DIG 721 .With all amino acids in L-form (C07K-99/62A)

DIG 722 .With at least one amino acid in D-form (C07K-99/64)

DIG 730 PEPTIDES CONTAINING THE SEQUENCE (Tyr-Gly-Gly-Phe-Met-Thr-Ser-Glu-Lys-Ser-Gln-Thr-Pro-Leu-Val-Thr-OH), E.G., LIPOTROPIN OR RELATED PEPTIDES (FRAGMENTS WHICH ARE COMMON WITH DIGEST 720 ARE ALSO IN THAT CLASSIFICATION) (C07K-99/66)

DIG 731 .With all amino acids in L-form (C07K-99/66A)

DIG 732 .With at least one amino acid in D-form (C07K-99/68)

DIG 740 PEPTIDES CONTAINING THE SEQUENCE (Try-Gly-Gly-Phe-X), X BEING AN AMINO ACID, E.G., ENKEPHALINS OR RELATED PEPTIDES (SEQUENCES CONTAINING MORE THAN FIVE AMINO ACIDS ARE CLASSIFIED IN DIGESTS 720 OR 730) (C07K-99/70)

DIG 741 .With all amino acids in L-form (C07K-99/70A)

DIG 742 .With at least one amino acid in D-form (C07K-99/72)

DIG 750 PEPTIDES CONTAINING THE SEQUENCE (Arg-Lys-Asp-Val-Tyr-Val-), E.G., THYMIN I OR II, THYMOPOIETINS, OR RELATED PEPTIDES (C07K-99/74)

DIG 751 .With all amino acids in L-form (C07K-99/74A)

DIG 752 .With at least one amino acid in D-form (C07K-99/76)

DIG 760 PEPTIDES CONTAINING THE SEQUENCE (Asp-A-Gly-Pro-Tyr-B-Met-Glu-His-Phe-Arg-Trp-Gly-Ser-Pro-Pro-Lys-Asp-OH), A BEING Glu or Ser, B BEING Lys or Arg, E.G., B-MELANOTROPINS OR RELATED PEPTIDES (C07K-99/78)

DIG 761 .With all amino acids in L-form (C07K-99/78A)

DIG 762 .With at least one amino acid in D-form (C07K-99/80)

DIG 770 PEPTIDES CONTAINING THE SEQUENCE (Thr-Val-Pro-Ser- (N-Methyl)Val-) (C07K-99/82)

DIG 771 .With all amino acids in L-form (C07K-99/82A)

DIG 772 .With at least one amino acid in D-form (C07K-99/84)

DIG 780 TETRAPEPTIDES (DERIVED FROM ONLY FOUR AMINO ACIDS) (C07K-5/10)

DIG 781 .Contains at least one ring formed only through peptide links (C07K-5/12B)

	TETRAPEPTIDES (DERIVED FROM ONLY FOUR AMINO ACIDS) (C07K-5/10)
DIG 782	.With at least one amino acid in D-form (C07K-5/10Z)
DIG 783	.The first amino acid being heterocyclic (Pro) (C07K-5/10H)
DIG 784	.The first amino acid contains the same number of amino and carboxylic acid or derivative groups (neutral) (C07K-5/10A)
DIG 785	..And aliphatic (C07K-5/10A1)
DIG 786	..And carbocyclic ring (Phe) (C07K-5/10A2)
DIG 787	.The first amino acid contains more amino groups than carboxylic acid or derivative groups (basic) (C07K-5/10B)
DIG 788	.The first amino acid contains more carboxylic acid or derivative groups than amino groups (acidic) (C07K-5/10C)
DIG 789	..Asp-X-Y-Z, Asn-X-Y-Z, or derivatives thereof, X, Y and Z being amino acids (C07K-5/10C1)
DIG 790	LINEAR PEPTIDES CONTAINING AT LEAST ONE ABNORMAL PEPTIDE LINK AND DERIVED FROM 5-100 AMINO ACIDS (C07K-7/02)
DIG 800	LINEAR PEPTIDES CONTAINING ONLY NORMAL PEPTIDE LINKS AND DERIVED FROM 5-100 AMINO ACIDS (C07K-7/04)
DIG 801	.Contains only 5-11 amino acids (C07K-7/06)
DIG 802	..With all amino acids in L-form (C07K-7/06A)
DIG 803	..With at least one amino acid in D-form (C07K-06B)
DIG 810	.Contains only 12-20 amino acids (C07K-7/08)
DIG 811	..With all amino acids in L-form (C07K-7/08A)
DIG 812	..With at least one amino acid in D-form (C07K-7/08B)
DIG 820	.Contains 21-100 amino acids (C07K-7/10)
DIG 821	..With all amino acids in L-form (C07K-10A)
DIG 822	..With at least one amino acid in D-form (C07K-7/10B)

CLASS 935 GENETIC ENGINEERING: RECOMBINANT DNA TECHOLOGY, HYBRID OR FUSED CELL TECHNOLOGY AND RELATED MANIPULATIONS OF NUCLEIC ACIDS

1 OBTAINING THE DESIRED GENE; DNA, RNA PER SE AND THE MODIFICATION THEREOF OTHER THAN VECTOR MODIFICATION
2 .DNA - RNA hybrid
3 .RNA
4 ..mRNA
5 ..2-100 nucleotides in length, e.g., t-RNA, etc.
6 .DNA, e.g., regulatory sequences, etc.
7 ..Homopolymeric, e.g., poly d(A) sequence, etc.
8 ..12-75 nucleotides in length, e.g., primers, etc.
9 ..Structural gene sequence
10 ...Modified structural gene, e.g., nonnaturally occuring sequence, etc.
11 ...Polypeptide
12 ....Antigenic material
13 ....Hormone, e.g., human growth factor, insulin, etc.
14 ....Enzyme
15 ....Antibody
16 .Methods of producing DNA or RNA other than by expression vectors, e.g., culture of cells high in DNA, etc.
17 ..Cell free production
18 ...cDNA synthesis
19 .Isolation or purification of DNA or RNA
20 ..RNA
21 ...mRNA
22 VECTORS AND METHODS OF MODIFYING VECTORS
23 .Inserting a gene into a vector to form a recombinant vector, i.e., cleavage and ligation
24 ..Vector utilized, e.g., episomes, etc.
25 ...Plant virus
26 ...Cosmid
27 ...Plasmid
28 ....Yeast
29 ....Prokaryotic
30 ....Plant
31 ...Bacteriophage
32 ...Animal virus, e.g., SV40, etc.
33 METHODS OF ENHANCING OR DIMINISHING EXPRESSION
34 .Eukaryotic cell
35 ..Plant cell
36 ..Transcription
37 ..Yeast cell
38 .Prokaryotic cell
39 ..Transcription
40 ...Operon selection
41 ....Promoter, e.g., portable promoters, etc.
42 ..Gene dosage modification, e.g., copy number amplification, etc.
43 ...Inducible, e.g., temperature inducible, etc
44 ..Translation
45 ...Ribosome binding site
46 ...Initiation
47 .Fused protein or peptide
48 ..Signal peptide, e.g., secretion, etc.
49 .Post translational modification
50 ..Glycosylation
51 ..Peptide bond cleavage
52 METHODS OF INTRODUCING A GENE INTO A HOST CELL, E.G., TRANSFORMATION OR TRANSFECTION, ETC.
53 .Microinjection
54 .Microencapsulation, e.g., liposome vesicle etc.
55 .Using vector, e.g., plasmid, etc.
56 ..Plasmid
57 ..Virus
58 ...Phage, e.g., phage lambda, etc.
59 METHOD OF USE OF GENETICALLY ENGINEERED CELLS, E.G., OIL SPILL CLEANUP, ETC.
60 .To produce an identified chemical product e.g., amino acid, etc.
61 ..Yield optimization
62 .Control of genetic diseases or defects by use of added gene
63 .Use im animal husbandry
64 .Use in agriculature
65 .Vaccine production
66 CELLS CONTAINING A VECTOR AND/OR EXOGENOUS GENE PER SE; PROPAGATION THEREOF; OTHER MEMBRANE ENCAPSULATED DNA, E.G., PROTOPLASTS, ETC.
67 .Plant cells
68 .Fungal cells
69 ..Yeast cells
70 .Animal cell
71 ..Human cell
72 .Bacteria
73 ..Escherichia
74 ..Bacillus
75 ..Streptomyces
76 ASSAY RELATED TO GENETIC ENGINEERING
77 .Methods of analysis of nucleic acids
78 ..Including hybridization
79 .Methods of selection of recombinant gene containing vector; materials therefore, e.g., replica plating, etc.
80 ..Gene library manipulation
81 ..Antigen-antibody
82 ..Enzyme activity
83 ..Host suicide
84 ..Selection medium
85 GENETIC ENGINEERING APPARATUS
86 .Analytical, e.g., for autoradiography, etc.
87 ..Automated
88 .Synthesis, e.g., peptide or gene synthesizers, etc.
89 HYBRID OR FUSED CELL TECHNOLOGY, E.G., HYBRIDOMA, ETC.
90 .Method of selection of the desired cell
91 ..Of plant cells, e.g., protoplasts, etc.
92 ..Using positive selection technique
93 .Method of production of hybrid or fused cells, e.g., chromosome or genome transfer techniques, etc.
94 ..Of plant cells
95 .Fused or hybrid cell per se
96 ..Interspecies fusion
97 ..Fungi, e.g., yeasts, etc.
98 ..Plant cells
99 ..Human cell
100 ...B lymphocyte
101 ...T lymphocyte
102 ..Animal cell
103 ...Murine cell, e.g., mouse cell, etc.
104 ....B lymphocyte
105 ....T lymphocyte
106 .Method of use of the fused or hybrid cell or the product thereof
107 ..In vivo use of product
108 ..In vitro, e.g., cell cultivation techniques, affinity chromatography, etc.
109 ...Production of non-antibody product
110 ...For use as testing material
111 MISCELLANEOUS

CLASS D1 EDIBLE PRODUCTS

100	MINERAL BLOCK, E.G., SALT LICK, ETC.
101	DISTINCT COMPOSITE INGREDIENTS, E.G., HOT DOG AND BUN; CONE AND ICE CREAM, ETC.
102	.With inedible holder (1)
103	..Plural holder
104	..Simulative
105	..Holder per se
106	SIMULATIVE
107	.Animate
108	..Humanoid
109	...Head or other appendage
110	..Quadruped
111	..Marine life
112	..Heart shaped
113	.Vehicle or component thereof
114	.Alpha or numeric
115	.Plant life
116	ICE CREAM CONE OR CUP
117	.Square or rectangular orifice
118	.Circular orifice
119	.Provision for juxtaposed scoops
120	WITH ENCLOSED OPENINGS, E.G., PRETZEL, DOUGHNUT, ETC.
121	SCORED FOR PORTION CONTROL
122	WITH VISIBLE CONCAVITY FOR FOOD
123	.Scoop or dip type
124	.With circular orifice
125	CONVOLUTED EXTERIOR
126	PASTA
127	CANDY
128	CRACKER OR COOKIE
129	BREAD OR CAKE TYPE
130	SUBSTANTIALLY CIRCULAR IN PLAN
199	MISCELLANEOUS

SEARCH NOTES FOR CLASS D1

(1) Includes holder per se.

CLASS D2 APPAREL AND HABERDASHERY

Excluded from this class are:
Applique or insignia patch; see D5-63+.
Article of personal adornment which is attachable to the person or to wearing apparel; see D11.
Badge or emblem; see D11-95+.
Bath mitt; see D28-63.
Belt or body attached purse; see D3-106.
Body-worn safety apparel for swimming, diving, etc.; see D21-238.
Clip for pencil or fountain pen; see D19-56.
Earmuff; see D29-19.
Fasteners per se, e.g., pin, clasp, button, etc.; see D11-200.
Garment-attached vase for boutonniere or perfume holder; see D11.
Grip improvement or protective hand covering; see D29-20+.
Gun holster; see D3-101.
Hand puppet, i.e., simulative hand covering having symmetrical appendages ; see D21-153.
Head or torso restraint or protective covering; see D29-10+.
Holster or holder for cartridges, fishing lures, etc.; see D3-101.
Ice or roller skate; see D21-225+.
Jewelry; see D11.
Mask for surgery, anesthetic application, oxygen, etc.; see D29-7+.
Package ornament or bow; see D11-184.
Slide-fastener pull combined with lock; see D8-123.
Sunglasses, spectacles combined with visor element; see D16.

1 LINGERIE OR UNDERGARMENTS
2 .Corset or girdle
3 ..Combined with brassiere
4 ..Bifurcated
5 ..Parts (e.g., gores, hip sections, etc.)
6 .Bifurcated
7 ..Combination
8 ...Pajamas or pajama ensemble
9 ....Having overblouse or jacket
10 ..Nether, knee-length or shorter
11 ...With pockets or with simulative motif
12 .Negligee, housecoat, bed jacket, robe
13 ..With simulative motif
14 ...Chenille
15 ..Chenille
16 ..Hanging loose from armholes
17 .Non-bifurcated sleeping garment
18 ..Ladies nightgown
19 .Slip (inclusive or combined with different article, e.g., brassiere, shield, etc.)
20 ..Strapless
21 ..Half-slip or petticoat
22 ..Simulative motif
23 .Camisole or corset cover (inclusive or combined with shields)
24 .Brassiere (inclusive of bust and waist front distender)
25 BODY GARMENTS
26 .With pannier, basque, bustle, etc. (i.e., such garments prior to 1900)
28 .Bifurcated
29 ..Combination of nether with torso garment or with torso garment and different article
30 ...Professional uniform or costume
31 ...Snow or ski suit (inclusive of combination with head or foot wear)
32 ....Trousers
33 ...Children's
34 ....Combined with skirt or dress
35 ....Simulative motif
36 ...Sport or play suit or ensemble with short bifurcated element
37 ....Simulative motif
38 ....With skirt element or tunic (inclusive of swimming suit)
39 .....Torso portion separate or separable
40 ....Swimming suit
41 .....Torson portion separate or separable
42 ..Shorts (e.g., bathing trunks, athletic shorts, etc.)
43 .Knit one- or two-piece dress, three-piece suit, or skirt
44 .Knit or crocheted torso garment (e.g., sweater, blouse, etc.)
45 ..Combination or ensemble, actual or seeming
46 ...With simulative motif
47 ....Jacket, cardigan or vest
48 ..Jacket, cardigan or vest
49 .Dress or suit
50 ..Wedding or evening
51 ...Combination or convertible (e.g., with completely visible underskirt or convertible from long to short)
52 ....Dress with hood
53 ....With cape, stole or scarf, coat or jacket
54 .....Dress with set-in sleeves
55 .....Dress with halter-type top
56 .....Dress with narrow shoulder straps and/or neck strap, or strapless
57 ......Waist-length or longer jacket or coat, fitted
58 ....Jacket or coat combined with hood
59 ...With train
60 ....Sleeve, elbow-length or longer
61 ...With completely set-in sleeve, conventional armhole
62 ....Sleeve, elbow-length or longer
63 .....With overblouse, actual or seeming
64 ......With apparently center front opening to waistline or below (1)
65 .....With apparently center front opening to waistline or below
66 ....With overblouse, actual or seeming
67 .....With apparently center front opening to waistline or below
68 ....With bodice front crossed diagonally from neck, or twisted or looped at neck
69 ....With apparently center front opening to waistline or below
70 ...With bottom portion of sleeve set-in and top portion of sleeve forming part of neckline
71 ....Having shoulder and/or neck strap
72 ...With halter-type top, strapless or with narrow shoulder or neck strap, or with arm band or ruffle continuing from neckline
73 ....Bodice front crossed diagonally from neck, or twisted or looped at neck
74 ...With overblouse actual or seeming
75 ...With skirt front draped from waist; with pleat or gathers to one side of skirt front from waistline; or with ruffle or ruffles down skirt front
76 ...With bodice front crossed diagonally from neck, or twisted or looped at neck

BODY GARMENTS
.Dress or suit
..Wedding or evening
77 ...With apparently center front opening to waist or waist yoke line or below
78 ...With set-in sleeves, 3/4-length or longer
79 ..Costume, ceremonial robe, vestment, etc.
80 ..Children's
81 ...With simulative motif
82 ..Combination or convertible
83 ...With hood (2)
84 ...Having removable sleeve or sleeve part
85 ...With apron or apron-type overskirt, actual or seeming
86 ....Dress front opening, actual or seeming
87 ...With cape, coat or jacket and dress suit comprised of skirt and overblouse or jacket, actual or seeming
88 ....Dress overblouse or jacket front opening to waistline or below, actual or seeming
89 ...With cape
90 ....Dress front opening to waistline or below, actual or seeming
91 ...With full-length or approximately full-length coat
92 ....Coat, beltless, fitted
93 .....Dress front opening to waistline or below, actual or seeming
94 ....Coat, belted, tied or shirred at waistline (includes partially)
95 .....Dress front opening to waist yoke, waistline or below, actual or seeming
96 ...With jacket
97 ....Waist length or shorter
98 .....Provided with closure or fastening means
99 ......Dress front opening to waist yoke, waistline, or below, actual or seeming
100 ....Jacket and/or dress, sleeveless, or with sleeves formed from bodice or set in unconventionally
101 .....Dress with front opening to waist yoke, waistline or below, actual or seeming
102 .....Jacket with decorative detail or details (e.g., fabric figured, tucked, etc.; contrasting collar and/or cuffs; edging trim, etc.)
103 ......Ornate embroidery or braid detail
104 ....Fitted or belted, hip length or longer
105 .....Jacket and/or dress, sleeveless, or sleeves formed from bodice or set in unconventionally
106 ......Dress front opening to waist yoke or line or below, actual or seeming
107 .....Jacket with ornate embroidery or braid detail
108 .....Dress front opening to waist yoke, waistline or below, actual or seeming
109 ....Jacket and/or dress, sleeveless or sleeves formed from bodice or set in unconventionally
110 .....Dress front opening to waist yoke, waistline or below, actual or seeming
111 ....Dress with front opening to waist yoke, waistline or below, actual or seeming
112 ..Comprised of jacket or overblouse, actual or seeming, combined with skirt
113 ...Front only giving effect of jacket or overblouse
114 ....Ending at waistline or above, no closure means
115 ....With closure means, actual or seeming
116 .....Sleeveless or with sleeves formed from bodice or set in unconventionally
117 ...Jacket or overblouse ending below hips
118 ....Sleeveless or with sleeves formed from bodice or set in unconventionally
119 ...Jacket or overblouse front crossed diagonally from neck, or twisted or looped at neck
120 ....Completely front opening, actual or seeming
121 ...Jacket or overblouse with entire, approximately centered, front opening
122 ....Sleeveless or with sleeves formed from bodice or set in unconventionally
123 ....Fitted, tailor-type, with or without belt
124 ....With visibly stitched pleats, tucks or darts on jacket or overblouse and/or skirt
125 ...Jacket or overblouse, center front opening to waistline only
126 ....Sleeveless or with sleeves formed from bodice or set in unconventionally
127 ...Jacket or overblouse, center rear opening to waistline or below
128 ....With simulative motif
129 ...Jacket or overblouse, sleeveless or with sleeves formed from bodice or set in unconventionally
130 ..Comprised of underblouse combined with skirt having suspenders, actual or seeming
131 ..Double- or triple-breasted, actual or seeming
132 ..With bodice front crossed diagonally from neck, or twisted or looped at neck
133 ...Diagonal extending to waistline or waist yoke continuously or angled
134 ....Line continuing into skirt
135 .....With draped skirt front; with pleats or gathers to one side of skirt front; or with vertical ruffle or ruffles down skirt front
136 .....Sleeveless, or with sleeves formed from bodice or set in unconventionally
137 ....Sleeveless, or with sleeves formed from bodice or set in unconventionally
138 ...Sleeveless, or with sleeves formed from bodice or set in unconventionally
139 ...With center rear closure to waistline or below, actual or seeming
140 ...With draped skirt front; with pleats or gathers to one side of skirt front; or with vertical ruffle or ruffles down skirt front

	BODY GARMENTS
	.Dress or suit
141	..With actual or seeming pockets extending from each side of center front of skirt at waistline to lower point at each side of skirt
142	...Front opening to waistline or waist yoke or below, actual or seeming
143	..With skirt front draped; with pleats or gathers to one side of skirt front, or with vertical ruffle or ruffles down skirt front
144	...Sleeveless or with sleeves formed from bodice or set in unconventionally
145	...Center front opening to waistline or below, actual or seeming
146	..Sleeveless
147	...With rear opening to waistline or below, actual or seeming
148	...Combined with underblouse, actual or seeming
149	..Apparently front opening
150	...Opening in approximate center front
151	....To waistline
152	.....With sleeves formed from bodice or set in unconventionally
153	......With narrow band at neck, or without turned-down collar and/or lapels
154	.....With narrow band at neck, or without turned-down collar and/or lapels
155	......Visibly stitched pleats, tucks or darts, or corded pattern on blouse and/or skirt
156	.....Visibly stitched pleats, tucks or darts, or corded pattern on blouse and/or skirt
157	....Extending below waistline
158	.....To skirt bottom
159	......With sleeves formed from bodice or set in unconventionally
160	.......Narrow band at neck, or without turned-down collar and/or lapels
161	......Narrow band at neck, or without turned-down collar and/or lapels
162	.......Visibly stitched pleats, tucks or darts, or corded pattern on blouse and/or skirt
163	......Visibly stitched pleats, tucks or darts, or corded pattern on blouse and/or skirt
164	.....Narrow band at neck, or without turned-down collar and/or lapels
165	.....With sleeves formed from bodice or set in unconventionally
166	....Narrow band at neck, or without turned-down collar and/or lapels
167	...With sleeves formed from bodice or set in unconventionally
168	..With sleeves formed from bodice or set in unconventionally
169	...Sleeves 3/4 length or longer
170	....Rear opening to waistline or below
171	..Rear opening to waistline or below, actual or seeming
172	...With narrow band at neck, or without turned-down collar and lapels
173	..With visibly stitched pleats, tucks or darts, or with corded pattern
174	...Waist only
175	...Skirt only
176	....Waist portion having lace or embroidered inserts
177	..With narrow band at neck, or without turned-down collar and/or lapels
178	...Waist portion having lace inserts, sequin, ruffle, tassel or fringe trimming, or heavy embroidery or applique
179	.Capes, capelets, stoles or tippets, shaped shawls
180	..Convertible or combined with different article
181	...With headwear
182	..Fur or fur trimmed
183	.Coat, jacket, vest or dickey
184	..Convertible or combined with different article (other than scarf or ornament such as flower, pin, etc.)
185	...With headwear
186	....Sleeveless or with sleeves set in unconventionally
187	..Approximately hip length or above
188	...Fur
189	...Costume or professional uniform
190	...Sleeveless
191	...Waist length or above
192	....Sleeves formed from bodice or set in unconventionally
193	...Lady's or child's loose hanging
194	....Sleeves formed from bodice or set in unconventionally
195	...Lady's fitted, dressmaker type
196	....Front opening or diagonal
197	....Sleeves formed from bodice or set in unconventionally
198	..Fur or fur trimmed
199	...Sleeves formed from bodice or set in unconventionally
200	....Fitted or belted at waistline, partially or completely
201	...Fitted or belted at waistline, partially or completely
202	..Sleeves formed from bodice or set in unconventionally
203	...Fitted or belted at waistline, partially or completely
204	..Belted or shirred at waistline
205	...Partially
206	...Fitted at waistline
207	..Linings (inclusive of cape linings)
208	.Blouse or shirt (31)
209	..Combined with different article, or with removable or reversible element
210	..Sleeveless
211	...Halter or midriff type
212	...With simulative motif
213	..Completely rear opening blouses, short set-in sleeves, with single or double darts at waistline front and/or rear, and with front characterized by lace inserts, embroidery, tucking, etc.
214	...With simulative motif
215	..With simulative motif
216	...Sleeves formed from bodice or set in unconventionally
217	..Apparently to be worn over or outside skirt, shorts or trousers
218	...Waist length or above, loose hanging, belted or fitted
219	....Sleeves formed from bodice or set in unconventionally
220	...Sleeves formed from bodice or set in unconventionally
221	...Belted, gathered or fitted at waistline
222	..Sleeves formed from bodice or set in unconventionally
222.1	..Cuff
223	.Skirts
224	..With simulative motif
225	.Garment protectors

BODY GARMENTS
.Garment protectors
226 ..Aprons and bibs
227 ...With simulative form or motif
228 ....Having special pockets
229 ...Having special pockets or holders, (e.g., for tools, sewing, food catching pockets for baby bibs, etc.)
500 SCARF, HANDKERCHIEF OR SIMILAR ACCESSORY (10)
501 .Combined with diverse article
502 .Substantially rectangular or square
503 ..Simulative (11)
504 ...Architectural or geographic
505 ...Animate
506 ....Humanoid
507 ...Plant life
508 .Simulative
509 HEADWEAR (12)
510 .Rain, bathing or shower (13)
511 ..Simulative
512 .Band or tie fastener (14)
513 ..Simulative
514 ..With crown opening
515 ..Hood, bonnet or wrap type
244 .Visored hats or caps
245 ..Combined with snood
246 ..Combined with ear covering, eye protector or other article
247 ...With crown opening or openings
248 ..With simulative form or motif
249 .Stocking caps, stocking cap type; brimless knit or crocheted
250 .With simulative form or motif
251 ..Brimless or with closely fitted upturned rim or brim
252 ..With crown opening or openings or with no crown
253 .With crown opening or openings or with no crown (includes net or crochet)
254 .Narrow caps (e.g., overseas, coonskin, etc.)
255 .With crown attached to headband (e.g., tam-o'shanter type)
256 .Fezzes, skullcaps or beanies; turbans, boudoir or dust caps; helmet or hood type
257 .With brim
258 ..Upturned
260 .Parts (e.g., brims, linings, etc.)
261 ..Hatbands and parts
262 ..Frames, blanks or bodies
263 ..Ornaments (3)
264 FOOTWEAR
265 .Combined with other article
266 ..Stock
267 .Legging or spat
268 .Moccasin
269 .Loafer type
270 .Toe encircling or bifurcating (4)
271 .Boots, shoe coverings, or protectors
272 ..Ankle height or higher
273 ...With simulative motive
274 ...With patterned sole
275 ...With fastening or tightening means
276 ....Ski boots
277 ..Toe or heel protectors
278 .Children's shoes or slippers
279 ..Simulative
280 .With slide fastener
281 .With button or snap fastener
282 .Women's shoes or slippers
283 ..Mule
284 ..Low cut
285 ...Having laces, ties, or eyelets over instep
286 ....Wedgie
287 ....Little or no heel
288 ....Perforated
289 ....With cutout portion
290 ...Having straps over instep, toe or ankle
291 ....Wedgie
292 ....Clog
293 ....Little or no heel
294 ....Featuring heel, sole, or toe element
295 ....Fur trimmed
296 ....Vamp and quarter unconnected
297 ....Heel strap connected to vamp
298 .....T-strap
299 ......Perforated
300 ...Wedgie
301 ...Little or no heel
302 ...Featuring heel, sole, or toe element (5)
303 ...Perforated
304 ...Fur trimmed
305 ...Attached ornament on vamp
306 ....Bow
307 ...With cutout portion
308 .Men's shoes or slippers
309 ..Athletic
310 ...Sneakers
311 ...With spikes
312 ..High cut
313 ..Provided with laces
314 .Attachments or parts (inclusive of heel guards for hosiery)
314.1 ..Shoe tree
315 ..Heel or vamp ornaments (inclusive of tongues) (6)
316 ..Shoelaces (inclusive of tips or tassels)
317 ..Plates or pads for heel or sole and anti-skid attachments
318 ..Innersoles
319 ..Soles per se combined with shank or shank and heel
320 ...With patterned bottom
321 ....Combined with simulative motif or initial
322 ...Platform or clog type, or with high heels
323 ..Heels or heel lifts
324 ...Platform or clog type
325 ...High or spike type
326 ..Vamps, straps, piping strips
327 ...Simulative motif
328 ..Welting or stay strips
329 SOCKS OR STOCKINGS
330 .Special type (e.g., with cutout, garter, etc., or for skiing, etc.)
331 .Socks characterized by pattern of weave and/or contrast
332 ..With simulative motif
333 ...Inanimate
334 ..By pattern of cuff
335 .Stockings simulative of combination with shoe, slipper or sock
336 .Stockings characterized by pattern of weave and/or contrast
337 ..Of top portion
338 ..Of heel and/or toe or instep
339 ...With simulative motif
340 ...With heel pattern extending above main portion
341 ..Pattern scattered, or spaced vertically or horizontally
342 ..Pattern simulative
600 NECKWEAR (15)
601 .Fur (16)
602 .Collar, neckpiece or neckline insert
603 ..Lace or ruffle
604 ..Simulative
605 .Tie or ascot

NECKWEAR (15)
.Tie or ascot
606 ..Bow type
607 ..Sliding knot or cord type
608 ..Simulative
609 .Element or attachment (17)
610 HAND OR ARM COVERING (18)
611 .Muff (i.e., singular unit with distinct entry for each hand)
612 ..Combined with diverse article (19)
613 ..Simulative
614 .Combined with diverse article (20)
615 .Simulative (21)
616 ..Glove (i.e., individual sheaths provided for fingers)
617 .Glove (i.e., individual sheaths provided for fingers)
618 ..Seam or detail extending from finger crotch
619 ..Detail on back of hand
620 ...Three longitudinal ribs
621 ..Detail on wrist or cuff (22)
622 .Mitten (i.e., with singular covering for all fingers)
623 .Element or attachment
624 BODY WORN APPAREL SUPPORT (23)
625 .Garter or garter belt (24)
626 .Suspenders (25)
627 .Belt or Cummerbund (26)
628 ..With signal feature
629 ..Combined
630 ...With purse, pouch or article receiver (27)
631 ..Simulative
632 ...Animate (28)
633 ..Linked plates or plaques
634 ..Parallel distinct circumferential strands
635 ..Interlaced, woven or mesh components
636 ..Perforated (29)
637 ..Repeating pleats, gathers or striations
638 ..Pattern components systematically repeat about periphery
639 ..Element or attachment (30)
640 ...Suspender end or connector
641 DONNING OR REMOVING IMPLEMENT
642 .Shoe horn, boot jack, etc.
643 .Buttonhook
699 MISCELLANEOUS

SEARCH NOTES FOR CLASS D2

(1) This subclass and similar subclasses below are limited to dresses or suits with no indication of a rear opening.
(2) For dresses or suits with center front opening to waistline or below with no indication of a rear opening, search this subclass.
(3) Search Class D11, subclasses 200+.
(4) Search subclasses 330+ below.
(5) Search subclasses 319+ and 323+ below.
(6) For shoe buckles, clasps, etc. per se, search Class D11, subclasses 200+.
(7) For collar buttons, clasps and holders, search Class D11, subclasses 202+ or 222+.
(8) For belt-attached buckles, clasps or slides, search Class D11, subclasses 200+.
(9) Includes both parts only unless otherwise specified.
(10) Essentially, items in this subclass are of uniform thickness and have the potential for convertible or alternative apparel use. For example, items may be used as head covering, shoulder covering, muffler, etc.
Clothing pieces which are designed to be used in a predetermined arrangement or in a predetermined three-dimensional shape are excluded. For example, shoulder stoles are in subclass 179, boas in subclass 600, neckties in subclass 605 and turbans in subclass 256.
CLASSIFIED BY FULL LINE DISCLOSURE.
(11) Includes letter or numeral.
(12) For impact protective type, see D29-12.
(13) Classified by full line disclosure.
(14) Includes sweat band.
Classified by full line disclosure.
(15) Classified by full line disclosure.
(16) For shoulder stole, see subclass 179.
(17) Includes internal collar stiffener, etc.
For necktie restraint or collar fastener, pin, etc., see D11-200.
(18) Classified by full line disclosure.
(19) Includes conbination with pouch or purse.
(20) Includes combination with pouch or purse.
(21) Items in this subclass differ from those classified in D21-153 in having asymmetrical appendages.
(22) Exclusive of wrist cutout or hem.
(23) Subject matter in this subclass and indented subclasses is distinguished from subject matter in D11-200+ in being exclusively body-attached suports for apparel whereas the latter includes fasteners which are attached to the apparel. For example, buckle, clasps, and slides per se are classified in D11.
Includes vehicle safety belt.
Classified by full line disclosure.
(24) For fastener per se, see D11-212.
(25) For suspender end, see subclass 640
(26) For buckle, see D11-200+;
Classified by full line disclose.
(27) For pouch attachment per se, see D3-106.
(28) Includes humanoid.
(29) Exclusive of prong or fastener receptacle.
(30) For belt attached purse, pouch, cradle, etc., see D3-106.
For fastener per se, see D11-212.
(31) For collar, see subclass 602+.

CLASS D3 TRAVEL GOODS AND PERSONAL BELONGINGS

DECEMBER 1990

Excluded from this class are:
Ammunition or weapon holder; see D22-13+.
Barrel, cask, or drum; see D34-39.
Canopy; see D25-56+.
Cartridge for holding and using photographic slides; see D16-26.
Cigarette case, tobacco jar or pouch; see D27-183+.
Coal basket; see D23-410.
Coin holder or bank; see D99-34+.
Combined belt and article holder; see D2-630.
Console, cabinet or other furniture for storage of reproduction tape, film, or disk; see D6-396+.
Container for cosmetic product; see D28.
Disposable package; see D9.
Electric fan; see D23-370+.
Embroidered, knitted, or crotcheted article; see D5.
Face powder box; see D28-91.
Holder for hair curlers; see D28-38.
Lunch box, picnic basket, etc; see D7-626+.
Luggage hardware, e.g., handle, hinge, lock, etc.; see D8.
Magnetic tape cartridge, cassette or reel; see D14-121.
Money belt; see D2-630.
Money clip; see D11-78.1.
Open top bin, tray, or basket; see D34-40+.
Packaging or disposable container; see D9.
Photographic slide holder; see D16-26.
Pipe holder or rack; see D27-6.
Portable phonograph case; see D14-201.
Purse combined with belt; see D2-630.
Record jacket; see D9.
Sewing kit or needle or thread packages; see D9-303.
Sewing machine; see D15-66+.
Sewing machine cabinet; see D15-72.
Soap bar container; see D28-76.
Storage cabinet per se, i.e., without carrying capability; see D6-396+.
Tent; see D21-253.
Toothbrush case; see D4-199.

1 HAND FAN (1)
2 .Folding
3 ..Simulative
4 .Simulative
5 UMBRELLA OR PARASOL, WALKING SUPPORT
6 .Simulative
7 .Cane or walking support (2)
8 ..Underarm support, i.e., crutch
9 ..Plural tips
10 .Element or attachment
11 ..Carrying case or sleeve
12 ..Handle
13 ...Combined with diverse article
14 ...Simulative
15 ....Animate
16 ...Offset or asymmetrical
17 ..Tip or ferrule
18 HAND SEWING, KNITTING, AND EMBROIDERY EQUIPMENT (3)
20 .Article storage or holder
21 ..Simulative
22 ...Pincushion (4)
23 ..Yarn, thread, etc. (5)
24 ...Spool type
25 ....Multiple spindle type
26 ..Work holder
27 ..Pincushion (6)
28 .Needle- or bodkin-type implement
29 .Thimble
30.1 STORAGE OR CARRYING CONTAINER (7)
30.5 .Shoeshine case, kit, or foot rest
31 .Child carrier
32 .Backpack type
33 .Optical equipment, e.g., projector, etc.
34 ..Eyeglasses or contact lens
35 .Reproduction tape, film, or disk (10)
100 .Body, apparel, or belt attached article holder
101 ..Gun holster
102 ..Scabbard or sheath
103 ..Key Keeper
104 ..Sports equipment
105 ..Tool
106 ..Purse, pouch or cradle
36 .Sports equipment
37 ..Golf bag
38 ..Hunting or fishing
39 .Vanity, toilet, or cosmetic case
40 .Vehicle type (8)
41 .With drawstring closure
42 .Handbag, purse, or tote bag (9)
43 ..Combined with diverse article (11)
44 ..Simulative
45 ...Animate
46 ....Humanoid
47 ...Plant life
48 ..Plural distinct external pockets or openings
49 ..Pivoted cooperating jaw closure
50 ...With carrying strap or handle, or with provision therefor
51 ..Lid closure, i.e., cooperating with fixed opening
52 ..Flap or strap closure, i.e., singular flexible element covering opening and extending onto front
53 ..Longitudinal central opening
54 ..Element or attachment
55 ...Glove holder
56 .Wallet or card case
57 ..Simulative
58 ..With enclosure securing means
59 ...Zipper
60 ..Symmetrical format of pockets or openings
61 .Keyholder
62 ..Combined with diverse article or having additional use
63 ...With light
64 ...With tool
65 ..Simulative
66 .Simulative
70 .Trunk type
71 .With zipper
72 .Recessed handle extends to operative position
73 .With molded integral handle
74 .Compartmented
75 ..Tableware or jewelry
76 .Luggage type
77 ..With external securing strap or tie
78 .With lid or flap closure
79 ..Flap type
99 MISCELLANEOUS

SEARCH NOTES FOR CLASS D3
(1) Element included in this and in indented subclasses.
(2) Includes swagger stick.
(3) For sewing machine carrying case, see subclasses 30+.

(4) Also search subclass 27.
(5) Includes bobbin holder.
(6) Also search subclass 22.
(7) Element included in this and in indented subclasses; includes canteen.
(8) For tape storage, see subclasses 35.
(9) For luggage-type carrying container see subclass 76.
(10) To be classified in this subclass, container must be a storage case, tray, holder or unit which is easily carried.
(11) For combination with glove or muff see, respectively, D2-614 and D2-612.

CLASS D4 BRUSHWARE (1)

Excluded from this class are:
Charger for electric toothbrush; see D13-108.
Crumb collector or dust pan; see D32-74.
Paint bucket or roller tray; see D32-53.
Paint working tool, e.g., graining, etc; see D8-16, 19.
Shoe or boot scraper; see D32-47.
Shoe shine machine or appliance; see D32-14.1.
Sponge type mop, broom; see D32-40+.
Toilet brush holder; see D6-551.

100 POWERED
101 .Electric toothbrush (2)
102 .Rotary brush
103 FINGER COT TYPE
104 TOOTHBRUSH OR HANDLE THEREFOR
105 .Plural brush groups
106 ..Directly opposed
107 .Simulative
108 .Combined with diverse article (3)
109 .Rotary brush
110 .Brush head at right angle to handle
111 .Circular head
112 .Asymmetrical in top plan view
113 .Attachment
114 FLUID MATERIAL DISPENSER, E.G., FOUNTAIN BRUSH, ETC.
115 .With hose coupling
116 COMBINED WITH DIVERSE ARTICLE (4)
117 .Brush and comb
118 .Brush and scraper
119 PLURAL BRUSH OR BUFFING PAD
120 .Superposed or antipodal
121 RELATIVELY MOVEABLE COMPONENTS
122 .Roller (5)
123 ..Repeat pattern applicator
124 SIMULATIVE
125 .Animate
126 ..Humanoid
127 CIRCULAR BRUSH HEAD
128 .Radially arranged bristles, e.g., rat tail type, etc.
129 HANDLE FORMS GRIP OPENING FOR FINGERS
130 BRISTLED
131 .Wire type handle or bristle support
132 .Bristles at one end of handle only
133 ..Radially arranged rows, i.e., around longitudinal axis
134 ..Substantially at right angle to handle
135 ..Bristles in axial alignment with handle, e.g., stencil or shaving brush, etc.
136 WITH DISTINCT TINE OR TOOTH
137 WITH PAD-LIKE BUFFING OR BRUSHING SURFACE
138 HANDLE OR HANDLE AND BACK
199 MISCELLANEOUS

SEARCH NOTES FOR CLASS D4

(1) This class only contains hand held brush type implements, powered or nonpowered.
For industrial type machinery, including brushes, and for nonbristled manual floor treatment equipment, e.g., mops, brooms, squeegees, etc., see Class D32.

(2) Includes power handle. See 199 for case.

(3) Includes brush with case.

(4) For plural brush and/or buffing pads. See 119 below.
Combination with case excluded; see 108 and 121.

(5) Includes roller per se.

CLASS D5 TEXTILE, OR PAPER YARD GOODS; SHEET MATERIAL (1)

Excluded from this class are:
Architectural panel or medallion; see D25-138+.
Bag or wrapper; see D9-305+.
Box covering paper having defined limits ;see D9-435+.
Decal or transfer, general; see D20-11.
Freestanding panel or screen; see D6-322.
Glass panel; see D25-103+.
Molding; see D25-119+ or 136+.
Mural or simila pictorial unit; see D11-132+.
Pattern for apparel; see D2.
Pattern for doll; see D21-148+.
Pendant; see D6-595.
Roofing material; see D25-139+.
Tassel; see D6-581.
Tile assembled into floor covering; see D6-582+.
Translucent or transparent achitectural panel or sheet material; see D25-102+.
Wrapper; see D9-305.
Writing paper; see D19-1.

1 PERFORATED OR OPENWORK PANEL MATERIAL (E.G., EXPANDED METAL TYPE, ETC.)
2 .Combined unidirectional and bidirectional pattern (i.e., combined overall and border pattern)
3 .Unidirectional (i.e., pattern having opposed limits)
4 COMBINED UNIDIRECTIONAL AND BIDIRECTIONAL PATTERN (I.E., COMBINED OVERALL AND BORDER PATTERN) (2)
5 .Simulative
6 ..Plant life
7 UNIDIRECTIONAL (E.G., BORDER, TRIM BAND, ETC.) (3)
8 .Simulative

13 ...Animate (6)
14 ..Animate (6)
15 ..Architectural or geographic theme (7)
16 ..Plant life or plume
17 ...Turnover, or being symmetrical to either side of longitudinal axis (e.g., mirror image, etc.)
18 .Fringe
19 .Lace or open weave type (5)
20 SIMULATIVE
21 .Special occasion, holiday or religious theme
22 ..Christmas (8)
23 .Lace or open weave type (5)
24 ..Plant life
25 .Pattern formed by stippled effect (i.e., small points or dots rather than lines or solid areas)
26 .Animate (9)
27 ..Humanoid
28 ..Hide or pelt
29 .Architectural or geographic theme (7)
30 .Letter, numeral or punctuation
31 .Musical theme
32 .Plant life or plume (10)
33 ..With container
34 ..With ribbon or bow
35 ..With diverse simulation
36 ..Fruit, nut, seed pod or vegetable (11)
37 ..Flower or bud
38 ...Fleur-de-lis
39 ...Pattern formed on grid or graph matrix (i.e., applied or conformed to grid base)
40 .Ribbon or bow
41 .Star
42 .Vehicle or component thereof
43 .Natural material (e.g., wood, etc.)
44 ..Marble or stone
45 PAISLEY TYPE PATTERN (I.E., PATTERN CONSISTING OF OVOID FORMS NARROWING TO SINUOUS TAIL PORTION)
46 PLAID OR TARTAN TYPE PATTERN (I.E., PATTERN CONSISTING OF LINES OF VARYING WIDTH, SPACING OR CONTRAST INTERSECTING AT RIGHT ANGLES) (12)
47 PATTERN CREATED BY TEXTURE OR OPEN WEAVE (13)
48 .Lace (i.e., specified as such)
49 .Nap, chenille or pile (i.e., cut or looped material extending from warp & weft plane)
50 .Formed from caning material
51 .Curtain material (i.e., specified as such)
52 .Shirred, gathered or quilted
53 .Embossed or puffed
54 .Metal fabric or mesh type
55 PATTERN FORMED BY TRACERY OF UNIFORM LINE (14)
56 ZIGZAG OR WAVE PATTERN
57 PATTERN FORMED BY STIPPLED EFFECT (I.E., SMALL POINTS OR DOTS RATHER THAN LINES OR SOLID AREAS)
58 PATTERN FORMED ON GRID OR GRAPH MATRIX (I.E., APPLIED OR CONFORMED TO GRID BASE)
59 REVERSE, ROTATED, OR ALTERNATING PATTERN ELEMENT (15)
60 LINEAR ARRANGEMENT OF ADJACENT PATTERN ELEMENTS, OR STRIATED
61 SINGLE ISOLATED SYSTEMATICALLY REPEATING ELEMENT
62 RANDOM ARRANGEMENT OF PATTERN ELEMENTS WITHIN REPEAT UNIT (16)
63 APPLIQUE, MEDALLION OR SINGULAR PATTERN UNIT (17)
64 .Simulative (18)
65 ..Animate (6)
66 ..Plant life
99 MISCELLANEOUS (19)

SEARCH NOTES FOR CLASS D5.
(1) This class includes material which, as disclosed and claimed, indicates repetition beyond the limits of the disclosure. The material in this class has indeterminate length or width. Material with specific limits or suggestion thereof (such as disclosure of a corner) is classified in D6, D11, D25, etc. However, singular pattern segments or material with disclosed limits which are not identified as subject matter for other classes are classified in this class, subclasses 63+.
(2) Exclusive of selvage.
(3) Exclusive of selvage.
If disclosure teaches repitition of the pattern bidirectionally, patent is classified under the following main line subclasses.
(4) Exclusive of plant life per se;

see subclasses 16+.

(5) Lace or open weave patterns are characterized by threads or strands defining adjacent open areas.

(6) Includes humanoid.

(7) Includes simulation of water.

(8) Exclusive of plant life per se; see subclasses 32+.

(9) For feather or plume per se, see subclasses 32+.

(10) For wood grain simulation, see subclass 43.

(11) Includes pine cone; includes grain

(12) Exclusive of check type pattern.

(13) For classification in this or in indented subclasses, the weave or texture itself must create the pattern as distinguished from the pattern being applied to the material.
Texture must be clearly indicated by shading, or by end or cross-sectional views.

(14) Exclusive of tile delineation.

(15) Includes design elements separated by intermediate distinct design motif.

(16) If repeat protocol is apparent from the disclosure, patent is classified under earlier main line subclasses. If, however, disclosed pattern element does not indicate how it can repeat, patent is classified here.

(17) Includes foundation or pattern for applique, etc.
Includes insignia patch.
Includes decal set for repeat pattern.

(18) Includes letter, numeral or punctuation.

(19) Some early patents are classified in this subclass because (a) they lack drawing disclosure or specifications or (b) the clarity of disclosure is insufficient to accurately place them earlier in the schedule. For example, because of age some drawings have faded to the point of being unreadable. In others, drawing techniques which do not employ current practice are inadequate to convey the extent or rhythm of the repeat pattern.

Excluded from this class are:
Altar; see D99-25.
Bagging tool for packing groceries; see D8-71.
Basket or tray; see D34-40+.
Bath mitt or cloth; see D28-63.
Bench for weight lifting; see D21-197.
Bicycle rack or holder; see D12-115.
Billiard table; see D21-232.
Cabinets with oil collecting or lubricating means; see D15-151+.
Card file; see D19-75+.
Cart; see D34-12+.
Carrier for sewing supplies; see D3-20+.
Carrier for tape reel, cartridge, cassette, etc.; see D3-35.
Casing for computer equipment; see D14-114.
Casing or enclosure for electronic equipment not elsewhere specified; see D13-184.
Caster; see D8-375.
Console cabinet for radio, television or stereo; see D14-133 and 175+.
Cord latch for Venetian blind; see D8-394.
Corner protector for furniture; see D8-403.
Depository; see D99-28+.
Desk tray or document holder; see D19-86+.
Dispenser for individual cigarette; see D27-184.
Display article; see D20.
Drawing board or writing surface; see D19-52.
Flowerpot or plant holder; see D11-143+.
Food display unit combined with oven or warmer; see D7-323+.
Frame for sign or bulletin board; see D19-52 and 54.
Game table; see D21-37.
Glass or bottle holder; see D7-616.
Gun holder or rack; see D3-38.
Hair dryer and chair combination; see D28-15.
Handgrip; see D8-303.
Hand-held mirror; see D28-69+.
Hardware, e.g., pull, glide caster, drawer guide, hinge, etc.; see D8.
Holder or support for eyeglasses; see D16-129.
Holder for food processor blade; see D7-637.
Hook or support for picture, mirror, etc.; see D8-354+.
Insulating mat for range; see D7-388.
Kitchen condiment container holder; see D7-590.
Ladder or stepladder; see D25-64+.
Linen designed specifically for medical purposes; see D24-49.
Mannequin; see D20-30+.
Mat for sink, bathtub, etc.; see D19-65.
Molding; see D25-119+ or 136+.
Molding for picture frame; see D25-119+ or 136+.
Mounting hardware for curtain, drape, shade, etc.; see D8-354+.
Paper fastener, clip or clamp; see D19-65.
Perambulator; see D12-128+.
Physician's examination table; see D24-3.
Plant container per se or combined with support; see D11-143+.
Plant growth unit, e.g., with lamp, etc.; see D11-144.
Plaque or wall decoration; see D11-132+.
Portable storage unit for reproduction tape, film, or disk; see D3-35.
Prefabricated building partition; see D25-58+.
Protective cover for cigarette pack; see D27-186+.
Protective cover for matchbook and match; see D27-173+.
Rack-type holder for tool; also see D8-71 and D8-349+.
Rigid drapery valance or cornice; see D25-55.
Saddlery; see D30-20+.
Serving cart; see D12-21+.
Sewing machine cabinets and parts; see D15-66+.
Sewing supplies holder or case; see D3-20+.
Sign; see D20-10+.
Sink combined with cabinet; see D23-59.
Sink mat; see D32-57.
Sleeping bag; see D2-25.
Spice rack; see D7-616+.
Standard or support for plumbing fixture; see D23-303.
Stock material; see D25-102+.
Stretcher; see D12-128+.
Table combined with lamp; see D26-58.
Television support stands; see D34-12+.
Tilter unit for Venetian blind; see D8-358.
Topiary or plant form; see D11-143+.
Training chair; see D23-296+.
Vehicle floor mat; see D12-203.
Wheelchair; see D12-131.
Wine rack; see D7-616+.
Work or eating surface integrally related to cooking grill; see D7-332.
Yard goods for carpeting or floor covering; see D5.

300 MIRROR, FRAME, PICTURE MOUNT, OR EASEL TYPE SUPPORT (2)
301 .Plural mount
302 ..Of varying size or shape
303 .Simulative
304 ..Animate
305 ...Humanoid
306 ..Plant life
307 ..Alpha
308 .Illuminated type
309 .Oval or circular opening or perimeter
310 .Stand-up type, e.g., rear supporting leg, etc.
311 ..Rearwardly swinging leg
312 ..Adjustable
313 ..Wire type support
314 ..With transparent mount
315 APPAREL SUPPORT (3)
316 .Simulative
317 .Substantially formed from wire or tube
318 .Downwardly sloping shoulder supports
319 ..With horizontal garment support
320 .Attachable to vertical surface
321 ..Combined with mirror
322 ..Rotating wheel type, e.g., tie rack, etc.
323 ..Hook or clamp type
324 ..Extendible or swinging arm
325 ..Clip-on bracket mount
326 .With article clamping means
327 .Cantilevered article support arm
328 .Element or attachment

329 FURNITURE, FREESTANDING SUPPORT, OR FRAME THEREFOR (4)
330 .Having provision for kneeling, or prie-dieu
331 .Playpen
332 .Freestanding panel or screen (5)
333 .Restraining seat or portable support for juvenile (6)
334 .Seating unit (7)
335 ..Combined or convertible (8)
336 ...With work surface or storage unit (9)
337 ....Plural facing seats
338 ....Work surface positioned at front of seat
339 .....High chair for juvenile (10)
340 .....Straddle type
341 .....Asymmetrical attachment, e.g., offset arm, etc.
342 ....Seat attached at front (11)
343 ...With apparel support, i.e., "Valet" (12)
344 ..Swinging or rocking
345 ...Simulative (13)
346 ...Plural facing seats
347 ...Suspended
348 ...Curved runner contacts floor
349 ..Hassock, ottoman, stool or bench, i.e., without armrest and backrest (14)
350 ...Stepped (15)
351 ...Simulative (16)
352 ...Three or more repeats or uniform pattern about axis
353 ...Folding or adjustable
354 ..Straddle type, e.g., saddle, etc.
355 ..Backless
356 ..Vehicle type
357 ..Oppositely facing plural seats
358 ..Simulative (16)
359 ...Animate (17)
360 ..With integral occupant leg or foot rest (18)
361 ...Contiguous relationship with seat, i.e., chaise longue type
362 ..Cantilevered from or attached to vertical surface
363 ..Triangular or three-point support
364 ..Unitary support column or inset pedestal type
365 ...Footed
366 ....Three or more radiating spokes, i.e., spider
367 ..Provision for adjustment
368 ...Collapsible or folding
369 ..Interlaced or lashed components, e.g., wicker, rattan or bamboo, etc.
370 ..Plural parallel slats forming seat or back (19)
371 ..Front-to-rear runner forms base (20)
372 ...Contiguous with leg
373 ....Front and rear
374 ..Seat or backrest formed of unitary material or material having uniform thickness
375 ...Contiguous seat and back
376 ..Cast or forged metal type
377 ..Amorphous or asymmetrical
378 ..Diverging adjacent backrests, e.g., corner unit, etc.
379 ..Open area or openwork between seat & armrest
380 ..Open area or openwork between seat & backrest
381 ..Plural occupant
382 .Bed or body support surface (21)
383 ..Combined or convertible (22)
384 ...With work surface or storage unit
385 ..Swinging or rocking
386 ...Suspended, e.g., hammock, etc.
387 ....Hammock
388 ..Simulative
389 ..With canopy or canopy frame
390 ..With side barrier, e.g., crib, bassinet, etc.
391 ...Collapsible or adjustable
392 ..Collapsible or adjustable
393 ..With headboard
394 ...Top rail and end post formed of contiguous material having uniform configuration
395 ...Spaced repeating vertical slats or tubes
396 .Work surface, storage, merchandising or display unit (23)
397 ..Combined or convertible (24)
398 ...With waste disposal facility, e.g., service station oil service unit
399 ...With distinct lamp (25)
400 ...With tool, vise or work holder
401 ...With timepiece
402 ..Checkout counter
403 ..Support for flowerpot or flower arrangement (26)
404 ...Simulative
405 ...Plural distinct retainers or shelves
406 ..Lap or bed type
407 ..Recording tape or disc
408 ..Sequential discharge
409 ..For display of rug or carpet
410 ..For suspension of textile or flexible material, i.e., sheet, towel, blanket, etc. (27)
411 ..Hook, post or bar for suspension of apparel (28)
412 ...Simulative
413 ...Combined with auxiliary storage, e.g., umbrella stand, etc.
414 ....Shelf or enclosed compartment
415 ...Repeating or uniform structure about axis
416 ..Umbrella or fireplace tool holder
417 ..Provision for ground insertion (29)
418 ..Clamp or fastener attachment
419 ..Lectern or book reading stand (30)
420 ..Inclined work surface (31)
421 ..Carrel type, i.e., with side panel adjacent to occupant (32)
422 ..Storage or enclosed area adjacent to recess for user, e.g., desk type (33)
423 ...Distinct provision for plural users, e.g., recesses, etc.
424 ...Tambour closure
425 ...Opening or extending work surface (34)
426 ...Stepped top, or with inset superposed component (35)
427 ...Offset or asymmetrical top
428 ...Bilaterally symmetrical
429 ..Folding or adjustable (36)
430 ...Auxiliary extending work or support surface, or with provision therefor
431 ...Rectilinear adjustment
432 ..Enclosed storage (37)
433 ...Tambour closure
434 ...Simulative
435 ....Animate (38)
436 ...Combined with visible storage (39)
437 ....Plural parallel stepped or terraced support surfaces
438 ....Inset or superposed distinct component, e.g., chest-on-chest type, etc.

FURNITURE, FREESTANDING SUPPORT, OR FRAME THEREFOR (4)
.Work surface, storage, merchandising or display unit (23)
..Enclosed storage (37)
439 ...Inset or superposed distinct components or with singular horizontal division between segments, e.g., chest-on-chest type, etc.
440 ...Opening top (40)
441 ...Curved front or side
442 ...5 or more sides
443 ...Inclined front surface
444 ...Combined with external mirror
445 ...Plural exterior closure or panel
446 ....Bilaterally symmetrical
447 .....With pediment, backsplash or irregular top surface
448 ...Bilaterally symmetrical
449 ..Visible storage or support
450 ...Simulative
451 ....Table or planar work surface
452 .....Animate (42)
453 ....Animate (42)
454 ...Plural swinging panels, or provision therefor
455 ...Three or more repeats or uniform structure about axis (43)
456 ....Horizontal axis
457 ....Notch, aperture or clip for retention of specific article
458 ....Wire, tubular or uniform-section material forming support surface
459 ....Inclined parallel support surfaces
460 ....Stepped or terraced support surfaces
461 ....Superposed repeating support surfaces
462 ...Wire, tubular or uniform - section material forming support surface (44)
463 ....Inclined parallel support surfaces
464 ....Stepped or terraced support surfaces
465 ....Repeating superposed support surfaces
466 ...Notch, aperture or clip for retention of specific article (45)
467 ....Plural
468 .....Stepped, terraced or vertically spaced repeating supports
469 .....Circular or oval aperture
470 ...Showcase type, i.e., with transparent panel for viewing contents or with provision therefor (46)
471 ....Planar inclined panel
472 ....Curved panel
473 ...Inclined parallel support surfaces
474 ...Stepped or terraced support surfaces
475 ...Upwardly oriented bin or confining barrier
476 ....Plural cell
477 ...Superposed planar surfaces
478 ....With vertical barrier
479 ....Repeating identical surfaces
480 ...Planar surface (47)
481 ....Counter or bar type (48)
482 ....Freeform
483 ....Asymmetrical on one side
484 ....Supports located at or beyond perimeter of top
485 ....Formed entirely of material having uniform thickness
486 ....Unitary support column, i.e., pedestal type
487 ....Tubular or wire material forming supports
488 ....Repeating or uniform configuration about axis
489 .....Tripartite
490 ...Formed entirely of material having uniform thickness
491 .Element (49)
492 ..Panel or end panel support (50)
493 ...Simulative
494 ...Bilaterally symmetrical
495 ..Base, foot or post (51)
496 ...Provision for adjustment
497 ...Simulative
498 ...Radiating spokes, i.e., spider
499 ...Formed of tubular or wire material
500 ..Seating unit (52)
501 ...Body support surface (53)
502 ....Seat or backrest (54)
503 ..Bed or body support surface
504 ...Spring
505 ...Headboard or footboard
506 ....Simulative
507 ....Top rail and end post formed of contiguous material having uniform configuration
508 ....Spaced repeating vertical slats or tubes
509 ..Work surface, storage, merchandising or display unit
510 ...Drawer or bin
511 ...Top or shelf
512 ARTICLE SUPPORT, HOLDER OR DISPENSER, NOT ELSEWHERE SPECIFIED (55)
513 .Depended from horizontal surface (56)
514 ..Plural shelves or provision for plural containers
515 .Sequential article dispenser (57)
516 ..Disposable cup
517 ..Package, e.g., cigarette, etc.
518 ..Roll or interfolded sheet
519 ...Combined with diverse article
520 ...Provision for plural rolls
521 ...Vertical spindle
522 ...Towel
523 ...Toilet paper
524 .Bathroom accessory fixture
525 ..Shower or bath caddy
526 ..Razor or razor blade holder
527 ..Combination fixture
528 ...Toothbursh holder
529 ....And soap dish
530 ....And dentifrice dispenser
531 ....And tumbler holder
532 ...Soap dish
533 ....And grab bar
534 ..Toothbrush holder
535 ..Tumbler or cup holder
536 ..Soap dish or bar holder (58)
537 ...Wire type
538 ...Magnetic type
539 ...Simulative
540 ...Attachable to vertical surface
541 ..Collapsible tube squeezer or holder
542 ..Dispenser for toiletries, e.g., liquid soap, lather, dentifrice, etc.
543 ...Hot lather type
544 ...Plural valve
545 ...Wall mount type
546 ..Towel rack or ring (59)
547 ...With moveable clip or clamp means
548 ...Plural arm
549 ...Bar type
550 ...Element
551 ..Toilet brush holder
552 .Rack or holder for sports equipment
553 .Attachable to vertical surface
554 ..Whisk broom holder
555 ..Planar work surfaces, e.g., wall desk, etc.
556 ..Flower or plant holder
557 ...Simulative

ARTICLE SUPPORT, HOLDER OR DISPENSER, NOT ELSEWHERE SPECIFIED (55)
.Attachable to vertical surface
..Flower or plant holder
558 ...Plural
559 ..With fully enclosed compartment (60)
560 ...With drawer
561 ...Plural doors
562 ..Corner type
563 ..Simulative
564 ...Animate
565 ...Plant life
566 ..Wire type support surface
567 ..Horizontal support surface (65)
568 ...Combined with mirror
569 ...Plural
570 ....Vertically arranged
571 .....Horizontally divided
572 ...Distinct separate brackets for support surface
573 ...With storage compartment
574 ...Shelf or tray type
575 WINDOW COVERING
576 .Simulative
577 .Venetian blind
578 .Tieback type curtain or drape
579 .Valance, corner panel, or portiere
580 .Element or attachment
581 ..Pull cord or tassel
582 CARPET, FLOOR MAT, OR RUG
583 .Bath or door mat
584 ..Bathtub applique
585 ..Perforate
586 ...Link type
587 ..Element
588 .Simulative (61)
589 ..Animate
590 ...Canine motif
591 ...Humanoid
592 .Oval, round, or irregular in form
593 .Fringed
594 ..Four sides
595 HOUSEHOLD LINEN, MATTRESS, OR CUSHION (62)
596 .Mattress, cushion, or bed linen (63)
597 ..Simulative
598 ...Animate
599 ....Humanoid
600 ...Plant life
601 ..Pillow, cushion or cover therefor (64)
602 ..Sheet
603 ..Bedspread, blanket, or comforter
604 ..Inflatable
605 ..Bed type mattress
606 ..Element or attachment
607 ...Bedclothes holder or fastener
608 .Towel or washcloth
609 ..Animate motif
610 .Furniture or appliance cover or protector
611 ..Seat cover or liner
612 ..Table or furniture scarf
613 ..Doily or place mat
614 ...Animate motif
615 ...Substantially circular format
616 ...Substantially rectangular or square format
617 ..Tablecloth
618 ...Card table type or with gameboard motif
619 ...Animate simulation
620 ....Humanoid
621 ...Oval or round shape or dominant motif
622 ...With distinct grid pattern
623 ...With simulated flower holder, e.g., vase, basket, etc.
624 ...With bow or ribbon simulation
625 ...With edible product representation

SEARCH NOTES FOR CLASS D6
(1) Classified by full-line disclosure
(2) For hand-held or body-attached mirror, see D28-64.1+.
For combination with freestanding furniture, see subclasses 396+.
For combination with horizontal support surface, see subclass 568
For furniture type book reading stand, see subclass 419.
(3) For combination with freestanding furniture, see subclasses 329+.
For freestanding apparel support, see subclasses 411+.
For combination with seat, see subclass 343.
For freestanding towel support, see subclass 410.
For wall-mounted coat hook, see D8-349+.
For example, a coat hook attachable directly to a wall, door, etc., would be classified in D8 whereas a hook unit comprised of a furniture-like mount which is then attachable to a verticle surface is classified here.
(4) Contains essentially freestanding furniture, but also includes cantilevered types such as chairs, etc.
For wall-mounted desk, shelf or similar support, see subclasses 512+.
(5) For merchandise display panel, see subclasses 449+.
(6) For swing or rocker, see subclasses 344+.
For chair without provision for restraint, see subclasses 334+.
(7) For leg, see subclass 495+.
For hammock, see subclass 387.
(8) For seating unit convertible to bed see other subclasses indented under subclass 334.
(9) For juvenille high chair, see subclass 339.
(10) For elevator seat without provision for work surface, see other subclasses indented under sublass 334.
(11) For end frame, see subclass see suclasses 492+.
(12) For freestanding apparel support, see subclasses 411+.
(13) Exclusive of upholstery fabric.
(14) For bench type seating unit with armrest, see subclass 355.
For straddle type seat, see subclass 354.
(15) For step ladder, see D25-65.
(16) Exclusive of upholstery fabric.
(17) Includes humanoid.
(18) For chair combined with distinct foot rest, see subclass 335.
(19) If seating unit is upholstered, it is classified below.
(20) Runners which are laterally joined at all extremities thus forming a boxed or enclosed base are not considered to be distinct runners
(21) Includes infant dressing table or bathing unit.
(22) For seating unit convertible to bed see subclasses indented under sub class 382.
(24) Excludes internal combination such as work surface and storage unit,

storage and merchandising unit, etc.
Excludes combination with mirror. See furniture item per se.
(25) If lamp is concealed to illuminate contents, classified with specifi furniture article below.
(26) If plant container is disclosed, classified as a planter in D11-143+.
For wall-mounted type, see subclasses 556+.
(27) For clothing support, see subclass 411.
(28) For support wherein article of apparel is supported upon a shelf, bracket, etc., see subclasses 449+.
For enclosed cabinet, see subclasse 432+.
(29) For freestanding carrel type telephone enclosure, see subclass 421
For wall-mounted telephone enclosure, see subclasses 553+.
(30) For bookend, see D19-34.1+.
For easel or bookrest type support, see subclasses 300+.
(31) For furniture with inclined display or storage surface, see subclasses 436+ or 449+.
(32) For desk with tambour closure, see subclass 424.
(33) If storage area is not indicated, classified as a table in subclasses 480+.
(34) Exclusive of auxiliary sliding shelf.
(35) Exclusive of mirror.
(36) For pivoted display panels, see subclass 454.
(37) To be classified in this and in indented subclasses, there must be a clear indication of access to the contents e.g., door or corresponding hardware. If glass panels permit viewing contents, article is classified in subclasses 449+.
(38) Includes humanoid.
(39) Sole top surface not considered.
(40) For extending surface such as leaf, see subclass 430.
(41) Excludes plural surface.
(42) Includes humanoid.
(43) For table or singular planar surface, see subclasses 480+.
(44) Excludes wire shelf in showcase type; see subclasses 470+.
(45) For shelf or bin, see subclasses 475+.
(46) Aperture must have appearance characteristics of a surround for a transparent panel; for shelf unit lacking same, see following subclasses.
(47) For bin or table having plural parallel support surfaces, see subclasses 49+.
For accessory work surface such as tray for chair, or top per se, see subclasses 509+.
For table with extending or drop leaf, see subclass 430.
(48) If storage area is disclosed, classified in subclasses 432+ or 449+.
(49) For general purpose hardware such as caster, hinge, knob, etc., see Class D8.
(50) Includes furniture door.
For bed headboard, see subclasses 505+.
(51) For hardware type item such as leg end cap, ferrule, caster, etc., D8-374+.
(52) For freestanding seat unit, frame or shell, see subclasses 334+.
For attachable work surface accessory, see subclasses 509+.
(53) For loose pillow, see subclass 601.
Includes armrest or headrest.
(54) For freestanding footrest, see subclasses 349+. Disclosure including both seat and backrest is considered to be seating unit and is therefore classified in subclasses 334+.
(55) Includes only those supports which are comprised of a horizontal supporting surface such as a shelf, a partially or fully enclosed structure, or combination thereof. Supports or brackets per se, in the form of hooks, clips, clamps, brackets and the like, or any lesser article than a shelf-like article, are found in Class D8.
(56) For support hook or bracket per se, see subclasses 524+.
(57) Includes holder for roll goods, etc
(58) Includes brackets per se.
(59) For freestanding type, see subclass 410.
(60) Includes medicine cabinet.
(61) Exclusive of plant life per se.
(62) Napkin included in this subclass.
(63) Includes bedspread, blanket, afghan comforter, mattress cover, etc.
(64) Includes pillowcase.
(65) Includes wire or peg type horizonta support surface.

CLASS D7 EQUIPMENT FOR PREPARING OR SERVING FOOD OR DRINK NOT ELSEWHERE SPECIFIED

Excluded from this class are:
Architectural or display fountain; see D23-201.
Bin or open top storage tray or basket; see D34-40+.
Bottle or can opener; see D8.
  for bottle, can, etc.; see D9-437.
Bristled brush or broom; see D4.
Bristled toilet article brush; see D4.
Calling card receiver; see D6-449.
Coaster combined with ash receiver; see D27-109 or 126.
Coin operated food vending machine; see D20-1+.
Coin tray; see D99-34.
Combined with key holder; see D3-64.
Combined with closure or attachment
  for bottles, can, etc.; see D9-437.
Crisper drawer for refrigerator; see D15-89.
Crumb collector; see D32-74.
Floor mat; see D6-209+.
Floor scrubbing or brushing machine or other surface treatment such as vacuum cleaner; see D32-15+.
Food display unit, per se; see D6-396+.
General purpose valve; see D23-238+.
Handle or knob for stove; see D8-307+.
Ice cream freezer; see D15-82.
Knife sharpener attachment for food mixer; see D8.
Laundry or ironing machine; see D32-9.
Machete or hunting knife; see D22-118.
Major appliances; see D32-1+.
Measuring dispenser for powdered or granular materials; see D6-515.
Measuring implement; see D10-46.2.
Minnow bucket or pail; see D22-22.
Packaging receptacle; see D9.
Packaging tray; see D9-424+.
Pharmaceutical muddler or pestle; see D24-23.
Place mat; see D6-271.
Sequential dispenser for dishes; see D6-408.
Scraper combined with bristled brush; see D4.
Shoe scraper attachment for vehicle; see D12-203.
Sponge for corporal use; see D28-63.
Toy housewares; see D21-121+.
Trash compactor container; see D34-3.
Tray, general purpose; see D6-449+ or 512+.
Vase; see D11-143+.
Wire rack; see D6-449+.

500 CHINA, GLASSWARE, SERVING VESSEL OR TRAY (1)
501 .Lazy susan type
502 .Butter container (i.e., designated as such) (2)
503 .Egg cup (i.e., designated as such) (3)
504 .Taco holder
505 .Plural distinct articles, or combined (4)
506 ..Simulative in form
507 ..Drinking vessel with diverse article (5)
508 ..With nutcracker (6)
509 .Drinking vessel
510 ..With anti-spill feature
511 ..With closure
512 ..Collapsible
513 ..Plural cavity
514 ..Simulative (7)
515 ...In form
516 ....Animate
517 .....Human
518 ....Flower, bud, fruit or vegetable
519 ...Animate
520 ....Human
521 ...Flower, bud, fruit or vegetable
522 ....Goblet
523 ..Three or more repeats, or uniform configuration, about axis
524 ...Goblet
525 ....Helical or sinuous detail
526 ....Incised V-shaped grooves defining pattern (i.e., cut glass type, etc.) (8)
527 ....Straight vertical ribs or grooves, or with planar surfaces
528 ....Repeating circumferential ribs or grooves
529 ...Helical or sinuous detail
530 ...Incised V-shaped grooves defining pattern (i.e., cut glass type, etc.) (8)
531 ...Straight vertical ribs or grooves, or with planar surfaces
532 ...Repeating circumferential ribs or grooves
533 ..With handle
534 ...Plural
535 ...Asymmetrical
536 ...Closed loop
537 ..Goblet
538 .Covered (9)
539 ..Simulative (7)
540 ..Three or more repeats, or uniform configuration, about axis
541 ..Compartmented or with division
542 ..Symmetrical on two axes
543 .With handle, finger grip, or opposed carrying flanges (10)
544 ..Simulative (7)
545 ..Symmetrical on two axes
546 ...Compartmented, or with perforation or collar forming restraint for food or container
547 ...Centrally disposed handle
548 ...Handle having plural attachment points or with finger opening
549 ..Compartmented, or with perforation or collar forming restraint for food or container
550 .Tray (i.e., designated as such) (11)
551 ..Simulative
552 ..Three or more repeats, or uniform configuration, about axis
553 ..Compartmented, or with perforation or collar forming restraint for food or container (12)
554 ...Bilaterally symmetrical
555 .Compartmented or with vertical division (13)
556 ..Simulative (7)
557 ..Three or more repeats, or uniform configuration, about axis
558 .Columar support, or footed base (e.g., compote, etc.)
559 ..Simulative (7)
560 .Ornamentation on exterior surface
561 ..Incised V-shaped grooves defining pattern (8)
562 ...Three or more repeats, or uniform configuration, about axis
563 ....Simulative (7)
564 ..Simulative (7) (35)
565 ..Three or more repeats, or uniform configuration, about axis

CHINA, GLASSWARE, SERVING VESSEL OR TRAY (1)
566 .Scalloped, fluted or irregular periphery in top plan (44)
567 ..Simulative (7)
568 ...Three or more repeats, or uniform configuration, about axis
569 ...Animate
570 ..Three or more repeats, or uniform configuration, about axis
571 .Simulative (7)
572 ..Three or more repeats, or uniform configuration, about axis
573 ...Animate
574 ...Ribbon or bow
575 ...Garland or festoon
576 ...Flower, bud, fruit or vegetable
577 ....With container (e.g., basket, cornucopia, etc.)
578 ..Animate
579 ...Human
580 ..Architectural or geographic
581 ..Ribbon or bow
582 ..Flower, bud, fruit or vegetable
583 ...With container (e.g., basket, cornucopia, etc.)
584 .Three or more repeats, or uniform configuration, about axis
585 ..Peripheral or border pattern (45)
586 ..Symmetrical on two axes
587 .Bilaterally symmetrical
588 .Peripheral or border patten (45)
300 BEVERAGE OR LIQUID SERVING OR DISPENSING (21)
300.1 .Shaker or siphon bottle
300.2 .Stirrer or straw (49)
301 .Simulative (22)
302 ..Handheld
303 ...With rim-mounted pouring lip
304 .Upwardly directed beverage stream with catch basin (i.e., drinking fountain type, etc.)
305 .Combined with diverse article, e.g., cup or condiment dispenser, etc.
306 .Console or floor type
307 ..Provision for plural valve
308 .Provision for plural valve
309 .Automatic drip or pressure brewing type, or having decanter warming surface
310 .Superposed components, e.g., vacuum or drip coffee maker, etc.
311 .With support or overflow tray for receiving vessel
312 .Provided with flow director (23)
313 ..Tap or valve actuated
314 ..Pivotally mounted for pouring
315 ..Plural
316 ..Rim-mounted pouring lip
317 ...With closure
318 ...With handle
319 ....Plural attachment points or with finger opening
320 ..With pivoted handle or provision therefor
321 ..With closure
322 ...Latch or lever operated
589 MEASURED OR SEQUENTIAL DISPENSER (E.G., LEVER OR KNOB ACTUATION, ETC.) (46)
590 CONDIMENT DISPENSER, CASTER OR CADDY (47)
591 .Shaker type
592 ..Combined with support
593 ...Simulative
594 ..Simulative
595 ...Animate
596 ..Plural cell or outlet
597 ..Three or more repeats, or uniform configuration, about axis
598 .Cruet, decanter or pitcher type (48)
599 .Simulative
600 .With carrying handle
601 HOLDER OR STORAGE RECEPTACLE (50)
602 .Of food, beverage or container therefor (51)
603 ..Ice serving or wine chilling bucket
604 ...Simulative
605 ..Insulated type (E.G., insulated jacket, jug, cooler, etc.) (52)
606 ...Simulative
607 ...Flaccid walls
608 ...Circular in cross-section
609 ..Breadbox type (53)
610 ..Cake or pie type
611 ..Egg type
612 ..Canister or cookie jar type
613 ...Simulative
614 ...Plural cell
615 ...Three or more repeats, or uniform configuration, about axis
616 ..Provision for multiple container or with plural compartment (e.g., milk or soda bottle, glass, cup, etc.) (54)
617 ...Simulative
618 ...Primarily of wire material
619 ..Beverage container (55)
620 ...Provision for attachment to other surface (e.g., clamp, hook, arm, etc.)
621 ...Pivoted or gimbals amount
622 ...With finger grip or handle (56)
623 ....Simulative
624 ...Coaster or sheath
625 ....Simulative
626 ..With centrally disposed pass-through handle (e.g., lunch box type, etc.)
627 ...Simulative
628 ..Simulative
629 ..With closure
630 ..Three or more repeats, or uniform configuration, about axis
631 .Of napkin (57)
632 ..Combined with holder for diverse article
633 ..Ring or clip
634 ..Simulative
635 .Of stirrer, straw or toothpick (58)
636 ..Simulative
637 .Of processing, preparing or handling implement, or of place setting utensil (59)
638 ..Combined
639 ..Simulative
640 ..Three of more repeats, or uniform configuration, about axis
641 ..Bilaterally symmetrical
642 PLACE SETTING, TABLE SERVICE UTENSIL OR HANDLE THEREFOR (60)
643 .Combined
644 ..Opposed (i.e., double ended, etc.)
645 .Plural distinct pieces (i.e., knife and fork, fork and spoon, etc.) (61)
646 .Powered (62)
647 .Pierced bowl (63)
648 .Loop or finger encircling handle
649 .Knife or blade (64)
650 ..Serrated edge
651 ..Simulative (7)
652 ..Asymmetrical in top plan
653 .Fork or spoon (81)
654 ..Simulative (7)
655 ...Vehicle
656 ...Animate

PLACE SETTING, TABLE SERVICE UTENSIL OR HANDLE THEREFOR (60)
.Fork or spoon (81)
..Simulative (7)
...Animate
657 ....Human
658 ...Architectural or geographic
659 ...Fruit, vegetable or seed pod
660 ...Flower or bud
661 ....Asymmetrical
662 ..Asymmetrical in front elevation
663 ...In form
664 ..Handle of distinct or plural materials
323 WARMING OR COOKING (24)
324 .Solar
325 .Popcorn (25)
326 .Bottle or baby food warmer
327 .Invertible or convertible
328 .Radiant toaster (26)
329 ..Combined
330 ..Top loading
331 .Vertically disposed heating element
332 .Solid or liquid fuel outdoor type
333 ..Masonry type
334 ..Mobile unit (i.e., provided with wheels, etc.)
335 ..Unitary vertical support column
336 ...Cantilevered cooking surface
337 ..Table top type
338 .With rotating or conveying feature
339 .Freestanding or built-in type
340 ..Combined oven and surface unit
341 ...Cantilevered shelf or warming oven over burner area
342 ...Simulative or baroque motif
343 ....Animate
344 ....Alpha or numeric motif
345 ....Simulative
346 ..Surface unit (27)
347 ..With fully enclosed cooking or warming area
348 ...Oven
349 ....Wall mounted type
350 .Countertop unit having side mounted door or opening
351 ..Microwave
352 .Opposed heated surfaces (28)
353 ..Plural lid
354 .Vessel, e.g., cooking container, pan, etc. (29)
355 ..With integral spaced heat source (i.e., chafing dish type, etc.) (30)
356 ..Superposed vessels (31)
357 ..Plural cooking cell or compartment (32)
358 ..Pressure cooker
359 ..Textured, irregular or convex cooking surface (i.e., grid or rib, etc.) (33)
360 ..Plural grip or provision therefor
361 ..Singular handle or provision therefor
362 .Heat source or planar heated surface (34)
363 ..Planar, e.g., griddle, warming surface, etc.
364 ..Plural
365 ..With spaced heater element or provision therefor
366 ...Chafing dish type
367 ..Hot plate type or having support feet
368 PROCESSING, PREPARING OR HANDLING (65)
665 .Squeezer or extractor (66)
666 ..Pivoted jaws or lever operated
667 .Sifter or strainer
668 ..Relative movement of parts while performing funtion, or provision therefor
669 .Hand operated (67)
670 ..Butter applicator (68)
671 ..Ice pick
672 ..Mold, cutting die, branding implement, or article for measured cutting (69)
673 ...Slicer or guide therefor
674 ...Pivoted cooperating components
675 ...Simulative
676 ....Animate
677 ...Three or more repeats, or uniform configuration, about axis
678 ..Grater
679 ..Mill or grinder (71)
680 ..Nut cracker (72)
681 ..Ice cream type
682 ..Pounding or mashing (73)
683 ..Clamping or piercing food holder (74)
684 ...Simulative
685 ....Clamping
686 ...Clamping
687 ....Pivot point between jaws and handle
688 ..Lifting, stirring, turning or spreading (75)
689 ...Simulative
690 ...Wire
691 ...Scoop or ladle (76)
692 ...Perforated
693 ..Cutting, peeling, shelling or coring (77)
694 ...Rotary blade
695 ...Shielded edge, or opposed facing edges
696 ...Serrated or sinuous edge
697 ..Roller
698 ..Cutting or kneading board
699 ...Simulative
700 ..Funnel
369 .Separating
370 ..Dairy
371 ...Churn
372 .Grinding or crushing (36)
373 ..Coffee
374 ..Ice (37)
375 ..Waste disposal
376 .Mixing
377 ..Homogenizer or emulsifier
378 ..Blender (38)
379 ..Provision for depending beater
380 ...Hand powered
381 .Cutting, slicing or piercing (39)
382 ..Tenderizer
383 ..Rotating blade
384 ...Processor
385 ..Reciprocating blade or saw type (40)
386 .Power base unit
387 ELEMENT OR ATTACHMENT (41)
388 .Insulating or supporting stand or mat (e.g., trivet, stove mat, etc.)
389 ..Simulative
390 .Toaster
391 .Utensil cover
392 ..Dispensing
392.1 ..For china, glassware or serving vessel
393 .Handle or knob
394 ..Provides finger pass-through
395 ..Attaches at end of in-line elongated axis
396 ..Percolator knob
396.1 .China, glassware, serving vessel or tray
396.2 ..Drinking vessel
396.3 ...Mustache guard
396.4 ..Decal or surface pattern (78)
396.5 ...Border
396.6 ..Base or foot (79)
397 .Serving or dispensing type
398 ..Tap, valve, or spout

	ELEMENT OR ATTACHMENT (41)
	.Serving or dispensing type
399	..Coffee or tea maker
400	...Filter or holder therefor
401	...Upper bowl (42)
401.1	.Condiment dispenser, caster or caddy (80)
401.2	.Place setting, table service utensil or handle therefor (82)
402	.Warming or cooking (43)
403	..Base, stand or leg
404	...Fuel tank or bottle support
405	..Door or panel
406	..Backsplash, control panel, or shelf unit
407	..Burner, liner or element thereof
408	...Grid or grate
409	..Grid, grille, holder or insert
410	...Waffle
411	...Toast
412	.Processing, preparing or handling
413	..Blender container
414	..Grinder or crusher
415	..Liquid
416	FIRE STARTER OR IGNITER
417	.Container type, e.g., charcoal bucket, etc.
213	MISCELLANEOUS

SEARCH NOTES FOR CLASS D7

(1) Classified by both full and broken lines;
  Includes pieces which are useable as either serving or cooking vessels, e.g., microwave safe ceramic, glass, plastic or other nonmetallic plates, casseroles, etc.;
  For bowl specifically designed for mixer or blender, see subclasses 412+;
  For cake or pie storage container, see subclass 610;
  For cocktail shaker, see subclass 300.1;
  For condiment dispenser or carrier therefor, see subclass 590;
  For cooking vessel, subclass 354;
  For ice serving or wine chilling bucket, see subclasses 603+;
  For pouring vessel, see subclass 312;
  For relish dish, see subclasses 590+;
  For sequential or measured food dispenser, see subclass 589;
  For storage or handling container, see subclass 601;
(2) For butter applicator, see subclass 670;
  For sequential butter dispenser see subclass 589.
(3) For egg storage article, see subclass 611.
(4) For cream and sugar container with caddy, see subclass 598.
(5) For drinking cup combined with vacuum bottle, see subclass 608.
(6) For nutcracker per se, see subclass 680.
(7) Exclusive of leaf, plume or scroll.
(8) Each wall of "V" must repeat (be a mirror image of) the opposite wall.
(9) For element or attachment, see subclasses 387+;
  For vessel with pouring or portion control feature, see subclasses 312+.
(10) For handled sheath or cover for drinking vessel, see subclass 622;
  For compartmented beverage carrier, see subclasses 616+.
(11) For element or attachment, see see subclasses 387+;
  For compartmented beverage carrier, see subclasses 616+;
  For tray combined with additonal serving vessel, see subclasses 505+;
  For condiment caster or caddy, see subclasses 590+;
  For carrier for cup, glass, etc., see subclasses 590+;
(12) For holder designed exclusively for plural drinking vessels, see subclasses 616+;
(13) For element or attachment, see subclasses 387+;
  For compartmented beverage carrier, see subclasses 616+.
(21) Classified by full-line disclosure; includes casing; element excluded; see subclasses 387+.
(22) Includes barrel simulation.
(23) For cooking vessel; see subclasses 354+.
(24) Classified by full-line disclosure.
  Element excluded; see subclasses 402+.
(25) For coating machine; see subclass 376.
(26) For toaster-oven combination; see subclass 350.
(27) Includes range top surface.
  For hot plate, see subclasses 362+
  For burner or element thereof, see subclasses 407+.
(28) For waffle grid, per se, see subclass 410.
(29) Includes deep fat fryer.
  For heat source, per se, or griddle, see subclasses 362+.
(30) For heat source or warmer base, per se, see subclass 366,
(31) For double boiler insert, see subclass 409.
(32) For waffle iron, see subclasses 352+.
(33) For food support, per see, such as broiler pan insert, grid type holder, etc., see subclasses 409+.
  For waffle iron, see subclasses 352+.
(34) For built-in range top, see subclass 346.
  For pot, pan or dish support without provision for heat source, see subclass 403.
(35) For similar articles having a cover, see subclass 539.
(36) For juicer, see subclasses 48+.
(37) For cracking hammer, see subclass 101.
(38) For power base unit, see subclass

386.

(39) For abrasive type vegetable peeling machine, see subclass 372.

(40) Includes bread slicing machine.

(41) For article casing, see subclasses 300+, 323+, 368+, 589, 590+ and 601+.

(42) For decanter, see subclasses 312+.

(43) For broiler pan insert or food holder, per se, see subclass 409.

(44) Exdlusive or regular geometric shape such as triangular, polygonal, etc.

(45) For border pattern decal, see Subclass 396.5.

(46) For napkin dispenser, see subclasses 631+;
For straw or toothpick dispenser, see subclasses 635+.

(47) Classified by full line disclosure
Includes casing or body;
Includes relish dish;
For bottle holder, see subclass 616;
For butter applicator, see subclass 670;
For hand operated grinder or mill, see subclass 679;
For spice rack, see subclass 616.
For static sugar bowl, see subclasses 500+.

(48) Includes combination of sugar container and creamer with stand.

(49) For cocktail pick, see subclass 683.

(50) Classified by both full and broken lines;
For element or attachment, see subclass 387.

(51) For condiment caster, see subclass 590;
For support for china or serving vessel, see subclasses 396.1+;
For sequential or measured food dispenser, see subclass 589.

(52) For similar container with beverage dispensing valve or with flow directing spout, see subclasses 312+.

(53) If breadbox is combined with additional, diverse type of storage compartment, see subclasses 616+.

(54) Includes draining stand for plural food containers;
For coasters disclosed as a set, see subclasses 619+.

(55) Includes draining stand for food container;
For pouring vessel or serving pitcher, see subclasses 312+.

(56) Includes handle per se, which is directly attachable to a container.

(57) For combination with condiment dispenser or holder, see subclasses 590+;
For facial tissue dispenser, see D6-518+.

(58) For sequential dispenser, see sublcass 589.

(59) Includes holder for cutlery.

(60) Classified by both full line and broken lines;
Includes in this subclass, chopsticks;
Element included.
For food preparation tool, see sublcasses 368+.

(61) Exclusive of combination disclosure, in an integral form, of fork and spoon, etc.; see subclasses 643+.

(62) Includes power handle per se.

(63) For ladle, see subclass 691.

(64) For scraping or spreading spatula, see subclass 688;
For special purpose cutting tool, e.g., vegetable peeler, shelling knife, etc., see subclasses 693+.

(65) Classified by both full and broken lines;
For holder or storage receptacle, see subclasses 601+;
For place setting or table service utensil, see subclasses 642+.

(66) Includes squeezer or extractor attachment for kitchen machine;
For baster or injector, see subclass 669;
For nutcracker, see subclass 680.

(67) Includes baster;
For hand operated mixer, see subclass 380;
For powered appliance, see subclasses 369+.

(68) For serving container, e.g., dish, etc., see subclass 502.

(69) For machine, see subclasses 381+.
For baking pan, see subclass 354;
For vegetable cutter which does not provide for specific shape or thickness, see subclass 693;
For waffle iron mold, see subclass 410.

(70) For vegetable corer, see subclass 693.

(71) For powered mill or grinder, see subclasses 372+.

(72) For serving vessel, or for combination with same, see, respectively, subclasses 500+ and 508.

(73) For squeezer, e.g., garlic press, etc., see subclass 665.

(74) Includes cocktail pick;
For squeezer or extractor, e.g., tea bag squeezer, etc., see subclass 665;
For substance injector, see subclass 669.

(75) Includes plate or pan lifter;
Includes squeegee or spatula type scraper;
For abrasive or cutting type scraper, see subclass 693.

(76) For slotted spoon, see subclass 647.

(77) For general purpose flat bladed knife, see subclasses 649+.

(78) For general purpose decal, see D20-11;
If edge of serving vessel, plate, etc. is shown either in

full or in broken lines, patent is classified with item per se above.

(79) For beverage container sleeve or carrier, see subclasses 619+; For serving dish or plate holder, see subclasses 602+.

(80) For caster, carrier, etc., see subclass 590.

(81) For carving fork, see subclass 683.

(82) For cutlery support, see subclass 637.

CLASS D8 TOOLS AND HARDWARE

Excluded from this class are:
Abrading machines and attachments; see D15-124+.
Agricultural machines which are not hand-held; see D15-10+.
Apparel fastener; see D11-200.
Apparel hook mounted to vertical surface; see D6-553+.
Apparel type fastener, e.g., snap, zipper, etc.; see D11-200+.
Architectural post or column; see D25-126+.
Battery terminal clamp; see D13-120.
Bed frame component; see D6-503+.
Capstan; see D34-33.
Can or bottle opener in combination with punching and pouring attachment for can, etc.; see D9-437.
Chain, jewelry; see D11-13.
  Tire; see D12-154.
Chopping, mincing, cutting, grinding, or mixing implement for food; see D7-669+.
Cigar cutter or smoker's tool; see D27-195 or 196
Clasp, clamp, clip, etc., for jewelry; see D11-86+.
Cleat or spike for shoe; see D2-317.
Clip, for holding blanket or sheet; see D6-607.
  For pen or pencil, see D19-56.
Coffin handle; see D99-15+.
Coffin screw; see D99-14.
Control panel, for air conditioner; see D23.
  For automobile, ship, aircraft, etc., see D12-192.
  For data processing machine or telephone switchboard, see D14.
  For measuring or testing machine; see D10.
Cornice, fabric; see D6-579.
  Rigid; see D25-55.
Door chime or bell; see D10-116+.
Drapery tieback, fabric; see D6-578.
Electrical connector; see D13-133+.
  Insulator; see D13-129+.
  Junction box; see D13-152.
  Wall outlet per se or in combination with escutcheon; see D13-137+.
Escutcheon plate for radio; see D14-76.
  For television, see D14-84.
Faucet or valve handle; see D23-250+.
Fence post or cap; see D25-126+ or 135.
Fireplace Equipment set; see D23-403+.
Fishing reel; see D22-137.
Fitting or conduit, for fluid handling; see D23-259+.
  For electrical conductor, see D13-155.
Flagpole holder; see D11-182+.
Garment hanger; see D6-315+.
Handbag frame per se or in combination with latch; see D3-54.
Handle attachment for drinking cup, pitcher, etc.; see D7-393+.
Handle, for brushware; see D4.
  For cleaning equipment, see D32-35+.
  For cooker, e.g., toaster, waffle iron, etc., see D7.
  For firearm, fishing rod or fly swatter, see D22-108.
  For knife, fork, spoon, pot, pan, etc., see D7.
  For luggage or handbag in combination with article per se, see D3-30.1+.
  For miscellaneous sporting goods, see D21-191+.
Hinge or lens fastener for eyeglasses; see D16-123+.
Horseshoe calk; see D30-99.
Hose reel combined with cart; see D34-14.

Internal washer, gasket, or packing for faucet or valve; see D23-269.
Knife, combined with money clip; see D11-78.1.
  Combined with key holder, ring, case, etc.; see D3-62+.
Lamp mantle support; see D26-144
Machinery parts, e.g., drill bit, die, reamer, etc.; see D15-135+.
Money, tie or scarf clip; see D11-78.1 or 200+.
Multiple-pronged fastener for necktie, etc.; see D11-202+.
Name or drawer plate; see D20-15
Paper clip or fastener; see D19-86.
Paper punch, desk type; see D19-72.
Pencil sharpener; see D19-73+.
Power source for soldering or welding equipment; see D15-144.
Protective slug for shoes; see D2-317.
Railway tie clamp; see D12-51.
Reinforcing bar for concrete form; see D25-164.
Roof rack for vehicle; see D12-157.
Sawhorse; see D25-67.
Scaffold element or coupling; see D25-68+.
Shade pull of fabric or cord; see D6-581.
Shelf; see D6-567+.
Shoe calk or spike; see D2-317.
Stand-supported holder for flashlight; see D26-142+.
  For baby bottle, see D24-48.
Support for bathtub, sink, etc.; see D23-303.
Switch control per se or in combination with escutcheon; see D13-158+.
Tent peg; see D21-255.
Toy hand tools; see D21-120.
Venetian blind; see D6-577.
Wall-mounted support structure; see D6-553+.
Window shade; see D6-575+.
Work or tool holder, machine-attached; see D15-140.

1 TOOLS AND IMPLEMENTS FOR AGRICULTURE, FORESTRY AND HORTICULTURE (51)
2 .With discharge spout or nozzle, e.g., hand-held insecticide dusters, seed planters, etc.
3 .Finger-attached
4 .Jaws activated by relatively movable plural handles, e.g., tongs, plier type, etc.
5 ..Cutting blade
6 .Provided with cutting blade and tines
7 .Provided with cutting blade
8 ..Rotary or reciprocating
9 ..Notched or serrated
10 ..Shovel or trowel
11 ..Hoe or mattock
12 ..Scythe or harvesting knife
13 .Provided with tines
14 OTHER TOOLS AND IMPLEMENTS
14.1 .Lubricating or caulking gun
15 .Carpet
16 .Entire article formed substantially from a single piece of sheet material (1)
17 ..Wrench (2)

OTHER TOOLS AND IMPLEMENTS
.Entire article formed substantially from a single piece of sheet material (1)
18 ..Can or bottle opener
19 ..Substantially flat
20 ...Cutting blade, e.g., saw, etc.
21 .Wrench (3)
22 ..Adjustable
23 ...Swinging jaw
24 ...Torque
25 ...Ratchet
26 ..Combined with disparate article
27 ..Spanner
28 ..Open end or box
29 ..Socket
29.1 .Heat gun, e.g., paint stripper, etc.
29.2 .Defrosting implement
30 .Fusing, e.g., soldering, etc.
31 .Tire, e.g., repair, etc.
32 .Rail or pipe bender
33 .Can or bottle opener
34 ..Combined with disparate article (4)
35 ...Sharpener
36 ..Powered
37 ..Wall-mounted
38 ..Simulative in form or motif
39 ..Relatively movable plural handles
40 ..Hand-held and manipulated
41 ...With material-cutting element
42 ....Cork remover
43 ....Combined with cap-removing feature
44 .Strap or wire tensioning
45 .Plaster or masonry finishing (52)
46 .Anvil
47 .Chisel, nail set, awl, or wedge
48 .Staple remover
49 .Stapler
50 ..Anvil provides staple deformation
51 .With relative movement of parts while performing function
52 ..Jaws activated by relatively movable plural handles, e.g., pliers, etc.
53 ...With simulative motif
54 ...Jaws diverge as handles converge
55 ...Combination tool (5)
56 ...Work held between pivot and handles (6)
57 ...Loop-type handle, e.g., scissors, etc.
58 ...Opposed jaws and handles substantially similar
59 ..Transmitted by rotating crank-type handle
60 ..Pipe or tube cutter
61 ..Power tool
62 ...Sander or grinder
63 ....Knife or scissors sharpener (7)
64 ...Saw (8)
65 ....Chain
66 ....Circular
67 ...Plural handles
68 ...Pistol grip (9)
69 ...With loop-type handle
70 ...Attachments
70.1 .Film splicer or cutter
71 .Work or tool holder (10)
72 ..Clamp
73 ...C-clamp type
74 ...Vise
75 .Hammer type
76 ..Ax, hatchet, or adz
77 ..Mallet, e.g., opposed duplicate faces, etc.
78 ..Head
79 ...Claw
80 ..Handle or handle attachments
81 ..Combined with distinct tool element (11)
82 .Screwdriver type
83 ..Handle
84 ...Plural
85 ..Plural bit or socket
86 ..Bit or shaft
87 ..Plural function, e.g., combined with light, etc.
88 .Lever
89 ..Nail or pry bar
90 .Abrading
91 ..Sharpener
92 ...Razor or razor blade
93 ...Knife or scissors
94 ..Handle
95 .Handsaw
96 ..Blade supported at both ends
97 ..Handle
98 .Cutting
99 ..Folding or sliding blade
100 ...With simulative motif
101 ..Wood plane or drawknife
102 ..Letter opener
103 ...With simulative motif
104 ...Combined with disparate article or plural function
105 .Combination tool
106 .Adjustable
107 .Handle
300 HANDLE, KNOB OR PULL (12)
301 .Combined (13)
302 ..With latch actuator (14)
303 .Handlebar grip or hand grip
305 .Simulative
306 .Pivoted or hinged to use position
307 .Singular point of attachment
308 ..Lever
309 ...Crank (15)
310 ..Substantially circular or oval
311 ...With grip bar or pointer
312 ...With peripheral striations or depressions
313 .Recessed finger grip
314 ..With open ends
315 .Bar type, i.e., having gripping surface spaced from mounting surface (16)
316 ..Symmetrical in front elevation on transverse and longitudinal axes
317 ...Arcuate pattern or outline
318 ....Sinuous
319 ..Symmetrical in front elevation on transverse axis
320 ..Symmetrical in front elevation on longitudinal axis
321 .Element or attachment (17)
322 ..Cover
323 HINGE (18)
324 .Simulative
325 .Flexible singular element, i.e., self-hinge type
326 .For toilet seat
327 .Leaf type
328 ..Symmetrical leaves
329 ..Offset
330 LOCKING OR CLOSING DEVICE (19)
331 .Lock, latch or bolt (20)
332 ..With alarm
333 ..Closed loop
334 ...Padlock (21)
335 ....Simulative
336 ..Swinging into engagement
337 ...Rotary motion window lock (22)
338 ...With distinct lever, knob or key release, or with provision therefor
339 ..Sliding into engagement
340 ...Chained bolt

LOCKING OR CLOSING DEVICE (19)
.Lock, latch or bolt (20)
..Sliding into engagement
341 ...With distinct lever, knob or key release, or with provision therefor (23)
342 ...Resilient engagement
343 ..Element or attachment (24)
344 ...Keeper or receiver (25)
345 ....Hasp staple
346 ...Protective cover (26)
347 ...Key
348 ....Simulative
349 FASTENER, SUPPORT OR MOUNT NOT ELSEWHERE SPECIFIED (27)
350 .Escutcheon (28)
351 ..Simulative
352 ..Substantially circular or oval
353 ..Substantially rectangular or square
354 .Support, guide or spacer (29)
355 ..Adjustable (30)
356 ..For flexible continuous material, i.e., rope, hose, belting, etc. (31)
357 ...Ignition wire manifold
358 ...Reel (32)
359 ....With crank or handle
360 ...Pulley
360.1 ...Twine holder
363 ..Standoff or crane type, e.g., handrail support, curtain rod support, etc. (34)
364 ...Electrical insulator bracket (35)
365 ...Simulative
366 ...Formed entirely of sheet material
367 ..Hook or eye (36)
368 ...Rigid loop or tieback for drapery (37)
369 ...With drapery pleating feature (38)
370 ...Formed entirely of wire
371 ...Formed entirely of sheet material
372 ...Plural (39)
373 ..Article supported vertically or suspended (50)
374 ...Furniture bearing (40)
375 ....Caster
376 ...Elongated, e.g., curtain rod, pole, etc.(41)
377 ....Track type, i.e., traverse rod, door track, etc.
378 ....Finial
379 ....Center ornament
380 ..Article supported horizontally
381 ...Shelf bracket (42)
382 .Fastener or coupling (43)
383 ..Locking slip or clutch for flexible material
384 ..Wall tie
385 ..Expanding, e.g., wall anchor
386 ...Rivet
387 ..Externally threaded, i.e., screw or bolt
388 ..Piercing
389 ...Plural piercing elements
390 ....Staple type, i.e., having two spaced points
391 ...Nail or spike (44)
392 ....Offset head
393 ....With rib or groove on shank
394 ..Clamping or gripping (45)
395 ...Resilient or spring biased
396 ...For cylindrical material
397 ...Nut or head
398 ...Wing type
399 ..Washer or nut lock
400 FITTING FOR DOOR, WINDOW OR FURNITURE NOT ELSEWHERE SPECIFIED (46)
401 .Knocker
402 .Stop or bumper (47)
403 ..Corner protector
404 .Push plate (48)
499 MISCELLANEOUS (49)

SEARCH NOTES FOR CLASS D8

(1) Letter openers are excluded; search subclasses 102+.
(2) Includes wrenches in combination.
(3) Power wrenches are excluded; search subclasses 61+.
(4) Combination with pocketknives are excluded; search subclasses 99+.
(5) For additional plier type combined with wrenches, search subclass 25.
(6) For can openers with similar arrangement of elements, search subclass 39.
(7) For sharpeners combined with can openers, search subclass 35.
(8) For handsaw, search subclasses 95+.
For saw attachments for other tools, search subclass 70.
(9) For additional tools with pistol grip, e.g., soldering gun, etc., search subclass 30.
(10) For other devices for holding flexible or rigid cylindrical material, search subclasses 356+ and 396.
Includes bagging tool.
(11) For hammer type combined with wrenches, search subclass 26.
(12) This and indented subclasses restricted to handle, knob, etc., which provide a grip (a) for lifting or grasping or (b) closing a door, panel, etc.
For lock, latch or actuator per se, see subclasses 331+.
(13) For knob combined with escutcheon or dial, see subclasses 307+.
(14) Includes only combination of handle, knob, etc., with latch-actuator button, thumb lever, etc.
If latch is disclosed, see subclasses 331+ below, particularly 338 and 341.
(15) For casement window operator, see subclass 400.
(16) For elongated handle not having grip opening, see subclasses 300 and 313+.
(17) For escutcheon, see subclasses 350+.
(18) Element included in this and in indented subclasses.
(19) Includes door closer.
(20) Includes casing.
Includes bar for jamming door in closed position.
For fastener which does not cooperate with keeper or receiver, e.g., fastener which acts directly upon door, window, shutter, etc., see subclasses 402+.
(21) Restricted to lock having hinged or pivoted link.
(22) For fastener to hold door or window in various positions, see subclass 402 below.
(23) Includes drawbolt-type latch catch.
(24) For handle or knob, see subclasses 300+.
For escutcheon, see subclasses 350+.

(25) For tongue or latch element, see subclasses 336+ and 339+.

(26) For keyhole escutcheon, see subclasses 350+.

(27) Element included in this and in indented subclasses.
Includes end or swivel for rope, cable, etc.

(28) Includes combination with electric switch button or actuator, or with electric receptacle face.
For combination with complete switch, see D13.

(29) Includes article-holding dam for vehicle use.

(30) For swinging crane-type support, see subclasses 363+.
Includes turnbuckle.

(31) Includes grommet.
Includes boat chock.
For boat cleat, see subclasses 382+.
For hook or eye, see subclasses 367+.
For fastener, e.g., rope clamp, see subclasses 383+.
For electric wire standoff, see subclasses 363 or 364.

(32) Includes Venetian blind tilter reel.

(34) For hook, see subclasses 367+.

(35) For insulator per se, see D13-129+

(36) For crane-type hook, see subclass 363.

(37) For fabric tieback, see D6-578.

(38) For pleater device per se, see subclasses 394+.

(39) Includes only plural-supporting hooks or eyes.

(40) Includes glide.

(41) For mounting bracket, see subclasses 363+ or 380+.

(42) For shelf, see D6-567+.

(43) Includes snap hook fastener.
For door or sash holder, see subclass 402.

(44) Includes flange or button for nail, tack, etc.
Includes thumbtack.

(45) Includes only fastener having provision for tightening or gripping.
Includes cord lock for Venetian blind.
For work holder-type clamp, see subclasses 72+.
Includes securing strap type.

(46) Includes sash weight.
Includes trunk fitting not provided for above.
Includes casement window operating mechanism.
For door opener or closer, see subclass 330.
For window pulley, see subclass 360.

(47) Includes holder for sash or door maintaining same in fixed position.
For lock, see subclasses 331+.

(48) For panic bar or static bar-type handle, see, respectively, subclasses 302 and 315+.

(49) Includes chain.
Includes roller shade locking or ratcheting mechanism.
Includes snow guard for roof.
Includes cleat for conveyor belt.

(50) Includes mop or broom holder.

(51) Includes plant stake.

(52) Includes plasterboard tape applying tool.

DIGESTS

DIG 1	Handles, pull-type
DIG 2	Handles, knob-type, circular, square and rectangular
DIG 3	Handles, knob-type, faucet and valve wheels
DIG 4	Handles, elongated-type, knife and fork
DIG 5	Handles, elongated-type, sword handles
DIG 6	Handles, elongated-type, golf and ski grips
DIG 7	Handles, elongated-type, tool handles
DIG 8	Handles, elongated-type, bicycle grips
DIG 9	Handles, asymmetrical-type, coffee, teapot and pitcher
DIG 10	Handles, asymmetrical-type, lever-type

CLASS D9 PACKAGES AND CONTAINERS FOR GOODS (1)

Excluded from this class are:
Atomizer; see D28-91.1.
Bagging tool; see D8-71.
Bail or handle per se; see D8-300+.
Bar soap container; see D28-76.
Bin, tray or similar permanent carrier; see D34-40+.
Brush combined with nail enamel; Container; see D4-116.
Bundle tie or strap; see D8-394+.
Calling card receiver; see D6-449.
Christmas stocking; see D11-126.
Clamp or locking device per se; see D8-382+.
Compact-type face powder container; see D28-91.
Compartmented permanent case or rack; see D34-40+.
Condiment cruet; see D7-598.
Cosmetic container for rouge, lipstick, powder compact, etc.; see D28-76+.
Dispensing container for photographic reproduction equipment; see D18-43.
Display card, sign, label, show card, etc.; see D20-10+.
Drinking cup; see D7-509+.
Fastener; see D8-349+.
Flower container or basket; see D11-143+.
Fluid storage tank; see D23-202+.
Food storage container such as lunch box, vacuum bottle, condiment server, etc.; see D7-590+ and 601+.
Fountain brush; see D4-114.
Glue applicator; see D19-70+.
Holy water bottle; see D99-25.
Kit or container for permanent storage of special article, e.g., chest for storing silver, jewelry, tool kit, etc.; see D3.
Label or tag; see D20-22+.
Liquid canteen; see D3-30.1.
Lubricating can; D23-211.
Medicine applicator; see D24-63.
Nursing bottle; see D24-47.
Office holder, tray or basket; see D19-86+.
Package ornament or bow; see D11-184.
Pail or can attachment, e.g., paint brush support, etc.; see D32-53+.
Paint can rim combined with brush rest; see D32-54.
Pencil box; see D19-85.
Permanent type shipping container; see D34-40+.
Reel; see D8-358+.
Sheet wrapping paper; see D5.
Shoeshine equipment container; see D3-30.5.
Spray gun; see D23-223+.
Spray nozzle; see D23-213+.
Stationery envelope; see D19-3+.
Storage, as opposed to packaging, container; see D3.
Tobacco product container and reuseable match container; see D27.
Washer for canning jar; see D8-399.
Watering can; see D23-212.

300 WITH GAS PROPELLANT MEANS OR PUMP
301 .Bellows type
302 COLLAPSIBLE TUBE
303 SEWING KIT, NEEDLE OR BUTTON (2)
304 MATCHBOOK TYPE
305 BAG OR WRAPPER TYPE (3)
306 .Tube or sleeve
307 SIMULATIVE IN FORM OR MOTIF
308 .Vehicle or component thereof
309 ..Ship or boat
310 .Animate
311 ..Humanoid
312 ...Christmas motif, e.g., Santa Claus, etc.
313 ...Plural figures
314 ...Organ, appendage, or element (4)
315 ....Heart
316 ...Freestanding figure
317 ..Bird
318 ..Quadruped
319 .Apparel
320 ..Hat or crown
321 .Horseshoe
322 .Building or component thereof
323 ..Furniture
324 .Timepiece
325 .Barrel
326 .Book
327 .Luggage
328 .Musical
329 .Edible article or tobacco product
330 .Light source
331 .Star
332 .Lettering
333 ..Single letter or numeral
334 .Bow
335 .Plant life
336 ..Flower
337 COMBINED WITH DIVERSE ARTICLE
338 .Applicator for contents (5)
339 SEQUENTIAL DISCHARGE OF CONTENTS
340 .Razor blade
341 COMPARTMENTED OR HAVING DISTINCT SUPPORT AREA FOR PLURAL ARTICLES (6)
342 .Razor and accessories
343 .Light string
344 .Engaging rim, top or neck only of contained article (7)
345 .Sheet or molded material conforming to shape of contained article, e.g., shrunk film, etc.
346 .Folded sheet material
347 .Of varying size or shape
348 .Staggered rows
349 UNIFORM CROSS SECTION AROUND POINT OR AXIS (8)
350 .Repeating adjacent ribs, grooves, or steps
351 ..With cylindrical body portion
352 .With closure
353 ..Closure conforms to and continues container configuration
354 ..Decanter type or with stopper
355 .Cylindrical body portion
356 OPPOSED PERIMETRICAL BEADS
357 .Front to rear opposition
358 ..Horizontally elongated container portion
359 .Shaker type dispensing container for powdered or granular material
360 ..Base merges vertically into different cross-sectional shape
361 ...Circular or oval base
362 ...Square or rectangular
363 ...Polygonal
364 ..Polygonal in plan
365 ..Circular or oval in plan
366 SHAKER TYPE DISPENSING CONTAINER FOR POWDERED OR GRANULAR MATERIAL
367 BOTTLE, JUG, JAR, OR CAN (9)
368 .Pull tab or tear strip opening
369 .Combined with holder, box, or package
370 .With bottom surface detail
371 ..Pointed or downwardly rounded, i.e., nonstandable

BOTTLE, JUG, JAR, OR CAN (9)
372 .Planar or concave side opposes convex side
373 .Mouth or spout not parallel to base
374 ..With handle or finger opening
375 .Mouth or spout offset from center line
376 ..With handle or finger opening
377 .Closure conforms to and continues container configuration
378 .With handle or finger opening
379 ..Bail type handle or ear
380 ..Plural
381 ..Attached at one end only
382 ..Centrally disposed finger opening
383 ..Applied to symmetrical container portion
384 .Decanter type or with stopper (10)
385 ..Substantially circular or oval body portion
386 ..Three or more repeats around body axis
387 .Quantitative measurement indicator
388 .Pedestal type
389 .Substantially diminishing size from base to top
390 .Substantially circular body portion
391 ..Specific area for product identification or label
392 ..Circular or oval surface detail
393 ..Coil or helical effect surface detail
394 ..Diamond, square, or triangular surface detail
395 ..Asymmetrical surface detail
396 ..Repeating adjacent ribs or grooves
397 ...Vertically and laterally oriented
398 ...Vertically oriented
399 ..Cylindrical
400 .Three or more repeats around body axis
401 ..Four repeats or square in plan
402 ..Three repeats or triangular in plan
403 .Bilateral symmetry
404 ..Body portion provided with grip retention overhang
405 ..Stepped down body portion
406 ..Circular or oval surface detail
407 ..Diamond, square, or triangular surface detail
408 ..Raised or depressed area for product identification or label
409 ..Asymmetrical surface detail
410 ..Repeating adjacent ribs or grooves
411 ...Laterally oriented
412 ..Arched surface detail
413 ..Planar wall
414 BOX OR PACKAGING CONTAINER
415 .With display or hanger panel (11)
416 .Pull tab or tear strip opening
417 .Specific flow director or spout
418 .External display aperture, window, or magnifier
419 .Ribbon, strip, or filament (12)
420 .Swinging closure (13)
421 ..Plural (14)
422 ..Rotating into enclosure
423 ..Planar top parallel to base
424 .Molded or stamped type, i.e., cast, vacuum formed, etc.
425 ..Flanged
426 ...Joined similar halves
427 ...Perforated bottom
428 ...Circular or oval
429 ....Plural ribs or grooves
430 .Polygonal in plan
431 ..Upwardly diverging or converging walls
432 ..Rectangular or square
433 .Folded or sheet material (15)
434 ELEMENT OR ATTACHMENT
435 .Closure, cover, or pouring attachment
436 ..Combined with diverse article or having additional use (16)
437 ...Cutter or punch
438 ..With tear strip or pop top (17)
439 ..Male type, i.e., stopper
440 ...With pouring or dispensing feature (18)
441 ...Simulative
442 ..Collapsible tube type
443 ..With distinct grip, handle, or clamping feature
444 ..Sheath type
445 ...Protector for closure, e.g., overcap type
446 ..Tethered type
447 ..With pouring or dispensing feature
448 ...Aerosol or pump type (19)
449 ...With moveable or separable closure element
450 ....Rotated to use position
451 ..Simulative (20)
452 ..Repeating or uniform pattern around body axis
453 ...Vertical straight ribs or grooves
454 ..Substantially circular (21)
455 .Stand or holder (22)
456 .Packing tray, separator, or insert
457 .Display or backing card (23)
499 MISCELLANEOUS

SEARCH NOTES FOR CLASS D9

(1) This class includes product containers whose acquisition is incidental to the purchase of the contents. Boxes, bottles, jars, etc., in this class, are of a disposable or destructible nature. However, returnable bottles, canning jars, or similar containers are included.
Containers purchased exclusively for storing or carrying purposes such as jewelry boxes, china, canister sets, etc., are excluded.
Secondary uses of the container are not specifically entertained for purposes of exclusion, e.g., bottle used as a bank, etc.
CLASSIFIED BY FULL-LINE DISCLOSURE.
Products which are contained in claimed packages not considered.

(2) For thread, tape, or ribbon containers, see subclass 419.

(3) Excludes articles which are protective only such as shroud, cover, etc.; see subclass 444.

(4) Nonskeletal head excluded; see subclasses 311+.

(5) For closure combined with applicator, see subclass 436.
For fountain brush, see D4-114.

(6) For reuseable tray, case, etc., see D3-67+.
For container holding plural articles loosely, i.e., tray or bin type, see subclasses 414+.
For package having plural closure, see subclass 421.
For egg type packing tray, see subclass 456.

(7) Includes top member for bottle or can 6-pack.

(8) Threaded opening or closure not

considered.
Must have constant profile. Vertical or diagonal surface ribs, grooves, etc., eliminate design from this subclass; see subclass 367.

(9) This subclass includes neck portion when balance is shown in broken lines.

(10) Must disclose stopper or be claimed as decanter.

(11) For card per se, see subclass 457.

(12) For adhesive or gummed tape dispenser, see D19-67+.

(13) Blank excluded; see subclass 433.

(14) For package having distinct provision for plural article, see subclass 341.

(15) Includes blank.

(16) Includes combination with measuring device.
For fountain brush, see D4-114.

(17) Includes tab per se.
For can end disclosing provision for pouring only, see subclass 447.

(18) For combination with measuring feature, see subclass 436.

(19) See subclass 300.

(20) Exclusive of pointer or arrow.

(21) For circular closure having repeat or uniform pattern around axis, see subclass 452.

(22) For combination of holder and container, see subclass 369.

(23) For advertising card, see D20-40.

CLASS D10 MEASURING, TESTING OR SIGNALLING INSTRUMENTS (1) (2)

Excluded from this class are:
Abacus; see D18-6+.
Clock combined with radio or television; see D14-131 and 170+.
Clock combined with sign or display equipment; see D20-20.
Control unit for recording, reproduction or communications equipment; see D14.
Drawing, drafting or writing implement; see D19-35+.
Flashlight or lantern; see D26.
Grounding bar; see D13-133.
Household measuring implement; see D7-50.
Laboratory measuring device; see D24-8+.
Lettering stencil; see D18-24+.
Medical measuring instrument, e.g., audiometer, blood pressure measuring instrument, etc.; see D24-17+.
Megaphone; see D14-204.
Musical chime, bell, horn, etc.; see D17-22.
Photographic light meter; see D16-238. Photographic rangefinder; see D16-220.
Photometer, light meter or photographic exposure meter; see D16-238.
Potentiometer for controlling electromotive force; see D13-21.
Pressure regulating valve or pressure valve combined with gauge; D23-235.
Pyrotechnic flare; see D22-112.
Reminder or program indicator; see D20-18.
Road or highway signs; see D20-17.
Signalling lamp for vehicle; see D26-29+.
Slide rule; see D18-9+.
Vehicle instrument panel; see D12-192.
Watchband bracelet, strap per se; see D11-3+.
Watch or clock combined with lighter; see D27-145.
Winding key for clock; see D8-347+.

1 CLOCK OR CLOCK CASE (3) (4)
2 .Combined (5)
3 ..With calendar
4 ..With weather instrument
5 ..With lamp or with provision therefor
6 .Simulative
7 ..Animate
8 ...Humanoid
9 ..Plant life
10 ..Map or globe
11 ..Building
12 ..Vehicle
13 ..Ship's wheel
14 .Plural face
15 .Changeable exhibitor, e.g., digital type
16 .Floor type, e.g., grandfather clock, etc.
17 .Case front having openwork filigree or surrounding radiating elements
18 .With closure panel
19 .With handle or bail
20 .Laterally asymmetrical in front elevation
21 .Case having geometric configuration in front elevation
22 ..Substantially circular or oval
23 ...With feet, distinct base or stand
24 ..Substantially rectangular or square
25 ...All sides flat and plain
26 ...With feet, distinct base or stand
27 ..Having flat and parallel sides
28 ...With curved top
29 ...With peaked or faceted top
30 WATCH, WRISTWATCH OR CASE (6)
31 .Combined
32 ..With wristband or strap
33 .Simulative
34 ..Animate
35 ...Humanoid
36 ..Plant life
37 .Pocket type
38 .Wrist type
39 ..With dial and/or hand
40 TIME-MEASURING INSTRUMENT OR CASING (7)
41 .Recording, e.g., time clock, etc.
42 .Parking meter
43 .Metronome
44 .Sandglass
45 .Sundial
46 MEASURING, REGULATING OR INDICATING INSTRUMENT, OR CASING (8) (9) (27)
46.1 .Scorer or indicator for game or sport
46.2 .Food preparation type (e.g., measuring cup, spoon, etc.)
46.3 ..Plural compartment or cell
47 .Radiation, e.g., Geiger counter
48 .Egg testing, e.g., candling instrument
49 .Regulator or control
50 ..Temperature regulator or thermostat
51 ...Combined with thermometer (10)
52 .Temperature, humidity, atmospheric condition (11)
53 ..Plural or combined
54 ..Simulative
55 ..Barometer
56 ..Moisture
57 ..Thermometer
58 ...Expanding fluid type
59 ...Weather vane
60 ..Element or attachment (12)
61 .Geometric (13)
62 ..Combined
63 ...Drafting machine
64 ..Template or comparator gauge (14)
65 ..Angle or direction (15)
66 ...Transit or theodolite
67 ...Aircraft instrument
68 ...Compass (16)
69 ...Spirit level
70 ..Linear or distance (17)
71 ...Rule, tape or scale (18)
72 ....With casing, i.e., retractable type
73 ...Micrometer, caliper or divider type
74 ..Element or attachment (12)
75 .Electrical property
76 ..Oscilloscope or oscillograph
77 ..Battery, vacuum tube, transistor or spark plug tester (19)
78 ..Provided with handle, or hand-held
79 ...Clamp-around type
80 ..Element or attachment (12)
81 .Chemical
82 .Balancer
83 .Weight, force or density
84 ..Specific gravity (20)
85 ..Pressure gauge
86 ...Tire inflation type
87 ..Scale
88 ...Combined
89 ...Vertical spring type
90 ...Beam or balance type
91 ...Provided with load platform
92 ....Standing user type
93 .....Readout at eye or waist level
94 ..Element or attachment (12)
95 ...Beam or balance
96 .Volume, flow or rate
97 ..Counter
98 ...Speedometer or tachometer

CLASS D10 MEASURING, TESTING OR SIGNALLING INSTRUMENTS (1) (2)

	MEASURING, REGULATING OR INDICATING INSTRUMENT, OR CASING (8) (9) (27)
	.Volume, flow or rate
99	..Public utility meter, i.e., gas, water, etc.
100	...Electric
101	..Liquid quantity level
102	.Dial gauge or meter
103	.Element or attachment (12)
104	SECURITY OR SIGNAL INSTRUMENT, OR CASING (21)
105	.Lightning conductor or arrestor
106	.Alarm or control therefor (22)
107	.Buoy
108	.Elevator signal or call unit
109	.Visual (23)
110	..Fender guide for vehicle
111	..Lamp or Reflector (28)
112	...Ignition timing light
113	...Road surface marker
114	...Flashing, warning or directing type
115	....Multiple sequential lamps, e.g., "traffic light"
116	.Aural (24)
117	..Curb feeler for vehicle
118	..Annunciator or door chime
119	..Air-operated (25)
120	...Siren or horn
121	.Element or attachment (12)
122	DIAL, INDICATOR HAND, OR OTHER ELEMENT OR ATTACHMENT
123	.Dial or face plate
124	..Combined (29)
125	..Substantially rectangular or square
126	..Substantially circular or oval
127	.Indicator hand
128	.Watch or clock element, or attachment (26)
129	..Movement or movement frame
130	...Pendulum
131	..Bow, pendant, crown or stem
132	..Crystal, cover or protector

SEARCH NOTES FOR CLASS D10

(1) Includes, in indented subclasses, elements or attachments which are used only with particular instruments and which cannot be placed in another class. When elements are common to several instruments in different subclasses, they are in subclasses 122+.

(2) All patents are classified by full-line disclosure.

(3) Includes front panel.

(4) Excludes timer, sandglass and sundial. See, respectively, subclasses 40, 44 and 45.

(5) Excludes "time clock". See subclass 41.

(6) Includes stopwatch.

(7) Includes timer.

(8) Includes depth-measuring instrument, e.g., sonar.

(9) Includes chart recorder.

(10) Excludes thermometer per se. See subclasses 57 and 58.

(11) Excludes rain gauge. See subclass 101.

(12) Excludes dial or indicator hand. See, respectively, subclasses 122+ and 127.

Includes Pitot tube.

(13) Includes plumb bob.

(14) Excludes eraser shield and lettering stencil. See Class D19, subclasses 37 and 40, respectively.

(15) Includes T-square.

(16) Includes element.

(17) Includes altimeter and odometer.

(18) Includes surveying rod or target.

(19) Excludes hydrometer. See subclass 84.

(20) Includes element.

(21) For radar, see subclass 46.

(22) Excludes bell, siren, etc. See subclasses 116+.

(23) Excludes pyrotechnic flare. See D22-112.

(24) Includes bell.

(25) Includes whistle.

(26) Includes holder or stand.

(27) Includes radar.

(28) Subject matter in this and indented subclasses is distinguished frm the subject matter in Class D26 in being exclusively for signalling purposes.

For illumination lamps, or those combining both illumination and signalling functions, see Class D26.

For lantern or flashlight, see D26.

(29) Includes combination with hands.

CLASS D11 JEWELRY, SYMBOLIC INSIGNIA AND ORNAMENTS

Excluded from this class are:
Candle holder; see D26-9+.
Chain, general purpose; see D8-499.
China, glassware, serving dish, etc.; see D7.
Christmas card holder, rack, etc.; see D6-449+.
Lamp; see D26-2+.
Light reflector; see D26-128+.
Light string; see D26-25.
Clasp, clamp or clip, general purpose; see D8-382+.
Crucifix or cross; see D99-27.
Decal or transfer; see D20-11.
Edging or curbing for flower bed, etc; see D25-38+ and 73+.
Electric Christmas candle; see D26-96.
Espalier or trellis; see D25-71.
Frame for wall decoration; D6-300+.
Grave monument; see D99-17+.
Incense burner; see D23-78.
Key ring, fob, etc.; see D3-61+.
Name tag or identification badge; see D19-13+.
Religious appliance, i.e., article employed in the celebration of religious ceremony such as baptismal font, tabernacle, monstrance, etc.; see D99-25+.
Rosary; see D99-26.
Shoulder patch, insignia, etc.; see D5-63+.
Stage set; see D25-58.
Support for flower pot or combination thereof; see D6-403+.
Toilet articles; see D28.
Tree brace or snake-type support; see D8-1.
Urn for ashes; see D99-5.
Wall mounted flower support; see D6-556+

200 FASTENER, BUCKLE OR RESTRAINT FOR APPAREL OR PERSONAL BELONGINGS NOT ELSEWHERE SPECIFIED (25)
201 .Combined with diverse article
202 .Necktie or scarf restraint (26)
203 ..With monogram or provision therefor
204 ..Simulative
205 ...Animate
206 .Safety pin or clasp (i.e., with detent for securing resilient end)
207 .Hatpin type (27)
208 .Hook and eye type
209 ..Wire
210 ..Formed substantially from sheet material having uniform thickness
211 ..Simulative
212 .Slot and sliding stud type (e.g., garter belt fastener, etc.) (28)
213 .Opposed mirror image restraint (e.g., collar pin, opposed mirror image cuff button, etc.)
214 ..Resilient engagement
215 .Resilient or spring clamp
216 .Pivoted or pushbutton release
217 ..Simulative
218 .Slip clutch or slide type buckle (29)
219 ..Simulative
220 .Snap engagement
221 .Zipper type
222 .Button or head type (e.g., cuff link, tie tack, etc.)
223 ..Simulative (30)
224 ...Animate
225 ...Plant life
226 ..Opposed cooperating components (i.e., fastened material is sandwiched by opposed fastener components; e.g., cuff link, etc.) (31)
227 ..Three or more repeats, or uniform configuration about axis (32)
228 ..Element or attachment
229 .With monogram or provision therefor
230 ..Prong engagement
231 .Penetrating prong (e.g., belt buckle type, etc.)
232 ..Simulative
233 ...Animate (33)
234 ..Provision for moveable prong
235 ...Plural
236 ...Frame perimeter having top to bottom and side to side symmetry
237 ...Frame perimeter having bilateral symmetry
238 .Simulative (34)
239 ..Animate
240 ...Humanoid
241 ..Plant life
1 JEWELRY (1)
2 .Combined
3 .Encircling, i.e., necklace, bracelet, etc. (2)
4 ..Bangle or armlet type
5 ...Overlapping ends
6 ..Major design element disposed on continuous strand
7 ...Pendant having singular suspension point (3)
8 ....Plural pendant
9 ...Asymmetrical along longitudinal axis
10 ....And laterally
11 ..Strung
12 ..Interlocked (4)
13 ...Wire type, i.e., chain (5)
14 ...Simulative
15 ...Arcuate surface pattern in plan (6)
16 ....With gem or stone
17 ....Circular or oval
18 ....Sinuous
19 ..Longitudinally expanding type (7)
20 ...Continuous filament or coil
21 ...Arcuate pattern in plan
22 ....Circular or oval
23 ....Sinuous
24 ...Triangular pattern in plan
25 ...Quadrilateral pattern in plan
26 ..Finger ring or mounting (8)
27 ...Open or having disconnected ends
28 ...Having axial shift
29 ...Axially asymmetrical
30 ....Simulative
31 .....Animate
32 ......Humanoid
33 .....Plant life
34 ...Plural gem mount
35 ...Solitaire (9)
36 ....Crown type, i.e., pronged
37 ...Circumferential pattern
38 ....Repeating
39 ....Rib or groove
40 .Brooch or earring (10)
41 ..Separable elements
42 ..Resilient, i.e., earring per se forms clamp
43 ..Pendant type
44 ...Simulative
45 ...Asymmetrical
46 ...Monogram holder (11)
47 ..Stickpin (35)
48 ..Simulative
49 ...Animate
50 ....Aquatic
51 ....Canine

JEWELRY (1)
.Brooch or earring (10)
..Simulative
...Animate
52 ....Feline
53 ....Humanoid
54 .....Organ or appendage
55 ......Head
56 ......Heart
57 ....Winged
58 .....Bird
59 ...Crown
60 ...Key
61 ...Letter or numeral
62 ...Map or globe
63 ...Plant life (12)
64 ....Tree
65 ....With container
66 ....With ribbon, tie or bow
67 ....Singular flower, bud or fruit
68 ....Singular leaf
69 ....Asymmetrical
70 ...Star
71 ...Torch or lamp
72 ...Vehicle or component thereof
73 ...Weapon, e.g., sword, arrow, firearm, etc.
74 ...Bow
75 ..Symmetrical
76 ...Circumferentially or radially arranged identical elements
77 ..Knotted, intertwined or tied (13)
78 ..Sinuous
78.1 .Money clip
79 .Pendant, fob or charm (14)
80 ..Locket
81 ..Simulative
82 ...Animate
83 ....Humanoid
84 ...Plant life
85 ..Laterally asymmetrical
86 .Element or attachment
87 ..Fastener
88 ...Clamp or nut for earring
89 ..Jewel, gem or signet
90 ...Faceted
91 ..Setting
92 ...Crown, i.e., pronged
93 ..Link
94 ...End type, i.e., for watch bracelet
95 SYMBOLIC MEDAL, BADGE OR INSIGNIA (15)
96 .Cross, or having radiating elements
97 .Suspended
98 ..By ribbon
99 .Simulative
100 ..Animate
101 ...Humanoid
102 ....Organ or appendage
103 .....Heart
104 .....Hand
105 ....Combined
106 .....With plant life
107 ...Bird
108 ..Star and/or stripe
109 ...U. S. flag
110 ..Map or globe
111 ..Building
112 ..Vehicle
113 ...Aircraft
114 ..Torch or flame
115 ..Plant life
116 ..Letter or numeral
117 ARTIFICIAL PLANT LIFE AND HOLIDAY SEASON DECORATIONS
118 .Tree
119 .Garland
120 ..Wreath
121 .Seasonal, or religious ornament (16)
122 ..Table shrine or altar
123 ...Creche
124 ..Treetop type
125 ..Simulative (17)
126 ...Stocking
127 ...Animate
128 ....Humanoid
129 .....Saint Nicholas
130 .Element or attachment (18)
130.1 ..Christmas tree stand
131 SCULPTURE, TABLE OR WALL ORNAMENT (19)
131.1 .Incense burner
132 .Plaque, picture or wall hanging (20)
133 ..Simulative
134 ...Animate
135 ....Combined, i.e., animal and human, etc.
136 ....Humanoid
137 ....Winged
138 ...Vehicle
139 ...Plant life
140 ..Symmetrical
141 .Mobile
142 .Folded paper or cardboard
143 .Flower or plant holder (21)
144 ..Combined with diverse article
145 ..Terrarium (22)
146 ..Stem receiver or having elongated neck
147 ...Plural, e.g., frog, etc.
148 ..With bail, handle or suspension means
149 ..Simulative
150 ...Humanoid
151 ...Plant life
152 ..Substantially circular or oval in plan
153 ...Vertically curvilinear wall
154 ....Concave or sinuous
155 ..Substantially rectangular or square in plan
156 ...And horizontally elongated in front elevation, e.g., window box, etc.
157 .Simulative
158 ..Animate
159 ...Equestrian
160 ...Humanoid
161 ....Plural
162 ...Winged
163 ..Vehicle
164 .Element or attachment
165 FLAG OR PENNANT
166 .Combined with support
167 .Combined national, state or municipal colors
168 .Characterized by peripheral shape or ornamentation, e.g., burgee, etc.
169 ..Fringed
170 ..Peripheral pattern or band
171 .Identical segments or quadrants
172 .Simulative
173 ..Animate
174 ...Humanoid
175 ..Cross
176 ..Map or globe
177 ..Wreath
178 ..Star
179 ...Plural
180 ....And stripes
181 .Element or attachment (23)
182 ..Flagpole holder
183 ...Plural
184 MISCELLANEOUS (24)

SEARCH NOTES FOR CLASS D11

(1) Include vinaigrette, or apparel-attached holder for flower, fragrance, etc.

(2) Includes watch strap.
For strap in combination with watch, see D10-32.

(3) For charm or pendant per se, see subclasses 79+.

(4) For individual link, fastener, etc., see subclasses 86+.

(5) For watch fob or chain, see subclasses 79+.

(6) Classified by major design elements; small connector elements are disregarded.

(7) For individual link, see subclasses 86+.

(8) For setting, see subclasses 91+.

(9) For stone or gem, see subclasses 89+.

(10) For badge or medal, see subclasses 95+.

(11) For brooch containing claimed letter or numeral, see subclass 61.

(12) Patents are placed in this subclass and indented subclasses only if they disclose realistic representations of, and are positively identifiable as, plant life forms.
For boutonniere, corsage, etc., see subclasses 117+.

(13) Patent is placed in this subclass only if an element is shown to be passing entirely under, or weaving through, itself or another element.

(14) For crucifix, see D99-27.
For medal, see subclasses 95+.

(15) Includes automobile badge, insignia, etc; includes coin or token; includes military or fraternal order insignia.
For emblem per se, see subclass 99.

(16) For light string, light reflector or candle holder, see D26, subclasses 25, 128+, and 9+, respectively.
For religious appliance, see D99-25.
Includes tinsel.

(17) For statue, see subclasses 143+.

(18) Includes skirt for Christmas tree base.

(19) For vase or flower holder, see subclasses 143+; includes party favor; includes trophy.

(20) For picture frame, see D6-300+.

(21) For wall-mounted plant support, see D6-553+; includes vase; includes combination with drain saucer.

(22) For aquarium, see D30-6+.

(23) Includes flagpole or banner rod.

(24) Includes inedible cake or pastry decoration;
Includes emblem;
Includes package ornament or bow.

(25) Subject matter in this subclass is distinguished from subject matter in D2-624+ in being fasteners for apparel whereas the latter includes only articles which attach apparel to the body. For example, belts, suspenders and garters are classified in D2.
Classified by full line diclosure

(26) Includes hankerchief ring.
For tie pin, see subclass 222.

(27) For pin which is intended for adornment only, and not for fastening, i.e., stickpin, see subclass 47.

(28) For stud per se, see subclass 222

(29) For buckle with prong engagement, see subclass 231.

(30) Includes letter or numeral.

(31) For sets having mirror image symmetry, see subclass 213.

(32) Exclusive of mounting hole.

(33) Includes humanoid.

(34) Includes letter numeral.

(35) For fastening pin, e.g., hatpin type, see subclass 207.

Excluded from this class are:
Boat hardware, e.g., cleat, chock, etc.; see, respectively, D8-382 and D8-356.
Buoy; see D10-107.
Engines; see D15-1+.
Flight trainer or simulator; see D19-63.
Handgrip for handlebar; see D8-303.
Ignition component; see D13-126+.
Lift or ramp for vehicle; see D34-28+.
Material handling article; see D34.
Parts, components, or accessories of vehicles which are provided for elsewhere, e.g., automobile headlights; see D26-28+.
For electric motors for vehicles; see D13-112+.
Portable or seat-mounted storage compartment for records, tapes, etc.; see D3-35.
Pulley or pulley block; see D8-360.
Registration plate; see D20-13.
Ski, or non-motorized water sports accessory such as surfboard, aquaplane, etc.; see D21-224+ and 236+.
Toy or scale models of vehicles; see D21.
Tractor, bulldozer, or earthworking machinery; see D15-10+.
Traffic light viewing prism; see D16-137.
Trash compactor container; see D34-3
Vehicle horn; see D10-120.
Vehicle seats; see D6-356.

1 SPECIAL PURPOSE VEHICLE
2 .Combined, e.g., land-sea-air-type vehicle
3 ..Amphibious
4 ..Land and air
5 .Air cushion
6 .Sleigh or sled
7 ..Self-propelled
8 ..Standing occupant only
9 ..With occupant support elevated from runner
10 ...Straddle or flat riding surface type
11 ...Toboggan or skimming type
12 .Armored
13 .Firefighting
14 .Service vehicle (2)
15 ..Dumping or trash handling
16 .Golf car (3)
16.1 .Drone, guided missile, or rocket
17 VEHICLE DRAWN BY ANIMAL (4)
18 .Body with cover
19 .Cart or sulky
20 .Element or attachment
36 RAIL VEHICLE (INCLUDES TRAIN)
37 .Monorail
38 .Locomotive (includes combination with tender)
39 .Car
40 ..Passenger (includes self-propelled)
41 ..Freight
42 .Element or attachment
43 ..Body element
44 ...Baggage support
45 ..Undercarriage
46 ...Truck
47 ...Bolster or bearing
48 ...Draft, coupler, or uncoupler element
49 ..Railway (includes tie)
50 ...Track
51 ...Tie plate or clamp
52 TELPHER CARRIER OR CHAIR LIFT
300 WATERCRAFT OR HULL (8)
301 .Simulative
302 .Canoe or kayak
303 .Sailboat (36)
304 ..Plural hulls or outrigger, e.g., catamaran
305 .Air propeller driven
306 .Paddle wheel or crank driven
307 .Straddle or motorized surfboard type
308 .Submersible
309 .Hydrofoil
310 .Opposed hull skids forming longitudinal channel
311 ..Laterally stepped
312 ..Channel divided by keel or keel rib
313 .Laterally stepped bottom
314 .Longitudinal planing steps or strakes on bottom
315 .With cabin (37)
316 .Raft, float, or platform
317 .Element or attachment
318 ..Deck or cabin unit
319 AIRCRAFT, SPACECRAFT, OR FUSELAGE (38)
320 .Space satellite or habitat (39)
321 .Flexible or uniform-thickness material forming lift surface, e.g., parachute, paraglider, kite type, etc.
322 .Body supported
323 .Lighter-than-air, i.e., lift provided by hot air or gas
324 .Amphibious
325 .Disc or saucer shaped
326 .Vertical takeoff type
327 ..Rotary wing, i.e., lift during horizontal flight maintained by moving airfoil
328 ...Plural horizontal rotors
329 ....Tandem
330 ..Ducted or shrouded fan
331 .Canard configuration or with plural distinct wings
332 ..Horizontal stabilizer ahead of wing
333 .Horizontal stabilizer conforms to and continues wing or fuselage configuration, e.g., lifting body type
334 ..Plural
335 .Plural fuselages or tail booms
336 .Plural distinct crew or armament nacelles
337 .T-tail empenhage, i.e., stabilizer mounted at top of rudder or vertical fin
338 .Plural distinct rudders (40)
339 .Pusher propeller
340 .Pylon-mounted engine
341 .Wing-mounted engine
342 .Plural distinct engine air intakes on fuselage flanks or wing roots
343 .Jet propelled
344 .Propeller driven
345 .Element or attachment
82 MOTORCAR, BUS OR TRUCK (9)
83 .Simulative
84 .Bus
85 .Three-wheeled
86 .Motorcar or body
87 ..Dune buggy type
88 ..Two or more fully exposed wheels or detached fenders, e.g., racing-type vehicle
89 ..Stepped top
90 ..Contiguous hood and roof
91 ..Distinct hood or cowl
92 ...With distinct trunk or notched back
93 .Motor truck or body (10)
94 ..Vehicle carrier

MOTORCAR, BUS OR TRUCK (9)
.Motor truck or body (10)
95 ..Tank-type carrier, e.g., oil, gasoline truck, etc.
96 ..Distinct operator or cargo compartment
97 ...Articulated
98 ...Cargo compartment open at top
99 ..Integral cab and cargo compartment
100 ...Camping, e.g., motor home, etc. (11)
101 TRAILER OR TRAILER BODY (12)
102 .Fully enclosed
103 ..House or camping type (13)
104 ...With expansible portion
105 .Partially enclosed
106 .Element or attachment (14)
107 CYCLE OR MOTORCYCLE (15)
108 .Simulative
109 .Tandem
110 .Motorcycle or frame
111 .Bicycle or frame
112 .Tricycle or frame
113 ..With distinct step plate or depression
114 .Element or attachment (16)
115 ..Cycle holder or rack (17)
116 ..Sidecar
117 ..Frame part
118 ...Fork or stem (18)
119 ...Saddle post or support (19)
120 ...Stand (20)
121 ...Step plate for tricycle
122 ..Running gear (21)
123 ...Crank or sprocket
124 ...Derailleur or gear unit (22)
125 ...Pedal or toe clip
126 ..Enclosure or guard (23)
127 ...For chain, sprocket or derailleur, etc.
128 PERAMBULATOR, INVALID CHAIR, OR STRETCHER
129 .Stroller type
130 .Walker
131 .Wheelchair
132 .Wheeled stretcher
133 .Element or attachment
134 TIRE
135 .Combined with wheel or wheel trim
136 .With tread pattern (24)
137 ..Characterized by symbol, simulation, letter or numeral (25)
138 ..Distinct triangular element (26)
139 ..Distinct circular or oval element
140 ..Distinct square or rectangular element
141 ..Uninterrupted circumferential discrete groove and rib (34)
142 ...Zigzag type
143 ....Opposite walls of groove laterally out of alignment or dissimilar
144 ....Sinuous curve type
145 ....Undirectional and having parallel sides
146 ..Circumferential, diagonal and lateral straight groove or rib sides
147 ..Circumferential and diagonal straight groove or rib sides
148 ..Circumferential and lateral straight groove or rib sides
149 ..Diagonal and lateral straight groove or rib sides
150 ..Lateral straight groove or rib sides
151 ..Diagonal straight groove or rib sides
152 .With sidewall or shoulder feature
153 .Element or attachment
154 ..Anti-skid
155 OTHER PARTS, EQUIPMENT AND ACCESSORIES FOR VEHICLES NOT ELSEWHERE SPECIFIED (35)
156 .Top, auxiliary compartment, carrier, or load cover (27)
157 ..Article carrier
158 ...Cycle type
159 .Chassis element (28)
160 ..Axle element
161 ..Bearing or fifth wheel
162 ..Draw element, e.g., trailer hitch
163 .Radiator, grille, or bumper (29)
164 ..Combined with hood or fender
165 ..Vertically elongated axis
166 ...Radiator or casing therefor
167 ..Bumper or guard
168 ...Boat fender
169 ...Vehicle-attached front or rear type
170 ....Combined with grille
171 ....Grille or radiator guard
172 ....Element or attachment
173 .Hood for motor vehicle
174 .Control element
175 ..Steering wheel
176 ...Circular
177 ...Element or attachment
178 ..Handlebar
179 ..Brake or gear shift lever or unit
180 ..Brake element
181 .Deflector or fender
182 ..Windshield
183 ..Window or curtain
184 ..Mudguard
185 ...Splash shield or flap
186 ...Cycle type
187 .Rear view mirror (30)
188 ..Combined with disparate article
189 ..Circular head
190 .Exterior or interior trim
191 ..Visor or attachment therefor
192 ..Instrument panel or element thereof
193 ..License plate holder, frame, or support
194 ..Tail pipe extension or muffler
195 ..Vehicle interior or interior panel
196 ..Exterior panel or door
197 ..Radiator cap, gas cap and/or hood ornament
198 ...With temperature or water indicator
199 ...Simulative
200 ....Humanoid
201 ...Opposed radial arms
202 .Tire cover or support
203 .Mat, step, or step plate (31)
204 .Wheel or wheel cover (includes hub or rim)
205 ..Wire-type spoke
206 ..With air diverter, e.g., vane or scoop, etc.
207 ..Hub
208 ..Rim
209 ..Aperture or simulated aperture (32)
210 ...Characterized by circular motif
211 ...Aperture has two straight sides
212 ..Concentric circles
213 ..Element or attachment
214 .Propeller
215 .Oar, paddle or anchor (33)
216 .Grille or radiator cover
217 .Wheel chock or stop

SEARCH NOTES FOR CLASS D12

(1) Includes parts, components, and accessories which exist only in connection with a vehicle and cannot be placed in another class; these parts, components, etc., are to be placed as an indented subclass or in the subclass of the vehicle on which they are used, or

in subclasses 155+ if they are common to several vehicles in different subclasses.

(2) Includes aircraft maintenance vehicle, tow truck, mobile service station, etc.

(3) For golf bag cart, see D34-15.

(4) Sleigh excluded; see subclasses 6+.

(5) For powered passenger carrying golf car, see subclass 16.

(6) For tilting carts, see subclasses 32+.

(7) Includes ramp for elevating vehicles, pallets, stairs for boarding aircraft and forklift trucks.

(8) Classified by full line disclosure.

(9) For special purpose type, see this class, subclasses 1+.

(10) Elements included with indented subclasses 94-100 below.

(11) For camping trailer per se, see subclasses 103+.
For pickup truck-mounted camper, see subclass 156.

(12) For truck semitrailer, see subclass 97.
For snow vehicle trailer, see subclasses 6+.

(13) For truck-mounted camper, search subclass 156.
For motor home, see subclass 100.

(14) For trailer hitch, see subclass 162.

(15) Includes only pedal, lever, or engine-driven vehicle.

(16) Includes trim.
Excluded are wheels, tires and combinations thereof; see, respectively, subclasses 204+, 134+, and 135.
For basket or saddle bag, see subclass 158.

(17) For cycle-mounted stand, see subclass 120.

(18) Includes element.
For handlebar, see subclass 178.

(19) For saddle, see Class D6-354.

(20) Includes cycle-mounted kickstand.

(21) Includes training or auxiliary wheel.

(22) For control lever, see subclass 179.

(23) Includes bicycle frame tank.
For fender, see subclass 186.

(24) Tread includes surface contacting only. Shoulder or sidewall surfaces not considered. Classified by major design element(s) in tread. Minor elements such as slits or sipes are disregarded.

(25) Excluding diamond shape.

(26) Includes only isolated form, i.e., form not connected to others in tread pattern.

(27) Includes truck-mounted camper unit.
For motor home, see subclass 100.
For camping, see subclasses 103+.

(28) Includes shock absorber or spring.

(29) Includes radiator casings and assembly combinations.

(30) Includes mirror head or support bracket per se.

(31) Includes running board.

(32) Excluding bolt, valve, or hub per se.

(33) For boat hardware, see D8-356 and 382.

(34) Only tires with tread patterns having both a discrete groove and a discrete rib are included in this subclass and indented subclasses.

(35) Includes vehicle-attached fuel or oil tank.

(36) Includes ice boat type.

(37) For cabin per se, see subclass 318.

(38) Classified by full line disclosure. Includes glider.

(39) Includes craft intended exclusively for use in space. For craft with aerial flight capability, see following subclasses.

(40) Includes V-Tail type.

CLASS D13 EQUIPMENT FOR PRODUCTION, DISTRIBUTION OR TRANSFORMATION OF ENERGY (1)

Excluded from this class are:
Battery tester; see D10-77.
Blasting equipment; see D22-112.
Cable support; see D8-354+.
Control panel for toy vehicle; see D21-142.
Cover plate for receptacle or junction box; see D8-350+.
Electric heating element; see D23-417.
Electric welding apparatus; see D15-144.
Electrically driven apparatus, such as electric watches; see D10-30+.
Apparatus for the measurement of electric current; see D10-75+.
Electrician's tool; see D8.
Escutcheon plate, rose, outlet cover for wall switch or outlet; see D8-350+.
Heating or cooking equipment; see D23 and D7.
Housing for measuring or testing instruments; see D10-46+.
Impedance matching transformer; see D14-230.
Internal combustion engine or steam engine; see D15-1+.
Joystick or control for video game; see D21-48.
Lamp guard or protector; see D26-119.
Light emitting gas discharge matrix display unit; see D18-26.
Lightning arrestor; see D10-105.
Machines and appliances; see D15, D7, D8.
Measuring or testing instrument; see D10.
Motor unit for garage door opener; see D15-199.
Post combined with lamp or light; see D26-68+.
Post or transmission tower; see D25-77+.
Radar; see D10-70.
Remote control unit for audio or video component; see D14-218.
Spreader for ignition wire manifold; see D8-231.
Standoff support for line insulator; see D8-364.
Streetcar or electric railway vehicle; see D12-36+.
Supporting or mounting bracket for conduit; see D8-354+.
Switch knob; see D8-307+.
Telephone connector; see D14-256.
Telephone switching component; see D14-241.
Timer; see D10-40.
Toy control transformer; see D21-141.1.
Video game console; see D21-13.

100 SOLID FUEL (2)
101 ENERGY CONVERSION OR TRANSFORMATION (3)
102 .Solar unit or component thereof
103 .Battery or casing therefor (4)
104 ..Plural cell automotive type
105 ...Simulative (5)
106 ...Pass-through hand or finger grip
107 .Battery charger
108 ..Cordless appliance type
109 ..With provision for mobility (e.g., wheeled, etc.)
110 .Transformer, rectifier or casing therefor (6)
111 ..Electric fence energizer
112 .Generator, motor or casing therefor
113 ..Engine starter type
114 ..Dynamoelectric machine (e.g., generator, etc.)
115 ...Wind or hand powered
116 ...With handle, bar or loop for lifting
117 .Inductor (e.g., coil, etc.)
118 .Element or attachment
119 ..Battery
120 ...Connector (e.g., terminal, clamp, etc.) (7)
121 ...Electrode (i.e., grid or plate type)
122 ..Generator, motor or casing therefor
123 DISTRIBUTION, MODIFICATION OR CONTROL (8)
124 .Voltage regulator
125 .Condenser, resistor or potentiometer (9)
126 .Vehicle ignition component (10)
127 ..Spark or glow plug
128 .Railway component
129 .Insulator (11)
130 ..Three or more repeats, or uniform configuration, about axis (12)
131 ..Symmetrical on two axes (13)
132 ..Bilaterally symmetrical (13)
133 .Connector, conductor or housing therefor (14)
134 ..Lamp socket
135 ...Converter (e.g., incandescent to fluorescent, etc.)
136 ...Provision for plural bulb
137 ..Domestic electric service plug or receptacle (i.e., 120-v or 220-v type)
138 ...Plug
139 ....Combined with receptacle
140 .....Extension type (e.g., cord, cord with reel, etc.)
141 ....Grounded or three prong type
142 ...Combined with circuit breaker or switch
143 ...Grounded or three prong type
144 ..12-volt cigarette lighter type
145 ..Heater or small appliance type
146 ..Three or more contacts (e.g., ports, terminals, etc.)
147 ...Linear array of identical repeating ports or contacts (i.e., in-line array)
148 ..Ring or spade lug
149 ..Compressive engagement (e.g., clamped, crimped, etc.) (15)
150 ...Wire nut type
151 ..Threaded engagement
152 ..Junction or outlet box (16)
153 ..Cable, wire or cladding therefor (17)
154 ..Element or attachment
155 ...Conduit, duct or channel
156 ...Cap, cover or boot
157 ...Cable marker
158 .Switch or casing therefor (18)
159 ..Relay
160 ..Circuit breaker, current suppressor or fuse, or casing therefor (19)
161 ...Fuse (20)
162 ..Control panel, console or module
163 ...Console or floor type
164 ...Linear array of three or more identical control or display elements
165 ..Photocell operated (21)
166 ..Solenoid operated
167 ..Foot operated
168 ..Hand held or remote type
169 ..Toggle, lever or rocker operated
170 ..Slide operated
171 ..Button operated
172 ..Reed type

DISTRIBUTION, MODIFICATION OR CONTROL (8)
.Switch or casing therefor (18)
173 ..Element or attachment
174 ...Actuator (e.g., button, slide, etc.)
175 ....Blade or pivoting contact
176 ...Reed switch
177 ...Face panel or cover (22)
178 ...Circuit breaker, current suppressor or fuse
179 .Heat sink
180 .Electron or vacuum tube (23)
181 ..Cathode ray
182 .Semiconductor, transistor or integrated circuit (24)
183 MAGNET (25)
184 CASING OR ENCLOSURE NOT ELSEWHERE SPECIFIED
199 MISCELLANEOUS (26)

SEARCH NOTES FOR CLASS D13
(1) Classified by both full lines and broken lines in claimed disclosure.
(2) Includes ceramic briquette substitu
(3) Includes maser or laser.
Includes transducer.
(4) Excludes holder such as box, mount, etc.; see subclass 119.
(5) Includes letter or numeral.
(6) Includes "power supply".
For diode or vacuum tube, see subclass 180.
(7) Includes jumper cable set.
(8) For control panel or console, i.e., with specific manual control element such as knob, etc., see subclass 162.
Includes programmable controller.
(9) Includes rheostat.
(10) For coil, see subclass 117.
For wire, see subclass 153.
(11) For insulated wire, or wire cladding, see subclass 153.
(12) Helical attachment provision not considered.
(13) Includes mirror image symmetry.
Helical attachment provision not considered.
(14) Includes grounding bar.
For battery connector, see subclass 120.
(15) For biased engagement, see earlier subclasses.
(16) For control panel or switch panel see, respectively, subclasses 162+ and 158+.
(17) For cable marker, see subclass 157;
For duct or channel, see subclass 155.
(18) For general purpose control panel or module, see subclass 162.
For rheostat, see subclass 125.
(19) If control element such as switch, knob or lever is not disclosed, article is considered to be an element and is therefore classified in subclasses 173+.
For combination with receptacle, see subclass 142.
(20) Includes Bolder or block.
(21) Includes photocell unit, per se.
(22) If control element such as switch, knob, lever, etc., is disclosed, article is considered to be a switch per se and is therefore classified above.
For escutcheon, see D8-350+.
(23) Includes diode.
Includes magnetron.
(24) Includes circuit board.
(25) Includes magnetizer or demagnetizer
(26) Includes electrode not elsewhere specified.

CLASS D14 RECORDING, COMMUNICATION OR INFORMATION RETRIEVAL EQUIPMENT

Excluded from this class are:
Adding machine; see D18-1+.
Bank Transaction terminal; see D99-28.
Calculator; see D18-6+.
Camera lens; see D16-134.
Cart for television; see D34-12+.
Cash register or point-of-sale computer with cash drawer; see D18-4.
Cinematic apparatus; see D16-205+.
Display character unit; see D18-24+.
Electrical connector; see D13-133+.
Electron tube; see D13-180.
Fan; see D23-370+.
Graphic recorder; see D10-61+.
Hearing aid; see D24-35.
Incandescent lamp; see D26-2+.
Knob per se, or combined with escutcheon for radio, television, etc.; see D8-307+.
Laser or maser; see D13-101.
Lightning arrester; see D10-105.
Measuring or testing instrument; see D10-46+.
Meter; see D10-46+.
Photographic or cinematic apparatus; see D16-200+.
Photographic reproduction equipment; see D16-36+.
Printing equipment; see D18-13+.
Sheet or copy sorter; see D18-42.
Soldering iron; see D10-46+.
Sonar; see D10-46+.
Television magnifier lens; see D16-135.
Timer; see D10-40+.
Toy communications equipment; see D21-111+.
Transistor; see D13-182.
Word processing unit; see D18-1.

100 DATA PROCESSOR OR TERMINAL (15)
101 .With handset or acoustic coupler (16)
102 .Console unit (17)
103 ..With work surface overhang or provision for seated operator
104 ...L-shaped or angularly offset top
105 .With reading or marking slot, channel or tray (18)
106 .With distinct vertically oriented display area or panel
107 .Peripheral unit (19)
108 ..Tape drive
109 ..Disc or drum drive
110 ..Data card sorter
111 ..Printer (20)
112 ..Punch
113 ..Display
114 .Element or attachment (25)
115 ..Front or keyboard panel (21)
116 ..Optical scanner
117 ..Record card
118 FACSIMILE EQUIPMENT (I.E., TRANSMITTED BY RADIO, WIRE OR TELEPHONE)
119 TELEGRAPH EQUIPMENT
120 RECORDING MEDIUM OR CARRIER THEREFOR (1)
121 .Cartridge, cassette or magazine
122 .Reel
123 .Transparency mount
124 VIDEO OR AUDIO RECORDING, TRANSMISSION OR PLAYBACK EQUIPMENT (2)
125 .Video
126 ..Receiver or monitor
127 ...Plural screens
128 ...Projection type
129 ...Combined
130 ....With telephone
131 ....With radio or phonograph
132 ...With swinging or sliding closure
133 ...Console type
134 ...With carrying handle
135 ..Tape or disc recorder or player (3)
136 ...Disc
137 .Radio transceiver (e.g., walkie-talkie, radio telephone, etc.)
138 ..Mobile telephone type (i.e., cellular, cordless, etc.)
139 ..Citizens band
140 .Telephone equipment
141 ..Answering machine
142 ..Telephone or base therefor
143 ...Simulative
144 ...Combined with diverse article (e.g., radio, etc.) (4)
145 ...With plural handsets
146 ...Coin or card operated
147 ...Unitary type (i.e., with integrated mouthpiece, earpiece and dialing means)
148 ...Dialing means on handset
149 ...Freestanding (5)
150 ....With provision for dialing or switching (i.e., keyset or dial)
151 .....Handset to side of dial
152 ......Rotary dial
153 .....Rotary dial
154 .Dictating or transcribing
155 .Radio transmitter (6)
156 .Compact disc player
157 .Vehicle radio, tape or disc player
158 .Voice synthesizer or translator
159 .Intercom (7)
160 .Magnetic recorder or player
161 ..Tape
162 ...Combined (e.g., with radio, turntable, etc.)
163 ....Portable
164 ...Cartridge or cassette type
165 ....Portable
166 ...Provision for juxtaposed reels
167 .Recorder
168 .Combined (8)
169 ..Radio or amplifier and phonograph
170 ..Radio and clock
171 ...Digital type
172 ..Speaker and diverse article
173 .Coin operated type phonograph or radio, (e.g., jukebox, etc.)
174 ..Remote selector unit
175 .Console type radio or phonograph
176 ..Simulative
177 ...Animate
178 ...Musical instrument or symbol (e.g., lyre, piano, etc.)
179 ..Wickerwork
180 ..Three or more repeats, or uniform configuration, about axis
181 ..Triangular in plan
182 ..Five or more sides
183 ..Curved front or side in plan
184 ..Bilaterally symmetrical (9)
185 .Public address system
186 ..Hand held
187 ...Megaphone or bullhorn type
188 .Radio receiver, tuner or amplifier, or housing therefor
189 ..Simulative
190 ...Humanoid
191 ..Paging device (e.g., beeper, etc.)
192 ..Body or clothing attached
193 ..With closure or swinging panel
194 ..Front mounted speaker or provision therefor
195 ...Circular
196 ...With handle or provision therefor
197 ..With visible control
198 ...Dial or readout panel

VIDEO OR AUDIO RECORDING, TRANSMISSION OR PLAYBACK EQUIPMENT (2)
199 .Phonograph or housing therefor
200 ..Simulative
201 ..With carrying handle or provision therefor
202 ..With swinging or removeable cover
203 ..Exposed turntable
204 .Speaker or housing therefor (10)
205 ..Headphone or headset
206 ...With microphone
207 ..Simulative
208 ..Radio or phonograph horn
209 ..Ceiling mount
210 ..With surround, grille or enclosure
211 ...And distinct pedestal or legs
212 ...Three or more repeats, or uniform configuration, about axis
213 ...Sound projection on vertical axis
214 ...Rectangular or square projection surface or outlet
215 ...Circular or oval outlet or grille
216 ..Circular or oval
217 .Element or attachment (11)
218 ..Remote control
219 ..Grille
220 ...Simulative
221 ..Speaker (12)
222 ...Transducer or diaphragm (e.g., driver, magnet, etc.)
223 ...Headphone
224 ...Support (e.g., mounting panel, basket, frame, etc.)
225 ..Microphone
226 ...Combined with diverse article
227 ...Freestanding or with pedestal
228 ...Circular or oval in cross-section
229 ...Holder or support
230 ..Antenna or component thereof
231 ...Bowl or dish type for satellite signal reception
232 ...Simulative
233 ...Three or more repeats, or uniform configuration, about axis
234 ...Formed of wire or uniform-section tubular material
235 ....Dipole type
236 ....Symmetrical on two axes
237 ...Rotator
238 ...Support (e.g., base, mount, etc.)
239 ..Video (13)
240 ..Telephone equipment
241 ...Switchboard or multiple line control (14)
242 ...Acoustic coupler or modem (22)
243 ...Telephone amplifier
244 ...Dial or dialing accessory
245 ....Automatic dialer
246 ....Dial
247 .....Keypad
248 ...Handset (23)
249 ....Mouthpiece or earpiece (24)
250 ...Cover for base or handset
251 ...Support or holder
252 ....Combined with diverse article (e.g., index, writing implement holder, etc.)
253 ....For handset
254 ....For writing materials
255 ...Light
256 ...Connector
257 ..Front panel or dial
258 ...Vehicle audio type
259 ..Dictating or transcribing
260 ..Magnetic recorder or player
261 ..Phonograph
262 ...Pickup arm
263 ...Cartridge or transducer
264 ...Stylus
265 ..Radio, tuner or amplifier
299 MISCELLANEOUS

SEARCH NOTES FOR CLASS D14

(1) For dedicated memory unit without universal application, e.g., memory module, etc., see subclass 114.
Excludes jacketed magnetic disc (i.e., floppy disc, etc.); see subclass 114.
(2) For film recording or viewing equipment, see Class D16.
(3) If recorder is integrated with video camera, see D16-202.
(4) For combination with television, see subclass 130.
(5) For instrument which is exclusivel wall mounted, see subclasses 142-146.
(6) For receiver, see subclasses 168+ or 188+.
(7) For combination with telephone or handset, see subclasses 142+.
(8) Excludes combination of radio, amplifier or phonograph with speaker per se; see subclasses 188+ or 199+.
(9) Exclusive of knob or crank.
(10) Includes megaphone;
For grille per se, see subclass 219.
(11) Includes, in this subclass, equalizer and sound channel mixer.
(12) Includes control, crossover network unit, etc.
(13) For cable television decorder/tuner or signal switcher, see subclass 125.
Includes prompting device.
(14) If switchboard is combined with a handset, it is considered to be a telephone and is therefor classified in subclasses 142-153.
(15) Includes casing for computer.
Includes control or keyboard unit housing.
For keyboard or front panel per se, see subclass 115.
(16) For coupler per se, see subclass 57.
For modem per se, see subclass 242.
(17) For memory storage unit per se, see subclasses 107+.
(18) For reader or marking unit per se, see subclasses 107+.
(19) For terminal, control, or keyboard unit, see subclasses 100+.
(20) For terminal, see subclasses 100+.
(21) If casing for keyboard or control unit is disclosed, patent is classified as a terminal in subclasses 100+.
(22) For modem combined with computer terminal, see subclass 101.
(23) If handset discloses dialing means, it is considered to be a telephone and is therefore classified in subclasses 147 or 148.
(24) For amplifying earpiece, see subclass 243.
(25) For memory storage device having

universal application, e.g., cassette, tape reel, etc., see subclasses 120+.

CLASS D15 MACHINES, NOT ELSEWHERE SPECIFIED

Excluded from this class are:
Abrading tools; see D8-61 and 90+.
Cutting tool; see D8-68 and 98+.
Flatiron; see D32-68+.
Food mixer, grinder, blender, etc.; see D7-368+.
General purpose sprayer; see D23-223+.
Hand held agricultural-type spreader; see D8-2.
Insulated portable food carrier; see D7-605+.
Lubricating can; see D23-211.
Manual pump; see D23-231+.
Material handling article; see D34.
Nonpowered floor cleaning implements; see D32-40+
Refrigerated display case; see D6-449+.
Spark plug; see D13-127.
Spray gun; see D23-223+.
Trash compactor container; see D34-3.
Truck-mounted concrete mixer; see D12-14.
Vending machine; see D20-1+.

1 ENGINE (1)
2 .Steam type (includes element)
3 .Vehicle
4 ..Boat type (includes element)
5 .Element or attachment
6 ..Carburetor
7 PUMP OR COMPRESSOR
8 .Aquarium type
9 .Compressor
9.1 .Gasoline or oil pump (see Note 11)
9.2 ..Plural
9.3 ..With superposed globe (see Note 12)
10 AGRICULTURAL OR CONSTRUCTION MACHINERY
11 .Plow, tiller or element thereof (includes snow plow, blower)
12 ..Powered
13 .Material spreader (includes sprayer)
14 .Lawnmower
15 ..Rider type (2)
16 ..Reel or sickle type
17 ..Element or attachment
18 ...Handle
19 .Concrete, asphalt, or soil mixer
20 .Compactor
21 .Drilling, mining, or soil treatment (includes element)
22 .Self-propelled
23 ..Tractor type (includes grader or bulldozer)
24 ...Endless track
25 ...With scoop or blade
26 ..Agricultural type
27 .Trailing implement (includes lawn sweeper)
28 .Element or attachment
29 ..Disc, rotary hoe, or tooth
30 ..Cab, e.g., enclosure for tractor, etc.
31 ..Hood or radiator grille
32 ..Scraper blade or loader element
33 ..Frame or body
66 TEXTILE, SEWING, KNITTING AND EMBROIDERING MACHINE
67 .With treadle
68 .Sleeve-type sewing surface
69 .Sewing machine
70 ..With carrying handle
71 ..Kneehole type
72 ..Element or attachment
73 ...Surface ornamentation
74 ...Leg or side frame
75 ...Cover
76 ...Frame, head, or arm
77 .Cutting
78 .Element or attachment
79 REFRIGERATION MACHINERY AND APPARATUS
80 .Ice maker
81 .Freezer or refrigerator
82 ..Ice cream type (includes element)
83 ..Top loading
84 ...Opposed doors
85 ..Plural doors and/or drawers
86 ...Three or more
87 ...Superposed
88 ..Vertical hinge alignment
89 .Element or attachment
90 ..Ice tray or mold
91 ..Door
122 MATERIAL WORKING, ABRADING, OR FOUNDING MACHINERY (6)
123 .Deforming or crushing (includes element) (7)
124 .Abrading
125 ..Bench or table mounted
126 ..Element or attachment
127 .Cutting (8)
128 ..Punching or stamping
129 ..Shearing
130 ..Turning, e.g., lathe, etc.
131 ..Milling
132 ..Drilling (9)
133 ..Sawing (includes element)
134 ...Band type
135 .Molding or casting
136 ..Mold or die
137 ...Shoe type, e.g., last, etc.
138 .Element or attachment
139 ..Cutting tool, e.g., drill bit, etc.
140 ..Tool or work holder
141 ..Machine support or frame
142 ..Lever or handle
143 ..Bearing, bushing, or pillow block
144 HEAT TREATMENT, WELDING OR BRAZING (INCLUDES INGOT)
144.1 .Scientific, laboratory, or industrial heating equipment
144.2 .Solid material melting, e.g., solder, etc.
145 PACKAGING OR WRAPPING
146 .Vacuum or heat seal
147 VIBRATOR OR SEPARATOR
148 DRIVE TRAIN (INCLUDES BELT AND PULLEY)
149 .Transmission or speed reducer
150 LUBRICATOR OR OIL COLLECTOR, E.G., DISPENSING, OIL CUP, RESERVOIR, ETC.
151 .Service station type (see Note 13)
152 ..With collecting means
199 MISCELLANEOUS (10)

SEARCH NOTES FOR CLASS D15
(1) For transmission, see subclass 149.
(2) For frame, see subclass 15.
(6) Excludes earth working. See subclasses 10+.
(7) Die excluded. See subclass 136 below.
(8) Specific element included with indented subclasses below.
(9) Includes support or stand, etc. Drill bit excluded. See subclass 139 below.
(10) Tire mounting, vulcanizing, etc. Includes laminating machine. Includes garage door opener unit.
(11) Includes element per se.
(12) Includes cylindrical element at top.
(13) Includes cabinet.

CLASS D16 PHOTOGRAPHY AND OPTICAL EQUIPMENT

Excluded from this class are:

Blinder type sun visor or shade; see D29-18.
Camera or photographic equipment case; see D3-33.
Cassette for film or magnetic tape; see D14-120+.
Computer or data processing equipment; see D14-100+.
Contact lens case; see D3-34.
Eyeglass case; see D3-34.
Eyeshade; see D29-18.
Eye shield for attachment to helmet; see D29-16.
Face mask; see D29-8.
Goggles, eye or face protector; see D2-234.
Grinder for lens; see D15-124+.
Intraocular lens; see D24-33.
Kaleidoscope; see D21-60.
Lamp, floodlight or spotlight for photography (non camera attached); see D26-24+.
Measuring or testing instrument embodying optical device (other than camera range finder); see D10-46+.
Microscope slide rack or support; see D6-85+.
Optical medical instrument; see D24-1.1+ and 8+.
Optician's equipment; see D24-1.1+ and 8+.
Photolithographic printing equipment; see D18-13+.
Reel for film or magnetic tape; see D14-122.
Sorter for data processing equipment; see D14-110.
Transit or optical surveyors's instrument; see D10-61+.

200 CAMERA OR BODY THEREFOR (1)
201 .Simulative
202 .Video type
203 .Security surveillance type
204 .Underwater
205 .Cinematographic (i.e., motion picture type, etc.)
206 ..With handgrip
207 ..With multiple lens
208 .Combined (e.g., with case, etc.)
209 ..With flash or floodlight
210 .Plural objective lens (e.g., stereoscopic, etc.) (2)
211 .Folding or extending case or lens
212 ..Laterally opening divided body
213 .Lens on narrow side of body
214 .Stand mounted (e.g., identification photo type, etc.)
215 .Cabinet or booth type
216 .Reflex viewing type
217 ..Single lens
218 .Separate lens and viewfinder (e.g., rangefinder type, etc.)
219 .Element (3)
220 ..Rangefinder or viewfinder
221 PROJECTOR OR VIEWER
222 .Stereoscopic
223 .Combined with printer
224 .Combined with splicer (i.e., film editing type, etc.)
225 .Integrated unit (i.e., with self-contained image viewing and reflection or projection)
226 ..Coin operated or arcade type
227 ..With eyepiece
228 ..Plural screen
229 ..Foldable, collapsible or articulated
230 .Motion picture type
231 ..With carrying handle or case
232 .Overhead or opague type
233 .With provision for transparency magazine (i.e., with provision for magazine, shuttle mechanism, etc.)
234 .With carrying handle or case
235 .Element or attachment
236 ..Transparency holder (e.g., magazine, cartridge, etc.) (4)
237 PHOTOGRAPHIC ACCESSORY
238 .Photometer, color, or exposure meter (5)
239 .Camera mounted movie light or flash unit
240 ..Provision for angle adjustment
241 .Screen or element thereof
242 .Support
243 ..Handgrip or shoulder support
244 ..Tripod or unipod
245 ...Element
246 .Film processing equipment (6)
247 ..For x-ray film
248 ..Enlarger, printer or head therefor (7)
249 ..Tray, tank or drum
250 ..Element or accessory
100 OPTHALMIC ARTICLE (14)
101 .Lens (15)
102 .Eyeglasses, protective eyewear or frame therefor (16)
103 ..Combined with diverse article
104 ..Simulative
105 ..Hand-held (e.g., lorgnette, etc.)
106 ..Singular arm for attachment to body
107 ..Provision for flexible attachment to body
108 ..Flexible, adjustable or folding bridge
109 ..Prismatic or cantilevered lens
110 ..With sun visor (17)
111 ..Outline of front extends onto and is contiguous with temple (18)
112 ..Contiguous lenses
113 ..Lens mounted below eye or bridge level
114 ..Temple mounted below centerline
115 ..Horizontal or upwardly curved surface spaning lens upper surfaces
116 ..Discontinuous or partial lens support or surround (e.g., "semi-rimless", etc.)
117 ..Distinct bridge or temple pieces (e.g., "rimless" or "wire frame" type, etc.)
118 ..With pierced temple or front
119 ..With distinct surface texture or applied ornamentation
120 ..Concavo-convex lens surround
121 ..Lens having straight side
122 ..Circular lens
123 ..Element or attachment
124 ...Contact lens handling implement
125 ...Applique
126 ...Bridge or nose pad component
127 ...Temple
128 ...Hinge component or lens fastener
129 ...Holder
130 OPTICAL ARTICLE NOT ELSEWHERE SPECIFIED (19)
131 .Microscope
132 .Telescope (20)
133 ..Binocular
134 .Lens or objective
135 ..Magnifying or reducing glass
136 ..Element or attachment
137 .Prism

SEARCH NOTES FOR CLASS D16

(1) For dedicated photocopy equipment camera, see D18-40.
(2) Exclusive or viewfinder objective.
(3) For attachment, e.g., tripod, handgrip, flash unit, etc., see subclasses 237+.
    For film or film strip, see subclasses 237+.
    For lens, see subclasses 134+.
    For reel, cassette, etc., see see D14-120.
(4) For transparency mount per se, see D14-123.
(5) For meter which is coupled to camera, see subclass 219.
(6) For photo processing or printing machine, see D18-36+.
(7) For lens, see subclass 134.
(14) Includes monocle.
    For magnifying glass, see subclas 135.
    CLASSIFIED BY FULL-LINE DISCLOSURE.
(15) For compound, multielement or adjustable lens, see subclass 134.
(16) If protection for other portion of the face is included, e.g., nose shield, covering, etc., article is classified in D29-17.
(17) Exclusive of lip or peripheral wall; to be classified in this subclass claimed disclosure must include a distinct forwardly extending sun shade.
(18) Exclusive of temple extension across front; to be classified in this subclass claimed disclosure must include top and bottom surfaces of a frame front which have continuity onto the temple piece.
(19) Element included in this and in indented subclasses.
    CLASSIFIED BY FULL-LINE DISCLOSURE.
(20) For combined firearm and telescope, see D22-1+ or 3+.

CLASS D17 MUSICAL INSTRUMENTS

Excluded from this Class are:
Musical instrument cases; see D3-30.1+.
Musical reproduction equipment; see D14.

1 KEYBOARD TYPE
2 .Combined with diverse article
3 .Accordion
4 ..Element or attachment
5 .Organ or cabinet therefor
6 ..Multiple keyboard
7 .Piano or cabinet therefor
8 ..Grand type
9 .Element or attachment
10 WIND INSTRUMENT
11 .Cornet or trumpet
12 .Harmonica
13 .Element or attachment
14 STRING INSTRUMENT
15 .Plural neck
16 .Harp (1)
17 .Violin (1)
18 .Simulative
19 .Symmetrical outline
20 .Element or attachment
21 ..Bridge, tailpiece, or vibrato unit
22 PERCUSSION INSTRUMENT (2)
23 .Xylophone or marimba
24 MECHANICAL INSTRUMENT (3)
99 MISCELLANEOUS

SEARCH NOTES FOR CLASS D17
(1) Includes body per se.
(2) Includes element.
(3) Includes music box.

CLASS D18 PRINTING AND OFFICE MACHINERY

Excluded from this class are:
Coin tray or holder; see D99-34+.
Computers and data processing equipment; see D14-100+.
Sales transaction terminal without cash drawer; see D14-100+.
Sorter for data processing equipment; see D14-110.
Teletype equipment; see D14-119.

1	TYPEWRITER OR CALCULATOR (1)
2	.Combined (2)
3	.Coin handling machine
4	..Cash register (3)
5	.Checkwriter (3)
6	.Calculator (12)
7	..With keyboard
8	...With carriage
9	..Slide rule type
10	...Rotary
11	..Housing or casing
12	.Element or attachment
36	COPY REPRODUCING EQUIPMENT
37	.Electrostatic type (i.e., specified as such)
38	..Console or floor type
39	.Console or floor type
40	.Element or attachment
41	..Control or panel
42	..Feeder or collator
43	..Toner or developer container, cassette, etc.
44	..Paper or film container, cassette, etc.
45	..Copy stand
13	PRINTING EQUIPMENT (4)
14	.Hand held or manipulated (5)
15	..Stamp, seal imprinter, or stamp pad
16	...Simulative (6)
17	...Stamp pad
18	...Element or attachment
19	..Label or tape embossing tool
20	..Stenograph
21	..Autographic register
22	.Element or attachment (13)
23	..Stand or frame
24	TYPE OR TYPE FACE
25	.Foreign alphabet
26	.Segmented display type (7)
27	.Simulative (8)
28	.Script type
29	.Individual panel mount type (9)
30	.Outlined or with shadow
31	.With detached interior embellishment (10)
32	.Border or ornament design
33	..Animate figure representation
34	BOOKBINDING MACHINES, PRINTERS' STAPLING MACHINES AND EQUIPMENT (11)
35	PNEUMATIC DISPATCH TUBE OR SYSTEM
99	MISCELLANEOUS

SEARCH NOTES FOR CLASS D18

(1) Includes casing or frame per se.
(2) Includes combination with case.
(3) Includes element.
(4) Includes engraving equipment.
(5) Excludes crank operated floor or console type; see subclass 13.
(6) Includes body per se.
(7) Electroluminescent, etc.
(8) Excludes border design; see subclass 32.
(9) Example, disclosed on oval, rectangular background, etc.
(10) Example, a dot in the middle of the letter "O".
(11) Includes machines for cutting paper analagous to guillotines, trimmers, shredders, etc.
(12) Includes voting machine.
(13) For ribbon or ribbon cartridge; see subclass 12.

CLASS D19 OFFICE SUPPLIES, ARTISTS' AND TEACHERS' MATERIALS

DECEMBER 1990

Excluded from this class are:
Air brush; see D23-223+.
Bulletin board; see D20-10+.
Calling card receiver; see D6-449.
Data processing record card; see D14-117.
Decal or transfer; see D20-11.
Dividers; see D10-73.
Drafting table; see D6-420.
Easel; see D6-300+.
Educational device in the guise of a toy; see D21.
Educational material in the form of graphics, e.g., sign, chart, etc.; see D20-10+.
File cabinet; see D6-432+.
Finger cot, stall, or guard; see D29-20.
Furniture type book reading stand; see D6-419.
Geometric drafting template; see D10-64.
Imprinting or embossing stamp; see D18-15+.
Ink bottle; see D9.
Measuring instrument; see D10-61+.
Napkin; see D6-595.
Office machine; see D18.
Packaging bag, wrapper or envelope, etc.; see D9-305+.
Packaging bag, wrapper or envelope; see D9-305+.
Paintbrush; see D4.
Paper cutter; see D15-127.
Pencil box or case; see D3-30.1+.
Photograph or picture frame; see D6-300+.
Photographic or cinematographic viewer; see D16.
Place mat; see D6-613+.
Pliers-type punch; see D8-51+.
Printing machine or press; see D18-13+.
Protractor; see D10-65.
Rule; see D10-71+.
Scissors; see D8-98.
Sculpting tool, e.g., knife or spatula; see D8-98+.
  Chisel; see D8-47.
  Hammer; see D8-75+.
Sheet material; see D5.
Shelf paper; see D5-7+.
Stapler; see D8-49+.
Staple remover; see D8-48.
Triangle; see D10-65.
T-square; see D10-65.
Voice reflector for speech or hearing therapy; see D24-35.
Voice synthesizer unit; see D14-158.
Wrapping paper; see D5 and D9-305.
Writing instrument combined with lighter; see D27-146.

1 PAPER OR PASTEBOARD FOR WRITING OR PRINTING (1)
2 .Combined (2)
3 .Envelope
4 ..Simulative
5 .Continuous background pattern, e.g., safety paper
6 .Simulative
7 ..Animate
8 ...Humanoid
9 CREDIT CARD, CERTIFICATE, OR STAMP
10 .Identification or credit-type card
11 .Negotiable instrument or ticket, e.g., currency, check, etc. (3)
12 .Stamp or seal
20 CALENDAR OR CALENDAR HOLDER
21 .Combined
22 ..With writing paper receptacle (5)
23 ..With pen or pencil holder (6)
24 .Simulative
25 .Perpetual
26 BOOK, ALBUM OR COVER (7)
27 .Ring bound or looseleaf type
28 .Simulative
29 ..Animate
30 ...Humanoid
31 ..Plant life
32 .Element or attachment
33 ..Leaf (8)
34 ..Bookmark
34.1 BOOKEND
34.2 .Combined with disparate article
34.3 .Simulative
34.4 ..Animate
34.5 ...Humanoid
35 EQUIPMENT FOR WRITING, DRAWING, OR FOR FINE ARTS (9)
36 .Plural or combined
37 .Guide (10)
38 ..Compass
39 ..Curve template or French curve
40 ..Stencil
41 .Marking instrument
42 ..Simulative
43 ..Provision for cap over writing tip only
44 ..With suspension ring or loop
45 ..Elongated
46 ...Having flared or enlarged top
47 ...With surface texture or pattern
48 ....Lateral striation
49 ....Longitudinal striation
50 ....Diagonal striation
51 ...Substantially circular or oval in cross section
52 .Writing or drawing surface, e.g., blackboard, drawing board, etc. (11)
53 .Eraser (12)
54 .Element or attachment
55 ..Nib, stylus or grip
56 ..Clip
57 ..Top or cover for marking instrument
58 ...Pencil top or ferrule (13)
59 TEACHING MATERIAL (14)
60 .Sensory feedback, e.g., audio-visual teaching machine
61 .Terrestrial or extraterrestrial map or model
62 .Demonstrator or exhibitor (15)
63 ..Vehicle trainer
64 ..Movable indicator or changeable exhibitor
65 OFFICE EQUIPMENT NOT ELSEWHERE SPECIFIED (16)
66 .For gluing, sealing, etc.
67 ..Strip material dispenser (17)
68 ...Lever-operated or automatic
69 ...Manual cutting
70 ..Moistener (18)
71 ...Hand-held
72 .Perforating or cutting (19)
73 ..Pencil sharpener
74 ...Crank type
75 .Holder or file (20)
76 ..Rotary or flip-card file, list finder
77 ..For writing instrument and diverse article
78 ...With paper receptacle
79 ...With inkwell
80 ....Simulative
81 ..For writing instrument
82 ...Simulative
83 ...Instrument supported horizontally
84 ...Instrument supported vertically or angularly

OFFICE EQUIPMENT NOT ELSEWHERE SPECIFIED (16)
.Holder or file (20)
..For writing instrument
...Instrument supported vertically or angularly
85 ....Plural
86 ..For paper or document (21)
87 ...Combined with telephone holder
88 ...Clipboard (22)
89 ...Roll paper type
90 ...Substantially vertical
91 ....For display of note pad, document, book, etc.
92 ...Substantially horizontal, e.g., desk tray
93 ..Inkwell (23)
94 ...Simulative
95 .Desk furnishing (24)
96 ..Paperweight
97 ...Simulative
98 ..Blotter or pen wiper
99 .Element or attachment (25)
100 MISCELLANEOUS

SEARCH NOTES FOR CLASS D19
(1) Includes carbon paper, greeting card or place card.
  For paper combined into book, tablet, etc., see subclass 26. Includes business form.
(2) Includes aerogram.
(3) For checkbook cover, see subclass 26 below.
(5) For paper holder per se, or in other combinations, see subclasses 78 and 86+ below.
(6) For writing instrument holder per se, or in other combinations, see subclasses 77+ and 81+ below.
(7) Includes writing tablet.
(8) For paper other than book or album leaf, see subclasses 1+ above.
(9) Includes only articles for writing, drawing, sculpting, etc., not elsewhere specified, and elements thereof.
  For holder, stand, etc., see subclasses 75+ below. Includes artist's paint tray or palette.
(10) Includes laminating machine.
(11) Includes tracing board.
(12) Includes element.
  For pencil tip eraser holder, see subclass 58 below.
(13) Includes eraser holder.
(14) Includes element.
(15) Includes science demonstrator.
(16) Includes paper fastener or clip.
(17) Includes stamp roll dispenser.
(18) Includes sponge cup.
(19) Includes hole punch.
(20) Includes "desk set".
  For calendar holder, see subclasses 20+.
(21) Includes ring or wire type.
(22) For clip or clamp for clipboard, see Class D8-395.
(23) For ink bottle, see Class D9.
(24) Includes desk pad or typewriter pad.
(25) Includes index tab.

CLASS D20 SALES AND ADVERTISING EQUIPMENT

Excluded from this class are:
Article of furniture; see D6.
Machines for making pop corn; see D7-325.
Racks, holders, or dispensers for cigarettes without mechanical features; see D6-396+.

1 VENDING MACHINE (1)
2 .Stamp, ticket, or insurance type (2)
3 .Simulative
4 .Multiple diverse article or plural compartment, e.g., beverage, food, etc.
5 ..Bottle, can, or carton (3)
6 .Periodical, e.g., newspaper, etc.
7 .Gum ball type (4)
8 .Element or attachment
9 ..Coin control mechanism
10 SIGNS OR DISPLAY FORMS (11)
11 .Decalcomania
12 .Composite character (5)
13 .Vehicle license or emblem plate
14 ..Animate motif
15 .Desk-type name plate
16 .Barber pole or sign
17 .Street or highway address sign
18 .Program reminder or programmable indicator, e.g., T.V., radio, etc. (6)
19 .Combined with diverse article or function
20 ..With time indicator
21 .Rotatable display
22 .Label or tag (7)
23 ..Simulative
24 ...Animate
25 ....Humanoid
26 ...Plant life
27 ..Substantially rectangular or square
28 ..Substantially circular or oval
29 .Simulative
30 ..Animate
31 ...Humanoid (8)
32 ....Element, e.g., hand, head, etc.
33 .....Hand
34 ..Scenic or geographic representation
35 ..Vehicle or element thereof
36 ..Star
37 ..Representation of consumable product or container therefor, e.g., barrel, bottle, etc.
38 ..Building
39 .Billboard type
40 .Card type (9)
41 .Post supported (10)
42 .Attachable to vertical surface or hanging type
43 .Fastener or support for card, price tag, etc.
44 ..Molding strip type
99 MISCELLANEOUS

SEARCH NOTES FOR CLASS D20

(1) Must be coin operated; dispensing articles of other types classified with appropriate class.
(2) For household type stamp holder, search D19-67.
(3) Includes beverage vending per se.
(4) Includes element.
(5) For electroluminescent type, search D18-26.
(6) Includes holder therefor.
(7) Excludes clothing label on emblem; see D5-63+.
(8) Figures partially obstructed are included in this subclass. Mannequins in this subclass.
(9) That is, made from flat, thin sheet material.
(10) Includes post per se.
(11) Includes, in this subclass, vehicle-attached sign.

CLASS D21 GAMES, TOYS, AND SPORTS GOODS

Excluded from this class are:
Abacus; see D18-6+.
Animal toy; see D30-99.
Archery equipment; see D22-107.
Ball storage or carrying case or bag; see D3-36.
Bank; see D99-34+.
Baseball glove; see D29-21.
Belt-attached ball holder; see D3-104.
Canopy or awning; see D25-56+.
Children's furniture; see D6.
Coin box; see D99-34+.
Coin holder; see D99-34+.
Desk for scorekeeping; see D6-396+.
Drawing surface or device; see D19-35+.
Golf bag cart; see D12-23.
Golf bag per se; see D3-37.
Handlebar; see D12-178.
Horn; see D10-120.
Horseshoe; see D30-99.
Lap counter; see D10-46.1.
Mannequin; see D20-31.
Money purse; see D3-42+ and 56+.
Motorized swimboard or surfboard; see D12-307.
Music box; see D17-24.
Pedal-operated two- or three-wheeled vehicle; see D12-107+.
Pyrotechnic article; see D22-10+.
Rangefinder; see D10-70.
Scorer or indicator; see D10-46.1.
Self-propelled vehicle; see D12.
Sleigh or sled; see D12-6.
Slingshot; see D22-106.
Sports equipment storage or carrying case or bag; see D3-36+.
Statue; see D11-131+.
Steering wheel; see D12-175+.
Strength-measuring device; see D10-83.
Target for archery; see D22-113.
Tennis equipment case; see D3-36.
Terrestrial or extraterrestrial model; see D19-61.
Tire; see D12-134+.
Toy bank; see D99-34+.
Toy chest; see D6-432+.
Wearing apparel; see D2.
Wheel; see D12-204+.
Whistle; see D10-119.

1 GAME OR GAMBLING ARTICLE (1)
2 .Aerial projectile type (2)
3 ..Projectile launched by ramp
4 ..Quoit or horseshoe (3)
5 ..Target (4)
6 ...Dartboard type
7 .Surface projectile type (5)
8 ..Inclined surface type, or having ramp
9 ...With propulsion means, or with provision therefor
10 ....Bumper or flipper
11 ..Sports simulation (6)
12 .Vertical fall type
13 .With screen or cathode-ray tube (76)
14 .Board or surface (7)
15 ..Folding
16 ..Walls confining playing surface (8)
17 ...And pocket or opening for capture of game piece
18 ....Sports simulation
19 ...And interior wall or trackway for game piece (9)
20 ..Pocket or opening for capture of game piece
21 ..Combined with chance determining device (10)
22 ...Wheel or spinner
23 ..Plural distinct playing surfaces (11)
24 ..Checkerboard type
25 ..Simulative (12)
26 ...Playing card or suit theme
27 ...Sports
28 ....Baseball
29 ....Football
30 ...Humanoid
31 ...Geographical or architectural
32 ..Arcuate outline
33 ..Having four or more sides
34 ...Rectangular or square
35 ....Curvilinear path (13)
36 ....Asymmetrical pattern
37 .Gambling or chance determining article (14)
38 ..Lever operated, i.e., "One-armed bandit"
39 ..Rotated or agitated (15)
40 ...Roulette type
41 ...Dice or teetotum
42 ..Playing card
43 ...Numerical (16)
44 ....Symbol set or suit
45 .....Club, diamond, heart, spade
46 ...Alphabetical
47 ...Back design
48 .Element or attachment (77)
49 ..Dart (17)
50 ..Quoit or horseshoe
51 ..Game piece or marker (18)
52 ...Chess
53 ...Circular, i.e., chip or checker type
54 ..Holder (19)
55 ...Combined, e.g., card and chip holder, etc.
56 ...For chip
57 ..Card game accessory (20)
58 ...Shuffler
59 TOY (21)
60 .Kaleidoscope or changeable image type
61 .Bubble or smoke ring making
62 .Tethered or suspended (22)
63 ..Crib-attached type
64 .Sounding or noisemaking type (23)
65 ..Rattle
66 .Rocking or bouncing (24)
67 ..Pogo stick
68 ..Simulative
69 ...Animate
70 ....Horse
71 .Provision for standing or seated occupant (25)
72 ..Stilt
73 ..Simulative
74 ...Animate
75 ....Horse (26)
76 ...Vehicle (27)
77 ....Aircraft
78 ....Automobile or truck
79 ....Construction, earthworking, or farming
80 ..Three-wheeled
81 ..Two-wheeled, e.g., scooter, etc.
82 .Aerial (28)
83 ..Animate simulation
84 ..Inflated, e.g., balloon, etc.
85 ..Rotary wing type or disk
86 ...Disk (29)
87 ..Aircraft or spacecraft (30)
88 ...Kite or flexible wing type, e.g., paraglider, hang glider, etc.
89 ...Formed entirely of planar or sheet material
90 ...With propeller or provision therefor
91 ..Element or attachment (31)
92 .Spinning or whirling (32)
93 ..Air operated, e.g., pinwheel, etc.

TOY (21)
.Spinning or whirling (32)
94 ..Spiral drop
95 ..Top, i.e., spinning on one point
96 ...With spin-inducing element or holder
97 ....Integral plunger
98 ..String-impelled
99 ...Return top
100 ..Baton or cheerleader's pompon
101 ..Hoop
102 .Balancing
103 .Pounding
104 .Puzzle
105 ..Shape-matching (33)
106 ...Bent wire
107 ...Three-dimensional, i.e., interfitting in three or more planes
108 .Construction type (34)
109 .Representation or scale model (35)
110 ..Photographic or cinematographic
111 ..Communications or electronic equipment
112 ...Phonograph or tape recorder
113 ...Radio or television
114 ..Building or structure
115 ...Simulative of diverse article
116 ...Barn
117 ...Bridge
118 ...Service type, i.e., airport, railroad, service station building, etc.
119 ....Tower, e.g., lighthouse, windmill, etc.
120 ..Hand tool, e.g., hammer, saw, shovel, etc. (36)
121 ..Furnishing (37)
122 ...Appliance (38)
123 ...Chair, sofa, or bed
124 ..Machinery or vehicle (39)
125 ...Motor
126 ...Reproducing (40)
127 ....Printing (41)
128 ...Vehicle or body therefor (42)
129 ....Rail (43)
130 ....Watercraft
131 ....Endless track type
132 ....Farming or earthworking
133 ....Firefighting
134 ....Load carrying (44)
135 .....Articulated type
136 .....Automobile (45)
137 ......Two or more fully exposed wheels, or having detached fenders, e.g., racing type, etc.
138 .....Cement
139 .....Towing
140 .....Fully enclosed load carrying portion
141 ...Element or attachment (46)
141.1 ....Controller or transformer
142 ....Control panel
143 ....Track or roadway
144 ..Timepiece
145 ..Weapon
146 ...Firearm type
147 ....Handgun (47)
148 ..Animate figure
149 ...Plural or convertible, i.e., combined animate forms, plural heads, etc.
150 ...Action type, i.e., animated (48)
151 ....Projecting, i.e., jack-in-the-box type
152 ....Puppet
153 .....Hand type (75)
154 ...Comprised of planar elements
155 ...Consisting of, or simulative of, diverse article, e.g., constructed from fruit or vegetable components, pipes, couplings, etc.
156 ...Ape or monkey
157 ...Aquatic (49)
158 ....Frog
159 ...Bear
160 ...Bird
161 ...Canine
162 ...Elephant
163 ...Feline
164 ...Giraffe
165 ...Horse
166 ...Humanoid (50)
167 ....Combined with holder or pouch
168 ....Armless or legless
169 ....Winged
170 ....Consisting primarily of yarn or fiber (51)
171 ....With body garment
172 .....Simulative of diverse animate figure
173 .....Clown or jester
174 .....Elf, leprechaun, pixie, etc.
175 .....Bibbed, or having apron
176 .....With pointed cap
177 .....Occupational or vocational costume or uniform (52)
178 ......Police or military
179 ......Santa Claus
180 .....National, regional, or ethnic costume
181 ......Cowboy or cowgirl
182 ......Indian
183 ......Oriental
184 .....Flattened, i.e., disproportional thickness or width
185 ...Insect
186 ...Pig
187 ...Rabbit
188 ...Rodent
189 ...Element or attachment (53)
190 ....Head or mask (54)
191 EXERCISING OR SPORTS EQUIPMENT (55)
192 .Treadmill or walking type
193 .Rotating or rocking platform
194 .Pedal operated type, e.g., stationary bicycle, etc.
195 .Lever, bar, or pulley operated machine
196 .Weight
197 ..Barbell or dumbbell
198 .Hand manipulated or with handgrip (56)
199 .Sports (57)
200 ..Goal
201 ...Basketball
202 ...Croquet
203 ..Projectile (58)
204 ...Ball
205 ....Symmetrical repeating surface pattern (59)
206 ....Retriever or holder (60)
207 ...Shuttlecock
208 ...Support, e.g., tee, etc.
209 ....For football
210 ..Striking or propelling element (61)
211 ...Bat or club
212 ....Racket type
213 .....Paddle
214 ....Golf club or club head
215 .....Simulative
216 .....Adjustable
217 .....Putter type
218 ......Opposed striking surfaces
219 ......With alignment aid, e.g., groove, tang, gauge, etc.
220 .....Iron type, i.e., having elongated and relatively shallow head
221 ...Element or attachment (62)
222 ....Handgrip
223 ....Rack or holder (63)
224 ..Skating or skimming device

EXERCISING OR SPORTS EQUIPMENT (55)
.Sports (57)
..Skating or skimming device
225 ...Ice
226 ...Roller
227 ....Skateboard
228 ...Skimming (64)
229 ....Ski
230 ....Element or attachment
231 .....Skeg or fin
232 ..Billiards or pool
233 ..Bowling (65)
234 ..Golf (66)
235 ..Gymnastics (67)
236 ..Water sports (68)
237 ...Swimming or flotation aid
238 ....Body-worn (69)
239 .....Fin or flipper
240 AMUSEMENT OR ENTERTAINMENT ARTICLE NOT ELSEWHERE SPECIFIED (70)
241 .Trick or magic device (71)
242 .Playground or amusement ride apparatus
243 ..Plural diverse articles, i.e., combined
244 ...Sliding and climbing
245 ..Climbing
246 ..Swinging
247 ..Riding or sitting (72)
248 ...Ferris wheel
249 ...Carousel, roundabout, or whirligig
250 ...Vehicle or vehicle simulation
251 ...Seesaw
252 ..Sandbox or wading pool (73)
253 TENT (74)
254 .Element or attachment
255 ..Stake

SEARCH NOTES FOR CLASS D21

(1) Includes coin-controlled horse race unit.
For element or attachment, see subclasses 48+.

(2) Includes game wherein projectile at some point is in flight toward target. Projectile must be thrown, propelled, launched, fired, projected, etc.
For game wherein game piece is simply moved, see subclasses 14+.
For boomerang, see subclasses 82+.
For golf practice article, see subclass 234.

(3) For horseshoe or quoit per se, see subclass 50.

(4) Includes shooting range type amusement unit.
For archery target, see D22-15+.

(5) Includes game wherein projectile is thrown, propelled, launched, fired, projected, etc., toward target.
For game wherein game piece is simply moved, see subclasses 14+.
For game board which is tilted to maneuver ball, see subclasses 16+.
For pool or billiards, see subclass 232.
For surface particularly adapted for gambling, see subclasses 37+.

(6) Includes shuffleboard type.

(7) For "talking board", see subclass 241.

(8) Entire surface must be confined by walls.

(9) Includes trackway defined by spaced walls or by channel.

(10) Includes combination with dice agitator.
For chance determining device per se, see subclasses 37+.
For roulette type game, see subclass 40.

(11) Playing surfaces must be separate; boards having two patterns on opposite sides of a single surface excluded.

(12) Geometric figure, letter, or numeral not considered.

(13) Circular indicia per se not considered.

(14) Includes game table.

(15) Includes bingo apparatus.

(16) Includes face card.

(17) For arrow, see subclass 145.

(18) For chance determining article, see subclasses 37+.

(19) Includes dispenser.

(20) For card table, see subclass 37.
For scoring device, see D10-46.1.

(21) Element included in this and in indented subclasses.
For marble drop game, see subclass 12.

(22) Includes toy having two elements which are interrelated and which coact.
For aerial spinning toy, see subclasses 92+.
For marionette or puppet, see subclass 152.
For paddle per se, see subclass 213.
For toy swing or swinging cradle, see subclass 123.
Pull toy per se excluded; see subclass for specific toy.

(23) Includes musical type.
For gun, see subclasses 146+.
For radio, phonograph, television, etc., see subclasses 111+.

(24) For ball, see subclasses 204+.
For children's rocking chair, see D6-344+.
For rocking exerciser, see subclass 193.
For seesaw, see subclass 251.
For trampoline, see subclass 235.

(25) Includes body or frame.
Includes wagon.
For skate or skateboard, see subclasses 226+.
For wheelbarrow, see subclass 134.

(26) Includes hobbyhorse, i.e., stick with a horse's head, or body-worn horse representation.

(27) For scale model or representation per se, see subclasses 128+.

(28) Includes parachute.
Includes scale model or representation.
For toy instrument panel, see subclass 142.

(29) Includes disk-shaped aircraft.

(30) Includes rocket.
For rotary-wing or disk-shaped aircraft, see subclasses 85+.

For aircraft control unit, see subclass 141.1.
(31) Includes launcher.
Includes pea shooter type.
For ball launcner or ball launching ana received article, see subclass 210.
For slingshot, see subclass 145.
(32) Includes toy gyroscope.
For jump rope, see subclass 198.
For windmill simulation, see subclass 119.
(33) For hammer and peg type, see subclass 103.
(34) Includes block.
(35) Includes toy soda fountain.
For aerial toy or representation thereof, see subclasses 82+.
For geographical model, see D19-61.
For toy sand bucket, see subclass 120.
For toy which simulates construction machinery, see subclasses 128+.
For toy sports equipment, see subclasses 199+.
(36) Includes sand pail.
(37) Includes toy housewares.
(38) Includes sewing machine.
(39) Includes cash register.
For toy slide projector, see subclass 110.
(40) Includes molding press.
(41) Includes typewriter.
(42) For aircraft, see subclasses 87+.
(43) For controller, see sublass 141.1.
For accessory building, see subclasses 114+.
(44) Includes wheelbarrow.
(45) For controller, see subclass 141.1.
(46) For scale representation of terrestrial features, e.g., model railway scenery, see D19-61.
For scale representation of building, see subclasses 114+.
(47) Includes water pistol.
(48) Normal hinged joints not considered.
For wheeled animate simulation, see appropriate subclass below.
(49) Includes turtle.
For waterfowl, see subclass 160.
(50) Includes "fuzzies" which appear to be human.
(51) Includes knit or crocheted.
(52) Includes dancer.
Includes witch.
(53) For clothing, see Class D2.
(54) Includes mask for disguise.
(55) Element included in this and in indented subclasses.
Includes ballet barre.
For scoring device, see D10-46.1.
(56) For sports equipment, see subclasses 199+.
(57) For quoit or horseshoe game equipment, see subclass 4.
For scoreboard, see D10-46.1.
(58) For dart, see subclass 49.
For quoit or toy horseshoe, see subclass 50.
For tethered ball and paddle-type toy, see subclass 62.
For striking or propelling element, see subclasses 210+.
(59) For golf ball washer, see subclass 234.
(60) For ball launching and receiving article, see subclass 210.
For belt-attached holder, see D3-104.
(61) Includes ball launcher.
Includes croquet mallet.
For ski pole, see subclass 230.
(62) Includes golf club head cover.
(63) Includes rack or holder for striking element only.
For other sports-accessory holders, see appropriate subclass under particular sport.
(64) Includes snowshoe.
Includes swimboard, surfboard aquaplane, etc.
For motorized or pedal-operated type, see D12-306-307.
For sleigh or sled, see D12-6+.
(65) Includes practice or training device.
For ball, see subclass 204.
(66) Includes practice or training device.
Includes golf ball washer.
For ball, see subclasses 204+.
For measuring instrument such as rangefinder, see D10-70.
For miniature putting game, see subclasses 2+ and 7+.
For scorekeeping article, see D10-46.1.
(67) Includes trampoline.
(68) Includes diving board.
For toy swimming pool, see subclass 252.
(69) Includes life preserver.
(70) Includes fortunetelling or astrological device.
For miniature golf unit, see subclasses 2+ and 7+.
For amusement game, see subclasses 1+.
(71) Includes "talking board".
(72) Inclues seat.
(73) For swimming pool, see D25-2.
(74) For building or canopy, see, respectively, D25-1+ and 56+.
(75) For simulative glove or mitten, see D2-615+.
(76) Includes video game console.
(77) Includes "joystick" or control for video game.

CLASS D22 ARMS, PYROTECHNICS, HUNTING AND FISHING EQUIPMENT

DECEMBER 1990

100	PROJECTILE LAUNCHING WEAPON (1)
101	.Combined
102	.Spear gun or blow gun
103	.Rifle or shotgun
104	.Pistol
105	..Simulative motif
106	.Slingshot (2)
107	.Bow (2)
108	.Firearm element or attachment
109	..Gunsight, ventilating rib, or mount
110	...Gunsight mount
111	..Recoil pad
112	EXPLOSIVE OR PYROTECHNIC ARTICLE
113	TARGET OR TARGET LAUNCHER
114	.Aerial or disc type
115	FREE FLIGHT PROJECTILE (2)
116	.Pellet or bullet, (e.g., cartridge, etc.)
117	HAND HELD WEAPON
118	.Sword or knife
119	TRAPPING, REPELLING, OR VERMIN DESTROYING (2) (3)
120	.Repeller, (e.g., ultrasonic, chemical, etc.)
121	.Marine life
122	.Insect type
123	..Electrocuting
124	..Fly swatter
125	.Lure, (e.g., decoy, etc.)
126	..Fishing
127	...Wormlike
128	...With fibrous or feather like appendage
129	...With spoon or spinner
130	....Simulative
131	.....Fish
132	...Simulative
133	....Fish
134	FISHING EQUIPMENT (2)
135	.Net or scoop
136	.Bait bucket or container
137	.Rod or reel (4)
138	..Combined (5)
139	...With diverse article
140	..Crank operated reel
141	...Reel rotates perpendicular to rod (e.g., spinning reel, etc.)
142	..Rod (6) (7)
143	..Line guide
144	.Fishhook or guard
145	.Sinker
146	.Float
147	.Fishing rod holder
148	..Combined with diverse article (e.g., signal, etc.)
149	.Fisherman's tool
150	..Relatively movable plural handles
199	MISCELLANEOUS

SEARCH NOTES FOR CLASS D22

(1) See 113 for target launcher; (e.g., clay pigeon, etc.).
(2) Element included.
(3) See 135 for fish scoop or net.
(4) Includes hand held devices for storing line.
(5) Includes reel and handle combination.
(6) Includes reel support or handle.
(7) Includes rod tip.

CLASS D23 ENVIRONMENTAL HEATING AND COOLING, FLUID HANDLING AND SANITARY EQUIPMENT

DECEMBER 1990

Excluded from this class are:
Baby dressing table combined with bathing unit; see D6-382.
Caps for automobile gas tanks or radiators; see D12-197+.
Defrosting tool; see D8-29.2.
Drinking fountain; search D7-304.
Drinking fountain; see D7-304.
Fireplace brush; see D4-3+.
Fireplace poker; see D8-14.
Fireplace shovel; see D8-7+.
Fireplace tongs; see D8-51+.
Firestarter or igniter; see D7-416+.
Gutter; see D25-35 or 73+.
Haircurling iron; see D28-38.
Hair dryers; see D28-12+.
Hand or face drier; see D28-54.1.
Heat gun; see D8-29.1.
Heating devices for laboratory, industrial, or scientific use; see D15-144+.
Hydrotherapy unit; see D24-38.
Incense burner; see D11-131.1.
Incinerator; see D34-1.1.
Miscellaneous bathroom accessories, e.g., holders, racks, shelves, etc.; see D6-524+.
Mobile agricultural sprayer; see D15-13.
Mobile material distributor or sprayer; see D15-13.
Nozzles for soap dispensers and soda fountains; see D6-542+ and D15-119+ respectively.
Plant waterer or root feeder; see D8-1.
Pressure regulating instrument; see D10-49.
Pump dispenser for disposable package; see D9-300, 448.
Pump or fuel supply unit or casing for oil burner; search D15-7+.
Safety grab bar attachment for toilet, tub, etc.; see D8-316+.
Seat lifter handle; see D8-307.
Sink cabinet or "vanity" per se; see D6-432+.
Skylight; see D25-52.
Solar energy convertors; see D13-102.
Soldering irons per se; see D8.
Solid fuel; see D13-100.
Solid fuel burning cooking ranges combined with incidental heating features; see D7.
Tap or valve for beverage dispenser; see D7-398.
Tire valve; see D12-153.
Water pressure cleaner or sweeper; see D32-15+.

200 FLUID HANDLING OR TREATMENT EQUIPMENT (1)
201 .Fountain
202 .Storage tank
203 ..Underground type (e.g., septic tank, etc.)
204 ..Substantially spherical
205 ..Cylindrical
206 ..Element or attachment (2)
207 .Treatment
208 ..Sanitary fixture type (e.g., deodorant holder, chemical dispenser, etc.)
209 ..Filter or strainer (3)
210 ...Immersion type (e.g., aquarium filter, etc.)
211 .Lubricating can
212 .Watering can (4)
213 .Dispersal (i.e., sprayer, fogger, nozzle, aerator, etc.) (5)
214 ..Sprinkler for lawn, agricultural irrigation or fire extinguishing (6)
215 ...Simulative
216 ...Oscillating
217 ...With surface penetration means
218 ...Recessed type
219 ...Tracking type (i.e., sprinkler follows hose, etc.)
220 ...Plural rotating arms
221 ...Base
222 ..Simulative
223 ..Hand held or controlled type
224 ...Direct piston or plunger actuation (i.e., without trigger or lever)
225 ...With material container (7)
226 ...Trigger, lever or button actuation
227 ....Cover or guard
228 ..Combined
229 ..Provision for adjustment of spray pattern or flow
230 ..Ball and socket joint for adjustment
231 .Hand or foot operated pump or well curb
232 ..Reciprocating lever actuated
233 .Valve or body therefor
234 ..Hydrant
235 ..Pressure regulating or relieving
236 ..Ballcock or float type
237 ..Check
238 ..Faucet fixture (8)
239 ...Combined (e.g., with dishwashing brush, support therefor, etc.)
240 ....With soap dish or with provision therefor
241 ...Plural flow controls or provision therefor
242 ....Distinct (i.e., when mounted, controls and spout are separated)
243 ....Pivoting spout
244 ..Gate or butterfly type
245 ..Manual or visible mechanical control or with provision therefor (e.g., handle, lever, etc.)
246 ...With gauge or dial (9)
247 ..Symmetrical on two or more axes
248 ..Symmetrical on one axis
249 ..Element or attachment
250 ...Handle
251 ....Simulative
252 ....Offset from axis
253 ....Rim connected to hub by spokes
254 ....With escutcheon
255 ...Spout (10)
256 ....Simulative
257 ....With control for diverter or drain
258 ...Float or check
259 .Fitting (11)
260 ..Cap, plug, vent or screen (12)
261 ...Drain guard or strainer (13)
262 ..Coupling or joint
263 ...Elbow or with flow direction change
264 ....Adjustable (e.g., swivel, etc.)
265 ...Clamp or bolt engagement
266 ..Pipe, tubing or hose
267 ..Gutter
268 ..Trap
269 ..Gasket or packing
270 SANITARY FIXTURE OR HOUSING THEREFOR
271 .Combined (14)
272 ..Sink and stove or refrigerator
273 ..Sink, water closet and bathing unit
274 ..Sink and water closet or urinal
275 ..Bathtub and shower enclosure
276 .Sitz bath (15)
277 .Bathtub (16)

SANITARY FIXTURE OR HOUSING THEREFOR
.Bathtub (16)
278 ..Infant type
279 ..With door or provision for external storage
280 ..Symmetrical or two axes (17)
281 ..Bilaterally symmetrical (17)
282 ...Footed
283 .Shower or shower receptor (18)
284 .Sink
285 ..Simulative, or with radiating striations
286 ..With cabinet or with provision for storage
287 ..With drainboard (i.e., adjacent recessed inclined surface)
288 ..Corner type
289 ..Shampoo type (e.g., with depression on rim for neck, etc.)
290 ..Plural
291 ..With integral spout or hooded overflow
292 ..Unitary singular support column
293 ..Symmetrical on two axes in plan (17)
294 ..Bilaterally symmetrical in plan
295 .Water closet, bidet or bowl therefor
296 ..Infant training type
297 ...Simulative
298 ..Simulative
299 ..Self-contained (i.e., chemical or portable type)
300 ..Wall mounted
301 ..With water tank (19)
302 .Urinal (20)
303 .Element or attachment (21)
304 ..Bathtub or shower
305 ...Surround, door or panel
306 ....Front
307 ...Splash shield
308 ..Sink (22)
309 ..Water closet or urinal
310 ...Deflector (23)
311 ...Seat, or bowl cover (24)
312 ....Simulative
313 ...Tank or tank cover
314 HEATING OR COOLING
315 .Sauna or steam bath type
316 .Liquid immersion type, e.g., aquarium, swimming pool, etc. (25)
317 .Mobile space heater, e.g., wheeled blower type, etc.
318 .Domestic water heater or boiler
319 ..Boiler
320 ..With door or access panel
321 ..With discharge valve or tap
322 ..Element
323 ...Heat exchange unit, e.g., coil, etc.
324 .Vehicle heating or cooling
325 ..Air conditioning
326 ..Defroster
327 ..With adjustable louver or door
328 .Combined heating and cooling or with diverse element
329 .Furnace
330 .Radiator, e.g., spaced enclosed heat exchangers
331 ..Plant life or scroll type ornamentation
332 .Portable
333 ..Air conditioner
334 ..Animal or agricultural heater
335 ..Heating element protected by grille, grid,etc.
336 ...Circular or cylindrical housing
337 ...Pedestal or pivoting head mount
338 ...Liquid fuel type, e.g., kerosene, etc.
339 ...Gas fired type
340 ...Quartz type
341 ..Element
342 .Stabile space heater
343 ..Fireplace or solid fuel heating stove (26)
344 ...Fireplace insert
345 ...Masonry or tile-like surround, e.g., architectural type fireplace
346 ...Ornate cast iron type (27)
347 ....Element therefor, e.g., stove plate, etc.
348 ...Circular horizontal cross section
349 ...Simulative
350 ...Symmetrical front
351 .Air conditioner (28)
352 ..Circular housing
353 ..Window mount type
354 ..Element, e.g., front panel, etc.
355 .Air Treatment
356 ..Humidifier
357 ...Wall or furnace mount
358 ...Element
359 ..Dehumidifier
360 ..Vaporizer
361 ...Wall mount
362 ...Circular container
363 ...Element
364 ..Air cleaner
365 ...Filter
366 ..Deodorizer or ozonizer
367 ...Simulative
368 ...With distinct hanger or suction cup
369 ...Activated by moveable cover or by piercing
370 ..Fan or ventilator
371 ...Exhaust type
372 ....Range or oven
373 ....Roof or chimney
374 .....Chimney
375 .....Wind rotated, e.g., turbine type, etc.
376 .....Circular hood
377 ...Blade unit rotates on vertical axis
378 ...Floor type on vertically elongated stand
379 ...With exposed blade
380 ...Plural impeller units, e.g., side by side, etc.
381 ...Wire protective grille
382 ....Circular grille
383 ...Blower
384 ...Bellows
385 ..Wall or ceiling mount (25)
386 .Element or attachment, not elsewhere specified
387 ..Flow director (29)
388 ...Register or diffuser
389 ....Baseboard type
390 ....Circular
391 ....Arched or curved top
392 ....Adjustable louver or damper
393 ...Vent, ductwork, or element thereof
394 ....Stovepipe
395 ..Radiator cover or cabinet
396 ..Stoker
397 ..Grate
398 ...Fireplace type (30)
399 ....Hollow tube circulator with blower unit
400 ....Perforated or expanded metal
401 ....Enclosed four sides
402 ...Stove or furnace type
403 ..Fireplace element not elsewhere specified
404 ...Mantle or frame for opening
405 ...Lining or enclosure for opening (31)
406 ....Screen

HEATING OR COOLING
.Element or attachment, not elsewhere specified
..Fireplace element not elsewhere specified
407 ...Andiron or fire dog
408 ....Simulative
409 ...Artificial log burner element
410 ..Coal scuttle or wood holder
411 ..Fan element
412 ...Fan guard
413 ...Fan or ventilator blade
414 ....With circumferential band
415 ..Burner or heater coil
416 ...Oil type
417 ...Electric
418 ...Element
419 ....Radiant
420 ..Ash pan or sifter
421 ..Valve or control
422 ..Fire brick
499 MISCELLANEOUS

SEARCH NOTES FOR CLASS D23
(1) For sanitary fixture such as tub, shower, sink, etc., see subclasses 270+.
(2) For cap or plug, see subclass 260.
(3) For filter disclosed as part of a faucet, see subclasses 238+
For aerator, see abclass 213.
(4) For battery water dispenser, see subclass 200.
(5) For aerator disclosed as part of a faucet, see subclasses 238+.
For shower head disclosed with shower unit structure, see subclass 283.
(6) For hose nozzle or hand held sprayer, see subclasses 223+.
For time or control, see subclass 245.
(7) Container must be shown in full or in broken lines.
(8) If disclosed with sink, classified in subclasses 284+.
(9) For gauge or dial, per se, see Class D10.
(10) Includes spout with provision for diverter control.
If provision is made for flow control handle, patent is classified as faucet in subclasses 238+.
(11) Includes overflow fitting.
(12) Includes sink stopper.
(13) Includes urinal screen.
(14) For faucet combined with sink and/or cabinet, see subclasses 284+.
(15) For bidet, see subclass 295.
(16) For front panel or sub-assembly, see subclasses 304+.
(17) Exclusive of drain or overflow opening.
(18) For bathtub surround, see subclass 305.
For shower head, per se, or with associated plumbing only (such as valve), see subclass 213.
(19) For tank, per se, see subclass 313.
(20) For water closet attachment type, see subclass 310.
(21) Includes leg or support
For overflow fitting, see subclass 261
For drain stopper or screen see, respectively, subclasses 260 and 261.
(22) For drain stopper or screen see, respectively, subclasses 260 and 261.
(23) For drain screen, see subclass 261.
(24) For infant training seat, see subclass 296.
For seat lifter handle, see D3-307.
(25) Includes element.
(26) Stoves with upper and lower doors, e.g., for fuel supply and ash removal are included in this subclass.
(27) Highly surface ornamented parlor or franklin type stoves of the late 19th and early 20th century variety.
Ornamentation usually formed as part of the casting.
(28) Includes cooling tower.
(29) See air conditioner element, subclass 354 for additional flow director panels.
(30) Search subclass 405 for grate combined with interior lining.
(31) Decorative panel for season use.

CLASS D24 MEDICAL AND LABORATORY EQUIPMENT

Excluded from this class are:
Crutch or walking support; see D3-7+.
Dentist's chair; see D6-334+.
Film processing equipment; see D16-246+.
Goggles per se; see D16-102+.
Mask for surgery, anesthetic application, oxygen, etc.; see D29-7+.
Surgical lighting; see D26-24+.
Toothpick or dental floss holder; see D28-64.

1.1 FIXED APPARATUS OR EQUIPMENT (1)
2 .X-ray or fluoroscopic (2)
3 .Examining or surgical table
4 .Dental unit
5 ..Element
6 .Embalming type
7 .Element
8 INSTRUMENT OR TOOL FOR MEDICAL OR LABORATORY USE
9 .Sterilizer or incubator
10 .Dental type
11 ..Double ended use
12 ..Drilling or grinding (3)
13 ..Mirror
14 ..Syringe
15 ..Jet cleaning unit
16 ..Element
17 .Diagnostic or body function monitor (2) (4)
18 ..Speculum (5)
19 ..Tongue depressor
20 ..Stethoscope (2)
21 ..Blood analysis or filtration (6)
22 .Centrifuge (2)
23 .Hand-held or manipulated (7)
24 ..Hypodermic syringe or implanter
25 ...Element
26 ..Surgical
27 ...Clamp, holder, or forceps
28 ...Cutting type (8)
29 .Element or accessory
30 ..Handle
31 ..Tray or rack
32 ...Test tube type
33 PROSTHETIC ARTICLE
34 MATERIAL FOR DRESSING WOUNDS, NURSING OR MEDICAL CARE (2)
35 .Hearing aid or voice reflector
36 .Kinesitherapy (9)
37 ..Steam or sauna bath
38 ..Hydrotherapy unit (10)
39 ..Solar type
40 ..Powered
41 ...Hand-held or manipulated
42 ...Foot application
43 ..Hot water bottle or ice bag (11)
44 ...Simulative
45 .Pediatric nipple or oral stimulator (12)
46 ..Nipple type
47 .Nursing bottle or accessory
48 ..Holder
49 .Bandage or protector
50 .Diaper
51 .Fluid or waste collector or ejector (2)
52 ..Intravenous type
53 ..Valve or connector for tubing
54 ..Catheter or urine collector (2)
55 ..Pippette
56 ..Container, e.g., surgical basin, etc.
57 ...Bedpan
58 ...Bag type (13)
59 ..Body cavity insertion type
60 ...Syringe
61 ....Element
62 ..Inhaler or atomizer
63 .Medicinal applicator
64 .Orthopedic appliance or body support
66 .Eyecup
67 .Earplug
68 .Therapeutic lamp
99 MISCELLANEOUS

SEARCH NOTES FOR CLASS D24

(1) Mobile equipment included.
For portable or table top type, search subclass 8.
(2) Includes element.
(3) For surgical grinder, see subclass 26.
(4) Includes test kit or device, e.g., for urinalysis, skin, etc.
(5) For specula blank, search subclass 29.
(6) Includes blood pressure measurement.
(7) Excludes massager or other therapeutic devices; see subclass 36.
(8) Includes piercing or scraping implement.
(9) Includes massage equipment.
(10) Includes tub or foot bath.
(11) For syringe bag, see subclass 60.
(12) Includes pacifier or teething device.
Includes gum conditioner.
(13) For hot water bottle, search subclass 43.

CLASS D25 BUILDING UNITS AND CONSTRUCTION ELEMENTS

Excluded from this class are:
Burial vault; see D99-1+.
Cloth sheet material; see D5.
Concrete wall tie; see D8-384.
Diving board; see D21-236.
Elevator; see D34-33.
Escalator; see D34-28.
Fence or railing hardware, e.g., mounting bracket, clip, etc.; see D8.
Fireplace mantel; see D23-404.
Form for flower arrangement; see D11-143+.
Gate hinge; see D8-323+.
Gate latch; see D8-331+.
Grille for audio or video equipment; see D14-219.
Lamp combined with post; see D26-68.
Lens or glass for lighting fixture; see D26-120+.
Linoleum rug; see D6-582+.
Linoleum sheet; see D5.
Mobile home or trailer; see D12-101+.
Mobile stair for boarding aircraft, etc.; D34-30.
Pipe, tubing or hose; see D23-266.
Plant stake; see D8-1.
Portable swimmimg pool; see D21-252.
Roof gutter; see D23-267.
Service station canopy combined with pump; see D15-9.1+.
Step plate for vehicle; see D12-203.
Structure which encloses telephone only; see D6-421 and 553+.
Tent; see D21-253.
Tiles assembled into countertop; see D23-308.
Tiles assembled into floor and wall covering; D6-582+.
Track for sliding door; see D8-377.
Vehicle support; see D34-31.
Wallpaper; see D5.

1 STRUCTURE (1)
2 .Swimming pool
3 .Combined with diverse article, e.g., airport complex, etc.
4 .Clustered identical units
5 .Four or more levels
6 ..Tower
7 .Simulative
8 ..Animate
9 ...Humanoid
10 ..Edible article or container therefor
11 ..Vehicle
12 ..Arena or stadium
13 .Geodesic dome (2)
14 .Grain storage
15 .Greenhouse
16 .Single occupant type, i.e., telephone booth, privy, ticket booth, etc. (3)
17 .Having intersecting angular or curved roofs (4)
18 .Having curved or vaulted roof
19 ..Dome
20 ..Sinuous
21 ..Concave, catenary or flexibly suspended
22 .Having angular roof
23 ..Trapezoidal or triangular surface
24 ...Gambrel type
25 ...Mansard type
26 ...Pyramidal
27 ...Zig-zag type, i.e., sawtooth
28 ...Inverted
29 ...A-frame type
30 ...Isolated slanted surface
31 .Circular or oval in plan
32 .Polygonal in plan
33 .Fully enclosed
34 ..Having carport or garage
35 PREFABRICATED UNIT (5)
36 .Underground service vault (6)
37 .Elevator cab interior (7)
38 .Railing unit or fence (8)
39 ..Combined, e.g., fence and gate
40 ..Simulative
41 ..Swimming pool grab rail
42 ..Post or board extending above rail, e.g., picket type
43 ..Post and rail type
44 ...Rail centered on post
45 ..Wire type (9)
46 ...Barbed
47 .Closure (10)
48 ..For passage, e.g., door, etc.
49 ...Flexible or folding
50 ...Gate
51 ....Turnstile
52 ..Window
53 ..Screen or guard (11)
54 ...Window well cover
55 .Finishing unit (12)
56 ..Roof or canopy (13)
57 ...Awning type
58 ..Partition, wall or ceiling (25)
59 ...Exterior, e.g., storefront
60 ..Surround for door window, panel, etc. (14)
61 .Framing unit, e.g., building frame (15)
62 STAIR, LADDER, SCAFFOLD OR SIMILAR SUPPORT (16)
63 .Stepped (17)
64 ..Ladder
65 ...Step stool type
66 .Scaffold
67 .Sawhorse
68 .Element or attachment (18)
69 ..Stair tread, step or ladder rung
100 TRELLIS OR TREILLAGE UNIT
101 .Simulative
102 ARCHITECTURAL STOCK MATERIAL (19)
103 .Transparent or translucent
104 ..Simulative
105 ...Plant life
106 ..Three or more pattern repeats about axis on side (20)
107 ...Hollow type
108 ..Hollow type
109 ..Symmetrical on two axes on one side (21)
110 ..Unidirectional repeat pattern
111 ..Random arrangement of pattern elements within repeat unit (22)
112 .Splash block
113 .Construction block or brick type (23)
114 ..Perforated or openwork (24)
115 ...Symmetrical
116 ....Arcuate detail
117 .....Cicular or oval
118 ....Rectangular or square detail
119 .Extruded shape (34)
120 ..Three or more repeats, or uniform configuration, about axis
121 ..Bilaterally symmetrical
122 ...With hollow core
123 ...Parallel repeating ribs or grooves
124 ..With hollow core
125 ..Parallel repeating ribs or grooves
126 .Post or beam
127 ..With cross arm or cantilevered support
128 ..Three or more repats, or uniform configuration, about axis
129 ...Vertically fluted
130 ..Simulative

ARCHITECTURAL STOCK MATERIAL (19)
.Post or beam
131 ..With notch or tang for receiving attachment (e.g., fencing wire, etc.)
132 ..Openwork type or with opening
133 ..Element or attachment
134 ...Cross arm or cantilevered support
135 ...Capital or cap
136 .Elongated molding type (e.g., crown, dentil, etc.) (26)
137 ..Simulative
138 .Panel, tile or applique or floor, wall, roof, etc. (27)
139 ..Roofing, or wall shingle
140 ...Tile type
141 ...Stamped, crimped or bent material having uniform thickness
142 ...Perforated or openwork
143 ...Three or more repeats, or uniform configuration, about axis
144 ...Symmetrical on two axes
145 ..Relief carving or medallion type (28)
146 ...Humanoid simulation
147 ...Three or more repeats, or uniform configuration, about axis (e.g., medallion, etc.)
148 ...Symmetrical on two axes
149 ..Simulative, or natural material pattern
150 ...Wood grain
151 ...Brick or stone (29)
152 ..Perforated or openwork (30)
153 ...Symmetrica pattern or pattern unit
154 ....Arcuate
155 .....Circular or oval
156 ....Rectangular or square
157 ..Symmetrical pattern or pattern unit (31)
158 ...Three or more repeats, or uniform configuration, about axis
159 ....Consisting entirely of material having uniform thickness
160 ...On two axes
161 ....Consisting entirely of aterial having uniform thickness
162 ...Consisting entirely of material having uniform thickness
163 ..Textured (e.g., pitted, cratered, drilled, etc)
164 .Elongated (32)
199 MISCELLANEOUS (33)

SEARCH NOTES FOR CLASS D25.

(1) Includes bridge.
For roof with no structure other than support, see subclasses 56+.
(2) For arcuate dome, see subclass 19.
(3) Includes structures which enclose a person.
(4) Search subclasses 56+ for roof, per se.
(5) Includes only plural components which are preassembled as a unit, e.g., steeple, cupola, etc.
For individual components, see subclasses 102+.
For trellis, stairs, louver unit, see, respectively, subclasses 100 , 62+ and 152+.
For girder, beam, etc., see subclasses 126+.
(6) Includes element.
(7) For elevator, see D34-33.
(8) For handrail or post, see respectively, subclasses 119 and 126+.
(9) Includes element.
(10) Includes shutter; includes a combination with surround.
For surround per se, see subclass 60.
(11) Includes only screens or guards which are designed solely for window or door.
For grille adaptable to other architectural uses, see subclasses 152+.
For perforated sheet material, see D5-1+.
(12) Includes rigid drapery cornice.
(13) If structure has wall, see subclasses 1+.
(14) Includes arch structure.
(15) Includes cantilever support.
(16) Includes ramp; includes bleachers.
(17) For mobile stairs, see D34-30.
(18) For component which is adaptable to other article, such as handrail, post, etc., see subclasses 102+.
(19) Classified by full line disclosure
(20) Planar surface not considered.
(21) Planar surface not considered.
(22) If repeat protocol is apparent from the disclosure, patent is classified under earlier subclasses. If, however, the disclosured pattern element does not indicate how it can repeat, patent is classified here.
(23) For edging, see subclass 164.
(24) Opening must extend through the article.
(25) Includes stage set.
(26) If molding has extruded shape, see subclasses 119+.
For corner or end piece, see subclass 102.
(27) For generic elongated stock material having indefinite length, see subclass 164.
(28) For embossed panelwork or for grill, see subclasses 138, 152 or 157.
(29) For brick per se, see subclasses 1
(30) Opening must extend through the article. Otherwise patent is classified in subclasses which follow.
(31) Exclusive of random acoustic texture within symmetrical pattern unit, or of tongue or groove edge detail.
(32) Includes railing, edging, etc. However, if railing, etc. has an extruded shape, patent is classified in subclasses 119+.
For corner or end piece, see subclass 102.
(33) Includes construction form.
Includes roof pipe flashing.
(34) To be classified in this subclass, article must have uninterrupted extruded shape. If openings, protrusions, rivets, vertical striations, etc., are disclosed with an elongated article, patent is classified in subclasses 126, 136 or 164.
For articles with specific end configuration such as fence picket, see subclasses 126+.

CLASS D26 LIGHTING (1)

Excluded from this class are:
Body treatment lamp; see D24-68.
Candle lighter; see D99-99.
Candle snuffer; see D29-2.
Catadioptric reflector; see D10-111+.
Combination shaving or vanity mirror and lamp; see D28-67.
Consumable flash lamp; see D16-42.
Electrical component, e.g., switch, socket, etc.; see D13.
Emergency-type lamp, e.g., strobe, rotating beacon, etc.; see D10.
Flash unit for camera; see D16-239.
Insect-attracting lamp and trap combination; see D22-119+.
Ignition timing light; see D10-111+.
Lamp exclusively for signal purposes; see D10-111+.
Lamppost; see D25-126+.
Light bulb socket; see D13-134.
Light switch; see D13-158+.
Planter combined with light source; see D11-143+.
Reflective signal; see D10-111+.
Sign; see D20-10+.
Stationary signalling lamp; see D10-114.
Traffic signal; see D10-115.
Wall plate for electric switch; see D8-350+.

1 LIGHT SOURCE (2)
2 .Electric light bulb
3 ..Fluorescent
4 ..Simulative
5 ...Candle or flame
6 .Candle
7 ..Simulative
8 .Torch
9 CANDLE HOLDER (3)
10 .Combined with diverse article
11 .With light modifier
12 .With means to penetrate support surface
13 .Plural, i.e., candelabrum, etc.
14 ..Simulative
15 ..Asymmetrical
16 .Simulative
17 ..Animate
18 ...Humanoid
19 ..Plant life
20 .With distinct drip collector, e.g., flared cup, etc.
21 .Asymmetrical in elevation
22 .Circular or oval base
23 .Element or attachment (4)
24 LIGHT FIXTURE (5)
25 .Plural, connected series, i.e., light string
26 .Receptacle mount, i.e., "night light" or screw-in type
27 .Fiber optic
28 .Vehicle lamp or casing (6)
29 ..Articulated type
30 ..Pointer or arrow (7)
31 ..With letter, numeral, or sign, or with provision therefor (8)
32 ..Simulative
33 ...Hand
34 ..Combined with diverse article
35 ..Plural lamp or lens elements, or with provision therefor
36 ..Circular or oval lens, or with provision therefor (9)
37 .Hand-held, body-attached or lantern type (10)
38 ..Combined with diverse article
39 ..Body-attached
40 ..360 deg. lateral light dispersal
41 ...With distinct handle or carrying strap
42 ..Fluorescent tube type
43 ..Flexible light shaft
44 ..Pivotal head capability
45 ..With pistol grip
46 ..Beam supplementary to body axis, i.e., light rays directed in line with longitudinal axis
47 ...Simulative
48 ...With distinct handle
49 ...Substantially circular body cross section (11)
50 ..With distinct handle
51 .Combined with diverse article
52 ..With communications equipment, e.g., television, radio, etc. (12)
53 ..With smokers' article
54 ..With clock
55 ..With plant holder
56 ..With mirror, picture frame, or holder therefor
57 ..Simulative
58 ..With table or cabinet
59 ..With fan or ventilator
60 .Resiliently attached, or clamped
61 .Articulated or adjustable (13)
62 ..Gooseneck type
63 ..Pivotal movement
64 ...And rectilinear
65 ...Plural pivots, i.e., more than one axis
66 ..Rectilinear movement
67 .Provision for post attachment or ground insertion (14)
68 ..Combined with standard (15)
69 ...Plural distinct light units
70 ..Plural radially arranged light units or provision therefor
71 ..Axially offset singular light unit (16)
72 .Attachable to overhead or vertical surface, i.e., ceiling or wall (17)
73 ..Simulative shape (18)
74 ..Recessed within mounting surface
75 ..Fluorescent tube type
76 ...Longitudinal axis parallel to support surface
77 ....Open grid-type modifier
78 ....Exposed bulb
79 ....Circular tube
80 ..Plural distinct light sources, or provision therefor (19)
81 ...Attached to overhead surface
82 ....Horizontally disposed light socket
83 ....Light source directly attached to ceiling mount
84 ....Depending light source
85 ..With light modifier
86 ...Repeating plural modifiers
87 ...Cantilevered or standoff-type support arm
88 ...Attached to overhead surface
89 ....Light source enclosed between overhead and modifier
90 ....Plural suspension elements from ceiling mount to modifier
91 ....Polygonal modifier
92 ..Cantilevered or standoff-type support arm
93 .Freestanding fixture or standard (20)
94 ..Simulative
95 ...Building or tower
96 ...Candle or candle holder
97 ...Vehicle or component thereof
98 ...Animate
99 ....Humanoid

LIGHT FIXTURE (5)
.Freestanding fixture or standard (20)
..Simulative
...Animate
....Humanoid
100 .....Plural
101 ...Plant life
102 ..Plural distinct light sources or modifiers, or provision therefor
103 ..Coil effect
104 ..Fully enclosed light source
105 ..Light modifier open at top only
106 ..Bilaterally symmetrical only
107 ...Axially offset singular support for light source or modifier
108 ...With light modifier
109 ....Horizontally elongated
110 ..Repeating or uniform design about axis (21)
111 ...Tripartite
112 ...With light modifier
113 .Element or attachment
114 ..Liquid or gaseous fuel burner or component thereof
115 ...Mantle type
116 ...Wick type
117 ..Fuel reservoir
118 ..Light source cover or modifier, i.e., reflector, screen, or shade (22)
119 ...Protective cover or cage, e.g., trouble light, etc.
120 ...Lens or panel type (23)
121 ....Openwork
122 ....With refractive rib or groove, e.g., prismatic, etc.
123 .....Circular or oval (24)
124 ....Circular or oval (25)
125 ...Simulative
126 ....Humanoid
127 ....Plant life
128 ...Chimney, globe or bowl, i.e., circumscribing or surrounding light source and being open at top and/or bottom (26)
129 ....With external framework or filigree
130 ....Repeating or uniform pattern about point or axis (27)
131 .....Curvilinear wall in elevation (28)
132 ......Sinuous (29)
133 ....With radiating ribs or grooves
134 ......With radiating ribs or grooves
135 .....Frusto-conical or pyramidal
136 ......With radiating ribs or grooves
137 .....Cylindrical
138 ..Support or trim (30)
139 ...Bezel, visor, or cover for vehicle lamp
140 ...Provision for security or adjustment
141 ...Frame, bridge, or harp (31)
142 ...Foot, mount, or surround (32)
143 ....Plural distinct light source supporting spokes or surrounds
144 .....Three or more, e.g., spider, etc.
145 ....Cantilever or standoff type (33)
146 .....Simulative
147 ....Simulative
148 .....Repeating or uniform pattern about point or axis (34)
149 ....Repeating or uniform pattern about point or axis (35)
150 .....Tripartite
151 .....Quadripartite
152 ...Band, grille, or trim panel
153 ...Spindle or column (36)
154 ...Loop, pendant, or finial
155 ...Brace or trim arm (37)
156 ...Simulative

SEARCH NOTES FOR CLASS D26

(1) Classified by full-line disclosure.
(2) Light source is defined as an element or material which provides illumination.
(3) For electric candelabrum, see subclasses 24+.
(4) For candle cup, bobeche, or similar support or surround, see subclasses 142+.
(5) If claimed disclosure can function as a light fixture as it is shown by the addition of (a) a light source, (b) a receptacle, (c) a modifier, or (d) a power source, it is classified as a light fixture in this and in indented subclasses.
If some element other than those specified must be added to complete the fixture, it is an element and must be classified in subclasses 113+.
(6) For lens or bezel see, respectively, subclasses 120+ and 139.
(7) For hand simulation, see subclass 33.
(8) Includes combination with license plate holder.
For vehicle signal other than lamp, see D10-109.
(9) For lens per se, see subclasses 120+.
(10) Includes base.
For lantern bracket, see subclass 138.
For bulb cage, see subclass 119.
For static signalling lamp, see D10-114.
For table lamp, see subclasses 93+.
(11) Includes patents showing striations, ridges, or depressions arranged around a substantially circular form.
(12) Includes combination with phonograph.
(13) Includes track-type light.
(14) Attachment may be at top or bottom of fixture.
(15) For lamp combined with distinct sign, see subclass 51.
For lamp post, per se, see D25-126+.
For arm, per se, see subclass 143 or 145
(16) For cantilevered arm, per se, see subclass 143 or 145.
(17) Includes article which can functon as a light fixture as it is shown, with only the insertion of the light source. If any other element is necessary to form the fixture, it is classified as an element in subclasses 113+.
If there is doubt as to whether the disclosure article is a light fixture under this or indented subclasses, it is classified as an element under subclasses 113+.
(18) Substantially entire article must be simulative; simulative detal not considered.
(19) For backing plate, collar, surround, or spider, see subclasses

142+.
For chandelier body, see subclasses 142+.

(20) Includes combination of base and light source or modifier support.
For subcombination, e.g., spindle, foot, modifier, etc., see subclasses 113+.

(21) In determining symmetry in this and in indented subclasses, the harp, control knob, chains, etc., are not considered.
Pattern must repeat three or more times.

(22) For fixture backing plate, see subclasses 142+.
For shade holder, see subclasses 138+.
For segment panel of a shade, globe, etc., see subclass 152.

(23) For vehicle lamp bezel, visor, or cover, see subclass 139.
For catadioptric reflector, see D10-111+.

(24) External shape only.

(25) External shape only.

(26) For vehicle lamp bezel, visor, or cover, see subclass 139.

(27) Pattern must repeat three or more times.

(28) Exclusive of mount flange.

(29) Exclusive of mount flange.

(30) If the claimed disclosure includes a combination of a wall or ceiling mount support, etc., with a modifier or light surce support e.g., socket, article is classified light fixture in subclasses 24+.
For combined lamp post and modifier support, see D25-126+.

(31) Includes mantle support.

(32) Includes base member, per se.
Includes chandelier body.
Includes collar-type surround.
For modifier trim band, see subclass 152.

(33) For brace or trim arm, see subclass 155.
For mount plate or support having security or adjustment provision, see subclass 140.
For plural type, see subclasses 143+.

(34) Pattern must repeat three or more times.

(35) Pattern must repeat three or more times.

(36) For post, see D25-126+.

(37) For support arm, see subclasses 145+.

CLASS D27 TOBACCO AND SMOKERS' SUPPLIES

Excluded from this class are:
Belt-attached holder for cigarette package or lighter; see D3-106.
Cigarette package dispenser; see D6-517.
Coin operated cigarette package dispenser; see D20-1+.
Commercial tobacco growing or processing machinery; see D15-10+.
Fire starter for grill, fireplace, etc; see D7-416.
Liquid gas cartridge for a cigarette lighter; see D9-300.
Matchbox or matchbook; see D9-304 and 414.
Packaging wrapper for cigar or cigarette; see D9-305+.
Silent butler; see D32-74.
Slotted holder for multiple matchbooks; see D6-449+.
Smokers' article combined with lamp; see D26-53.
Spittoon or cuspidor; see D34-2.
Tobacco storage or curing building; see D25.

100 TOBACCO PRODUCT
101 .Cigar, cigarette or wrapper therefor (1)
102 ASH RECEIVER, SNUFFER OR SUPPORT THEREFOR (2)
103 .Attachable to tobacco product or to holder therefor
104 .Wall, post or clamp mount
105 ..With closure or cover
106 .Simulative
107 ..Floor type
108 ..Combined (3)
109 ...With coaster or glass holder
110 ...With enclosed case, humidor or individual server
111 ...With holder for match or cigarette pack
112 ...With lighter
113 ..Animate
114 ...Humanoid
115 ...Aquatic
116 ...Quadruped
117 ..Architectural or geographic
118 ..Beverage or food container
119 ..Plant life
